# att.bend.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

### Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.  
att.bend.anl → <bend>

### Declaration

```
<classSpec ident="att.bend.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.bend.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@amount** (*optional*) Records the amount of detuning. The decimal values should be rendered as a fraction (or an integer plus a fraction) along with the bend symbol. Value conforms to [data.BEND.AMOUNT](#).

att.bend.ges → @amount

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.bend.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.bend.ges → @tstamp2.real

### Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.bend.ges → <bend>

### Declaration

```
<classSpec ident="att.bend.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
  <attList>
    <attDef ident="amount" usage="opt">
      <desc xml:lang="en">Records the amount of detuning. The decimal values should be
      rendered as a fraction (or an integer plus a fraction) along with the bend
      symbol.</desc>
      <datatype>
        <rng:ref name="data.BEND.AMOUNT"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.bend.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.bend.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.bend.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.bend.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.bend.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.bend.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.bend.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.bend.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.bend.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.bend.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.bend.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.bend.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.bend.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.bend.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.bend.log → @when

## Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.bend.log → <bend>

## Declaration

```
<classSpec ident="att.bend.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>

    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.bend.vis

Visual domain attributes. If the bulge or bezier attributes are present, the bend should be rendered as a curve. Otherwise, it should be rendered using lines. The ho and vo attributes describe the visual offset of the entire rendered bend. The endho, endvo and startho, startvo attribute pairs may be used to encode start and end points relative to their programmatic placement. For exact placement of the endpoints of the bend, use the x and y attributes.

### Module

[MEI.visual](#)

### Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.bend.vis → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.bend.vis → @bulge

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.bend.vis → @color

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (Upward curve.), "**below**" (Downward curve.), "**mixed**" (A "meandering" curve, both above and below the items it pertains to.)

att.bend.vis → @curvedir

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bend.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.bend.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bend.vis → @endvo

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bend.vis → @ho

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.bend.vis → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.bend.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bend.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.bend.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bend.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.bend.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bend.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.bend.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.bend.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.bend.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.bend.vis → @y2

## Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.bend.vis → <bend>

## Declaration

```

## att.bibl

Bibliographic attributes.

### Referenced in chapters

[3.8.4 Header Elements and their Relationship to Other Bibliographic Standards](#)

### Module

[MEI.shared](#)

### Attributes

**@analog** (*optional*) Contains a reference to a field or element in another descriptive encoding system to which this MEI element is comparable. Value is plain text.

att.bibl → @analog

### Available at

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.bibl → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.bibl → <accessRestrict>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.bibl → <acquisition>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.bibl → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.bibl → <addName>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.bibl → <altId>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.bibl → <analytic>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.bibl → <annot>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.bibl → <arranger>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.bibl → <attUsage>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.bibl → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.bibl → <author>

**<avFile>** References an external digital audio or video file.

att.bibl → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.bibl → <availability>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.bibl → <bibl>

**<biblList>** List of bibliographic references.

att.bibl → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.bibl → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.bibl → <biblStruct>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.bibl → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.bibl → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.bibl → <bloc>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.bibl → <byline>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.bibl → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.bibl → <carrierForm>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.bibl → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.bibl → <castList>

**<catRel>** Contains the name of a related category.

att.bibl → <catRel>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.bibl → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.bibl → <category>

**<change>** Individual change within the revision description.

att.bibl → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.bibl → <changeDesc>

**<classDecl>** Groups information which describes the nature or topic of an entity.

att.bibl → <classDecl>

**<classification>** Groups information which describes the nature or topic of an entity.

att.bibl → <classification>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.bibl → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.bibl → <colophon>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.bibl → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.bibl → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.bibl → <contentItem>

**<contents>** List of the material contained within a resource.

att.bibl → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.bibl → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.bibl → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.bibl → <corpName>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.bibl → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.bibl → <country>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.bibl → <creation>

**<date>** A string identifying a point in time or the time period between two such points.

att.bibl → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.bibl → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.bibl → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.bibl → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.bibl → <dedication>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.bibl → <depth>

**<dim>** Any single dimensional specification.

att.bibl → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.bibl → <dimensions>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.bibl → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.bibl → <district>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.bibl → <domainsDecl>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.bibl → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.bibl → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.bibl → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.bibl → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.bibl → <encodingDesc>

**<event>** Contains a free-text event description.

att.bibl → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.bibl → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.bibl → <exhibHist>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.bibl → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.bibl → <expression>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.bibl → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.bibl → <extent>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.bibl → <famName>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.bibl → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.bibl → <fileDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.bibl → <foliation>

**<foreName>** Contains a forename, given or baptismal name.

att.bibl → <foreName>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.bibl → <funder>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.bibl → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.bibl → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.bibl → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.bibl → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.bibl → <geogName>

**<hand>** Defines a distinct scribe or handwriting style.

att.bibl → <hand>

**<handList>** Container for one or more hand elements.

att.bibl → <handList>

**<height>** Description of the vertical size of an object.

att.bibl → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.bibl → <heraldry>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.bibl → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.bibl → <identifier>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.bibl → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.bibl → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.bibl → <incipCode>

**<incipText>** Opening words of a musical composition.

att.bibl → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.bibl → <inscription>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.bibl → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.bibl → <item>

**<key>** Key captures information about tonal center and mode.

att.bibl → <key>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.bibl → <langUsage>

**<language>** Description of a language used in the document.

att.bibl → <language>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.bibl → <layout>

**<layoutDesc>** Collects layout descriptions.

att.bibl → <layoutDesc>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.bibl → <librettist>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.bibl → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.bibl → <locusGrp>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.bibl → <lyricist>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.bibl → <manifestation>

**<meiHead>** Supplies the descriptive and declarative metadata prefixed to every MEI-conformant text.

att.bibl → <meiHead>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.bibl → <mensuration>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.bibl → <meter>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.bibl → <monogr>

**<name>** Proper noun or noun phrase.

att.bibl → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.bibl → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.bibl → <namespace>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.bibl → <normalization>

**<notesStmt>** (notes statement)– Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.bibl → <notesStmt>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.bibl → <otherChar>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.bibl → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.bibl → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.bibl → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.bibl → <perfResList>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.bibl → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.bibl → <persName>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.bibl → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.bibl → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.bibl → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.bibl → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.bibl → <playingSpeed>

**<price>** The cost of access to a bibliographic item.

att.bibl → <price>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.bibl → <projectDesc>

**<provenance>** The record of ownership or custodianship of an item.

att.bibl → <provenance>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.bibl → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.bibl → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.bibl → <publisher>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.bibl → <recipient>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.bibl → <region>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.bibl → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.bibl → <relation>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.bibl → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.bibl → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.bibl → <respStmt>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.bibl → <revisionDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.bibl → <roleName>

**<rubic>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.bibl → <rubic>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.bibl → <samplingDecl>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.bibl → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.bibl → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.bibl → <scriptNote>

**<seal>** A single seal or similar attachment.

att.bibl → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.bibl → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.bibl → <secFolio>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.bibl → <segmentation>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.bibl → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.bibl → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.bibl → <settlement>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.bibl → <signatures>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.bibl → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.bibl → <source>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.bibl → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.bibl → <sponsor>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.bibl → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.bibl → <stdVals>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.bibl → <styleName>

**<support>** Provides a description of the physical support material of a written item.

att.bibl → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.bibl → <supportDesc>

**<sysReq>** System requirements for using the electronic item.

att.bibl → <sysReq>

**<tagUsage>** Documents the usage of a specific element within the document.

att.bibl → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.bibl → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.bibl → <taxonomy>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.bibl → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.bibl → <term>

**<termList>** Collection of text phrases which describe a resource.

att.bibl → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.bibl → <textLang>

**<title>** Title of a bibliographic entity.

att.bibl → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.bibl → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.bibl → <titlePart>

**<titleStmt>** Container for title and responsibility meta-data.

att.bibl → <titleStmt>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.bibl → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.bibl → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.bibl → <treatSched>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.bibl → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.bibl → <typeNote>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.bibl → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.bibl → <useRestrict>

**<watermark>** Contains a description of a watermark or similar device.

att.bibl → <watermark>

**<width>** Description of the horizontal size of an object.

att.bibl → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.bibl → <work>

## Remarks

Mapping elements from one system to another via analog may help a repository harvest selected data from the MEI file to build a basic catalog record. The encoding system from which fields are taken must be specified. When possible, subfields as well as fields should be specified, e.g., subfields within MARC fields.

## Declaration

```

<classSpec ident="att.bibl" module="MEI.shared" type="atts">
  <desc xml:lang="en">Bibliographic attributes.</desc>
  <attList>
    <attDef ident="analog" usage="opt">
      <desc xml:lang="en">Contains a reference to a field or element in another descriptive
      encoding system to which this MEI element is comparable.</desc>
      <datatype>
        <rng:data type="string"/>
      </datatype>
    </attDef>
  </attList>
  <remarks xml:lang="en">

VERSION

## att.bifoliumSurfaces

Attributes that link a bifolium element with a [surface](#) element.

### Referenced in chapters

[3.7.2.1 Linking surface elements](#)

### Module

[MEI.header](#)

### Attributes

**@inner.recto** (*optional*) A reference to a [surface](#) element positioned on the inner recto side of a (folded) sheet. Value conforms to [data.URI](#).

att.bifoliumSurfaces → @inner.recto

**@inner.verso** (*optional*) A reference to a [surface](#) element positioned on the inner verso side of a (folded) sheet. Value conforms to [data.URI](#).

att.bifoliumSurfaces → @inner.verso

**@outer.recto** (*optional*) A reference to a [surface](#) element positioned on the outer recto side of a (folded) sheet. Value conforms to [data.URI](#).

att.bifoliumSurfaces → @outer.recto

**@outer.verso** (*optional*) A reference to a [surface](#) element positioned on the outer verso side of a (folded) sheet. Value conforms to [data.URI](#).

att.bifoliumSurfaces → @outer.verso

### Available at

**<bifolium>** Describes a folded sheet of paper.

att.bifoliumSurfaces → <bifolium>

### Declaration

```

<classSpec ident="att.bifoliumSurfaces" module="MEI.header" type="atts">
  <desc xml:lang="en">Attributes that link a bifolium element with a

## att.bracketSpan.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.bracketSpan.anl → <bracketSpan>

#### Declaration

```
<classSpec ident="att.bracketSpan.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.bracketSpan.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.bracketSpan.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.bracketSpan.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.bracketSpan.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.bracketSpan.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.bracketSpan.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.bracketSpan.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.bracketSpan.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.bracketSpan.ges → @tstamp2.real

### Available at

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.bracketSpan.ges → <bracketSpan>

### Declaration

```
<classSpec ident="att.bracketSpan.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

# att.bracketSpan.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.bracketSpan.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.bracketSpan.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.bracketSpan.log → @evaluate

**@func** (*required*) Describes the function of the bracketed event sequence. Allowed values are:

**"coloration"** (*Represents coloration in the mensural notation source material.*), **"cross-rhythm"** (*Marks a sequence which does not match the current meter.*), **"ligature"** (*Represents a ligature in the mensural notation source material.*)

att.bracketSpan.log → @func

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.bracketSpan.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\n\r][\c]+)"**, separated by spaces.

att.bracketSpan.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.bracketSpan.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.bracketSpan.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.bracketSpan.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.bracketSpan.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.bracketSpan.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.bracketSpan.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.bracketSpan.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.bracketSpan.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.bracketSpan.log → @when

## Available at

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.bracketSpan.log → <bracketSpan>

## Declaration

```

    <desc xml:lang="en">Represents a ligature in the mensural notation source
        material.</desc>
</valItem>
</valList>
</attDef>
</attList>
</classSpec>
```

## att.bracketSpan.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.bracketSpan.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.bracketSpan.vis → @color

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bracketSpan.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.bracketSpan.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bracketSpan.vis → @endvo

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.bracketSpan.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.bracketSpan.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.bracketSpan.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.bracketSpan.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.bracketSpan.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.bracketSpan.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.bracketSpan.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.bracketSpan.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.bracketSpan.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bracketSpan.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.bracketSpan.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.bracketSpan.vis → @lendsym.size

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.bracketSpan.vis → @letterspacing

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.bracketSpan.vis → @lform

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.bracketSpan.vis → @lineheight

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.bracketSpan.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.bracketSpan.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.bracketSpan.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.bracketSpan.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bracketSpan.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.bracketSpan.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bracketSpan.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.bracketSpan.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.bracketSpan.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.bracketSpan.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.bracketSpan.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.bracketSpan.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.bracketSpan.vis → @y2

## Available at

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.bracketSpan.vis → <bracketSpan>

## Declaration

```
<classSpec ident="att.bracketSpan.vis" module="MEI.visual" type="atts">

    <memberOf key="att.xy"/>
    <memberOf key="att.xy2"/>
  </classes>
</classSpec>
```

## att.breath.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.breath.anl → <breath>

#### Declaration

```
<classSpec ident="att.breath.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.breath.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.breath.ges → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.breath.ges → @tstamp.real

### Available at

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.breath.ges → <breath>

### Declaration

```
<classSpec ident="att.breath.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.timestamp.ges"/>
  </classes>
</classSpec>
```

# att.breath.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.breath.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.breath.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.breath.log → @partstaff

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.breath.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.breath.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.breath.log → @tstamp

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.breath.log → @when

## Available at

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.breath.log → <breath>

## Declaration

```
<classSpec ident="att.breath.log" module="MEI.cmn" type="atts">

# att.breath.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.breath.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.breath.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.breath.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.breath.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.breath.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.breath.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.breath.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.breath.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.breath.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.breath.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.breath.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.breath.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.breath.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.breath.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.breath.vis → @loc

**@oloc** (*optional*) Records staff location in terms of written octave. Value conforms to [data.OCTAVE](#).

att.breath.vis → @oloc

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.breath.vis → @place

**@ploc** (*optional*) Captures staff location in terms of written pitch name. Value conforms to [data.PITCHNAME](#).

att.breath.vis → @ploc

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.breath.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.breath.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.breath.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.breath.vis → @y

## Available at

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.breath.vis → <breath>

## Declaration

```
<classSpec ident="att.breath.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>

<memberOf key="att.color"/>
<memberOf key="att.extSym"/>
<memberOf key="att.placementRelStaff"/>
<memberOf key="att.staffLoc"/>
<memberOf key="att.staffLoc.pitched"/>
<memberOf key="att.typography"/>
<memberOf key="att.visualOffset"/>
<memberOf key="att.xy"/>
</classes>
</classSpec>
```

## att.caesura.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.caesura.anl → <caesura>

#### Declaration

```
<classSpec ident="att.caesura.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.caesura.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.caesura.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.caesura.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.caesura.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.caesura.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.caesura.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum **\*\*recip** value. Value is a [token](#).

att.caesura.ges → @dur.recip

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.caesura.ges → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.caesura.ges → @tstamp.real

### Available at

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.caesura.ges → <caesura>

### Declaration

```
<classSpec ident="att.caesura.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp.ges"/>
  </classes>
</classSpec>
```

## att.caesura.log

Logical domain attributes.

### Module

[MEI.shared](#)

### Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.caesura.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.caesura.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.caesura.log → @partstaff

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.caesura.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.caesura.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.caesura.log → @tstamp

### Available at

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.caesura.log → <caesura>

### Declaration

## att.caesura.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.caesura.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.caesura.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.caesura.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.caesura.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.caesura.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.caesura.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.caesura.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*).

att.caesura.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.caesura.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.caesura.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.caesura.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.caesura.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.caesura.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.caesura.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.caesura.vis → @loc

**@oloc** (*optional*) Records staff location in terms of written octave. Value conforms to [data.OCTAVE](#).

att.caesura.vis → @oloc

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.caesura.vis → @place

**@ploc** (*optional*) Captures staff location in terms of written pitch name. Value conforms to [data.PITCHNAME](#).

att.caesura.vis → @ploc

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.caesura.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.caesura.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.caesura.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.caesura.vis → @y

## Available at

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.caesura.vis → <caesura>

## Declaration

```

## att.calendared

Attributes that indicate the calendar system of a date or other datable element.

### Referenced in chapters

[9.2.9 Dates](#)

### Module

[MEI.shared](#)

### Attributes

**@calendar** (*optional*) Indicates the calendar system to which a date belongs, for example, Gregorian, Julian, Roman, Mosaic, Revolutionary, Islamic, etc. Value is a [NMTOKEN](#).  
 att.calendared → @calendar

### Available at

**<date>** A string identifying a point in time or the time period between two such points.

att.calendared → <date>

**<event>** Contains a free-text event description.

att.calendared → <event>

### Declaration

```

<classSpec ident="att.calendared" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that indicate the calendar system of a date or other
  datable element.</desc>
  <attList>
    <attDef ident="calendar" usage="opt">
      <desc xml:lang="en">Indicates the calendar system to which a date belongs, for
      example, Gregorian, Julian, Roman, Mosaic, Revolutionary, Islamic, etc.</desc>
      <datatype>
        <rng:data type="NMTOKEN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.canonical

Attributes that can be used to associate a representation such as a name or title with canonical information about the object being named or referenced.

### Module

[MEI.shared](#)

### Attributes

**@codedval** (*optional*) A value that represents or identifies other data. Often, it is a primary key in the database or a unique value in the coded list identified by the auth or auth.uri attributes. One or more values of datatype **NMTOKEN**, separated by spaces.

att.canonical → @codedval

### Available at

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.canonical → <accessRestrict>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.canonical → <addName>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.canonical → <audience>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.canonical → <bloc>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.canonical → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.canonical → <carrierForm>

**<catRel>** Contains the name of a related category.

att.canonical → <catRel>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.canonical → <category>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.canonical → <context>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.canonical → <corpName>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.canonical → <country>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.canonical → <district>

**<expression>** Intellectual or artistic realization of a work.

att.canonical → <expression>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.canonical → <famName>

**<foreName>** Contains a forename, given or baptismal name.

att.canonical → <foreName>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.canonical → <genName>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.canonical → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.canonical → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.canonical → <geogName>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.canonical → <identifier>

**<item>** Single instance or exemplar of a source/manifestation.

att.canonical → <item>

**<language>** Description of a language used in the document.

att.canonical → <language>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.canonical → <manifestation>

**<name>** Proper noun or noun phrase.

att.canonical → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.canonical → <nameLink>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.canonical → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.canonical → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.canonical → <perfResList>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.canonical → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.canonical → <persName>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.canonical → <physMedium>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.canonical → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.canonical → <region>

**<relation>** Describes a relationship or linkage amongst entities.

att.canonical → <relation>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.canonical → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.canonical → <resp>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.canonical → <roleName>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.canonical → <scoreFormat>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.canonical → <settlement>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.canonical → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.canonical → <source>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.canonical → <specRepro>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.canonical → <styleName>

**<title>** Title of a bibliographic entity.

att.canonical → <title>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.canonical → <titlePart>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.canonical → <trackConfig>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.canonical → <useRestrict>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.canonical → <work>

## Declaration

```

<classSpec ident="att.canonical" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that can be used to associate a representation such as a

## att.channelized

Attributes that record MIDI channel information.

### Module

MEI.midi

### Attributes

**@midi.channel** (*optional*) Records a MIDI channel value. Value conforms to [data.MIDICHANNEL](#).

att.channelized → @midi.channel

**@midi.duty** (*optional*) Specifies the 'on' part of the duty cycle as a percentage of a note's duration. Value conforms to [data.PERCENT.LIMITED](#).

att.channelized → @midi.duty

**@midi.port** (*optional*) Sets the MIDI port value. Value conforms to [data.MIDIValue\\_NAME](#).

att.channelized → @midi.port

**@midi.track** (*optional*) Sets the MIDI track. Value is a positive integer.

att.channelized → @midi.track

### Available at

**<instrDef>** MIDI instrument declaration.

## att.chord.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.chord.anl → @beam

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.chord.anl → @fermata

**@lv** (*optional*) Indicates the attachment of an l.v. (laissez vibrer) sign to this element. Value conforms to [data.BOOLEAN](#).

att.chord.anl → @lv

**@ornam** (*optional*) Indicates that this element has an attached ornament. If visual information about the ornament is needed, then one of the elements that represents an ornament (mordent, trill, or turn) should be employed. One or more values from [data.ORNAM.cmn](#), separated by spaces.

att.chord.anl → @ornam

**@slur** (*optional*) Indicates that this element participates in a slur. If visual information about the slur needs to be recorded, then a [<slur>](#) element should be employed. One or more values from [data.SLUR](#), separated by spaces.

att.chord.anl → @slur

**@tie** (*optional*) Indicates that this element participates in a tie. If visual information about the tie needs to be recorded, then a [<tie>](#) element should be employed. One or more values from [data.TIE](#), separated by spaces.

att.chord.anl → @tie

**@tuple** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLET](#), separated by spaces.

att.chord.anl → @tuple

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.chord.anl → <chord>

### Declaration

```
<classSpec ident="att.chord.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
```

```
<memberOf key="att.chord.anl.cmn"/>
</classes>
</classSpec>
```

VERSION

## att.chord.anl.cmn

Analytical domain attributes in the CMN repertoire.

### Module

[MEI.cmn](#)

### Attributes

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.chord.anl.cmn → @beam

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.chord.anl.cmn → @fermata

**@lv** (*optional*) Indicates the attachment of an l.v. (laissez vibrer) sign to this element. Value conforms to [data.BOOLEAN](#).

att.chord.anl.cmn → @lv

**@ornam** (*optional*) Indicates that this element has an attached ornament. If visual information about the ornament is needed, then one of the elements that represents an ornament (mordent, trill, or turn) should be employed. One or more values from [data.ORNAM.cmn](#), separated by spaces.

att.chord.anl.cmn → @ornam

**@slur** (*optional*) Indicates that this element participates in a slur. If visual information about the slur needs to be recorded, then a [<slur>](#) element should be employed. One or more values from [data.SLUR](#), separated by spaces.

att.chord.anl.cmn → @slur

**@tie** (*optional*) Indicates that this element participates in a tie. If visual information about the tie needs to be recorded, then a [<tie>](#) element should be employed. One or more values from [data.TIE](#), separated by spaces.

att.chord.anl.cmn → @tie

**@tuple** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLET](#), separated by spaces.

att.chord.anl.cmn → @tuple

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.chord.anl.cmn → <chord>

### Declaration

```

## att.chord.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@artic.ges** (*optional*) Records performed articulation that differs from the written value. One or more values from [data.ARTICULATION](#), separated by spaces.

att.chord.ges → @artic.ges

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.chord.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.chord.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.chord.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.chord.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.chord.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.chord.ges → @dur.recip

**@instr** (*optional*) Provides a way of pointing to a MIDI instrument definition. It must contain the ID of an [<instrDef>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.chord.ges → @instr

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.chord.ges → <chord>

### Declaration

```
<classSpec ident="att.chord.ges" module="MEI.gestural" type="atts">

## att.chord.ges.cmn

Gestural domain attributes for CMN features.

### Module

[MEI.cmn](#)

### Attributes

#### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.  
att.chord.ges.cmn → <chord>

#### Declaration

```
<classSpec ident="att.chord.ges.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Gestural domain attributes for CMN features.</desc>
</classSpec>
```

## att.chord.log

Logical domain attributes for chord. The artic, dots, and dur attributes encode the written articulations, augmentation dots, and duration values. The beam, fermata, lv, slur, syl, tie, and tuplet attributes may be used to indicate the attachment of these things to this chord. If visual information about these things needs to be recorded, then either the elements corresponding to these attributes or the attributes available in the att.vis.chord class should be employed.

### Module

[MEI.shared](#)

### Attributes

**@artic** (*optional*) Encodes the written articulation(s). Articulations are normally encoded in order from the note head outward; that is, away from the stem. See additional notes at att.vis.note. Only articulations should be encoded in the artic attribute; for example, fingerings should be encoded using the [`<fing>`](#) element. One or more values from [data.ARTICULATION](#), separated by spaces.

att.chord.log → @artic

**@cue** (*optional*) Value conforms to [data.BOOLEAN](#).

att.chord.log → @cue

**@dots** (*optional*) Records the number of augmentation dots required by a written dotted duration. Value conforms to [data.AUGMENTDOT](#).

att.chord.log → @dots

**@dur** (*optional*) Records the duration of a feature using the relative durational values provided by the [data.DURATION](#) datatype. Value conforms to [data.DURATION](#).

att.chord.log → @dur

**@grace** (*optional*) Marks a note or chord as a "grace" (without a definite performed duration) and records from which other note/chord it should "steal" time. Value conforms to [data.GRACE](#).

att.chord.log → @grace

**@grace.time** (*optional*) Records the amount of time to be "stolen" from a non-grace note/chord. Value conforms to [data.PERCENT](#).

att.chord.log → @grace.time

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.chord.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.chord.log → @staff

**@syl** (*optional*) Holds an associated sung text syllable. Value is plain text.

att.chord.log → @syl

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.chord.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.chord.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).  
att.chord.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.chord.log → @when

## Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.  
att.chord.log → <chord>

## Declaration

```
<classSpec ident="att.chord.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes for chord. The artic, dots, and dur attributes encode the written articulations, augmentation dots, and duration values. ## att.chord.log.cmn

Logical domain attributes in the CMN repertoire.

### Module

[MEI.cmn](#)

### Attributes

**@grace** (*optional*) Marks a note or chord as a "grace" (without a definite performed duration) and records from which other note/chord it should "steal" time. Value conforms to [data.GRACE](#).

att.chord.log.cmn → @grace

**@grace.time** (*optional*) Records the amount of time to be "stolen" from a non-grace note/chord. Value conforms to [data.PERCENT](#).

att.chord.log.cmn → @grace.time

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.chord.log.cmn → <chord>

### Declaration

```
<classSpec ident="att.chord.log.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes in the CMN repertoire.</desc>
  <classes>
    <memberOf key="att.graced"/>
  </classes>
</classSpec>
```

## att.chord.vis

Visual domain attributes for chord. The slur, slur.dir, slur.rend, tie, tie.dir, and tie.rend attributes here are syntactic sugar for these attributes on each of the chord's individual notes. The values here apply to all the notes in the chord. If some notes are slurred or tied while others aren't, then the individual note attributes must be used.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.chord.vis → @altsym

**@breaksec** (*optional*) Presence of this attribute indicates that the secondary beam should be broken following this note/chord. The value of the attribute records the number of beams which should remain unbroken. Value is a positive integer.

att.chord.vis → @breaksec

**@cluster** (*optional*) Indicates a single, alternative note head should be displayed instead of individual note heads. The highest and lowest notes of the chord usually indicate the upper and lower boundaries of the cluster note head. Value conforms to [data.CLUSTER](#).

att.chord.vis → @cluster

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.chord.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.chord.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.chord.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.chord.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.chord.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.chord.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.chord.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

`att.chord.vis` → `@glyph.auth`

**@glyph.name** (*optional*) Glyph name. Value is plain text.

`att.chord.vis` → `@glyph.name`

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

`att.chord.vis` → `@glyph.num`

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

`att.chord.vis` → `@glyph.uri`

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

`att.chord.vis` → `@ho`

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

`att.chord.vis` → `@letterspacing`

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

`att.chord.vis` → `@lineheight`

**@stem.dir** (*optional*) Describes the direction of a stem. Value conforms to [data.STEMDIRECTION](#).

`att.chord.vis` → `@stem.dir`

**@stem.form** (*optional*) Records the form of the stem. Value conforms to [data.STEMFORM.mensural](#).

`att.chord.vis` → `@stem.form`

**@stem.len** (*optional*) Encodes the stem length. Value conforms to [data.MEASUREMENTUNSIGNED](#).

`att.chord.vis` → `@stem.len`

**@stem.mod** (*optional*) Encodes any stem "modifiers"; that is, symbols rendered on the stem, such as tremolo or Sprechstimme indicators. Value conforms to [data.STEMMODIFIER](#).

`att.chord.vis` → `@stem.mod`

**@stem.pos** (*optional*) Records the position of the stem in relation to the note head(s). Value conforms to [data.STEMPOSITION](#).

`att.chord.vis` → `@stem.pos`

**@stem.sameas** (*optional*) Points to a note element in a different layer whose stem is shared. The linked notes should be rendered like a chord though they are part of different layers. Value conforms to [data.URI](#).

`att.chord.vis` → `@stem.sameas`

**@stem.visible** (*optional*) Determines whether a stem should be displayed. Value conforms to [data.BOOLEAN](#).

`att.chord.vis` → `@stem.visible`

**@stem.with** (*optional*) Contains an indication of which staff a note or chord that logically belongs to the current staff should be visually placed on; that is, the one above or the one below. Value conforms to [data.NEIGHBORINGLAYER](#).

att.chord.vis → @stem.with

**@stem.x** (*optional*) Records the output x coordinate of the stem's attachment point. Value is a decimal number.

att.chord.vis → @stem.x

**@stem.y** (*optional*) Records the output y coordinate of the stem's attachment point. Value is a decimal number.

att.chord.vis → @stem.y

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.chord.vis → @to

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.chord.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.chord.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.chord.vis → @y

## Available at

```

# att.chordMember.log

Logical domain attributes.

## Module

[MEI.harmony](#)

## Attributes

**@oct** (*optional*) Captures written octave information. Value conforms to [data.OCTAVE](#).

att.chordMember.log → @oct

**@pname** (*optional*) Contains a written pitch name. Value conforms to [data.PITCHNAME](#).

att.chordMember.log → @pname

**@tab.fing** (*optional*) Indicates which finger, if any, should be used to play an individual string. The index, middle, ring, and little fingers are represented by the values 1-4, while t is for the thumb. The values x and o indicate muffled and open strings, respectively. Value conforms to [data.FINGER.FRET](#).

att.chordMember.log → @tab.fing

**@tab.fret** (*optional*) Records the location at which a string should be stopped against a fret. Value conforms to [data.FRETNUMBER](#).

att.chordMember.log → @tab.fret

**@tab.string** (*optional*) Records which string is to be played. Value conforms to [data.STRINGNUMBER](#).

att.chordMember.log → @tab.string

## Available at

**<chordMember>** An individual pitch in a chord defined by a [<chordDef>](#) element.

att.chordMember.log → <chordMember>

## Declaration

```
<classSpec ident="att.chordMember.log" module="MEI.harmony" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.pitched"/>
    <memberOf key="att.stringtab"/>
  </classes>
</classSpec>
```

## att.chordMember.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

#### Available at

**<chordMember>** An individual pitch in a chord defined by a **<chordDef>** element.

att.chordMember.vis → <chordMember>

### Declaration

```
<classSpec ident="att.chordMember.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
</classSpec>
```

## att.classed

Attributes which can be used to classify features.

### Referenced in chapters

[2.1.2.1 Divisions of the Body](#), [2.3.3 Classification Attributes](#), [13.2.2 Specifying Link Elements](#)

### Module

[MEI.shared](#)

### Attributes

**@class** (*optional*) Contains one or more URIs which denote classification terms that apply to the entity bearing this attribute. One or more values from [data.URI](#), separated by spaces.

att.classed → @class

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.classed → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.classed → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.classed → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.classed → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.classed → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.classed → <actor>

**<add>** Marks an addition to the text.

att.classed → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.classed → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.classed → <addName>

**<addrLine>** Single line of a postal address.

att.classed → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.classed → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.classed → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.classed → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.classed → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.classed → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.classed → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.classed → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.classed → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.classed → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.classed → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.classed → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.classed → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.classed → <arranger>

**<artic>** An indication of how to play a note or chord.

att.classed → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.classed → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.classed → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.classed → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.classed → <author>

**<avFile>** References an external digital audio or video file.

att.classed → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.classed → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.classed → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.classed → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.classed → <barLine>

**<barre>** A barre in a chord tablature grid.

att.classed → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.classed → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.classed → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.classed → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.classed → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.classed → <bibl>

**<biblList>** List of bibliographic references.

att.classed → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.classed → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.classed → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.classed → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.classed → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.classed → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.classed → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.classed → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.classed → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.classed → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.classed → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.classed → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.classed → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.classed → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.classed → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.classed → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.classed → <castItem>

**<castList>** Contains a single cast list or *dramatis personae*.

att.classed → <castList>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.classed → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.classed → <category>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.classed → <cb>

**<cc>** MIDI parameter/control change.

att.classed → <cc>

**<chan>** MIDI channel assignment.

att.classed → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.classed → <chanPr>

**<change>** Individual change within the revision description.

att.classed → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.classed → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.classed → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.classed → <chord>

**<chordDef>** Chord tablature definition.

att.classed → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a <chordDef> element.

att.classed → <chordMember>

**<chordTable>** Chord/tablature look-up table.

att.classed → <chordTable>

**<classDecl>** Groups information which describes the nature or topic of an entity.

att.classed → <classDecl>

**<classification>** Groups information which describes the nature or topic of an entity.

att.classed → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.classed → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.classed → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.classed → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.classed → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.classed → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.classed → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.classed → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.classed → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.classed → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.classed → <contentItem>

**<contents>** List of the material contained within a resource.

att.classed → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.classed → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.classed → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.classed → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.classed → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.classed → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.classed → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.classed → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.classed → <creation>

**<cue>** MIDI cue point.

att.classed → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.classed → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.classed → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.classed → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.classed → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.classed → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.classed → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.classed → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.classed → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.classed → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.classed → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.classed → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.classed → <desc>

**<dim>** Any single dimensional specification.

att.classed → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.classed → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.classed → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.classed → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.classed → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.classed → <div>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.classed → <divLine>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.classed → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.classed → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.classed → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.classed → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.classed → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.classed → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.classed → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.classed → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.classed → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.classed → <epigraph>

**<episema>** Episema.

att.classed → <episema>

**<event>** Contains a free-text event description.

att.classed → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.classed → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.classed → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.classed → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.classed → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.classed → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.classed → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.classed → <expressionList>

**<extData>** Provides a container element for non-MEI data formats.

att.classed → <extData>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.classed → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.classed → <extent>

**<f>** Single element of a figured bass indication.

att.classed → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.classed → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.classed → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.classed → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.classed → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.classed → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.classed → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.classed → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.classed → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.classed → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.classed → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.classed → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.classed → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.classed → <foliation>

**<folium>** Describes a single leaf of paper.

att.classed → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.classed → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.classed → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.classed → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.classed → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.classed → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.classed → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.classed → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.classed → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.classed → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.classed → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.classed → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.classed → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.classed → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.classed → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.classed → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.classed → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.classed → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.classed → <hand>

**<handList>** Container for one or more hand elements.

att.classed → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.classed → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.classed → <harm>

**<harpPedal>** Harp pedal diagram.

att.classed → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.classed → <head>

**<height>** Description of the vertical size of an object.

att.classed → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.classed → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.classed → <hex>

**<hispanTick>** Hispanic tick.

att.classed → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.classed → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.classed → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.classed → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.classed → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.classed → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.classed → <incipCode>

**<incipText>** Opening words of a musical composition.

att.classed → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.classed → <inscription>

**<instrDef>** MIDI instrument declaration.

att.classed → <instrDef>

**<instrGrp>** Collects MIDI instrument definitions.

att.classed → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.classed → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.classed → <item>

**<itemList>** Gathers bibliographic item entities.

att.classed → <itemList>

**<key>** Key captures information about tonal center and mode.

att.classed → <key>

**<keyAccid>** Accidental in a key signature.

att.classed → <keyAccid>

**<keySig>** Written key signature.

att.classed → <keySig>

**<l>** Contains a single line of text within a line group.

att.classed → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.classed → <label>

**<labelAbbr>** A label on the pages following the first.

att.classed → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.classed → <langUsage>

**<language>** Description of a language used in the document.

att.classed → <language>

**<layer>** An independent stream of events on a staff.

att.classed → <layer>

**<layerDef>** Container for layer meta-information.

att.classed → <layerDef>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.classed → <layout>

**<layoutDesc>** Collects layout descriptions.

att.classed → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.classed → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.classed → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.classed → <lg>

**<li>** Single item in a <list>.

att.classed → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.classed → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.classed → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.classed → <line>

**<liquefiant>** Liquescent.

att.classed → <liquefiant>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.classed → <list>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.classed → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.classed → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.classed → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.classed → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.classed → <mNum>

**<mRest>** Complete measure rest in any meter.

att.classed → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.classed → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.classed → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.classed → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.classed → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.classed → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.classed → <mapping>

**<marker>** MIDI marker meta-event.

att.classed → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.classed → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.classed → <measure>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more <mei> elements, each with its own complete header.

att.classed → <meiCorpus>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.classed → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.classed → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.classed → <metaMark>

**<metaText>** MIDI text meta-event.

att.classed → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.classed → <meter>

**<meterSig>** Written meter signature.

att.classed → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.classed → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.classed → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.classed → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.classed → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.classed → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.classed → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an étude, opera, song cycle, symphony, or anthology of piano solos.

att.classed → <music>

**<name>** Proper noun or noun phrase.

att.classed → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.classed → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.classed → <namespace>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.classed → <nc>

**<ncGrp>** Collection of one or more neume components.

att.classed → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.classed → <neume>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.classed → <normalization>

**<note>** A single pitched event.

att.classed → <note>

**<noteOff>** MIDI note-off event.

att.classed → <noteOff>

**<noteOn>** MIDI note-on event.

att.classed → <noteOn>

**<notesStmt>** (notes statement)– Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.classed → <notesStmt>

**<num>** Numeric information in any form.

att.classed → <num>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.classed → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.classed → <oStaff>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.classed → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.classed → <orig>

**<oriscus>** Oriscus.

att.classed → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.classed → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.classed → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.classed → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.classed → <p>

**<pad>** An indication of extra visual space between notational elements.

att.classed → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.classed → <part>

**<parts>** Provides a container for performers' parts.

att.classed → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.classed → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.classed → <pb>

**<pedal>** Piano pedal mark.

att.classed → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.classed → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.classed → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.classed → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.classed → <perfResList>

**<performance>** A presentation of one or more musical works.

att.classed → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.classed → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.classed → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.classed → <pgDesc>

**<pgFoot>** A running footer.

att.classed → <pgFoot>

**<pgHead>** A running header.

att.classed → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.classed → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.classed → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.classed → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.classed → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.classed → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.classed → <playingSpeed>

**<plica>** Plica

att.classed → <plica>

**<port>** MIDI port.

att.classed → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.classed → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.classed → <postCode>

**<price>** The cost of access to a bibliographic item.

att.classed → <price>

**<prog>** MIDI program change.

att.classed → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.classed → <projectDesc>

**<propValue>** A single property value.

att.classed → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.classed → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.classed → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.classed → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.classed → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.classed → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.classed → <publisher>

**<q>** Contains material which is distinguished from the surrounding phrase-level text using quotation marks or a similar method. Use **<quote>** for block-level quotations.

att.classed → <q>

**<quilisma>** Quilisma.

att.classed → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.classed → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.classed → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.classed → <recipient>

**<recording>** A recorded performance.

att.classed → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.classed → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.classed → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.classed → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.classed → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.classed → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.classed → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.classed → <relation>

**<relationList>** Gathers relation elements.

att.classed → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.classed → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.classed → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.classed → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.classed → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.classed → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.classed → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.classed → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.classed → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.classed → <role>

**<roleDesc>** Describes a character's role in a drama.

att.classed → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.classed → <roleName>

**<rubicric>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.classed → <rubicric>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.classed → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.classed → <sb>

**<score>** Full score view of the musical content.

att.classed → <score>

**<scoreDef>** Container for score meta-information.

att.classed → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.classed → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.classed → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.classed → <scriptNote>

**<seal>** A single seal or similar attachment.

att.classed → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.classed → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.classed → <secFolio>

**<section>** Segment of music data.

att.classed → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.classed → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.classed → <segmentation>

**<seqNum>** MIDI sequence number.

att.classed → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.classed → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.classed → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.classed → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.classed → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.classed → <signatures>

**<signifLet>** Significantive letter(s).

att.classed → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.classed → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.classed → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.classed → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.classed → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.classed → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.classed → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.classed → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.classed → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.classed → <sponsor>

**<stack>** An inline table with a single column.

att.classed → <stack>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.classed → <staff>

**<staffDef>** Container for staff meta-information.

att.classed → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.classed → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.classed → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.classed → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.classed → <stdVals>

**<stem>** A stem element.

att.classed → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.classed → <street>

**<strophicus>** Strophicus.

att.classed → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.classed → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.classed → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.classed → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.classed → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.classed → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.classed → <surface>

**<syl>** Individual lyric syllable.

att.classed → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.classed → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.classed → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.classed → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.classed → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.classed → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.classed → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.classed → <sysReq>

**<table>** Contains text displayed in tabular form.

att.classed → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.classed → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.classed → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.classed → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.classed → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.classed → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.classed → <term>

**<termList>** Collection of text phrases which describe a resource.

att.classed → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.classed → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.classed → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.classed → <tie>

**<title>** Title of a bibliographic entity.

att.classed → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.classed → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.classed → <titlePart>

**<titleStmt>** Container for title and responsibility meta-data.

att.classed → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.classed → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.classed → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.classed → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.classed → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.classed → <trill>

**<trkName>** MIDI track/sequence name.

att.classed → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.classed → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.classed → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.classed → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.classed → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.classed → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.classed → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.classed → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.classed → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.classed → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.classed → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.classed → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.classed → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.classed → <when>

**<width>** Description of the horizontal size of an object.

att.classed → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.classed → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.classed → <workList>

**<zone>** Defines an area of interest within a <surface> or graphic file.

att.classed → <zone>

## Constraints

The value in @class must either correspond to the @xml:id attribute of a category element or be an external URL.

## Declaration

```

<classSpec ident="att.classed" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes which can be used to classify features.</desc>
  <attList>
    <attDef ident="class" usage="opt">
      <desc xml:lang="en">Contains one or more URIs which denote classification terms that apply to the entity bearing this attribute.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.URI"/>
      </datatype>
      <constraintSpec ident="check_classURI" scheme="schematron">
        <constraint>
          <sch:rule context="@class">

```

```
<sch:assert test="every $i in tokenize(., '\s+') satisfies
substring($i,2)=//mei:category/@xml:id or matches($i, '^([a-
z]+://|.{1,2}/)')">The value in @class must either correspond to the
@xml:id attribute of a category element or be an external URL.</sch:assert>
</sch:rule>
</constraint>

  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.clef.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@cautionary** (*optional*) Records the function of the clef. A "cautionary" clef does not change the following pitches. Value conforms to [data.BOOLEAN](#).

att.clef.log → @cautionary

**@dis** (*optional*) Records the amount of octave displacement. Value conforms to [data.OCTAVE.DIS](#).

att.clef.log → @dis

**@dis.place** (*optional*) Records the direction of octave displacement. Value conforms to [data.STAFFREL.basic](#).

att.clef.log → @dis.place

**@line** (*optional*) Indicates the line upon which a feature stands. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff. Value conforms to [data.CLEFLINE](#).

att.clef.log → @line

**@oct** (*optional*) Captures written octave information. Value conforms to [data.OCTAVE](#).

att.clef.log → @oct

**@shape** (*optional*) Describes a clef's shape. Value conforms to [data.CLEFSHAPE](#).

att.clef.log → @shape

## Available at

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.clef.log → <clef>

## Declaration

```

# att.clef.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.clef.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.clef.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.clef.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.clef.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.clef.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.clef.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.clef.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.clef.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.clef.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.clef.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.clef.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.clef.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.clef.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.clef.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.clef.vis → @lineheight

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.clef.vis → @to

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.clef.vis → @visible

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.clef.vis → @vo

## Available at

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.clef.vis → <clef>

## Declaration

```
<classSpec ident="att.clef.vis" module="MEI.visual" type="atts">

```

## att.clefShape

Attributes that record the shape of a clef.

### Module

MEI.shared

### Attributes

**@shape** (*optional*) Describes a clef's shape. Value conforms to [data.CLEFSHAPe](#).  
 att.clefShape → @shape

### Available at

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.  
 att.clefShape → <clef>

### Constraints

When @shape is present, @line must also be specified.

### Declaration

```

<classSpec ident="att.clefShape" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record the shape of a clef.</desc>
  <constraintSpec ident="shape_requires_line" scheme="schematron">
    <constraint>
      <sch:rule context="mei:clef[matches(@shape, '[FCG'])]">
        <sch:assert test="@line">When @shape is present, @line must also be
          specified.</sch:assert>
      </sch:rule>
    </constraint>
  </constraintSpec>
  <attList>
    <attDef ident="shape" usage="opt">
      <desc xml:lang="en">Describes a clef's shape.</desc>
      <datatype>
        <rng:ref name="data.CLEFSHAPe"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.cleffing.log

Used by staffDef and scoreDef to provide default values for attributes in the logical domain related to clefs.

### Referenced in chapters

[4.2.2 Defining Score Parameters for CMN](#)

### Module

[MEI.shared](#)

### Attributes

**@clef.dis** (*optional*) Records the amount of octave displacement to be applied to the clef. Value conforms to [data.OCTAVE.DIS](#).

att.cleffing.log → @clef.dis

**@clef.dis.place** (*optional*) Records the direction of octave displacement to be applied to the clef. Value conforms to [data.STAFFREL.basic](#).

att.cleffing.log → @clef.dis.place

**@clef.line** (*optional*) Contains a default value for the position of the clef. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff. Value conforms to [data.CLEFLINE](#).

att.cleffing.log → @clef.line

**@clef.shape** (*optional*) Encodes a value for the clef symbol. Value conforms to [data.CLEFSHAPE](#).

att.cleffing.log → @clef.shape

### Available at

**<scoreDef>** Container for score meta-information.

att.cleffing.log → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.cleffing.log → <staffDef>

### Constraints

An 'F', 'C', or 'G' clef requires that its position be specified.

A TAB or percussion clef requires that the number of lines be specified.

### Declaration

```
<classSpec ident="att.cleffing.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Used by staffDef and scoreDef to provide default values for attributes in the logical domain related to clefs.</desc>

    </datatype>
  </attDef>
</attList>
</classSpec>

```

## att.cleffing.vis

Used by staffDef and scoreDef to provide default values for attributes in the visual domain related to clefs.

### Module

MEI.visual

### Attributes

**@clef.color** (*optional*) Describes the color of the clef. Value conforms to [data.COLOR](#).

att.cleffing.vis → @clef.color

**@clef.visible** (*optional*) Determines whether the clef is to be displayed. Value conforms to [data.BOOLEAN](#).

att.cleffing.vis → @clef.visible

### Available at

**<scoreDef>** Container for score meta-information.

att.cleffing.vis → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.cleffing.vis → <staffDef>

### Declaration

```
<classSpec ident="att.cleffing.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Used by staffDef and scoreDef to provide default values for attributes
  in the visual domain related to clefs.</desc>
  <attList>

      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.color

Visual color attributes.

## Module

[MEI.shared](#)

## Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.color → @color

## Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.color → <accid>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.color → <ambNote>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.color → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.color → <artic>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.color → <barLine>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.color → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.color → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.color → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.color → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.color → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.color → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.color → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.color → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.color → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.color → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.color → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line.

Sometimes called a "direct".

att.color → <custos>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.color → <divLine>

**<dot>** Dot of augmentation or division.

att.color → <dot>

**<episema>** Episema.

att.color → <episema>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.color → <fermata>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.color → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.color → <graceGrp>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.color → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.color → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.color → <halfmRpt>

**<harpPedal>** Harp pedal diagram.

att.color → <harpPedal>

**<hispanTick>** Hispanic tick.

att.color → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.color → <keyAccid>

**<keySig>** Written key signature.

att.color → <keySig>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.color → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.color → <line>

**<liquecent>** Liquescent.

att.color → <liquecent>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.color → <lv>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on **<measure>** does not adequately capture the appearance or placement of the measure number/label.

att.color → <mNum>

**<mRest>** Complete measure rest in any meter.

att.color → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.color → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.color → <mRpt2>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.color → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.color → <mensuration>

**<meterSig>** Written meter signature.

att.color → <meterSig>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.color → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.color → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.color → <multiRpt>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.color → <nc>

**<ncGrp>** Collection of one or more neume components.

att.color → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.color → <neume>

**<note>** A single pitched event.

att.color → <note>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.color → <octave>

**<oriscus>** Oriscus.

att.color → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.color → <ornam>

**<pedal>** Piano pedal mark.

att.color → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.color → <phrase>

**<proport>** Description of note duration as arithmetic ratio.

att.color → <proport>

**<quilisma>** Quilisma.

att.color → <quilisma>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.color → <refrain>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.color → <reh>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.color → <rend>

**<rest>** A non-sounding event found in the source being transcribed.

att.color → <rest>

**<signifLet>** Significative letter(s).

att.color → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.color → <slur>

**<stem>** A stem element.

att.color → <stem>

**<strophicus>** Strophicus.

att.color → <strophicus>

**<symbol>** A reference to a previously defined symbol.

att.color → <symbol>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.color → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.color → <trill>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.color → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.color → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.color → <turn>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.color → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.color → <volta>

## Declaration

```
<classSpec ident="att.color" module="MEI.shared" type="atts">
  <desc xml:lang="en">Visual color attributes.</desc>
  <attList>
    <attDef ident="color" usage="opt">
      <desc xml:lang="en">Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation.</desc>

        <rng:ref name="data.COLOR"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.coloration

Indication of coloration.

### Module

MEI.shared

### Attributes

**@colored** (*optional*) Indicates this feature is 'colored'; that is, it is a participant in a change in rhythmic values. In mensural notation, coloration is indicated by colored notes (red, black, etc.) where void notes would otherwise occur. In CMN, coloration is indicated by an inverse color; that is, the note head is void when it would otherwise be filled and vice versa. Value conforms to [data.BOOLEAN](#).

att.coloration → @colored

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.coloration → <ambNote>

**<note>** A single pitched event.

att.coloration → <note>

### Declaration

```
<classSpec ident="att.coloration" module="MEI.shared" type="atts">
  <desc xml:lang="en">Indication of coloration.</desc>
  <attList>
    <attDef ident="colored" usage="opt">
      <desc xml:lang="en">Indicates this feature is 'colored'; that is, it is a participant in a change in rhythmic values.         <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.common

Attributes common to many elements.

### Referenced in chapters

[2.3 Common Attributes](#), [2.3.1 Attributes from the XML-namespace](#), [11.2 Editorial Markup](#), [11.2.2 Apparent Errors](#)

### Module

[MEI.shared](#)

### Attributes

**@class** (*optional*) Contains one or more URIs which denote classification terms that apply to the entity bearing this attribute. One or more values from [data.URI](#), separated by spaces.

att.common → @class

**@copyof** (*optional*) Points to an element of which the current element is a copy. Value conforms to [data.URI](#).

att.common → @copyof

**@corresp** (*optional*) Used to point to other elements that correspond to this one in a generic fashion. One or more values from [data.URI](#), separated by spaces.

att.common → @corresp

**@follows** (*optional*) points to one or more events in a user-defined collection that are known to be predecessors of the current element. One or more values from [data.URI](#), separated by spaces.

att.common → @follows

**@label** (*optional*) Captures text to be used to generate a label for the element to which it's attached, a "tool tip" or prefatory text, for example. Should not be used to record document content. Value is plain text.

att.common → @label

**@n** (*optional*) Provides a number-like designation that indicates an element's position in a sequence of similar elements. May not contain space characters. Value conforms to [data.WORD](#).

att.common → @n

**@next** (*optional*) Used to point to the next event(s) in a user-defined collection. One or more values from [data.URI](#), separated by spaces.

att.common → @next

**@precedes** (*optional*) Points to one or more events in a user-defined collection that are known to be successors of the current element. One or more values from [data.URI](#), separated by spaces.

att.common → @precedes

**@prev** (*optional*) Points to the previous event(s) in a user-defined collection. One or more values from [data.URI](#), separated by spaces.

att.common → @prev

**@resp** (*optional*) Indicates the agent(s) responsible for some aspect of the text's transcription, editing, or encoding. Its value must point to one or more identifiers declared in the document header. One or more values from [data.URI](#), separated by spaces.

att.common → @resp

**@sameas** (*optional*) Points to an element that is the same as the current element but is not a literal copy of the current element. One or more values from [data.URI](#), separated by spaces.

att.common → @sameas

**@synch** (*optional*) Points to elements that are synchronous with the current element. One or more values from [data.URI](#), separated by spaces.

att.common → @synch

**@type** (*optional*) Designation which characterizes the element in some sense, using any convenient classification scheme or typology that employs single-token labels. One or more values of datatype **NMTOKEN**, separated by spaces.

att.common → @type

**@xml:base** (*optional*) Provides a base URI reference with which applications can resolve relative URI references into absolute URI references. Value conforms to [data.URI](#).

att.common → @xml:base

**@xml:id** (*optional*) Regularizes the naming of an element and thus facilitates building links between it and other resources. Each id attribute within a document must have a unique value. Value is a valid [xml:id](#).

att.common → @xml:id

## Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.common → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.common → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.common → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.common → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.common → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.common → <actor>

**<add>** Marks an addition to the text.

att.common → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.common → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.common → <addrName>

**<addrLine>** Single line of a postal address.

att.common → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.common → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.common → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.common → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.common → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.common → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.common → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.common → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.common → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.common → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.common → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.common → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.common → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.common → <arranger>

**<artic>** An indication of how to play a note or chord.

att.common → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.common → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.common → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.common → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.common → <author>

**<avFile>** References an external digital audio or video file.

att.common → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.common → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.common → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.common → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.common → <barLine>

**<barre>** A barre in a chord tablature grid.

att.common → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.common → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.common → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.common → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.common → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.common → <bibl>

**<biblList>** List of bibliographic references.

att.common → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.common → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.common → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.common → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.common → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.common → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.common → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.common → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.common → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.common → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.common → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.common → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.common → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.common → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.common → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.common → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.common → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.common → <castList>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.common → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.common → <category>

**<cc>** MIDI parameter/control change.

att.common → <cc>

**<chan>** MIDI channel assignment.

att.common → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.common → <chanPr>

**<change>** Individual change within the revision description.

att.common → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.common → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.common → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.common → <chord>

**<chordDef>** Chord tablature definition.

att.common → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a <chordDef> element.

att.common → <chordMember>

**<chordTable>** Chord/tablature look-up table.

att.common → <chordTable>

**<classDecls>** Groups information which describes the nature or topic of an entity.

att.common → <classDecls>

**<classification>** Groups information which describes the nature or topic of an entity.

att.common → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.common → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.common → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.common → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.common → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.common → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.common → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.common → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.common → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.common → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.common → <contentItem>

**<contents>** List of the material contained within a resource.

att.common → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.common → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.common → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.common → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.common → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.common → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.common → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.common → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.common → <creation>

**<cue>** MIDI cue point.

att.common → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.common → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.common → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.common → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.common → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.common → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.common → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.common → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.common → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.common → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.common → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.common → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.common → <desc>

**<dim>** Any single dimensional specification.

att.common → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.common → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.common → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.common → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.common → <district>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.common → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.common → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.common → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.common → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.common → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.common → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.common → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.common → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.common → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.common → <epigraph>

**<episema>** Episema.

att.common → <episema>

**<event>** Contains a free-text event description.

att.common → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.common → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.common → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.common → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.common → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.common → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.common → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.common → <expressionList>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.common → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.common → <extent>

**<f>** Single element of a figured bass indication.

att.common → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.common → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.common → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.common → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.common → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.common → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.common → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.common → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.common → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.common → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.common → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.common → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.common → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.common → <foliation>

**<folium>** Describes a single leaf of paper.

att.common → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.common → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.common → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.common → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.common → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.common → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.common → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.common → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.common → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.common → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.common → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.common → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.common → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.common → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.common → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.common → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.common → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.common → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.common → <hand>

**<handList>** Container for one or more hand elements.

att.common → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.common → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.common → <harm>

**<harpPedal>** Harp pedal diagram.

att.common → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.common → <head>

**<height>** Description of the vertical size of an object.

att.common → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.common → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.common → <hex>

**<hispanTick>** Hispanic tick.

att.common → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.common → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.common → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.common → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.common → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.common → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.common → <incipCode>

**<incipText>** Opening words of a musical composition.

att.common → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.common → <inscription>

**<instrGrp>** Collects MIDI instrument definitions.

att.common → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.common → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.common → <item>

**<itemList>** Gathers bibliographic item entities.

att.common → <itemList>

**<key>** Key captures information about tonal center and mode.

att.common → <key>

**<keyAccid>** Accidental in a key signature.

att.common → <keyAccid>

**<keySig>** Written key signature.

att.common → <keySig>

**<l>** Contains a single line of text within a line group.

att.common → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.common → <label>

**<labelAbbr>** A label on the pages following the first.

att.common → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.common → <langUsage>

**<language>** Description of a language used in the document.

att.common → <language>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.common → <layout>

**<layoutDesc>** Collects layout descriptions.

att.common → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.common → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.common → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.common → <lg>

**<li>** Single item in a <list>.

att.common → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.common → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.common → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.common → <line>

**<liquefent>** Liquescent.

att.common → <liquefent>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.common → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.common → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.common → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.common → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on [<measure>](#) does not adequately capture the appearance or placement of the measure number/label.

att.common → <mNum>

**<mRest>** Complete measure rest in any meter.

att.common → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.common → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.common → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.common → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.common → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.common → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.common → <mapping>

**<marker>** MIDI marker meta-event.

att.common → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.common → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.common → <measure>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more <mei> elements, each with its own complete header.

att.common → <meiCorpus>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.common → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.common → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.common → <metaMark>

**<metaText>** MIDI text meta-event.

att.common → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.common → <meter>

**<meterSig>** Written meter signature.

att.common → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.common → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.common → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.common → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.common → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.common → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.common → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an etude, opera, song cycle, symphony, or anthology of piano solos.

att.common → <music>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.common → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.common → <namespace>

**<ncGrp>** Collection of one or more neume components.

att.common → <ncGrp>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.common → <normalization>

**<note>** A single pitched event.

att.common → <note>

**<noteOff>** MIDI note-off event.

att.common → <noteOff>

**<noteOn>** MIDI note-on event.

att.common → <noteOn>

**<notesStmt>** (notes statement)– Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.common → <notesStmt>

**<num>** Numeric information in any form.

att.common → <num>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.common → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.common → <orig>

**<oriscus>** Oriscus.

att.common → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.common → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.common → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.common → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.common → <p>

**<pad>** An indication of extra visual space between notational elements.

att.common → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.common → <part>

**<parts>** Provides a container for performers' parts.

att.common → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.common → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.common → <pb>

**<pedal>** Piano pedal mark.

att.common → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.common → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.common → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.common → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.common → <perfResList>

**<performance>** A presentation of one or more musical works.

att.common → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.common → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.common → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.common → <pgDesc>

**<pgFoot>** A running footer.

att.common → <pgFoot>

**<pgHead>** A running header.

att.common → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.common → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.common → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.common → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.common → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.common → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.common → <playingSpeed>

**<plica>** Plica

att.common → <plica>

**<port>** MIDI port.

att.common → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.common → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.common → <postCode>

**<price>** The cost of access to a bibliographic item.

att.common → <price>

**<prog>** MIDI program change.

att.common → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.common → <projectDesc>

**<propValue>** A single property value.

att.common → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.common → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.common → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.common → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.common → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.common → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.common → <publisher>

**<quilisma>** Quilisma.

att.common → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.common → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.common → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.common → <recipient>

**<recording>** A recorded performance.

att.common → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.common → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.common → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.common → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.common → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.common → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.common → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.common → <relation>

**<relationList>** Gathers relation elements.

att.common → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.common → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.common → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.common → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.common → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.common → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.common → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.common → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.common → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.common → <role>

**<roleDesc>** Describes a character's role in a drama.

att.common → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.common → <roleName>

**<rubic>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.common → <rubic>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.common → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.common → <sb>

**<score>** Full score view of the musical content.

att.common → <score>

**<scoreDef>** Container for score meta-information.

att.common → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.common → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.common → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.common → <scriptNote>

**<seal>** A single seal or similar attachment.

att.common → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.common → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.common → <secFolio>

**<section>** Segment of music data.

att.common → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.common → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.common → <segmentation>

**<seqNum>** MIDI sequence number.

att.common → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.common → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.common → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.common → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.common → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.common → <signatures>

**<signifLet>** Significantive letter(s).

att.common → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.common → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.common → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.common → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.common → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.common → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.common → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.common → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.common → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.common → <sponsor>

**<stack>** An inline table with a single column.

att.common → <stack>

**<staffGrp>** A group of bracketed or braced staves.

att.common → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.common → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.common → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.common → <stdVals>

**<stem>** A stem element.

att.common → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.common → <street>

**<strophicus>** Strophicus.

att.common → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.common → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.common → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.common → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.common → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.common → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.common → <surface>

**<syl>** Individual lyric syllable.

att.common → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.common → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.common → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.common → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.common → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.common → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.common → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.common → <sysReq>

**<table>** Contains text displayed in tabular form.

att.common → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.common → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.common → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.common → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.common → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.common → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.common → <term>

**<termList>** Collection of text phrases which describe a resource.

att.common → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.common → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.common → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.common → <tie>

**<titlePage>** Contains a transcription of the title page of a text.

att.common → <titlePage>

**<titleStmt>** Container for title and responsibility meta-data.

att.common → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.common → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.common → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.common → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.common → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.common → <trill>

**<trkName>** MIDI track/sequence name.

att.common → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.common → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.common → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.common → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.common → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.common → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.common → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.common → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.common → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.common → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.common → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.common → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.common → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.common → <when>

**<width>** Description of the horizontal size of an object.

att.common → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.common → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.common → <workList>

**<zone>** Defines an area of interest within a <surface> or graphic file.

att.common → <zone>

## Declaration

```
<classSpec ident="att.common" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes common to many elements.</desc>
  <classes>
    <memberOf key="att.basic"/>
    <memberOf key="att.labelled"/>
    <memberOf key="att.linking"/>
    <memberOf key="att.nNumberLike"/>
    <memberOf key="att.responsibility"/>
    <memberOf key="att.typed"/>
  </classes>
</classSpec>
```

## att.componentType

Attributes that express the relationship between a component and its host.

### Module

MEI.msDesc

### Attributes

**@comptype** (*optional*) Allowed values are: "**constituent**" (*A physical and logical part of entity.*), "**boundwith**" (*A physical, but not logical component of the entity, usually included as part of the binding process.*), "**separated**" (*A logical component of the entity physically held elsewhere.*)  
att.componentType → @comptype

### Available at

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.componentType → <analytic>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.componentType → <manifestation>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.componentType → <source>

### Constraints

The comptype attribute may occur on only when it is a descendant of a componentList.

### Declaration

```
<classSpec ident="att.componentType" type="atts" module="MEI.msDesc">
  <desc xml:lang="en">Attributes that express the relationship between a component and its host.</desc>
  <attList>
    <attDef ident="comptype" usage="opt">
      <constraintSpec ident="checkComponentType" scheme="schematron">
        <constraint>
          <sch:rule context="mei:*[@comptype]">
            <sch:let name="elementName" value="local-name()" />
            <sch:assert test="ancestor::mei:componentList">The comptype attribute may occur on
              <sch:value-of select="$elementName" />
            only when it is a descendant of a componentList.</sch:assert>
          </sch:rule>
        </constraint>
      </constraintSpec>
      <valList type="closed">
```

```
<valItem ident="constituent">
    <desc xml:lang="en">A physical and logical part of entity.</desc>

    <desc xml:lang="en">A physical, but not logical component of the entity, usually
        included as part of the binding process.</desc>
</valItem>
<valItem ident="separated">
    <desc xml:lang="en">A logical component of the entity physically held
        elsewhere.</desc>
</valItem>
</valList>
</attDef>
</attList>
</classSpec>
```

## att.controlEvent

Attributes shared by events which rely on other events for their existence. For example, a slur/phrase marking must be drawn between or over a group of notes. The slur is therefore a control event.

### Referenced in chapters

[4.2.6 Timestamps and Durations](#)

### Module

[MEI.shared](#)

### Attributes

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
att.controlEvent → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.  
att.controlEvent → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.  
att.controlEvent → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.  
att.controlEvent → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.  
att.controlEvent → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.  
att.controlEvent → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).  
att.controlEvent → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).  
att.controlEvent → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.controlEvent → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.controlEvent → @when

## Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.controlEvent → <accid>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.controlEvent → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.controlEvent → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.controlEvent → <attacca>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.controlEvent → <beamSpan>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.controlEvent → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.controlEvent → <bracketSpan>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.controlEvent → <cpMark>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#),

[<dynam>](#) or [<repeatMark>](#).

att.controlEvent → <dir>

**<dot>** Dot of augmentation or division.

att.controlEvent → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.controlEvent → <dynam>

**<f>** Single element of a figured bass indication.

att.controlEvent → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.controlEvent → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.controlEvent → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.controlEvent → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.controlEvent → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.controlEvent → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.controlEvent → <harm>

**<harpPedal>** Harp pedal diagram.

att.controlEvent → <harpPedal>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.controlEvent → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.controlEvent → <lv>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.controlEvent → <metaMark>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.controlEvent → <mordent>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.controlEvent → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.controlEvent → <ornam>

**<pedal>** Piano pedal mark.

att.controlEvent → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.controlEvent → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.controlEvent → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.controlEvent → <slur>

**<sp>** Contains an individual speech in a performance text.

att.controlEvent → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.controlEvent → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.controlEvent → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.controlEvent → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.controlEvent → <trill>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.controlEvent → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.controlEvent → <turn>

## Declaration

```
<classSpec ident="att.controlEvent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes shared by events which rely on other events for their
  existence. For example, a slur/phrase marking must be drawn between or over a group of
  notes. The slur is therefore a control event.</desc>

  </classes>
</classSpec>
```

## att.coordinated

This attribute class records the position of a feature within a two-dimensional coordinate system.

### Module

MEI.shared

### Attributes

**@lrx** (*optional*) Indicates the lower-right corner x coordinate. Value is a positive integer, including 0.

att.coordinated → @lrx

**@lry** (*optional*) Indicates the lower-left corner x coordinate. Value is a positive integer, including 0.

att.coordinated → @lry

**@rotate** Indicates the amount by which the contents of this element have been rotated clockwise or, if applicable, how the orientation of the element self should be interpreted, with respect to the normal orientation of the parent surface. The orientation is expressed in arc degrees. Value conforms to [data.DEGREES](#).

att.coordinated → @rotate

**@ulx** (*optional*) Indicates the upper-left corner x coordinate. Value is a positive integer, including 0.

att.coordinated → @ulx

**@uly** (*optional*) Indicates the upper-left corner y coordinate. Value is a positive integer, including 0.

att.coordinated → @uly

### Available at

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.coordinated → <surface>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.coordinated → <symbolDef>

**<zone>** Defines an area of interest within a **<surface>** or graphic file.

att.coordinated → <zone>

### Declaration

```
<classSpec ident="att.coordinated" module="MEI.shared" type="atts">
  <desc xml:lang="en">This attribute class records the position of a feature within a two-dimensional coordinate system.</desc>
  <attList>

</classSpec>
```

## att.cpMark.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.cpMark.anl → <cpMark>

#### Declaration

```
<classSpec ident="att.cpMark.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

# att.cpMark.ges

Gestural domain attributes.

## Module

[MEI.gestural](#)

## Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.cpMark.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.cpMark.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.cpMark.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.cpMark.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.cpMark.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.cpMark.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.cpMark.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.cpMark.ges → @tstamp2.real

## Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.cpMark.ges → <cpMark>

## Declaration

```
<classSpec ident="att.cpMark.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.tstamp2.ges"/>
  </classes>
</classSpec>
```

## att.cpMark.log

Logical domain attributes.

### Module

[MEI.edittrans](#)

### Attributes

**@dis** (*optional*) Records the amount of octave displacement. Value conforms to [data.OCTAVE.DIS](#).  
att.cpMark.log → @dis

**@dis.place** (*optional*) Records the direction of octave displacement. Value conforms to [data.STAFFREL.basic](#).  
att.cpMark.log → @dis.place

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.cpMark.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
att.cpMark.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.cpMark.log → @layer

**@origin.endid** (*optional*) indicates the final element in a sequence of events. Value conforms to [data.URI](#).

att.cpMark.log → @origin.endid

**@origin.layer** (*optional*) identifies the layer on which referenced notation occurs. One or more of **positiveInteger**.

att.cpMark.log → @origin.layer

**@origin.staff** (*recommended*) signifies the staff on which referenced notation occurs. Defaults to the same value as the local staff. Mandatory when applicable. One or more of **positiveInteger**.

att.cpMark.log → @origin.staff

**@origin.startid** (*optional*) indicates the first element in a sequence of events. Value conforms to [data.URI](#).

att.cpMark.log → @origin.startid

**@origin.tstamp** (*optional*) encodes the starting point of musical material in terms of musical time, i.e., a (potentially negative) count of measures plus a beat location. Value conforms to [data.MEASUREBEATOFFSET](#).

att.cpMark.log → @origin.tstamp

**@origin.tstamp2** (*recommended*) encodes the ending point of musical material in terms of musical time, i.e., a count of measures plus a beat location. The values are relative to the measure identified by origin.tstamp. Value conforms to [data.MEASUREBEAT](#).

att.cpMark.log → @origin.tstamp2

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\n\r][\c]+)"**, separated by spaces.

att.cpMark.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.cpMark.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.cpMark.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.cpMark.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.cpMark.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.cpMark.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.cpMark.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.cpMark.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.cpMark.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.cpMark.log → @when

## Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.cpMark.log → <cpMark>

## Declaration

```
<classSpec ident="att.cpMark.log" module="MEI.edittrans" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>

    <memberOf key="att.origin.staffIdent"/>
    <memberOf key="att.origin.layerIdent"/>
    <memberOf key="att.origin.startEndId"/>
    <memberOf key="att.octaveDisplacement"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

# att.cpMark.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.cpMark.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.cpMark.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.cpMark.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.cpMark.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.cpMark.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.cpMark.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.cpMark.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.cpMark.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.cpMark.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.cpMark.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.cpMark.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.cpMark.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.cpMark.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.cpMark.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.cpMark.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.cpMark.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.cpMark.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.cpMark.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.cpMark.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.cpMark.vis → @y

## Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.cpMark.vis → <cpMark>

## Declaration

```
<classSpec ident="att.cpMark.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

VERSION

## att.crit

Attributes common to all elements representing variant readings.

### Module

MEI.critapp

### Attributes

**@cause** (*optional*) Classifies the cause for the variant reading, according to any appropriate typology of possible origins. Value is a [NMTOKEN](#).

att.crit → @cause

**@hand** (*optional*) Signifies the hand responsible for an action. The value must be the ID of a [<hand>](#) element declared in the header. Value conforms to [data.URI](#).

att.crit → @hand

**@seq** (*optional*) Used to assign a sequence number related to the order in which the encoded features carrying this attribute are believed to have occurred. Value is a positive integer.

att.crit → @seq

**@source** (*optional*) Contains a list of one or more pointers indicating the sources which attest to a given reading. Each value should correspond to the ID of a [<source>](#) or [<manifestation>](#) element located in the document header. One or more values from [data.URI](#), separated by spaces.

att.crit → @source

### Available at

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.crit → <lem>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.crit → <rdg>

### Declaration

```
<classSpec ident="att.crit" module="MEI.critapp" type="atts">
  <desc xml:lang="en">Attributes common to all elements representing variant
  readings.</desc>

DEVELOPMENT  
VERSION

## att.cue

Attributes that describe "cue-ness".

### Module

MEI.shared

### Attributes

**@cue** (*optional*) Value conforms to [data.BOOLEAN](#).

att.cue → @cue

### Available at

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.cue → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.cue → <beamSpan>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.cue → <chord>

**<layer>** An independent stream of events on a staff.

att.cue → <layer>

**<mRest>** Complete measure rest in any meter.

att.cue → <mRest>

**<note>** A single pitched event.

att.cue → <note>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.cue → <oLayer>

**<rest>** A non-sounding event found in the source being transcribed.

att.cue → <rest>

### Declaration

```
<classSpec ident="att.cue" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe "cue-ness".</desc>
  <attList>
    <attDef ident="cue" usage="opt">

        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.curvature

Attributes that describe curvature.

### Module

[MEI.shared](#)

### Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.curvature → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.curvature → @bulge

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (*Upward curve.*), "**below**" (*Downward curve.*), "**mixed**" (*A "meandering" curve, both above and below the items it pertains to.*)

att.curvature → @curvedir

### Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.curvature → <bend>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.curvature → <curve>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.curvature → <lv>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.curvature → <phrase>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.curvature → <slur>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.curvature → <tie>

### Declaration

[MEI.visual](#)

## Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.curve.vis → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.curve.vis → @bulge

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.curve.vis → @color

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (*Upward curve.*), "**below**" (*Downward curve.*), "**mixed**" (*A "meandering" curve, both above and below the items it pertains to.*)

att.curve.vis → @curvedir

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.curve.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.curve.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.curve.vis → @endvo

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.curve.vis → @ho

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.curve.vis → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.curve.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.curve.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.curve.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.curve.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.curve.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.curve.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.curve.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.curve.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.curve.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.curve.vis → @y2

## Available at

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.curve.vis → <curve>

## Declaration

```
<classSpec ident="att.curve.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.color"/>
    <memberOf key="att.curvature"/>
    <memberOf key="att.curveRend"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.visualOffset2"/>
```

```
<memberOf key="att.xy"/>
<memberOf key="att.xy2"/>
</classes>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.curveRend

Attributes that record the visual rendition of curves.

### Module

MEI.shared

### Attributes

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.curveRend → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.curveRend → @lwidth

### Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.curveRend → <bend>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.curveRend → <curve>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.curveRend → <lv>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.curveRend → <phrase>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.curveRend → <slur>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.curveRend → <tie>

### Declaration

```
<classSpec ident="att.curveRend" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record the visual rendition of curves.</desc>
  <attList>

VERSION

## att.custos.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line.

Sometimes called a "direct".

att.custos.anl → <custos>

### Declaration

```
<classSpec ident="att.custos.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.custos.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line.

Sometimes called a "direct".

att.custos.ges → <custos>

### Declaration

```
<classSpec ident="att.custos.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.custos.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@accid** (*optional*) Captures a written accidental. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.custos.log → @accid

**@oct** (*optional*) Captures written octave information. Value conforms to [data.OCTAVE](#).

att.custos.log → @oct

**@pname** (*optional*) Contains a written pitch name. Value conforms to [data.PITCHNAME](#).

att.custos.log → @pname

**@target** (*optional*) Encodes the target note when its pitch differs from the pitch at which the custos appears. Value conforms to [data.URI](#).

att.custos.log → @target

### Available at

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line.  
Sometimes called a "direct".

att.custos.log → <custos>

### Constraints

@target attribute should have content.

The value in @target should correspond to the @xml:id attribute of a note element.

### Declaration

```
<classSpec ident="att.custos.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.accidental"/>

        <rng:ref name="data.URI"/>
      </datatype>
      <constraintSpec ident="check_custosTarget" scheme="schematron">
        <constraint>
```

```
<sch:rule context="mei:custos/@target">
    <sch:assert role="warning" test="not(normalize-space(.) eq '')">@target
        attribute should have content.</sch:assert>
        <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
            substring($i,2)=//mei:note/@xml:id">The value in @target should correspond
            to the @xml:id attribute of a note element.</sch:assert>
    </sch:rule>
</constraint>
</constraintSpec>
</attDef>
</attList>
</classSpec>
```

## att.custos.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.custos.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.custos.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.custos.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.custos.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.custos.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.custos.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.custos.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*).

att.custos.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.custos.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.custos.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.custos.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.custos.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.custos.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.custos.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.custos.vis → @loc

## Available at

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.custos.vis → <custos>

## Declaration

```
<classSpec ident="att.custos.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.extSym"/>
    <memberOf key="att.staffLoc"/>
    <memberOf key="att.typography"/>
    <memberOf key="att.visualOffset.ho"/>
  </classes>
</classSpec>
```

## att.cutout

Attributes that indicate how to render the staff lines of the measure containing an element belonging to this attribute class.

### Module

[MEI.cmn](#)

### Attributes

**@cutout** (*optional*) "Cut-out" style. Allowed values are: "**cutout**" (*The staff lines should not be drawn.*)

att.cutout → @cutout

### Available at

**<mRest>** Complete measure rest in any meter.

att.cutout → <mRest>

**<mSpace>** A measure containing only empty space in any meter.

att.cutout → <mSpace>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.cutout → <space>

### Declaration

```
<classSpec ident="att.cutout" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that indicate how to render the staff lines of the measure
  containing an element belonging to this attribute class.</desc>
  <attList>
    <attDef ident="cutout" usage="opt">
      <desc xml:lang="en">"Cut-out" style.</desc>
      <valList type="closed">
        <valItem ident="cutout">
          <desc xml:lang="en">The staff lines should not be drawn.</desc>
        </valItem>
      </valList>
    </attDef>
  </attList>
</classSpec>
```

# att.dataPointing

Attributes for linking metadata to data.

## Module

[MEI.shared](#)

## Attributes

**@data** (*optional*) Used to link metadata elements to one or more data-containing elements. One or more values from [data.URI](#), separated by spaces.

att.dataPointing → @data

## Available at

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.dataPointing → <analytic>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.dataPointing → <annot>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.dataPointing → <availability>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.dataPointing → <biblStruct>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.dataPointing → <category>

**<classification>** Groups information which describes the nature or topic of an entity.

att.dataPointing → <classification>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.dataPointing → <clip>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.dataPointing → <correction>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.dataPointing → <editorialDecl>

**<expression>** Intellectual or artistic realization of a work.

att.dataPointing → <expression>

**<genState>** Describes a distinctive state in the textual development of a work.

att.dataPointing → <genState>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.dataPointing → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.dataPointing → <item>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.dataPointing → <langUsage>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.dataPointing → <manifestation>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.dataPointing → <monogr>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.dataPointing → <normalization>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.dataPointing → <projectDesc>

**<recording>** A recorded performance.

att.dataPointing → <recording>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.dataPointing → <relatedItem>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.dataPointing → <samplingDecl>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.dataPointing → <segmentation>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.dataPointing → <source>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.dataPointing → <stdVals>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.dataPointing → <surface>

**<term>** Keyword or phrase which describes a resource.

att.dataPointing → <term>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.dataPointing → <when>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.dataPointing → <work>

**<zone>** Defines an area of interest within a [<surface>](#) or graphic file.

att.dataPointing → <zone>

## Constraints

@data attribute should have content.

The value in @data should correspond to the @xml:id attribute of a descendant of the music element.

## Declaration

```

<classSpec ident="att.dataPointing" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes for linking metadata to data.</desc>
  <attList>
    <attDef ident="data" usage="opt">
      <desc xml:lang="en">Used to link metadata elements to one or more data-containing
elements.</desc>

element.</sch:assert>
          </sch:rule>
        </constraint>
      </constraintSpec>
    </attDef>
  </attList>
</classSpec>

```

## att.datable

Attributes common to dates.

### Referenced in chapters

[9.2.9 Dates](#)

### Module

[MEI.shared](#)

### Attributes

**@enddate** (*optional*) Contains the end point of a date range in standard ISO form. Value conforms to [data.ISODATE](#).

att.datable → @enddate

**@isodate** (*optional*) Provides the value of a textual date in standard ISO form. Value conforms to [data.ISODATE](#).

att.datable → @isodate

**@notafter** (*optional*) Contains an upper boundary for an uncertain date in standard ISO form. Value conforms to [data.ISODATE](#).

att.datable → @notafter

**@notbefore** (*optional*) Contains a lower boundary, in standard ISO form, for an uncertain date. Value conforms to [data.ISODATE](#).

att.datable → @notbefore

**@startdate** (*optional*) Contains the starting point of a date range in standard ISO form. Value conforms to [data.ISODATE](#).

att.datable → @startdate

### Available at

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.datable → <acquisition>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.datable → <addName>

**<application>** Provides information about an application which has acted upon the current document.

att.datable → <application>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.datable → <binding>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.datable → <bloc>

**<change>** Individual change within the revision description.

att.datable → <change>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.datable → <corpName>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.datable → <country>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.datable → <creation>

**<date>** A string identifying a point in time or the time period between two such points.

att.datable → <date>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.datable → <district>

**<event>** Contains a free-text event description.

att.datable → <event>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.datable → <exhibHist>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.datable → <famName>

**<foreName>** Contains a forename, given or baptismal name.

att.datable → <foreName>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.datable → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.datable → <genState>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.datable → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.datable → <geogName>

**<name>** Proper noun or noun phrase.

att.datable → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.datable → <nameLink>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.datable → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.datable → <persName>

**<provenance>** The record of ownership or custodianship of an item.

att.datable → <provenance>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.datable → <region>

**<relation>** Describes a relationship or linkage amongst entities.

att.datable → <relation>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.datable → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.datable → <resp>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.datable → <roleName>

**<seal>** A single seal or similar attachment.

att.datable → <seal>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.datable → <settlement>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.datable → <stamp>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.datable → <styleName>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.datable → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.datable → <treatSched>

```

## att.dimensions

Attributes that capture the dimensions of an entity.

### Module

MEI.shared

### Attributes

**@height** (*optional*) Measurement of the vertical dimension of an entity. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.dimensions → @height

**@width** (*optional*) Measurement of the horizontal dimension of an entity. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.dimensions → @width

### Available at

**<bifolium>** Describes a folded sheet of paper.

att.dimensions → <bifolium>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.dimensions → <cutout>

**<folium>** Describes a single leaf of paper.

att.dimensions → <folium>

**<graphic>** Indicates the location of an inline graphic.

att.dimensions → <graphic>

### Declaration

```
<classSpec ident="att.dimensions" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that capture the dimensions of an entity.</desc>
  <classes>
    <memberOf key="att.height"/>
    <memberOf key="att.width"/>
  </classes>
</classSpec>
```

## att.dir.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [\*\*<tempo>\*\*](#), [\*\*<dynam>\*\*](#) or [\*\*<repeatMark>\*\*](#).

att.dir.anl → <dir>

#### Declaration

```
<classSpec ident="att.dir.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.dir.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.dir.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.dir.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.dir.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.dir.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.dir.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum [\\*\\*recip value](#). Value is a [token](#).

att.dir.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.dir.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.dir.ges → @tstamp2.real

### Available at

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.dir.ges → <dir>

### Declaration

```
<classSpec ident="att.dir.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.tstamp2.ges"/>
```

```
</classes>  
</classSpec>
```

DEVELOPMENT  
VERSION

## att.dir.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.dir.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.dir.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.dir.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.dir.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.dir.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.dir.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.dir.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.dir.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.dir.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.dir.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.dir.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.dir.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.dir.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.dir.log → @when

## Available at

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.dir.log → <dir>

## Declaration

```
<classSpec ident="att.dir.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.dir.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dir.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.dir.vis → @endto

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.dir.vis → @extender

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dir.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.dir.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.dir.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.dir.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.dir.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.dir.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.dir.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.dir.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.dir.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dir.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.dir.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.dir.vis → @to

**@vgrp** (*optional*) Provides a label for members of a vertically aligned group. Value is a positive integer.

att.dir.vis → @vgrp

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dir.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.dir.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.dir.vis → @y

## Available at

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.dir.vis → <dir>

## Declaration

```
<classSpec ident="att.dir.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.extender"/>
    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.verticalGroup"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.visualOffset2.ho"/>
    <memberOf key="att.visualOffset2.to"/>
    <memberOf key="att.xy"/>
  </classes>
```

</classSpec>

DEVELOPMENT  
VERSION

## att.distances

Attributes that describe distance from the staff.

### Module

[MEI.shared](#)

### Attributes

**@dir.dist** (*optional*) Records the default distance from the staff for directives. Value conforms to [data.MEASUREMENTSIGNED](#).

att.distances → @dir.dist

**@dynam.dist** (*optional*) Records the default distance from the staff for dynamic marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.distances → @dynam.dist

**@harm.dist** (*optional*) Records the default distance from the staff of harmonic indications, such as guitar chord grids or functional labels. Value conforms to [data.MEASUREMENTSIGNED](#).

att.distances → @harm.dist

**@reh.dist** (*optional*) Records the default distance from the staff for rehearsal marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.distances → @reh.dist

**@tempo.dist** (*optional*) Records the default distance from the staff for tempo marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.distances → @tempo.dist

### Available at

**<scoreDef>** Container for score meta-information.

att.distances → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.distances → <staffDef>

### Declaration

```

<classSpec ident="att.distances" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe distance from the staff.</desc>

# att.divLine.log

Logical domain attributes.

## Module

[MEI.neumes](#)

## Attributes

**@form** (*optional*) Identifies the different kinds of division. Allowed values are: "**caesura**" , "**finalis**" , "**maior**" , "**maxima**" , "**minima**" , "**virgula**"

att.divLine.log → @form

## Available at

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.divLine.log → <divLine>

## Declaration

```
<classSpec ident="att.divLine.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <attList>
    <attDef ident="form" usage="opt">
      <desc xml:lang="en">Identifies the different kinds of division.</desc>
      <datatype maxOccurs="unbounded">

        <valItem ident="minima"/>
        <valItem ident="virgula"/>
      </valList>
    </attDef>
  </attList>
</classSpec>
```

## att.dot.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<dot>** Dot of augmentation or division.

att.dot.anl → <dot>

#### Declaration

```
<classSpec ident="att.dot.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.dot.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<dot>** Dot of augmentation or division.

att.dot.ges → <dot>

#### Declaration

```
<classSpec ident="att.dot.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>

## att.dot.log

Logical domain attributes.

### Module

[MEI.shared](#)

### Attributes

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
att.dot.log → @evaluate

**@form** (*optional*) Records the function of the dot. Allowed values are: "**aug**" (*Augmentation dot.*), "**div**" (*Dot of division.*)  
att.dot.log → @form

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.  
att.dot.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.  
att.dot.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.  
att.dot.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.  
att.dot.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.  
att.dot.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).  
att.dot.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).  
att.dot.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).  
att.dot.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).  
att.dot.log → @when

## Available at

**<dot>** Dot of augmentation or division.  
att.dot.log → <dot>

## Declaration

```
<classSpec ident="att.dot.log" module="MEI.shared" type="atts">
<desc xml:lang="en">Logical domain attributes.</desc>
<classes>
  <memberOf key="att.controlEvent"/>
</classes>
<attList>
  <attDef ident="form" usage="opt">
    <desc xml:lang="en">Records the function of the dot.</desc>
    <valList type="closed">
      <valItem ident="aug">
        <desc xml:lang="en">Augmentation dot.</desc>
      </valItem>
      <valItem ident="div">
        <desc xml:lang="en">Dot of division.</desc>
      </valItem>
    </valList>
  </attDef>
</attList>
</classSpec>
```

## att.dot.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.dot.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.dot.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.dot.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.dot.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.dot.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.dot.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.dot.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*).

att.dot.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.dot.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.dot.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.dot.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dot.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.dot.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.dot.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.dot.vis → @loc

**@oloc** (*optional*) Records staff location in terms of written octave. Value conforms to [data.OCTAVE](#).

att.dot.vis → @oloc

**@ploc** (*optional*) Captures staff location in terms of written pitch name. Value conforms to [data.PITCHNAME](#).

att.dot.vis → @ploc

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dot.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.dot.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.dot.vis → @y

## Available at

**<dot>** Dot of augmentation or division.

att.dot.vis → <dot>

## Declaration

```
<classSpec ident="att.dot.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

DEVELOPMENT  
VERSION

## att.duration.additive

Attributes that permit total duration to be represented by multiple values.

### Module

[MEI.shared](#)

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.duration.additive → @dur

### Available at

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.duration.additive → <annot>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.duration.additive → <beamSpan>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.duration.additive → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.duration.additive → <bracketSpan>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#),

[<dynam>](#) or [<repeatMark>](#).

att.duration.additive → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.duration.additive → <dynam>

**<f>** Single element of a figured bass indication.

att.duration.additive → <f>

**<fing>** finger – An individual finger in a fingering indication.

att.duration.additive → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.duration.additive → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.duration.additive → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.duration.additive → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.duration.additive → <harm>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.duration.additive → <line>

**<mRest>** Complete measure rest in any meter.

att.duration.additive → <mRest>

**<mSpace>** A measure containing only empty space in any meter.

att.duration.additive → <mSpace>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.duration.additive → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.duration.additive → <ornam>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.duration.additive → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.duration.additive → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.duration.additive → <slur>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.duration.additive → <trill>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.duration.additive → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.duration.additive → <tupletSpan>

## Declaration

```
<classSpec ident="att.duration.additive" module="MEI.shared" type="atts">

## att.duration.default

Attributes that provide a durational default value.

### Module

[MEI.shared](#)

### Attributes

**@dur.default** (*optional*) Contains a default duration in those situations when the first note, rest, chord, etc. in a measure does not have a duration specified. Value conforms to [data.DURATION](#).

att.duration.default → @dur.default

**@num.default** (*optional*) Along with numbase.default, describes the default duration as a ratio. num.default is the first value in the ratio. Value is a positive integer.

att.duration.default → @num.default

**@numbase.default** (*optional*) Along with num.default, describes the default duration as a ratio. numbase.default is the second value in the ratio. Value is a positive integer.

att.duration.default → @numbase.default

### Available at

**<layerDef>** Container for layer meta-information.

att.duration.default → <layerDef>

**<scoreDef>** Container for score meta-information.

att.duration.default → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.duration.default → <staffDef>

### Declaration

## att.duration.ges

Attributes that record performed duration that differs from a feature's written duration.

### Referenced in chapters

[14.5.1 PPQ in scoreDef and staffDef](#)

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.duration.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration. Value conforms to [data.DURATION.GESTURAL](#).

att.duration.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.duration.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.duration.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.duration.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.duration.ges → @dur.recip

### Available at

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.duration.ges → <annot>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.duration.ges → <beamSpan>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.duration.ges → <bracketSpan>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.duration.ges → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.duration.ges → <chord>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.duration.ges → <cpMark>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.duration.ges → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.duration.ges → <dynam>

**<f>** Single element of a figured bass indication.

att.duration.ges → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.duration.ges → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.duration.ges → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.duration.ges → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.duration.ges → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.duration.ges → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.duration.ges → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.duration.ges → <harm>

**<harpPedal>** Harp pedal diagram.

att.duration.ges → <harpPedal>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.duration.ges → <line>

**<mRest>** Complete measure rest in any meter.

att.duration.ges → <mRest>

**<mSpace>** A measure containing only empty space in any meter.

att.duration.ges → <mSpace>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as [<add>](#), [<del>](#), etc.

att.duration.ges → <metaMark>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.duration.ges → <multiRest>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.duration.ges → <nc>

**<note>** A single pitched event.

att.duration.ges → <note>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.duration.ges → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.duration.ges → <ornam>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.duration.ges → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.duration.ges → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.duration.ges → <rest>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.duration.ges → <slur>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.duration.ges → <space>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.duration.ges → <trill>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.duration.ges → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.duration.ges → <tupletSpan>

# att.duration.log

Attributes that express duration in musical terms.

## Module

[MEI.shared](#)

## Attributes

**@dur** (*optional*) Records the duration of a feature using the relative durational values provided by the data.DURATION datatype. Value conforms to [data.DURATION](#).

att.duration.log → @dur

## Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.duration.log → <ambNote>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.duration.log → <bTrem>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.duration.log → <chord>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.duration.log → <fTrem>

**<halfmRpt>** A half-measure repeat in any meter.

att.duration.log → <halfmRpt>

**<note>** A single pitched event.

att.duration.log → <note>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.duration.log → <space>

## Declaration

```

<classSpec ident="att.duration.log" module="MEI.shared" type="atts">

DEVELOPMENT  
VERSION

# att.duration.quality

Attribute that expresses duration for a given mensural note symbol.

## Module

[MEI.mensural](#)

## Attributes

**@dur.quality** (*recommended*) Encodes the durational quality of a mensural note using the values provided by the data.DURQUALITY.mensural datatype (i.e., the perfect / imperfect / altered / major / minor / duplex quality of a note). Value conforms to [data.DURQUALITY.mensural](#).  
 att.duration.quality → @dur.quality

## Available at

**<note>** A single pitched event.

att.duration.quality → <note>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.duration.quality → <space>

## Constraints

Duplex quality can only be used with longas (in Ars antiqua).

Maior / minor quality can only be used with semibreves (in Ars antiqua).

## Declaration

```

<classSpec ident="att.duration.quality" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Attribute that expresses duration for a given mensural note
  symbol.</desc>
  <constraintSpec ident="check_duplex_quality" scheme="schematron">
    <constraint>
      <sch:rule context="(mei:note|mei:space)[@dur.quality='duplex']">
        <sch:assert test="@dur='longa'"> Duplex quality can only be used with longas (in
          Ars antiqua). </sch:assert>
      </sch:rule>
    </constraint>
  </constraintSpec>
  <constraintSpec ident="check_maiorminor_quality" scheme="schematron">
    <constraint>
      <sch:rule context="(mei:note|mei:space)[@dur.quality='maiор' or
      @dur.quality='minor']">
        <sch:assert test="@dur='semibrevis'"> Maior / minor quality can only be used with
        semibreves (in Ars antiqua). </sch:assert>
      </sch:rule>
    </constraint>
  </constraintSpec>

```

```
</constraint>
</constraintSpec>
<attList>
  <attDef ident="dur.quality" usage="rec">

    </datatype>
  </attDef>
</attList>
</classSpec>
```

## att.duration.ratio

Attributes that describe duration as a ratio.

### Module

[MEI.shared](#)

### Attributes

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.duration.ratio → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.duration.ratio → @numbase

### Available at

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.duration.ratio → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.duration.ratio → <mensuration>

**<note>** A single pitched event.

att.duration.ratio → <note>

**<proport>** Description of note duration as arithmetic ratio.

att.duration.ratio → <proport>

**<rest>** A non-sounding event found in the source being transcribed.

att.duration.ratio → <rest>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.duration.ratio → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.duration.ratio → <tupletSpan>

### Declaration

```
<classSpec ident="att.duration.ratio" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe duration as a ratio.</desc>
  <attList>
    <attDef ident="num" usage="opt">

    value in the ratio, while numbase is the second.</desc>
    <datatype>
        <rng:data type="positiveInteger"/>
    </datatype>
</attDef>
</attList>
</classSpec>
```

## att.dynam.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.dynam.anl → <dynam>

#### Declaration

```
<classSpec ident="att.dynam.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.dynam.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.dynam.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.dynam.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.dynam.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.dynam.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.dynam.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum **\*\*recip** value. Value is a [token](#).

att.dynam.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.dynam.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.dynam.ges → @tstamp2.real

**@val** (*optional*) MIDI number. Value conforms to [data.MIDIValue](#).

att.dynam.ges → @val

**@val2** (*optional*) MIDI number. Value conforms to [data.MIDIValue](#).

att.dynam.ges → @val2

### Available at

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.dynam.ges → <dynam>

### Declaration

```
<classSpec ident="att.dynam.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
```

```
<classes>
  <memberOf key="att.duration.ges"/>

  <memberOf key="att.midiValue2"/>
  <memberOf key="att.timestamp2.ges"/>
</classes>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.dynam.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.dynam.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.dynam.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.dynam.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.dynam.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.dynam.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.dynam.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.dynam.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.dynam.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.dynam.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.dynam.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.dynam.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.dynam.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.dynam.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.dynam.log → @when

## Available at

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.dynam.log → <dynam>

## Declaration

```
<classSpec ident="att.dynam.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.dynam.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dynam.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.dynam.vis → @endto

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.dynam.vis → @extender

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dynam.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.dynam.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.dynam.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.dynam.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.dynam.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.dynam.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.dynam.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.dynam.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.dynam.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dynam.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.dynam.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.dynam.vis → @to

**@vgrp** (*optional*) Provides a label for members of a vertically aligned group. Value is a positive integer.

att.dynam.vis → @vgrp

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.dynam.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.dynam.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.dynam.vis → @y

## Available at

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.dynam.vis → <dynam>

## Declaration

```
<classSpec ident="att.dynam.vis" module="MEI.visual" type="atts">

    <memberOf key="att.visualOffset2.to"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.edit

Attributes describing the nature of an encoded scholarly intervention or interpretation.

### Referenced in chapters

[11.2 Editorial Markup](#), [11.2.2 Apparent Errors](#)

### Module

[MEI.edittrans](#)

### Attributes

**@cert** (*optional*) Signifies the degree of certainty or precision associated with a feature. Value conforms to [data.CERTAINTY](#).

att.edit → @cert

**@evidence** (*optional*) Indicates the nature of the evidence supporting the reliability or accuracy of the intervention or interpretation. Allowed values are: "**internal**" (*There is evidence within the document to support the intervention.*), "**external**" (*There is evidence outside the document to support the intervention.*), "**conjecture**" (*The assertion has been made by the editor, cataloguer, or scholar on the basis of their expertise.*)

att.edit → @evidence

**@source** (*optional*) Contains a list of one or more pointers indicating the sources which attest to a given reading. Each value should correspond to the ID of a [<source>](#) or [<manifestation>](#) element located in the document header. One or more values from [data.URI](#), separated by spaces.

att.edit → @source

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.edit → <abbr>

**<add>** Marks an addition to the text.

att.edit → <add>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.edit → <addName>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.edit → <bloc>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.edit → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.edit → <corr>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.edit → <country>

**<date>** A string identifying a point in time or the time period between two such points.

att.edit → <date>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.edit → <del>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.edit → <district>

**<event>** Contains a free-text event description.

att.edit → <event>

**<expan>** Contains the expansion of an abbreviation.

att.edit → <expan>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.edit → <famName>

**<foreName>** Contains a forename, given or baptismal name.

att.edit → <foreName>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.edit → <gap>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.edit → <genName>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.edit → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.edit → <geogName>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.edit → <handShift>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.edit → <metaMark>

**<name>** Proper noun or noun phrase.

att.edit → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.edit → <nameLink>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.edit → <orig>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.edit → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.edit → <perfResList>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.edit → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.edit → <persName>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.edit → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.edit → <region>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.edit → <restore>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.edit → <roleName>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.edit → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.edit → <sic>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.edit → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.edit → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.edit → <supplied>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.edit → <unclear>

## Declaration

```
<classSpec ident="att.edit" module="MEI.edittrans" type="atts">
  <desc xml:lang="en">Attributes describing the nature of an encoded scholarly intervention
  or interpretation.</desc>
  <classes>
    <memberOf key="att.source"/>
```

```
<memberOf key="att.evidence"/>
</classes>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.enclosingChars

Attributes that capture characters used to enclose symbols having a cautionary or editorial function.

### Module

[MEI.shared](#)

### Attributes

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.enclosingChars → @enclose

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.enclosingChars → <accid>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.enclosingChars → <ambNote>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.enclosingChars → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.enclosingChars → <artic>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.enclosingChars → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.enclosingChars → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.enclosingChars → <cpMark>

**<episema>** Episema.

att.enclosingChars → <episema>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.enclosingChars → <fermata>

**<hispanTick>** Hispanic tick.

att.enclosingChars → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.enclosingChars → <keyAccid>

**<liquegent>** Liquescent.

att.enclosingChars → <liquegent>

**<meterSig>** Written meter signature.

att.enclosingChars → <meterSig>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.enclosingChars → <mordent>

**<neume>** Sign representing one or more musical pitches.

att.enclosingChars → <neume>

**<note>** A single pitched event.

att.enclosingChars → <note>

**<oriscus>** Oriscus.

att.enclosingChars → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.enclosingChars → <ornam>

**<quilisma>** Quilisma.

att.enclosingChars → <quilisma>

**<rest>** A non-sounding event found in the source being transcribed.

att.enclosingChars → <rest>

**<signifLet>** Significantive letter(s).

att.enclosingChars → <signifLet>

**<strophicus>** Strophicus.

att.enclosingChars → <strophicus>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.enclosingChars → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.enclosingChars → <turn>

</classSpec>
```

## att.ending.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

#### Available at

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.  
att.ending.ges → <ending>

#### Declaration

```
<classSpec ident="att.ending.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.ending.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.ending.log → @when

### Available at

[<ending>](#) Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.ending.log → <ending>

### Declaration

```
<classSpec ident="att.ending.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.alignment"/>
  </classes>
</classSpec>
```

# att.ending.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).  
 att.ending.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).  
 att.ending.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).  
 att.ending.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.  
 att.ending.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).  
 att.ending.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).  
 att.ending.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).  
 att.ending.vis → @lwidth

## Available at

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.  
 att.ending.vis → <ending>

## Declaration

```
<classSpec ident="att.ending.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.lineRend"/>
  </classes>
</classSpec>
```

## att.endings

Attributes that record ending style information

### Module

[MEI.shared](#)

### Attributes

**@ending.rend** (*optional*) Describes where ending marks should be displayed. Allowed values are: "**top**" (*Ending rendered only above top staff.*), "**barred**" (*Ending rendered above staves that have bar lines drawn across them.*), "**grouped**" (*Endings rendered above staff groups.*)

att.endings → @ending.rend

### Available at

**<scoreDef>** Container for score meta-information.

att.endings → <scoreDef>

### Declaration

```
<classSpec ident="att.endings" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record ending style information</desc>
  <attList>
    <attDef ident="ending.rend" usage="opt">
      <desc xml:lang="en">Describes where ending marks should be displayed.</desc>
      <valList type="closed">
        <valItem ident="top">
          <desc xml:lang="en">Ending rendered only above top staff.</desc>
        </valItem>
        <valItem ident="barred">
          <desc xml:lang="en">Ending rendered above staves that have bar lines drawn
          across them.</desc>
        </valItem>
        <valItem ident="grouped">
          <desc xml:lang="en">Endings rendered above staff groups.</desc>
        </valItem>
      </valList>
    </attDef>
  </attList>
</classSpec>
```

## att.episema.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

[\*\*<episema>\*\*](#) Episema.  
att.episema.anl → <episema>

#### Declaration

```
<classSpec ident="att.episema.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.episema.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

`@artic.ges` (*optional*) Records performed articulation that differs from the written value. One or more values from [data.ARTICULATION](#), separated by spaces.

att.episema.ges → @artic.ges

### Available at

[`<episema>`](#) Episema.

att.episema.ges → <episema>

### Declaration

```
<classSpec ident="att.episema.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.articulation.ges"/>
  </classes>
</classSpec>
```

# att.episema.log

Logical domain attributes.

## Module

[MEI.neumes](#)

## Attributes

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
 att.episema.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.  
 att.episema.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.  
 att.episema.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.  
 att.episema.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.  
 att.episema.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.  
 att.episema.log → @staff

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).  
 att.episema.log → @when

## Available at

[\*\*<episema>\*\*](#) Episema.

att.episema.log → <episema>

## Declaration

```
<classSpec ident="att.episema.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <!-- att.controlEvent class expanded here in order to disallow att.timestamp.* -->
    <memberOf key="att.alignment"/>
    <memberOf key="att.layerIdent"/>
    <memberOf key="att.partIdent"/>
    <memberOf key="att.plist"/>
    <memberOf key="att.staffIdent"/>
    <memberOf key="att.targetEval"/>
  </classes>
</classSpec>
```

# att.episema.vis

Visual domain attributes.

## Referenced in chapters

[6.4.4 Episema attributes](#)

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.episema.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.episema.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.episema.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.episema.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.episema.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.episema.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.episema.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.episema.vis → @fontweight

**@form** (*recommended*) Allowed values are: "**h**" (*Horizontal stroke*), "**v**" (*Vertical stroke*).

att.episema.vis → @form

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*).

att.episema.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.episema.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.episema.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.episema.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.episema.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.episema.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.episema.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.episema.vis → @loc

**@place** (*recommended*) Captures the placement of the episema with respect to the neume or neume component with which it is associated. Value conforms to [data.EVENTREL](#).

att.episema.vis → @place

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.episema.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.episema.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.episema.vis → @y

## Available at

**<episema>** Episema.

att.episema.vis → <episema>

## Declaration

```
<classSpec ident="att.episema.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>

## att.event

Attributes that apply to all written events, e.g., note, chord, rest, etc.

### Module

[MEI.shared](#)

### Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.event → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.event → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.event → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.event → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.event → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.event → @when

### Available at

**<bTrem>** A rapid alternation on a single pitch or chord.

att.event → <bTrem>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.event → <beam>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.event → <beatRpt>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.event → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.event → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.event → <clefGrp>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.event → <fTrem>

**<graceGrp>** A container for a sequence of grace notes.

att.event → <graceGrp>

**<halfmRpt>** A half-measure repeat in any meter.

att.event → <halfmRpt>

**<mRest>** Complete measure rest in any meter.

att.event → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.event → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.event → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.event → <mSpace>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.event → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.event → <multiRpt>

**<note>** A single pitched event.

att.event → <note>

**<pad>** An indication of extra visual space between notational elements.

att.event → <pad>

**<rest>** A non-sounding event found in the source being transcribed.

att.event → <rest>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.event → <space>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.event → <tuplet>

## Declaration

DEVELOPMENT  
VERSION

## att.evidence

Attributes describing the support for and the certainty of an assertion.

### Referenced in chapters

[11.2 Editorial Markup](#), [11.2.2 Apparent Errors](#)

### Module

[MEI.shared](#)

### Attributes

**@cert** (*optional*) Signifies the degree of certainty or precision associated with a feature. Value conforms to [data.CERTAINTY](#).

att.evidence → @cert

**@evidence** (*optional*) Indicates the nature of the evidence supporting the reliability or accuracy of the intervention or interpretation. Allowed values are: "**internal**" (*There is evidence within the document to support the intervention.*), "**external**" (*There is evidence outside the document to support the intervention.*), "**conjecture**" (*The assertion has been made by the editor, cataloguer, or scholar on the basis of their expertise.*)

att.evidence → @evidence

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.evidence → <abbr>

**<add>** Marks an addition to the text.

att.evidence → <add>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.evidence → <addName>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.evidence → <arranger>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.evidence → <author>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.evidence → <bloc>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.evidence → <composer>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.evidence → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.evidence → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.evidence → <corr>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.evidence → <country>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.evidence → <cutout>

**<date>** A string identifying a point in time or the time period between two such points.

att.evidence → <date>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.evidence → <del>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.evidence → <dimensions>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.evidence → <district>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.evidence → <editor>

**<event>** Contains a free-text event description.

att.evidence → <event>

**<expan>** Contains the expansion of an abbreviation.

att.evidence → <expan>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.evidence → <famName>

**<foreName>** Contains a forename, given or baptismal name.

att.evidence → <foreName>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.evidence → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.evidence → <gap>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.evidence → <genName>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.evidence → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.evidence → <geogName>

**<hand>** Defines a distinct scribe or handwriting style.

att.evidence → <hand>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.evidence → <handShift>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.evidence → <librettist>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.evidence → <lyricist>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.evidence → <metaMark>

**<name>** Proper noun or noun phrase.

att.evidence → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.evidence → <nameLink>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.evidence → <orig>

**<patch>** Describes a physical writing surface attached to the original document.

att.evidence → <patch>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.evidence → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.evidence → <perfResList>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.evidence → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.evidence → <persName>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.evidence → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.evidence → <region>

**<relation>** Describes a relationship or linkage amongst entities.

att.evidence → <relation>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.evidence → <restore>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.evidence → <roleName>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.evidence → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.evidence → <sic>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.evidence → <sponsor>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.evidence → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.evidence → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.evidence → <supplied>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.evidence → <unclear>

## att.expandable

Attributes that indicate whether to render a repeat symbol or the source material to which it refers.

### Module

MEI.cmn

### Attributes

**@expand** (*optional*) Indicates whether to render a repeat symbol or the source material to which it refers. A value of 'true' renders the source material, while 'false' displays the repeat symbol. Value conforms to [data.BOOLEAN](#).

att.expandable → @expand

### Available at

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.expandable → <beatRpt>

**<halfmRpt>** A half-measure repeat in any meter.

att.expandable → <halfmRpt>

**<mRpt>** An indication that the previous measure should be repeated.

att.expandable → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.expandable → <mRpt2>

**<multiRpt>** Multiple repeated measures.

att.expandable → <multiRpt>

### Declaration

```
<classSpec ident="att.expandable" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that indicate whether to render a repeat symbol or the source material to which it refers.</desc>

```

## att.extSym

Attributes used to associate MEI features with corresponding glyphs in an externally-defined standard such as SMuFL.

### Referenced in chapters

[2.4.2.3 Defining a Specific Graphical Rendition for a Semantic Element](#)

### Module

[MEI.externalsymbols](#)

### Attributes

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

`att.extSym` → `@glyph.auth`

**@glyph.name** (*optional*) Glyph name. Value is plain text.

`att.extSym` → `@glyph.name`

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

`att.extSym` → `@glyph.num`

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

`att.extSym` → `@glyph.uri`

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

`att.extSym` → `<accid>`

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

`att.extSym` → `<arpeg>`

**<artic>** An indication of how to play a note or chord.

`att.extSym` → `<artic>`

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

`att.extSym` → `<barLine>`

**<beatRpt>** An indication that material on a preceding beat should be repeated.

`att.extSym` → `<beatRpt>`

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

`att.extSym` → `<bracketSpan>`

**<breathe>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

`att.extSym` → `<breathe>`

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.extSym → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.extSym → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.extSym → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.extSym → <cpMark>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.extSym → <custos>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.extSym → <divLine>

**<dot>** Dot of augmentation or division.

att.extSym → <dot>

**<episema>** Episema.

att.extSym → <episema>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.extSym → <fermata>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.extSym → <gliss>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.extSym → <grpSym>

**<halfmRpt>** A half-measure repeat in any meter.

att.extSym → <halfmRpt>

**<harpPedal>** Harp pedal diagram.

att.extSym → <harpPedal>

**<hispanTick>** Hispanic tick.

att.extSym → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.extSym → <keyAccid>

**<liquegent>** Liquescent.

att.extSym → <liquegent>

**<mRest>** Complete measure rest in any meter.

att.extSym → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.extSym → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.extSym → <mRpt2>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.extSym → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.extSym → <mensuration>

**<meterSig>** Written meter signature.

att.extSym → <meterSig>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.extSym → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.extSym → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.extSym → <multiRpt>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.extSym → <nc>

**<neume>** Sign representing one or more musical pitches.

att.extSym → <neume>

**<note>** A single pitched event.

att.extSym → <note>

**<oriscus>** Oriscus.

att.extSym → <oriscus>

**<pedal>** Piano pedal mark.

att.extSym → <pedal>

**<proport>** Description of note duration as arithmetic ratio.

att.extSym → <proport>

**<quilisma>** Quilisma.

att.extSym → <quilisma>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.extSym → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.extSym → <rest>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.extSym → <sb>

**<signifLet>** Significantive letter(s).

att.extSym → <signifLet>

**<stem>** A stem element.

att.extSym → <stem>

**<strophicus>** Strophicus.

att.extSym → <strophicus>

**<symbol>** A reference to a previously defined symbol.

att.extSym → <symbol>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.extSym → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.extSym → <turn>

## Declaration

```
<classSpec ident="att.extSym" module="MEI.externalsymbols" type="atts">

## att.extSym.auth

Attributes that point to an external symbol authority.

### Module

[MEI.externalsymbols](#)

### Attributes

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*).  
`att.extSym.auth` → `@glyph.auth`

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).  
`att.extSym.auth` → `@glyph.uri`

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.  
`att.extSym.auth` → `<accid>`

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".  
`att.extSym.auth` → `<arpeg>`

**<artic>** An indication of how to play a note or chord.  
`att.extSym.auth` → `<artic>`

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.  
`att.extSym.auth` → `<barLine>`

**<beatRpt>** An indication that material on a preceding beat should be repeated.  
`att.extSym.auth` → `<beatRpt>`

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.  
`att.extSym.auth` → `<bracketSpan>`

**<breathe>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.  
`att.extSym.auth` → `<breathe>`

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.  
`att.extSym.auth` → `<caesura>`

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.  
`att.extSym.auth` → `<chord>`

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.  
`att.extSym.auth` → `<clef>`

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.extSym.auth → <cpMark>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.extSym.auth → <custos>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.extSym.auth → <divLine>

**<dot>** Dot of augmentation or division.

att.extSym.auth → <dot>

**<episema>** Episema.

att.extSym.auth → <episema>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.extSym.auth → <fermata>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.extSym.auth → <gliss>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.extSym.auth → <grpSym>

**<halfmRpt>** A half-measure repeat in any meter.

att.extSym.auth → <halfmRpt>

**<harpPedal>** Harp pedal diagram.

att.extSym.auth → <harpPedal>

**<hispanTick>** Hispanic tick.

att.extSym.auth → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.extSym.auth → <keyAccid>

**<liquecent>** Liquescent.

att.extSym.auth → <liquecent>

**<mRest>** Complete measure rest in any meter.

att.extSym.auth → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.extSym.auth → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.extSym.auth → <mRpt2>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.extSym.auth → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.extSym.auth → <mensuration>

**<meterSig>** Written meter signature.

att.extSym.auth → <meterSig>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.extSym.auth → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.extSym.auth → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.extSym.auth → <multiRpt>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.extSym.auth → <nc>

**<neume>** Sign representing one or more musical pitches.

att.extSym.auth → <neume>

**<note>** A single pitched event.

att.extSym.auth → <note>

**<oriscus>** Oriscus.

att.extSym.auth → <oriscus>

**<pedal>** Piano pedal mark.

att.extSym.auth → <pedal>

**<proport>** Description of note duration as arithmetic ratio.

att.extSym.auth → <proport>

**<quilisma>** Quilisma.

att.extSym.auth → <quilisma>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.extSym.auth → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.extSym.auth → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.extSym.auth → <rest>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.extSym.auth → <sb>

**<signifLet>** Significantive letter(s).

att.extSym.auth → <signifLet>

**<stem>** A stem element.

att.extSym.auth → <stem>

**<strophicus>** Strophicus.

att.extSym.auth → <strophicus>

**<symbol>** A reference to a previously defined symbol.

att.extSym.auth → <symbol>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.extSym.auth → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.extSym.auth → <turn>

## Declaration

```

<classSpec ident="att.extSym.auth" module="MEI.externalsymbols" type="atts">

## att.extSym.names

Attributes that specify names or values taken from an external symbol authority.

### Module

[MEI.externalsymbols](#)

### Attributes

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.extSym.names → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.extSym.names → @glyph.num

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.extSym.names → <accid>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.extSym.names → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.extSym.names → <artic>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.extSym.names → <barLine>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.extSym.names → <beatRpt>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.extSym.names → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.extSym.names → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.extSym.names → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.extSym.names → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.extSym.names → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.extSym.names → <cpMark>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.extSym.names → <custos>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.extSym.names → <divLine>

**<dot>** Dot of augmentation or division.

att.extSym.names → <dot>

**<episema>** Episema.

att.extSym.names → <episema>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.extSym.names → <fermata>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.extSym.names → <gliss>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.extSym.names → <grpSym>

**<halfmRpt>** A half-measure repeat in any meter.

att.extSym.names → <halfmRpt>

**<harpPedal>** Harp pedal diagram.

att.extSym.names → <harpPedal>

**<hispanTick>** Hispanic tick.

att.extSym.names → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.extSym.names → <keyAccid>

**<liquecent>** Liquescent.

att.extSym.names → <liquecent>

**<mRest>** Complete measure rest in any meter.

att.extSym.names → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.extSym.names → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.extSym.names → <mRpt2>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.extSym.names → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.extSym.names → <mensuration>

**<meterSig>** Written meter signature.

att.extSym.names → <meterSig>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.extSym.names → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.extSym.names → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.extSym.names → <multiRpt>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.extSym.names → <nc>

**<neume>** Sign representing one or more musical pitches.

att.extSym.names → <neume>

**<note>** A single pitched event.

att.extSym.names → <note>

**<oriscus>** Oriscus.

att.extSym.names → <oriscus>

**<pedal>** Piano pedal mark.

att.extSym.names → <pedal>

**<proport>** Description of note duration as arithmetic ratio.

att.extSym.names → <proport>

**<quilisma>** Quilisma.

att.extSym.names → <quilisma>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.extSym.names → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.extSym.names → <rest>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.extSym.names → <sb>

**<signifLet>** Significantive letter(s).

att.extSym.names → <signifLet>

**<stem>** A stem element.

att.extSym.names → <stem>

**<strophicus>** Strophicus.

att.extSym.names → <strophicus>

**<symbol>** A reference to a previously defined symbol.

att.extSym.names → <symbol>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.extSym.names → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.extSym.names → <turn>

## Constraints

@glyph.name attribute should have content.

SMuFL version 1.18 uses the range U+E000 - U+ECBF.

## Declaration

```

DEVELOPMENT  
VERSION

## att.extender

Attributes that describe extension symbols, typically lines. Members of this class are also typically members of the att.lineRend class.

### Referenced in chapters

10.2.1.3 Indications of Harmony in the Music Text, 10.2.1.3.1 Figured Bass

### Module

MEI.shared

### Attributes

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.extender → @extender

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.extender → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.extender → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.extender → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.extender → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.extender → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.extender → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.extender → @lwidth

### Available at

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.extender → <attacca>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.extender → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.extender → <dynam>

**<f>** Single element of a figured bass indication.

att.extender → <f>

**<fing>** finger – An individual finger in a fingering indication.

att.extender → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.extender → <fingGrp>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.extender → <harm>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.extender → <octave>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.extender → <repeatMark>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.extender → <tempo>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.extender → <trill>

## Declaration

  </attList>
</classSpec>
```

## att.extent

Provides attributes for describing the size of an entity.

### Module

MEI.shared

### Attributes

**@atleast** (*optional*) Gives a minimum estimated value for an approximate measurement. Value is a decimal number.

att.extent → @atleast

**@atmost** (*optional*) Gives a maximum estimated value for an approximate measurement. Value is a decimal number.

att.extent → @atmost

**@confidence** (*optional*) Specifies the degree of statistical confidence (between zero and one) that a value falls within the range specified by min and max, or the proportion of observed values that fall within that range. Value conforms to [data.CONFIDENCE](#).

att.extent → @confidence

**@extent** (*optional*) Captures a measurement, count, or description. When extent contains a numeric value, use the unit attribute to indicate the measurement unit. Value is plain text.

att.extent → @extent

**@max** (*optional*) Where the measurement summarizes more than one observation or a range of values, supplies the maximum value observed. Value is a decimal number.

att.extent → @max

**@min** (*optional*) Where the measurement summarizes more than one observation or a range of values, supplies the minimum value observed. Value is a decimal number.

att.extent → @min

**@unit** (*optional*) Indicates the unit of measurement. Allowed values are: "byte" (Byte.), "char" (Character.), "cm" (Centimeter.), "deg" (Degree.), "in" (Inch.), "issue" (Serial issue.), "ft" (Foot.), "m" (Meter.), "mm" (Millimeter.), "page" (Page.), "pc" (Pica.), "pt" (Point.), "px" (Pixel.), "rad" (Radian.), "record" (Record.), "vol" (Serial volume.), "vu" (MEI virtual unit.).

att.extent → @unit

### Available at

**<add>** Marks an addition to the text.

att.extent → <add>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.extent → <biblScope>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.extent → <corr>

**<damage>** Contains an area of damage to the physical medium.

att.extent → <damage>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.extent → <del>

**<expan>** Contains the expansion of an abbreviation.

att.extent → <expan>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.extent → <gap>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.extent → <orig>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.extent → <reg>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.extent → <restore>

**<sic>** Contains apparently incorrect or inaccurate material.

att.extent → <sic>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.extent → <supplied>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.extent → <unclear>

## Constraints

The @unit attribute is recommended.

Separation into value (@extent) and unit (@unit) is recommended.

## Declaration

```

<classSpec ident="att.extent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Provides attributes for describing the size of an entity.</desc>
  <classes>
    <memberOf key="att.measurement"/>
    <memberOf key="att.ranging"/>
  </classes>
  <attList>
    <attDef ident="extent" usage="opt">
      <desc xml:lang="en">Captures a measurement, count, or description. When extent contains a numeric value, use the unit attribute to indicate the measurement unit.</desc>
      <datatype>
        <rng:data type="string"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

```
</datatype>
<constraintSpec ident="check_extent" scheme="schematron">
    <constraint>
        <sch:rule context="@extent[matches(normalize-space(.), '^\\d+(\\.\\d+)?$')]">
            <sch:assert role="warning" test="../@unit">The @unit attribute is
                recommended.</sch:assert>
        </sch:rule>
        <sch:rule context="@extent[matches(., '\\d+(\\.\\d+)?\\s')]">
            <sch:assert role="warning" test="../@unit">Separation into value (@extent)
                and unit (@unit) is recommended.</sch:assert>
        </sch:rule>
    </constraint>
</constraintSpec>
</attDef>
</attList>
</classSpec>
```

## att.f.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<f>** Single element of a figured bass indication.

att.f.anl → <f>

#### Declaration

```
<classSpec ident="att.f.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.f.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.f.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.f.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.f.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.f.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.f.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.f.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.f.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.f.ges → @tstamp2.real

### Available at

**<f>** Single element of a figured bass indication.

att.f.ges → <f>

### Declaration

```
<classSpec ident="att.f.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

# att.f.log

Logical domain attributes.

## Module

[MEI.harmony](#)

## Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.f.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.f.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.f.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.f.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.f.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.f.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.f.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.f.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.f.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.f.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.f.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.f.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.f.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.f.log → @when

## Available at

**<f>** Single element of a figured bass indication.

att.f.log → <f>

## Declaration

```
<classSpec ident="att.f.log" module="MEI.harmony" type="atts">

## att.f.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.f.vis → @altsym

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.f.vis → @extender

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.f.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.f.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.f.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.f.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.f.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.f.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.f.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.f.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.f.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.f.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.f.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facs attribute. Value is a decimal number.

att.f.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facs attribute. Value is a decimal number.

att.f.vis → @y

## Available at

**<f>** Single element of a figured bass indication.

att.f.vis → <f>

## Remarks

If tstamp2 is not provided, then the extender should be drawn based on the value of tstamp2 on the harm ancestor.

## Declaration

```
<classSpec ident="att.f.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.xy"/>
  </classes>
  <remarks xml:lang="en">
    <p>If <att>tstamp2</att> is not provided, then the extender should be drawn based on the value of <att>tstamp2</att> on the harm ancestor.</p>
  </remarks>
</classSpec>
```

## att.fTrem.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.fTrem.anl → <fTrem>

#### Declaration

```
<classSpec ident="att.fTrem.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.fTrem.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

`@unitdur` (*optional*) The performed duration of an individual note in a measured tremolo. Value conforms to [data.DURATION.cmn](#).

`att.fTrem.ges` → `@unitdur`

### Available at

`<fTrem>` A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

`att.fTrem.ges` → `<fTrem>`

### Declaration

```
<classSpec ident="att.fTrem.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.tremMeasured"/>
  </classes>
</classSpec>
```

# att.fTrem.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@dots** (*optional*) Records the number of augmentation dots required by a written dotted duration. Value conforms to [data.AUGMENTDOT](#).

att.fTrem.log → @dots

**@dur** (*optional*) Records the duration of a feature using the relative durational values provided by the [data.DURATION](#) datatype. Value conforms to [data.DURATION](#).

att.fTrem.log → @dur

**@form** (*optional*) Describes the style of the tremolo. Allowed values are: "**meas**" (*Measured tremolo.*), "**unmeas**" (*Unmeasured tremolo.*)

att.fTrem.log → @form

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.fTrem.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.fTrem.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.fTrem.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.fTrem.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.fTrem.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.fTrem.log → @when

## Available at

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.fTrem.log → <fTrem>

## Declaration

```
<classSpec ident="att.fTrem.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.event"/>
    <memberOf key="att.augmentDots"/>
    <memberOf key="att.duration.log"/>
  </classes>

        </valItem>
      </valList>
    </attDef>
  </attList>
</classSpec>
```

# att.fTrem.vis

Visual domain attributes.

## Module

MEI.visual

## Attributes

**@beams** (*optional*) Indicates the number of beams present. Value is a positive integer.

att.fTrem.vis → @beams

**@beams.float** (*optional*) Captures the number of "floating" beams, i.e., those not attached to stems. Value is a positive integer, including 0.

att.fTrem.vis → @beams.float

**@float.gap** (*optional*) Records the amount of separation between floating beams and stems. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.fTrem.vis → @float.gap

## Available at

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.fTrem.vis → <fTrem>

## Constraints

The number of floating beams must be less than or equal to the total number of beams.

## Declaration

```

<classSpec ident="att.fTrem.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <attList>
    <attDef ident="beams" usage="opt">
      <desc xml:lang="en">Indicates the number of beams present.</desc>
      <datatype>

        <rng:ref name="data.MEASUREMENTUNSIGNED"/>
    </datatype>
</attDef>
</attList>
</classSpec>
```

## att.facsimile

Attributes that associate a feature corresponding with all or part of an image.

### Referenced in chapters

[12.1.1 Elements of the Facsimile Module](#)

### Module

[MEI.facsimile](#)

### Attributes

**@facs** (*optional*) Points to one or more images, portions of an image, or surfaces which correspond to the current element. One or more values from [data.URI](#), separated by spaces.

att.facsimile → @facs

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.facsimile → <abbr>

**<accid>** Records a temporary alteration to the pitch of a note.

att.facsimile → <accid>

**<actor>** Name of an actor appearing within a cast list.

att.facsimile → <actor>

**<add>** Marks an addition to the text.

att.facsimile → <add>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.facsimile → <addName>

**<addrLine>** Single line of a postal address.

att.facsimile → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.facsimile → <address>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.facsimile → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.facsimile → <ambitus>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.facsimile → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.facsimile → <annot>

**<argument>** Contains a formal list or prose description of topics addressed.

att.facsimile → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.facsimile → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.facsimile → <arranger>

**<artic>** An indication of how to play a note or chord.

att.facsimile → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.facsimile → <attacca>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.facsimile → <author>

**<avFile>** References an external digital audio or video file.

att.facsimile → <avFile>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.facsimile → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.facsimile → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.facsimile → <barLine>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.facsimile → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.facsimile → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.facsimile → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.facsimile → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.facsimile → <bibl>

**<biblList>** List of bibliographic references.

att.facsimile → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.facsimile → <biblScope>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.facsimile → <bloc>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.facsimile → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.facsimile → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.facsimile → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.facsimile → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.facsimile → <caption>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.facsimile → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.facsimile → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.facsimile → <castList>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.facsimile → <cb>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.facsimile → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.facsimile → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.facsimile → <clefGrp>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.facsimile → <colophon>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.facsimile → <composer>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.facsimile → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.facsimile → <corpName>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.facsimile → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.facsimile → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.facsimile → <creation>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.facsimile → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.facsimile → <custos>

**<damage>** Contains an area of damage to the physical medium.

att.facsimile → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.facsimile → <date>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.facsimile → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.facsimile → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.facsimile → <del>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.facsimile → <desc>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.facsimile → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.facsimile → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.facsimile → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.facsimile → <div>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.facsimile → <divLine>

**<dot>** Dot of augmentation or division.

att.facsimile → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.facsimile → <dynam>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.facsimile → <editor>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.facsimile → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.facsimile → <epigraph>

**<episema>** Episema.

att.facsimile → <episema>

**<event>** Contains a free-text event description.

att.facsimile → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.facsimile → <eventList>

**<expan>** Contains the expansion of an abbreviation.

att.facsimile → <expan>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.facsimile → <explicit>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.facsimile → <extent>

**<f>** Single element of a figured bass indication.

att.facsimile → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.facsimile → <fTrem>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.facsimile → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.facsimile → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.facsimile → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.facsimile → <fig>

**<fing>** finger – An individual finger in a fingering indication.

att.facsimile → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.facsimile → <fingGrp>

**<foreName>** Contains a forename, given or baptismal name.

att.facsimile → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.facsimile → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.facsimile → <funder>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.facsimile → <genName>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.facsimile → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.facsimile → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.facsimile → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.facsimile → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.facsimile → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.facsimile → <graphic>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.facsimile → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.facsimile → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.facsimile → <halfmRpt>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.facsimile → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.facsimile → <harm>

**<harpPedal>** Harp pedal diagram.

att.facsimile → <sharpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.facsimile → <head>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.facsimile → <heraldry>

**<hispanTick>** Hispanic tick.

att.facsimile → <hispanTick>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.facsimile → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.facsimile → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.facsimile → <imprint>

**<keyAccid>** Accidental in a key signature.

att.facsimile → <keyAccid>

**<keySig>** Written key signature.

att.facsimile → <keySig>

**<l>** Contains a single line of text within a line group.

att.facsimile → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.facsimile → <label>

**<labelAbbr>** A label on the pages following the first.

att.facsimile → <labelAbbr>

**<layer>** An independent stream of events on a staff.

att.facsimile → <layer>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.facsimile → <lb>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.facsimile → <lg>

**<li>** Single item in a <list>.

att.facsimile → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.facsimile → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.facsimile → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.facsimile → <line>

**<liquefiant>** Liquescent.

att.facsimile → <liquescent>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.facsimile → <list>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.facsimile → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.facsimile → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on **<measure>** does not adequately capture the appearance or placement of the measure number/label.

att.facsimile → <mNum>

**<mRest>** Complete measure rest in any meter.

att.facsimile → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.facsimile → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.facsimile → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.facsimile → <mSpace>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.facsimile → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.facsimile → <measure>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.facsimile → <mensur>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.facsimile → <metaMark>

**<meterSig>** Written meter signature.

att.facsimile → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.facsimile → <meterSigGrp>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.facsimile → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.facsimile → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.facsimile → <multiRpt>

**<name>** Proper noun or noun phrase.

att.facsimile → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.facsimile → <nameLink>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.facsimile → <nc>

**<ncGrp>** Collection of one or more neume components.

att.facsimile → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.facsimile → <neume>

**<note>** A single pitched event.

att.facsimile → <note>

**<num>** Numeric information in any form.

att.facsimile → <num>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.facsimile → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.facsimile → <oStaff>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.facsimile → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.facsimile → <orig>

**<oriscus>** Oriscus.

att.facsimile → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.facsimile → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.facsimile → <ossia>

**<p>** One or more text phrases that form a logical prose passage.

att.facsimile → <p>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.facsimile → <pb>

**<pedal>** Piano pedal mark.

att.facsimile → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.facsimile → <perfDuration>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.facsimile → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.facsimile → <persName>

**<pgFoot>** A running footer.

att.facsimile → <pgFoot>

**<pgHead>** A running header.

att.facsimile → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.facsimile → <phrase>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.facsimile → <physLoc>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.facsimile → <plateNum>

**<plica>** Plica

att.facsimile → <plica>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.facsimile → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.facsimile → <postCode>

**<proport>** Description of note duration as arithmetic ratio.

att.facsimile → <proport>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.facsimile → <pubPlace>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.facsimile → <publisher>

**<quilisma>** Quilisma.

att.facsimile → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.facsimile → <quote>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.facsimile → <recipient>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.facsimile → <refrain>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.facsimile → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.facsimile → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.facsimile → <relatedItem>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.facsimile → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.facsimile → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.facsimile → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.facsimile → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.facsimile → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.facsimile → <restore>

**<role>** Name of a dramatic role, as given in a cast list.

att.facsimile → <role>

**<roleDesc>** Describes a character's role in a drama.

att.facsimile → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.facsimile → <roleName>

**<rubric>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.facsimile → <rubric>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.facsimile → <sb>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.facsimile → <secFolio>

**<section>** Segment of music data.

att.facsimile → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.facsimile → <seg>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.facsimile → <series>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.facsimile → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.facsimile → <sic>

**<signifLet>** Significantive letter(s).

att.facsimile → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.facsimile → <slur>

**<sp>** Contains an individual speech in a performance text.

att.facsimile → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.facsimile → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.facsimile → <speaker>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.facsimile → <sponsor>

**<stack>** An inline table with a single column.

att.facsimile → <stack>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.facsimile → <staff>

**<staffGrp>** A group of bracketed or braced staves.

att.facsimile → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.facsimile → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.facsimile → <stamp>

**<stem>** A stem element.

att.facsimile → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.facsimile → <street>

**<strophicus>** Strophicus.

att.facsimile → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.facsimile → <styleName>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.facsimile → <supplied>

**<syl>** Individual lyric syllable.

att.facsimile → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.facsimile → <syllable>

**<symbol>** A reference to a previously defined symbol.

att.facsimile → <symbol>

**<table>** Contains text displayed in tabular form.

att.facsimile → <table>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.facsimile → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.facsimile → <tempo>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.facsimile → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.facsimile → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.facsimile → <tie>

**<title>** Title of a bibliographic entity.

att.facsimile → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.facsimile → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.facsimile → <titlePart>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a **<table>**.

att.facsimile → <tr>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.facsimile → <trill>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.facsimile → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.facsimile → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.facsimile → <turn>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.facsimile → <unclear>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.facsimile → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.facsimile → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.facsimile → <watermark>

## Constraints

@facs attribute should have content.

Each value in @facs should correspond to the @xml:id attribute of a surface or zone element.

## Declaration

```
<classSpec ident="att.facsimile" module="MEI.facsimile" type="atts">
  <desc xml:lang="en">Attributes that associate a feature corresponding with all or part of
  an image.</desc>
  <attList>
    <attDef ident="facs" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">facsimile</gloss>
      <desc versionDate="2022-10-18" xml:lang="en">Points to one or more images, portions of
      an image, or surfaces which correspond to the current element.</desc>
      <datatype minOccurs="1" maxOccurs="unbounded">
        <rng:ref name="data.URI"/>
      </datatype>
    <constraintSpec ident="check_facsTarget" scheme="schematron">
```

```

</classSpec>
```

## att.fermata.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.fermata.anl → <fermata>

#### Declaration

```
<classSpec ident="att.fermata.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

# att.fermata.ges

Gestural domain attributes.

## Module

[MEI.gestural](#)

## Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.fermata.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.fermata.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.fermata.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.fermata.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.fermata.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.fermata.ges → @dur.recip

## Available at

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.fermata.ges → <fermata>

## Declaration

```
<classSpec ident="att.fermata.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
  </classes>
</classSpec>
```

## att.fermata.log

Logical domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.fermata.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.fermata.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.fermata.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.fermata.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.fermata.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.fermata.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.fermata.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.fermata.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.fermata.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.fermata.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).  
att.fermata.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.fermata.log → @when

## Available at

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.fermata.log → <fermata>

## Declaration

```
<classSpec ident="att.fermata.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.startEndId"/>
  </classes>
</classSpec>
```

## att.fermata.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.fermata.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.fermata.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.fermata.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.fermata.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.fermata.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.fermata.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.fermata.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.fermata.vis → @fontweight

**@form** (*optional*) Describes the visual appearance of the fermata; that is, whether it occurs as upright or inverted. Allowed values are: "**inv**" (*Inverted, , curve or bracket below the dot.*), "**norm**" (*Upright; , curve or bracket above the dot.*)

att.fermata.vis → @form

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout.*)

att.fermata.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.fermata.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.fermata.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.fermata.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.fermata.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.fermata.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.fermata.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.fermata.vis → @place

**@shape** (*optional*) Describes the visual appearance of the fermata; that is, whether it has a curved, square, or angular shape. Allowed values are: "**curved**" (A curve above or below the dot.), "**square**" (A bracket above or below the dot.), "**angular**" (A triangle above or below the dot.)

att.fermata.vis → @shape

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.fermata.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.fermata.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.fermata.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.fermata.vis → @y

## Available at

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.fermata.vis → <fermata>

## Declaration

DEVELOPMENT  
VERSION

## att.fermataPresent

Attributes indicating the attachment of a fermata to the feature.

### Module

MEI.shared

### Attributes

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.fermataPresent → @fermata

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.fermataPresent → <chord>

**<mRest>** Complete measure rest in any meter.

att.fermataPresent → <mRest>

**<mSpace>** A measure containing only empty space in any meter.

att.fermataPresent → <mSpace>

**<note>** A single pitched event.

att.fermataPresent → <note>

**<rest>** A non-sounding event found in the source being transcribed.

att.fermataPresent → <rest>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.fermataPresent → <space>

### Declaration

```
<classSpec ident="att.fermataPresent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes indicating the attachment of a fermata to the

## att.filing

Attributes that deal with string filing characteristics.

### Module

[MEI.shared](#)

### Attributes

**@nonfiling** (*optional*) Holds the number of initial characters (such as those constituting an article or preposition) that should not be used for sorting a title or name. Value is a positive integer.

att.filing → @nonfiling

### Available at

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.filing → <addName>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.filing → <bloc>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.filing → <corpName>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.filing → <country>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.filing → <district>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.filing → <famName>

**<foreName>** Contains a forename, given or baptismal name.

att.filing → <foreName>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.filing → <genName>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.filing → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.filing → <geogName>

**<name>** Proper noun or noun phrase.

att.filing → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.filing → <nameLink>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.filing → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.filing → <persName>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.filing → <region>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.filing → <repository>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.filing → <roleName>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.filing → <settlement>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.filing → <styleName>

**<title>** Title of a bibliographic entity.

att.filing → <title>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.filing → <titlePart>

## Declaration

```

```

## att.fing.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<fing>** finger – An individual finger in a fingering indication.

att.fing.anl → <fing>

#### Declaration

```
<classSpec ident="att.fing.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

# att.fing.ges

Gestural domain attributes.

## Module

[MEI.gestural](#)

## Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.fing.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.fing.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.fing.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.fing.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.fing.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum **\*\*recip value**. Value is a [token](#).

att.fing.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.fing.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.fing.ges → @tstamp2.real

## Available at

**<finger>** finger – An individual finger in a fingering indication.

att.fing.ges → <finger>

## Declaration

```
<classSpec ident="att.fing.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

## att.fing.log

Logical domain attributes.

### Module

MEI.fingering

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.fing.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.fing.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.fing.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.fing.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.fing.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.fing.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.fing.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.fing.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.fing.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.fing.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.fing.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.fing.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.fing.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.fing.log → @when

## Available at

**<fing>** finger – An individual finger in a fingering indication.

att.fing.log → <fing>

## Declaration

```
<classSpec ident="att.fing.log" module="MEI.fingering" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.fing.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.fing.vis → @altsym

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.fing.vis → @extender

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.fing.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.fing.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.fing.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.fing.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.fing.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.fing.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.fing.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.fing.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.fing.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.fing.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.fing.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.fing.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.fing.vis → @y

## Available at

**<fing>** finger – An individual finger in a fingering indication.

att.fing.vis → <fing>

## Remarks

If `tstamp2` is not provided, then the extender should be drawn based on the value of `tstamp2` on a fingering ancestor.

## Declaration

```

<classSpec ident="att.fing.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.extender"/>
    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.xy"/>
  </classes>
  <remarks xml:lang="en">

DEVELOPMENT  
VERSION

## att.geneticState

Attributes that pertain to a genetic state.

### Module

MEI.genetic

### Attributes

**@instant** The @instant attribute is syntactic sugar for classifying a scribal intervention as an ad-hoc modification; that is, one which does not interrupt the writing process. Value must conform to **data.BOOLEAN** or **unknown**.

att.geneticState → @instant

**@state** Points to the genetic state that results from this modification. One or more values from **data.URI**, separated by spaces.

att.geneticState → @state

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.geneticState → <abbr>

**<add>** Marks an addition to the text.

att.geneticState → <add>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.geneticState → <corr>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.geneticState → <cutout>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.geneticState → <del>

**<expan>** Contains the expansion of an abbreviation.

att.geneticState → <expan>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.geneticState → <metaMark>

**<patch>** Describes a physical writing surface attached to the original document.

att.geneticState → <patch>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.geneticState → <restore>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.geneticState → <subst>

## Constraints

@state attribute should have content.

The value in @state should correspond to the @xml:id attribute of a genState (genetic state) element.

## Declaration

```

<classSpec ident="att.geneticState" module="MEI.genetic" type="atts">
  <desc xml:lang="en">Attributes that pertain to a genetic state.</desc>
  <constraintSpec ident="check_changeState.targets" scheme="schematron">
    <constraint>
      <sch:rule context="@state">
        <sch:assert role="warning" test="not(normalize-space(.) eq '')">@state attribute
        should have content.</sch:assert>
        <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
        substring($i,2)=/mei:genState/@xml:id">The value in @state should correspond to
        the @xml:id attribute of a genState (genetic state) element.</sch:assert>
      </sch:rule>
    </constraint>
  </constraintSpec>
  <attList>
    <attDef ident="instant">
      <desc xml:lang="en">The @instant attribute is syntactic sugar for classifying a
      scribal intervention as an ad-hoc modification; that is, one which does not interrupt
      the writing process.</desc>
      <datatype>
        <rng:choice>
          <rng:ref name="data.BOOLEAN"/>
          <rng:value>unknown</rng:value>
        </rng:choice>
      </datatype>
    </attDef>
    <attDef ident="state">
      <desc xml:lang="en">Points to the genetic state that results from this
      modification.</desc>

```

## att.gliss.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.gliss.anl → <gliss>

#### Declaration

```
<classSpec ident="att.gliss.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.gliss.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.gliss.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.gliss.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.gliss.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.gliss.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.gliss.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum **\*\*recip value**. Value is a [token](#).

att.gliss.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.gliss.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.gliss.ges → @tstamp2.real

### Available at

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.gliss.ges → <gliss>

### Declaration

```
<classSpec ident="att.gliss.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
```

</classSpec>

DEVELOPMENT  
VERSION

# att.gliss.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.gliss.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.gliss.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.gliss.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.gliss.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.gliss.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.gliss.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.gliss.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.gliss.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.gliss.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.gliss.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.gliss.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.gliss.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.gliss.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.gliss.log → @when

## Available at

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.gliss.log → <gliss>

## Declaration

```
<classSpec ident="att.gliss.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

# att.gliss.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.gliss.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.gliss.vis → @color

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.gliss.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.gliss.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.gliss.vis → @endvo

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.gliss.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.gliss.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.gliss.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.gliss.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.gliss.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.gliss.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.gliss.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.gloss.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.gloss.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.gloss.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.gloss.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.gloss.vis → @lendsym.size

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.gloss.vis → @letterspacing

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.gloss.vis → @lform

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.gloss.vis → @lineheight

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.gloss.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.gloss.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.gloss.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.gloss.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.gloss.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.gloss.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.gliss.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.gliss.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.gliss.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.gliss.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.gliss.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.gliss.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.gliss.vis → @y2

## Available at

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.gliss.vis → <gliss>

## Declaration

```
<classSpec ident="att.gliss.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>

    <memberOf key="att.xy"/>
    <memberOf key="att.xy2"/>
    <memberOf key="att.lineRend"/>
  </classes>
</classSpec>
```

## att.glissPresent

Attributes that indicate whether an event participates in a glissando.

### Module

MEI.cmn

### Attributes

`@gliss` (*optional*) Indicates that this element participates in a glissando. If visual information about the glissando needs to be recorded, then a `<gliss>` element should be employed instead. Value conforms to [data.GLISSANDO](#).

att.glissPresent → @gliss

### Available at

`<note>` A single pitched event.

att.glissPresent → <note>

### Declaration

```
<classSpec ident="att.glissPresent" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that indicate whether an event participates in a
  glissando.</desc>
  <attList>
    <attDef ident="gliss" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">glissando</gloss>
      <desc xml:lang="en">Indicates that this element participates in a glissando. If visual
      information about the glissando needs to be recorded, then a
        <gi scheme="MEI">gliss</gi>
      element should be employed instead.</desc>
      <datatype>
        <rng:ref name="data.GLISSANDO"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.graceGrp.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<graceGrp>** A container for a sequence of grace notes.

att.graceGrp.anl → <graceGrp>

#### Declaration

```
<classSpec ident="att.graceGrp.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## **att.graceGrp.ges**

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

#### Available at

**<graceGrp>** A container for a sequence of grace notes.

att.graceGrp.ges → <graceGrp>

#### Declaration

```
<classSpec ident="att.graceGrp.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.graceGrp.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@attach** (*optional*) Records whether the grace note group is attached to the following event or to the preceding one. The usual name for the latter is "Nachschlag". Allowed values are: "**pre**" (*Attached to the preceding event.*), "**post**" (*Attached to the following event.*), "**unknown**" (*Attachment is ambiguous.*)  
 att.graceGrp.log → @attach

**@grace** (*optional*) Marks a note or chord as a "grace" (without a definite performed duration) and records from which other note/chord it should "steal" time. Value conforms to [data.GRACE](#).  
 att.graceGrp.log → @grace

**@grace.time** (*optional*) Records the amount of time to be "stolen" from a non-grace note/chord. Value conforms to [data.PERCENT](#).  
 att.graceGrp.log → @grace.time

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.  
 att.graceGrp.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.  
 att.graceGrp.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).  
 att.graceGrp.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).  
 att.graceGrp.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).  
 att.graceGrp.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).  
 att.graceGrp.log → @when

## Available at

**<graceGrp>** A container for a sequence of grace notes.

att.graceGrp.log → <graceGrp>

## Declaration

```
<classSpec ident="att.graceGrp.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>

    </attDef>
  </attList>
</classSpec>
```

## att.graceGrp.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.graceGrp.vis → @color

### Available at

**<graceGrp>** A container for a sequence of grace notes.

att.graceGrp.vis → <graceGrp>

### Declaration

```
<classSpec ident="att.graceGrp.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.color"/>
  </classes>
</classSpec>
```

## att.graced

Attributes that mark a note or chord as a "grace", how it should "steal" time, and how much time should be allotted to the grace note/chord.

### Module

[MEI.cmn](#)

### Attributes

**@grace** (*optional*) Marks a note or chord as a "grace" (without a definite performed duration) and records from which other note/chord it should "steal" time. Value conforms to [data.GRACE](#).

att.graced → @grace

**@grace.time** (*optional*) Records the amount of time to be "stolen" from a non-grace note/chord. Value conforms to [data.PERCENT](#).

att.graced → @grace.time

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.  
att.graced → <chord>

**<graceGrp>** A container for a sequence of grace notes.  
att.graced → <graceGrp>

**<note>** A single pitched event.  
att.graced → <note>

### Declaration

```
<classSpec ident="att.graced" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that mark a note or chord as a "grace", how it should
  "steal" time, and how much time should be allotted to the grace note/chord.</desc>

MEI.shared

### Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.grpSym.log → @endid

**@level** (*optional*) Indicates the nesting level of staff grouping symbols. Value is a positive integer.

att.grpSym.log → @level

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.grpSym.log → @startid

**@symbol** (*optional*) Specifies the symbol used to group a set of staves. Allowed values are: "**brace**" (*Curved symbol, , {,}*), "**bracket**" (*Square symbol, , [, but with curved/angled top and bottom segments. ,]*), "**bracketsq**" (*Square symbol, , [, with horizontal top and bottom segments. ,]*), "**line**" (*Line symbol, , |, (wide) line without top and bottom curved/horizontal segments. ,]*), "**none**" (*Grouping symbol missing. ,]*)

att.grpSym.log → @symbol

### Available at

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.grpSym.log → <grpSym>

### Declaration

```
<classSpec ident="att.grpSym.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>

  </classes>
  <attList>
    <attDef ident="level" usage="opt">
      <desc xml:lang="en">Indicates the nesting level of staff grouping symbols.</desc>
      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.grpSym.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.grpSym.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.grpSym.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.grpSym.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.grpSym.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.grpSym.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.grpSym.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.grpSym.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*).

att.grpSym.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.grpSym.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.grpSym.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.grpSym.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.grpSym.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.grpSym.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.grpSym.vis → @lineheight

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.grpSym.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.grpSym.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.grpSym.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.grpSym.vis → @y

## Available at

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.grpSym.vis → <grpSym>

## Declaration

```
<classSpec ident="att.grpSym.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.extSym"/>
    <memberOf key="att.typography"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.hairpin.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >. att.hairpin.anl → <hairpin>

#### Declaration

```
<classSpec ident="att.hairpin.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.hairpin.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.hairpin.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.hairpin.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.hairpin.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.hairpin.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.hairpin.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum **\*\*recip** value. Value is a [token](#).

att.hairpin.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.hairpin.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.hairpin.ges → @tstamp2.real

**@val** (*optional*) MIDI number. Value conforms to [data.MIDIVALEUE](#).

att.hairpin.ges → @val

**@val2** (*optional*) MIDI number. Value conforms to [data.MIDIVALEUE](#).

att.hairpin.ges → @val2

### Available at

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.hairpin.ges → <hairpin>

### Declaration

```
<classSpec ident="att.hairpin.ges" module="MEI.gestural" type="atts">
```

```
<desc xml:lang="en">Gestural domain attributes.</desc>
<classes>
  <memberOf key="att.duration.ges"/>
  <memberOf key="att.midiValue"/>
  <memberOf key="att.midiValue2"/>
  <memberOf key="att.timestamp2.ges"/>
</classes>
</classSpec>
```

## att.hairpin.log

Logical domain attributes.

### Module

MEI.cmn

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.hairpin.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.hairpin.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.hairpin.log → @evaluate

**@form** (*required*) Captures the visual rendition and function of the hairpin; that is, whether it indicates an increase or a decrease in volume. Allowed values are: "**cres**" (*Crescendo; , louder.*), "**dim**" (*Diminuendo; , softer.*)

att.hairpin.log → @form

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.hairpin.log → @layer

**@niente** (*optional*) Indicates that the hairpin starts from or ends in silence. Often rendered as a small circle attached to the closed end of the hairpin. See Gould, p. 108. Value conforms to [data.BOOLEAN](#).

att.hairpin.log → @niente

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.hairpin.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "("%all|\d+(-\d+)?)"**, separated by spaces.

att.hairpin.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.hairpin.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.hairpin.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.hairpin.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.hairpin.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.hairpin.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.hairpin.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.hairpin.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.hairpin.log → @when

## Available at

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.hairpin.log → <hairpin>

```

## att.hairpin.vis

Visual domain attributes. The startho and startvo attributes record the horizontal and vertical offsets of the left end, endho and endvo record the horizontal and vertical offsets of the right end, and the opening attribute records the width of the opening in staff inter-line units. The x and y attributes give the absolute coordinates of the left end point, and x2 and y2 the right end point, of an imaginary line that defines the length of the hairpin and horizontally bifurcates it. The so-called "pitch" of hairpin may be controlled by use of the startho, endho, startvo, and endvo attributes, while the placement of the entire rendered mark may be controlled by use of the ho and vo attributes.

### Module

[MEI.visual](#)

### Attributes

**@angle.optimize** (*optional*) Indicates that the slope of the hairpin can be adjusted to follow the content in order to optimize spacing. Value conforms to [data.BOOLEAN](#).

att.hairpin.vis → @angle.optimize

**@closed** (*optional*) Applies to a "Rossini" hairpin, i.e., one where the normally open side is closed by a connecting line. Value conforms to [data.BOOLEAN](#).

att.hairpin.vis → @closed

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.hairpin.vis → @color

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.hairpin.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.hairpin.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.hairpin.vis → @endvo

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.hairpin.vis → @ho

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.hairpin.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.hairpin.vis → @lseg

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.hairpin.vis → @lwidth

**@opening** (*optional*) Specifies the distance between the lines at the open end of a hairpin dynamic mark. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.hairpin.vis → @opening

**@opening.vertical** (*optional*) Indicates that the opening points are aligned with an imaginary line that is always 90° perpendicular to the horizontal plane, regardless of any angle or start/end adjustments, including when the hairpin is angled with @angle.optimize or through @endvo/@startvo adjustments. Value conforms to [data.BOOLEAN](#).

att.hairpin.vis → @opening.vertical

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.hairpin.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.hairpin.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.hairpin.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.hairpin.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.hairpin.vis → @to

**@vgrp** (*optional*) Provides a label for members of a vertically aligned group. Value is a positive integer.

att.hairpin.vis → @vgrp

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.hairpin.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.hairpin.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.hairpin.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.hairpin.vis → @y

**@y2 (optional)** Encodes the optional 2nd y coordinate. Value is a decimal number.  
att.hairpin.vis → @y2

## Available at

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >. att.hairpin.vis → <hairpin>

# att.halfmRpt.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@dur** (*optional*) Records the duration of a feature using the relative durational values provided by the data.DURATION datatype. Value conforms to [data.DURATION](#).

att.halfmRpt.log → @dur

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.halfmRpt.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.halfmRpt.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.halfmRpt.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.halfmRpt.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.halfmRpt.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.halfmRpt.log → @when

## Available at

**<halfmRpt>** A half-measure repeat in any meter.

att.halfmRpt.log → <halfmRpt>

## Declaration

```

## att.halfmRpt.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.halfmRpt.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.halfmRpt.vis → @color

**@expand** (*optional*) Indicates whether to render a repeat symbol or the source material to which it refers. A value of 'true' renders the source material, while 'false' displays the repeat symbol. Value conforms to [data.BOOLEAN](#).

att.halfmRpt.vis → @expand

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.halfmRpt.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.halfmRpt.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.halfmRpt.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.halfmRpt.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.halfmRpt.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.halfmRpt.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.halfmRpt.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.halfmRpt.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.halfmRpt.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.halfmRpt.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.halfmRpt.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.halfmRpt.vis → @lineheight

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.halfmRpt.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.halfmRpt.vis → @vo

## Available at

**<halfmRpt>** A half-measure repeat in any meter.

att.halfmRpt.vis → <halfmRpt>

## Declaration

```
<classSpec ident="att.halfmRpt.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.expandable"/>
    <memberOf key="att.extSym"/>
    <memberOf key="att.typography"/>
    <memberOf key="att.visualOffset"/>
  </classes>
</classSpec>
```

## att.handIdent

Attributes which identify a document hand.

### Module

[MEI.shared](#)

### Attributes

**@hand** (*optional*) Signifies the hand responsible for an action. The value must be the ID of a [`<hand>`](#) element declared in the header. Value conforms to [data.URI](#).

att.handIdent → @hand

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.handIdent → <abbr>

**<add>** Marks an addition to the text.

att.handIdent → <add>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.handIdent → <corr>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.handIdent → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.handIdent → <damage>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.handIdent → <del>

**<expan>** Contains the expansion of an abbreviation.

att.handIdent → <expan>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.handIdent → <gap>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.handIdent → <lem>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as [`<add>`](#), [`<del>`](#), etc.

att.handIdent → <metaMark>

**<patch>** Describes a physical writing surface attached to the original document.

att.handIdent → <patch>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.handIdent → <rdg>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.handIdent → <restore>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.handIdent → <subst>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.handIdent → <unclear>

## Constraints

@hand attribute should have content.

Each value in @hand should correspond to the @xml:id attribute of a hand element.

## Declaration

```

<classSpec ident="att.handIdent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes which identify a document hand.</desc>
  <attList>
    <attDef ident="hand" usage="opt">

## att.harm.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@form** (*optional*) Indicates to what degree the harmonic label is supported by the notation. Allowed values are: "**explicit**" (*The notation contains all the notes necessary for the harmonic label, , the notes "D F# A" for the harmonic label "D".*), "**implied**" (*The harmonic label relies on notes implied, but not actually present, in the notation, , the notes "D F# C" for the harmonic label "D7". The note "A" is missing from the notation, but can be implied.*)

att.harm.anl → @form

**@inth** (*optional*) Encodes the harmonic interval between pitches occurring at the same time. One or more values from [data.INTERVAL.HARMONIC](#), separated by spaces.

att.harm.anl → @inth

### Available at

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.harm.anl → <harm>

### Declaration

```
<classSpec ident="att.harm.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.intervalHarmonic"/>

## att.harm.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.harm.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.harm.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.harm.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.harm.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.harm.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum [\\*\\*recip value](#). Value is a [token](#).

att.harm.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.harm.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.harm.ges → @tstamp2.real

### Available at

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.harm.ges → <harm>

### Declaration

```
<classSpec ident="att.harm.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>

```

# att.harm.log

Logical domain attributes.

## Module

[MEI.harmony](#)

## Attributes

**@chordref** (*optional*) Contains a reference to a `<chordDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.harm.log → @chordref

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.harm.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.harm.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.harm.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.harm.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.harm.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.harm.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.harm.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.harm.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.harm.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.harm.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.harm.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.harm.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.harm.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.harm.log → @when

## Available at

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.harm.log → <harm>

## Constraints

@chordref attribute should have content.

The value in @chordref should correspond to the @xml:id attribute of a chordDef element.

## Declaration

```
<classSpec ident="att.harm.log" module="MEI.harmony" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>

      <desc xml:lang="en">Contains a reference to a
        <gi scheme="MEI">chordDef</gi>
      element elsewhere in the document.</desc>
    </attDef>
  </attList>
</classSpec>
```

```
<datatype>
  <rng:ref name="data.URI"/>
</datatype>
<constraintSpec ident="check_chordrefTarget" scheme="schematron">
  <constraint>
    <sch:rule context="@chordref">
      <sch:assert role="warning" test="not(normalize-space(.) eq '')">@chordref
      attribute should have content.</sch:assert>
      <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
      substring($i,2)=//mei:chordDef/@xml:id">The value in @chordref should
      correspond to the @xml:id attribute of a chordDef element.</sch:assert>
    </sch:rule>
  </constraint>
</constraintSpec>
</attDef>
</attList>
</classSpec>
```

## att.harm.vis

Visual domain attributes.

### Referenced in chapters

10.2.1.3 Indications of Harmony in the Music Text

### Module

MEI.visual

### Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.harm.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.harm.vis → @endto

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.harm.vis → @extender

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.harm.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.harm.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.harm.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.harm.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.harm.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.harm.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.harm.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.harm.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.harm.vis → @place

**@rendgrid** (*optional*) Describes how the harmonic indication should be rendered. Allowed values are: "grid" (*Chord tablature grid.*), "gridtext" (*Chord tablature grid and the element's textual content.*), "text" (*Textual content of the element.*)

att.harm.vis → @rendgrid

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.harm.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.harm.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.harm.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.harm.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.harm.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.harm.vis → @y

## Available at

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.harm.vis → <harm>

## Declaration

```
<classSpec ident="att.harm.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

</classSpec>
```

## att.harmonicFunction

Attributes describing the harmonic function of a single pitch.

### Referenced in chapters

[10.1.2 Event-Specific Analytical Information](#), [10.1.2.4 Scale Degrees](#)

### Module

[MEI.analytical](#)

### Attributes

**@deg** (*optional*) Captures scale degree information using [Humdrum \\*\\*deg syntax](#) -- an optional indicator of melodic approach (^ = ascending approach, v = descending approach), a scale degree value (1 = tonic ... 7 = leading tone), and an optional indication of chromatic alteration, 1, v7, ^1, or v5+, for example. The amount of chromatic alternation is not indicated. Value conforms to [data.SCALEDEGREE](#).  
att.harmonicFunction → @deg

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.harmonicFunction → <nc>

**<note>** A single pitched event.

att.harmonicFunction → <note>

### Declaration

```

<classSpec ident="att.harmonicFunction" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Attributes describing the harmonic function of a single pitch.</desc>

## att.harpPedal.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.harpPedal.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.harpPedal.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.harpPedal.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.harpPedal.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.harpPedal.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.harpPedal.ges → @dur.recip

### Available at

**<harpPedal>** Harp pedal diagram.

att.harpPedal.ges → <harpPedal>

### Declaration

```
<classSpec ident="att.harpPedal.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
  </classes>
</classSpec>
```

## att.harpPedal.log

Logical domain attributes. The pedal setting, i.e., flat, natural, or sharp, for each diatonic pitch name is indicated by the seven letter-named attributes.

### Module

[MEI.cmn](#)

### Attributes

**@a** (*optional*) Indicates the pedal setting for the harp's A strings. Allowed values are: "**f**" (*Flat.*), "**n**" (*Natural.*), "**s**" (*Sharp.*)

att.harpPedal.log → @a

**@b** (*optional*) Indicates the pedal setting for the harp's B strings. Allowed values are: "**f**" (*Flat.*), "**n**" (*Natural.*), "**s**" (*Sharp.*)

att.harpPedal.log → @b

**@c** (*optional*) Indicates the pedal setting for the harp's C strings. Allowed values are: "**f**" (*Flat.*), "**n**" (*Natural.*), "**s**" (*Sharp.*)

att.harpPedal.log → @c

**@d** (*optional*) Indicates the pedal setting for the harp's D strings. Allowed values are: "**f**" (*Flat.*), "**n**" (*Natural.*), "**s**" (*Sharp.*)

att.harpPedal.log → @d

**@e** (*optional*) Indicates the pedal setting for the harp's E strings. Allowed values are: "**f**" (*Flat.*), "**n**" (*Natural.*), "**s**" (*Sharp.*)

att.harpPedal.log → @e

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.harpPedal.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.harpPedal.log → @evaluate

**@f** (*optional*) Indicates the pedal setting for the harp's F strings. Allowed values are: "**f**" (*Flat.*), "**n**" (*Natural.*), "**s**" (*Sharp.*)

att.harpPedal.log → @f

**@g** (*optional*) Indicates the pedal setting for the harp's G strings. Allowed values are: "**f**" (*Flat.*), "**n**" (*Natural.*), "**s**" (*Sharp.*)

att.harpPedal.log → @g

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.harpPedal.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.harpPedal.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.harpPedal.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.harpPedal.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.harpPedal.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.harpPedal.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.harpPedal.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.harpPedal.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.harpPedal.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.harpPedal.log → @when

## Available at

## att.harpPedal.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.harpPedal.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.harpPedal.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.harpPedal.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.harpPedal.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.harpPedal.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.harpPedal.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.harpPedal.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.harpPedal.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.harpPedal.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.harpPedal.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.harpPedal.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.harpPedal.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.harpPedal.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.harpPedal.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.harpPedal.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.harpPedal.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.harpPedal.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.harpPedal.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.harpPedal.vis → @y

## Available at

**<harpPedal>** Harp pedal diagram.

att.harpPedal.vis → <harpPedal>

## Declaration

```
<classSpec ident="att.harpPedal.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>

    <memberOf key="att.visualOffset"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.height

Attributes that describe vertical size.

### Referenced in chapters

[3.7.2.2 Specifying page dimensions](#)

### Module

[MEI.shared](#)

### Attributes

**@height** (*optional*) Measurement of the vertical dimension of an entity. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.height → @height

### Available at

**<bifolium>** Describes a folded sheet of paper.

att.height → <bifolium>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.height → <cutout>

**<folium>** Describes a single leaf of paper.

att.height → <folium>

**<graphic>** Indicates the location of an inline graphic.

att.height → <graphic>

### Declaration

```
<classSpec ident="att.height" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe vertical size.</desc>
  <attList>
    <attDef ident="height" usage="opt">
      <desc xml:lang="en">Measurement of the vertical dimension of an entity.</desc>
      <datatype>
        <rng:ref name="data.MEASUREMENTUNSIGNED"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.hispanTick.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<hispanTick>** Hispanic tick.

att.hispanTick.anl → <hispanTick>

#### Declaration

```
<classSpec ident="att.hispanTick.anl" module="MEI.analytical" type="atts">

</classSpec>
```

## att.hispanTick.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<hispanTick>** Hispanic tick.

att.hispanTick.ges → <hispanTick>

#### Declaration

```
<classSpec ident="att.hispanTick.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.hispanTick.log

Logical domain attributes.

## Module

[MEI.neumes](#)

## Attributes

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
att.hispanTick.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.  
att.hispanTick.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.  
att.hispanTick.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.  
att.hispanTick.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.  
att.hispanTick.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.  
att.hispanTick.log → @staff

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [`<when>`](#) element elsewhere in the document. Value conforms to [data.URI](#).  
att.hispanTick.log → @when

## Available at

[`<hispanTick>`](#) Hispanic tick.

att.hispanTick.log → <hispanTick>

## Declaration

```
<classSpec ident="att.hispanTick.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <!-- att.controlEvent class expanded here in order to disallow att.timestamp.* -->
    <memberOf key="att.alignment"/>
    <memberOf key="att.layerIdent"/>
    <memberOf key="att.partIdent"/>
    <memberOf key="att.plist"/>
    <memberOf key="att.staffIdent"/>
    <memberOf key="att.targetEval"/>
  </classes>
</classSpec>
```

# att.hispanTick.vis

Visual domain attributes.

## Referenced in chapters

[6.4.6 Old Hispanic tick attributes](#)

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.hispanTick.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.hispanTick.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.hispanTick.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.hispanTick.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.hispanTick.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.hispanTick.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.hispanTick.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.hispanTick.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.hispanTick.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.hispanTick.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.hispanTick.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).  
att.hispanTick.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.hispanTick.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.hispanTick.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.hispanTick.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.hispanTick.vis → @loc

**@place** (*recommended*) Captures the placement of the tick mark with respect to the neume or neume component with which it is associated. Value conforms to [data.EVENTREL](#).

att.hispanTick.vis → @place

**@tilt** (*recommended*) Direction toward which the mark points. Value conforms to [data.COMPASSDIRECTION](#).

att.hispanTick.vis → @tilt

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.hispanTick.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.hispanTick.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.hispanTick.vis → @y

## Available at

**<hispanTick>** Hispanic tick.

att.hispanTick.vis → <hispanTick>

## Declaration

```
<classSpec ident="att.hispanTick.vis" module="MEI.visual" type="atts">

</attList>
</classSpec>
```

## att.horizontalAlign

Attributes that record horizontal alignment.

### Referenced in chapters

[8.2 Lyric Syllables](#), [9.2.2 Text Rendition](#)

### Module

[MEI.shared](#)

### Attributes

**@halign** (*optional*) Records horizontal alignment. Value conforms to [data.HORIZONTALALIGNMENT](#).

att.horizontalAlign → @halign

### Available at

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.  
att.horizontalAlign → <fig>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.horizontalAlign → <rend>

**<syl>** Individual lyric syllable.

att.horizontalAlign → <syl>

### Declaration

```
<classSpec ident="att.horizontalAlign" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record horizontal alignment.</desc>
  <attList>
    <attDef ident="halign" usage="opt">
      <desc xml:lang="en">Records horizontal alignment.</desc>
      <datatype>
        <rng:ref name="data.HORIZONTALALIGNMENT"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.id

Attributes that uniquely identify an element.

### Referenced in chapters

[2.3.1 Attributes from the XML-namespace](#)

### Module

[MEI.shared](#)

### Attributes

**@xml:id** (*optional*) Regularizes the naming of an element and thus facilitates building links between it and other resources. Each id attribute within a document must have a unique value. Value is a valid [xml:id](#).

att.id → @xml:id

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.id → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.id → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.id → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.id → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.id → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.id → <actor>

**<add>** Marks an addition to the text.

att.id → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.id → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.id → <addName>

**<addrLine>** Single line of a postal address.

att.id → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.id → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.id → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.id → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.id → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.id → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.id → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.id → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.id → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.id → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.id → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.id → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.id → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.id → <arranger>

**<artic>** An indication of how to play a note or chord.

att.id → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.id → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.id → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.id → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.id → <author>

**<avFile>** References an external digital audio or video file.

att.id → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.id → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.id → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.id → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.id → <barLine>

**<barre>** A barre in a chord tablature grid.

att.id → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.id → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.id → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.id → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.id → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.id → <bibl>

**<biblList>** List of bibliographic references.

att.id → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.id → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.id → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.id → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.id → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.id → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.id → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.id → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.id → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.id → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.id → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.id → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.id → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.id → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.id → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.id → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.id → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.id → <castList>

**<catRel>** Contains the name of a related category.

att.id → <catRel>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.id → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.id → <category>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.id → <cb>

**<cc>** MIDI parameter/control change.

att.id → <cc>

**<chan>** MIDI channel assignment.

att.id → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.id → <chanPr>

**<change>** Individual change within the revision description.

att.id → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.id → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.id → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.id → <chord>

**<chordDef>** Chord tablature definition.

att.id → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a **<chordDef>** element.

att.id → <chordMember>

**<chordTable>** Chord/tablature look-up table.

att.id → <chordTable>

**<classDecls>** Groups information which describes the nature or topic of an entity.

att.id → <classDecls>

**<classification>** Groups information which describes the nature or topic of an entity.

att.id → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.id → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.id → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.id → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.id → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.id → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.id → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.id → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.id → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.id → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.id → <contentItem>

**<contents>** List of the material contained within a resource.

att.id → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.id → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.id → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.id → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.id → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.id → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.id → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.id → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.id → <creation>

**<cue>** MIDI cue point.

att.id → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.id → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.id → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.id → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.id → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.id → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.id → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.id → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.id → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.id → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.id → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.id → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.id → <desc>

**<dim>** Any single dimensional specification.

att.id → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.id → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.id → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.id → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.id → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.id → <div>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.id → <divLine>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.id → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.id → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.id → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.id → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.id → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.id → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.id → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.id → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.id → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.id → <epigraph>

**<episema>** Episema.

att.id → <episema>

**<event>** Contains a free-text event description.

att.id → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.id → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.id → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.id → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.id → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.id → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.id → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.id → <expressionList>

**<extData>** Provides a container element for non-MEI data formats.

att.id → <extData>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.id → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.id → <extent>

**<f>** Single element of a figured bass indication.

att.id → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.id → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.id → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.id → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.id → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.id → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.id → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.id → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.id → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.id → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.id → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.id → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.id → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.id → <foliation>

**<folium>** Describes a single leaf of paper.

att.id → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.id → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.id → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.id → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.id → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.id → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.id → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.id → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.id → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.id → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.id → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.id → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.id → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.id → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.id → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.id → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.id → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.id → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.id → <hand>

**<handList>** Container for one or more hand elements.

att.id → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.id → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.id → <harm>

**<harpPedal>** Harp pedal diagram.

att.id → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.id → <head>

**<height>** Description of the vertical size of an object.

att.id → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.id → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.id → <hex>

**<hispanTick>** Hispanic tick.

att.id → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.id → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.id → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.id → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.id → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.id → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.id → <incipCode>

**<incipText>** Opening words of a musical composition.

att.id → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.id → <inscription>

**<instrDef>** MIDI instrument declaration.

att.id → <instrDef>

**<instrGrp>** Collects MIDI instrument definitions.

att.id → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.id → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.id → <item>

**<itemList>** Gathers bibliographic item entities.

att.id → <itemList>

**<key>** Key captures information about tonal center and mode.

att.id → <key>

**<keyAccid>** Accidental in a key signature.

att.id → <keyAccid>

**<keySig>** Written key signature.

att.id → <keySig>

**<|>** Contains a single line of text within a line group.

att.id → <|>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.id → <label>

**<labelAbbr>** A label on the pages following the first.

att.id → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.id → <langUsage>

**<language>** Description of a language used in the document.

att.id → <language>

**<layer>** An independent stream of events on a staff.

att.id → <layer>

**<layerDef>** Container for layer meta-information.

att.id → <layerDef>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.id → <layout>

**<layoutDesc>** Collects layout descriptions.

att.id → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.id → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.id → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.id → <lg>

**<li>** Single item in a <list>.

att.id → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.id → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.id → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.id → <line>

**<liquefiant>** Liquescent.

att.id → <liquefiant>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.id → <list>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.id → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.id → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.id → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.id → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.id → <mNum>

**<mRest>** Complete measure rest in any meter.

att.id → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.id → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.id → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.id → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.id → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.id → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.id → <mapping>

**<marker>** MIDI marker meta-event.

att.id → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.id → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.id → <measure>

**<mei>** Contains a single MEI-conformant document, consisting of an MEI header and a musical text, either in isolation or as part of an meiCorpus element.

att.id → <mei>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more <mei> elements, each with its own complete header.

att.id → <meiCorpus>

**<meiHead>** Supplies the descriptive and declarative metadata prefixed to every MEI-conformant text.

att.id → <meiHead>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.id → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.id → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.id → <metaMark>

**<metaText>** MIDI text meta-event.

att.id → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.id → <meter>

**<meterSig>** Written meter signature.

att.id → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.id → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.id → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.id → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.id → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.id → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.id → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an etude, opera, song cycle, symphony, or anthology of piano solos.

att.id → <music>

**<name>** Proper noun or noun phrase.

att.id → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.id → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.id → <namespace>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.id → <nc>

**<ncGrp>** Collection of one or more neume components.

att.id → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.id → <neume>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.id → <normalization>

**<note>** A single pitched event.

att.id → <note>

**<noteOff>** MIDI note-off event.

att.id → <noteOff>

**<noteOn>** MIDI note-on event.

att.id → <noteOn>

**<notesStmt>** (notes statement)– Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.id → <notesStmt>

**<num>** Numeric information in any form.

att.id → <num>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.id → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.id → <oStaff>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.id → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.id → <orig>

**<oriscus>** Oriscus.

att.id → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.id → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.id → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.id → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.id → <p>

**<pad>** An indication of extra visual space between notational elements.

att.id → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.id → <part>

**<parts>** Provides a container for performers' parts.

att.id → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.id → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.id → <pb>

**<pedal>** Piano pedal mark.

att.id → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.id → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.id → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.id → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.id → <perfResList>

**<performance>** A presentation of one or more musical works.

att.id → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.id → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.id → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.id → <pgDesc>

**<pgFoot>** A running footer.

att.id → <pgFoot>

**<pgHead>** A running header.

att.id → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.id → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.id → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.id → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.id → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.id → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.id → <playingSpeed>

**<plica>** Plica

att.id → <plica>

**<port>** MIDI port.

att.id → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.id → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.id → <postCode>

**<price>** The cost of access to a bibliographic item.

att.id → <price>

**<prog>** MIDI program change.

att.id → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.id → <projectDesc>

**<propName>** Name of a property of the symbol.

att.id → <propName>

**<propValue>** A single property value.

att.id → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.id → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.id → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.id → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.id → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.id → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.id → <publisher>

**<q>** Contains material which is distinguished from the surrounding phrase-level text using quotation marks or a similar method. Use **<quote>** for block-level quotations.

att.id → <q>

**<quilisma>** Quilisma.

att.id → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.id → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.id → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.id → <recipient>

**<recording>** A recorded performance.

att.id → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.id → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.id → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.id → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.id → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.id → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.id → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.id → <relation>

**<relationList>** Gathers relation elements.

att.id → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.id → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.id → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.id → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.id → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.id → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.id → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.id → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.id → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.id → <role>

**<roleDesc>** Describes a character's role in a drama.

att.id → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.id → <roleName>

**<rubic>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.id → <rubic>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.id → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.id → <sb>

**<score>** Full score view of the musical content.

att.id → <score>

**<scoreDef>** Container for score meta-information.

att.id → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.id → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.id → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.id → <scriptNote>

**<seal>** A single seal or similar attachment.

att.id → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.id → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.id → <secFolio>

**<section>** Segment of music data.

att.id → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.id → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.id → <segmentation>

**<seqNum>** MIDI sequence number.

att.id → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.id → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.id → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.id → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.id → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.id → <signatures>

**<signifLet>** Significantive letter(s).

att.id → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.id → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.id → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.id → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.id → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.id → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.id → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.id → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.id → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.id → <sponsor>

**<stack>** An inline table with a single column.

att.id → <stack>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.id → <staff>

**<staffDef>** Container for staff meta-information.

att.id → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.id → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.id → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.id → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.id → <stdVals>

**<stem>** A stem element.

att.id → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.id → <street>

**<strophicus>** Strophicus.

att.id → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.id → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.id → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.id → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.id → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.id → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.id → <surface>

**<syl>** Individual lyric syllable.

att.id → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.id → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.id → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.id → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.id → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.id → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.id → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.id → <sysReq>

**<table>** Contains text displayed in tabular form.

att.id → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.id → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.id → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.id → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.id → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.id → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.id → <term>

**<termList>** Collection of text phrases which describe a resource.

att.id → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.id → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.id → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.id → <tie>

**<title>** Title of a bibliographic entity.

att.id → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.id → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.id → <titlePart>

**<titleStmt>** Container for title and responsibility meta-data.

att.id → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.id → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.id → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.id → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.id → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.id → <trill>

**<trkName>** MIDI track/sequence name.

att.id → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.id → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.id → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.id → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.id → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.id → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.id → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.id → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.id → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.id → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.id → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.id → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.id → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.id → <when>

**<width>** Description of the horizontal size of an object.

att.id → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.id → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.id → <workList>

**<zone>** Defines an area of interest within a <**<surface>** or graphic file.

att.id → <zone>

## Declaration

```
<classSpec ident="att.id" module="MEI.shared" type="atts">

## att.instrDef.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@azimuth** (*optional*) The lateral or left-to-right plane. Value conforms to [data.DEGREES](#).

att.instrDef.ges → @azimuth

**@elevation** (*optional*) The above-to-below axis. Value conforms to [data.DEGREES](#).

att.instrDef.ges → @elevation

**@midi.channel** (*optional*) Records a MIDI channel value. Value conforms to [data.MIDICHANNEL](#).

att.instrDef.ges → @midi.channel

**@midi.duty** (*optional*) Specifies the 'on' part of the duty cycle as a percentage of a note's duration. Value conforms to [data.PERCENT.LIMITED](#).

att.instrDef.ges → @midi.duty

**@midi.instrname** (*optional*) Provides a General MIDI label for the MIDI instrument. Value conforms to [data.MIDINAMES](#).

att.instrDef.ges → @midi.instrname

**@midi.instrnum** (*optional*) Captures the General MIDI instrument number. Use an integer for a 0-based value. An integer preceded by "in" indicates a 1-based value. Value conforms to [data.MIDIVALUE](#).

att.instrDef.ges → @midi.instrnum

**@midi.pan** (*optional*) Sets the instrument's position in a stereo field. MIDI values of 0 and 1 both pan left, 127 or 128 pans right, and 63 or 64 pans to the center. Positive percentage values pan to the right, negative ones to the left. 0% is centered. Value conforms to [data.MIDIVALUE\\_PAN](#).

att.instrDef.ges → @midi.pan

**@midi.patchname** (*optional*) Records a non-General MIDI patch/instrument name. Value is a [NMTOKEN](#).

att.instrDef.ges → @midi.patchname

**@midi.patchnum** (*optional*) Records a non-General MIDI patch/instrument number. Value conforms to [data.MIDIVALUE](#).

att.instrDef.ges → @midi.patchnum

**@midi.port** (*optional*) Sets the MIDI port value. Value conforms to [data.MIDIVALUE\\_NAME](#).

att.instrDef.ges → @midi.port

**@midi.track** (*optional*) Sets the MIDI track. Value is a positive integer.

att.instrDef.ges → @midi.track

**@midi.volume** (*optional*) Sets the instrument's volume. Value conforms to [data.MIDIVALUE\\_PERCENT](#).

att.instrDef.ges → @midi.volume

### Available at

**<instrDef>** MIDI instrument declaration.

att.instrDef.ges → <instrDef>

## Declaration

```
<classSpec ident="att.instrDef.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.channelized"/>
    <memberOf key="att.midiInstrument"/>
    <memberOf key="att.soundLocation"/>
  </classes>
</classSpec>
```

## att.instrDef.log

Logical domain attributes.

### Module

MEI.midi

### Attributes

#### Available at

**<instrDef>** MIDI instrument declaration.

att.instrDef.log → <instrDef>

#### Declaration

```
<classSpec ident="att.instrDef.log" module="MEI.midi" type="atts">

</classSpec>
```

## att.instrDef.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

#### Available at

**<instrDef>** MIDI instrument declaration.

att.instrDef.vis → <instrDef>

#### Declaration

```
<classSpec ident="att.instrDef.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
</classSpec>
```

## att.instrumentIdent

Attributes which identify a MIDI instrument.

### Module

MEI.midi

### Attributes

**@instr** (*optional*) Provides a way of pointing to a MIDI instrument definition. It must contain the ID of an **<instrDef>** element elsewhere in the document. Value conforms to [data.URI](#).

att.instrumentIdent → @instr

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.instrumentIdent → <chord>

**<layerDef>** Container for layer meta-information.

att.instrumentIdent → <layerDef>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.instrumentIdent → <nc>

**<note>** A single pitched event.

att.instrumentIdent → <note>

**<staffDef>** Container for staff meta-information.

att.instrumentIdent → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.instrumentIdent → <staffGrp>

### Constraints

@instr attribute should have content.

The value in @instr should correspond to the @xml:id attribute of an instrDef element.

### Declaration

```
<classSpec ident="att.instrumentIdent" module="MEI.midi" type="atts">
  <desc xml:lang="en">Attributes which identify a MIDI instrument.</desc>
  <attList>

</classSpec>
```

## att.internetMedia

Attributes which record the type of an electronic resource.

### Referenced in chapters

[13.2.2 Specifying Link Elements](#)

### Module

[MEI.shared](#)

### Attributes

**@mimetype** (*optional*) Specifies the applicable MIME (multimedia internet mail extension) type. The value should be a valid MIME media type defined by the Internet Engineering Task Force in RFC 2046. Value is plain text.

att.internetMedia → @mimetype

### Available at

**<avFile>** References an external digital audio or video file.

att.internetMedia → <avFile>

**<extData>** Provides a container element for non-MEI data formats.

att.internetMedia → <extData>

**<graphic>** Indicates the location of an inline graphic.

att.internetMedia → <graphic>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.internetMedia → <incipCode>

**<incipText>** Opening words of a musical composition.

att.internetMedia → <incipText>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.internetMedia → <ptr>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.internetMedia → <ref>

### Declaration

```
<classSpec ident="att.internetMedia" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes which record the type of an electronic resource.</desc>
  <attList>
    <attDef ident="mimetype" usage="opt">
      <desc xml:lang="en">Specifies the applicable MIME (multimedia internet mail extension) type. The value should be a valid MIME media type defined by the Internet Engineering Task Force in RFC 2046.</desc>
      <datatype>
        <rng:data type="string"/>
    
```

```
</datatype>
</attDef>
</attList>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.intervalHarmonic

Attributes that describe harmonic intervals.

### Referenced in chapters

[10.1.2 Event-Specific Analytical Information](#), [10.1.2.3 Harmonic Intervals](#), [10.2.1.1 Interpreted Chord Data in scoreDef](#)

### Module

[MEI.analytical](#)

### Attributes

**@inth** (*optional*) Encodes the harmonic interval between pitches occurring at the same time. One or more values from [data.INTERVAL.HARMONIC](#), separated by spaces.

att.intervalHarmonic → @inth

### Available at

**<ambitus>** Range of a voice, instrument or piece.

att.intervalHarmonic → <ambitus>

**<chordMember>** An individual pitch in a chord defined by a [<chordDef>](#) element.

att.intervalHarmonic → <chordMember>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.intervalHarmonic → <harm>

### Declaration

```
<classSpec ident="att.intervalHarmonic" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Attributes that describe harmonic intervals.</desc>
  <attList>
    <attDef ident="inth" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">interval harmonic</gloss>
      <desc xml:lang="en">Encodes the harmonic interval between pitches occurring at the same time.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.INTERVAL.HARMONIC"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.intervalMelodic

Attributes that provide for description of intervallic content.

### Referenced in chapters

[6.4.2 Neume component attributes](#), [10.1.2 Event-Specific Analytical Information](#)

### Module

[MEI.analytical](#)

### Attributes

**@intm** (*optional*) Encodes the melodic interval from the previous pitch. The value may be a general directional indication (u, d, s, etc.), an indication of diatonic interval direction, quality, and size, or a precise numeric value in half steps. Value conforms to [data.INTERVAL.MELODIC](#).

att.intervalMelodic → @intm

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.intervalMelodic → <nc>

**<note>** A single pitched event.

att.intervalMelodic → <note>

### Declaration

```

<classSpec ident="att.intervalMelodic" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Attributes that provide for description of intervallic content.</desc>
  <attList>
    <attDef ident="intm" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">interval melodic</gloss>
      <desc xml:lang="en">Encodes the melodic interval from the previous pitch. The value may be a general directional indication (u, d, s, etc.), an indication of diatonic interval direction, quality, and size, or a precise numeric value in half steps.</desc>
      <datatype>
        <rng:ref name="data.INTERVAL.MELODIC"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.joined

Attributes indicating that elements are semantically linked; that is, while the parts are encoded separately, together they may be thought of as a single intellectual object.

### Module

[MEI.shared](#)

### Attributes

**@join** (*optional*) Used for linking visually separate entities that form a single logical entity, for example, multiple slurs broken across a system break that form a single musical phrase. Also used to indicate a measure which metrically completes the current one. Record the identifiers of the separately encoded components, excluding the one carrying the attribute. One or more values from [data.URI](#), separated by spaces.

att.joined → @join

### Available at

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.joined → <measure>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.joined → <phrase>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.joined → <slur>

### Constraints

@join attribute should have content.

Each value in @join should correspond to the @xml:id attribute of an element.

### Declaration

```
<classSpec ident="att.joined" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes indicating that elements are semantically linked; that is,
  while the parts are encoded separately, together they may be thought of as a single
  intellectual object.</desc>
  <attList>
    <attDef ident="join" usage="opt">

## att.keyAccid.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<keyAccid>** Accidental in a key signature.

att.keyAccid.anl → <keyAccid>

#### Declaration

```
<classSpec ident="att.keyAccid.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.keyAccid.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

#### Available at

**<keyAccid>** Accidental in a key signature.

att.keyAccid.ges → <keyAccid>

#### Declaration

```
<classSpec ident="att.keyAccid.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.keyAccid.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@accid** (*optional*) Captures a written accidental. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.keyAccid.log → @accid

**@oct** (*optional*) Captures written octave information. Value conforms to [data.OCTAVE](#).

att.keyAccid.log → @oct

**@pname** (*optional*) Contains a written pitch name. Value conforms to [data.PITCHNAME](#).

att.keyAccid.log → @pname

### Available at

**<keyAccid>** Accidental in a key signature.

att.keyAccid.log → <keyAccid>

### Declaration

```
<classSpec ident="att.keyAccid.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.accidental"/>
    <memberOf key="att.pitched"/>
  </classes>
</classSpec>
```

# att.keyAccid.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.keyAccid.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.keyAccid.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.keyAccid.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.keyAccid.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.keyAccid.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.keyAccid.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.keyAccid.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.keyAccid.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.keyAccid.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.keyAccid.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.keyAccid.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.keyAccid.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.keyAccid.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.keyAccid.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.keyAccid.vis → @loc

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.keyAccid.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.keyAccid.vis → @y

## Available at

**<keyAccid>** Accidental in a key signature.

att.keyAccid.vis → <keyAccid>

## Declaration

```
<classSpec ident="att.keyAccid.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.enclosingChars"/>
    <memberOf key="att.extSym"/>
    <memberOf key="att.staffLoc"/>
    <memberOf key="att.typography"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

# att.keySig.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

- @accid** (*optional*) Captures a written accidental. Value conforms to [data.ACIDENTAL.WRITTEN](#).  
att.keySig.anl → @accid
- @mode** (*optional*) Indicates major, minor, or other tonality. Value conforms to [data.MODE](#).  
att.keySig.anl → @mode
- @pname** (*optional*) Contains a written pitch name. Value conforms to [data.PITCHNAME](#).  
att.keySig.anl → @pname

## Available at

**<keySig>** Written key signature.

att.keySig.anl → <keySig>

## Declaration

```
<classSpec ident="att.keySig.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.accidental"/>
    <memberOf key="att.pitch"/>
  </classes>
  <attList>
    <attDef ident="mode" usage="opt">
      <desc xml:lang="en">Indicates major, minor, or other tonality.</desc>
      <datatype>
        <rng:ref name="data.MODE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.keySig.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<keySig>** Written key signature.

att.keySig.ges → <keySig>

#### Declaration

```
<classSpec ident="att.keySig.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.keySig.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@sig** (*optional*) Written key signature. One or more values from [data.KEYFIFTHS](#), separated by spaces.

att.keySig.log → @sig

## Available at

**<keySig>** Written key signature.

att.keySig.log → <keySig>

## Remarks

Mixed key signatures, e.g., those consisting of a mixture of flats and sharps (Read, p. 143, ex. 9-39), and key signatures with unorthodox placement of the accidentals (Read, p. 141) can be encoded using the **<keySig>** element.

## Declaration

```

<classSpec ident="att.keySig.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <attList>
    <attDef ident="sig" usage="opt">
      <desc xml:lang="en">Written key signature.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.KEYFIFTHS"/>
      </datatype>
    </attDef>
  </attList>
  <remarks xml:lang="en">
    <p>Mixed key signatures,  

     <abbr>e.g.</abbr>  

     , those consisting of a mixture of flats and sharps (Read, p. 143, ex. 9-39), and key  

     signatures with unorthodox placement of the accidentals (Read, p. 141) can be encoded  

     using the <gi scheme="MEI">keySig</gi> element.</p>
  </remarks>
</classSpec>

```

## att.keySig.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@cancelaccid** (*optional*) Determines where cautionary accidentals should be displayed at a key change.  
Value conforms to [data.CANCELACCID](#).

att.keySig.vis → @cancelaccid

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.keySig.vis → @color

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.keySig.vis → @visible

### Available at

**<keySig>** Written key signature.

att.keySig.vis → <keySig>

### Declaration

```
<classSpec ident="att.keySig.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.color"/>
    <memberOf key="att.visibility"/>
  </classes>
  <attList>
    <attDef ident="cancelaccid" usage="opt">
      <desc xml:lang="en">Determines where cautionary accidentals should be displayed at a key change.</desc>
      <datatype>
        <rng:ref name="data.CANCELACCID"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.keySigDefault.anl

Used by staffDef and scoreDef to provide default values for attributes in the analytical domain that are related to key signatures.

### Module

[MEI.analytical](#)

### Attributes

**@key.accid** (*optional*) Contains an accidental for the tonic key, if one is required, e.g., if key.pname equals c and key.accid equals s, then a tonic of C# is indicated. Value conforms to [data.ACCIDENTAL.GESTURAL](#).

att.keySigDefault.anl → @key.accid

**@key.mode** (*optional*) Indicates major, minor, or other tonality. Value conforms to [data.MODE](#).

att.keySigDefault.anl → @key.mode

**@key.pname** (*optional*) Holds the pitch name of the tonic key, e.g., c for the key of C. Value conforms to [data.PITCHNAME](#).

att.keySigDefault.anl → @key.pname

### Available at

**<scoreDef>** Container for score meta-information.

att.keySigDefault.anl → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.keySigDefault.anl → <staffDef>

### Declaration

```

<classSpec ident="att.keySigDefault.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Used by staffDef and scoreDef to provide default values for attributes in the analytical domain that are related to key signatures.</desc>

## att.labelled

Referenced in chapters

[2.3.2 Label Attributes](#)

### Module

[MEI.shared](#)

### Attributes

**@label** (*optional*) Captures text to be used to generate a label for the element to which it's attached, a "tool tip" or prefatory text, for example. Should not be used to record document content. Value is plain text.

att.labelled → @label

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.labelled → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.labelled → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.labelled → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.labelled → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.labelled → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.labelled → <actor>

**<add>** Marks an addition to the text.

att.labelled → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.labelled → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.labelled → <addName>

**<addrLine>** Single line of a postal address.

att.labelled → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.labelled → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.labelled → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.labelled → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.labelled → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.labelled → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.labelled → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.labelled → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.labelled → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.labelled → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.labelled → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.labelled → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.labelled → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.labelled → <arranger>

**<artic>** An indication of how to play a note or chord.

att.labelled → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.labelled → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.labelled → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.labelled → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.labelled → <author>

**<avFile>** References an external digital audio or video file.

att.labelled → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.labelled → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.labelled → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.labelled → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.labelled → <barLine>

**<barre>** A barre in a chord tablature grid.

att.labelled → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.labelled → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.labelled → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.labelled → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.labelled → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.labelled → <bibl>

**<biblList>** List of bibliographic references.

att.labelled → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.labelled → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.labelled → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.labelled → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.labelled → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.labelled → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.labelled → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.labelled → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.labelled → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.labelled → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.labelled → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.labelled → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.labelled → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.labelled → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.labelled → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.labelled → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.labelled → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.labelled → <castList>

**<catRel>** Contains the name of a related category.

att.labelled → <catRel>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.labelled → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.labelled → <category>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.labelled → <cb>

**<cc>** MIDI parameter/control change.

att.labelled → <cc>

**<chan>** MIDI channel assignment.

att.labelled → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.labelled → <chanPr>

**<change>** Individual change within the revision description.

att.labelled → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.labelled → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.labelled → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.labelled → <chord>

**<chordDef>** Chord tablature definition.

att.labelled → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a **<chordDef>** element.

att.labelled → <chordMember>

**<chordTable>** Chord/tablature look-up table.

att.labelled → <chordTable>

**<classDecls>** Groups information which describes the nature or topic of an entity.

att.labelled → <classDecls>

**<classification>** Groups information which describes the nature or topic of an entity.

att.labelled → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.labelled → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.labelled → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.labelled → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.labelled → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.labelled → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.labelled → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.labelled → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.labelled → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.labelled → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.labelled → <contentItem>

**<contents>** List of the material contained within a resource.

att.labelled → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.labelled → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.labelled → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.labelled → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.labelled → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.labelled → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.labelled → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.labelled → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.labelled → <creation>

**<cue>** MIDI cue point.

att.labelled → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.labelled → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.labelled → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.labelled → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.labelled → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.labelled → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.labelled → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.labelled → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.labelled → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.labelled → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.labelled → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.labelled → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.labelled → <desc>

**<dim>** Any single dimensional specification.

att.labelled → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.labelled → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.labelled → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.labelled → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.labelled → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.labelled → <div>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.labelled → <divLine>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.labelled → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.labelled → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.labelled → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.labelled → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.labelled → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.labelled → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.labelled → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.labelled → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.labelled → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.labelled → <epigraph>

**<episema>** Episema.

att.labelled → <episema>

**<event>** Contains a free-text event description.

att.labelled → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.labelled → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.labelled → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.labelled → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.labelled → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.labelled → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.labelled → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.labelled → <expressionList>

**<extData>** Provides a container element for non-MEI data formats.

att.labelled → <extData>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.labelled → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.labelled → <extent>

**<f>** Single element of a figured bass indication.

att.labelled → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.labelled → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.labelled → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.labelled → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.labelled → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.labelled → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.labelled → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.labelled → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.labelled → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.labelled → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.labelled → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.labelled → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.labelled → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.labelled → <foliation>

**<folium>** Describes a single leaf of paper.

att.labelled → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.labelled → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.labelled → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.labelled → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.labelled → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.labelled → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.labelled → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.labelled → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.labelled → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.labelled → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.labelled → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.labelled → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.labelled → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.labelled → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.labelled → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.labelled → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.labelled → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.labelled → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.labelled → <hand>

**<handList>** Container for one or more hand elements.

att.labelled → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.labelled → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.labelled → <harm>

**<harpPedal>** Harp pedal diagram.

att.labelled → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.labelled → <head>

**<height>** Description of the vertical size of an object.

att.labelled → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.labelled → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.labelled → <hex>

**<hispanTick>** Hispanic tick.

att.labelled → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.labelled → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.labelled → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.labelled → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.labelled → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.labelled → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.labelled → <incipCode>

**<incipText>** Opening words of a musical composition.

att.labelled → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.labelled → <inscription>

**<instrDef>** MIDI instrument declaration.

att.labelled → <instrDef>

**<instrGrp>** Collects MIDI instrument definitions.

att.labelled → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.labelled → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.labelled → <item>

**<itemList>** Gathers bibliographic item entities.

att.labelled → <itemList>

**<key>** Key captures information about tonal center and mode.

att.labelled → <key>

**<keyAccid>** Accidental in a key signature.

att.labelled → <keyAccid>

**<keySig>** Written key signature.

att.labelled → <keySig>

**<|>** Contains a single line of text within a line group.

att.labelled → <|>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.labelled → <label>

**<labelAbbr>** A label on the pages following the first.

att.labelled → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.labelled → <langUsage>

**<language>** Description of a language used in the document.

att.labelled → <language>

**<layer>** An independent stream of events on a staff.

att.labelled → <layer>

**<layerDef>** Container for layer meta-information.

att.labelled → <layerDef>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.labelled → <layout>

**<layoutDesc>** Collects layout descriptions.

att.labelled → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.labelled → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.labelled → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.labelled → <lg>

**<li>** Single item in a <list>.

att.labelled → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.labelled → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.labelled → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.labelled → <line>

**<liquecent>** Liquescent.

att.labelled → <liquecent>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.labelled → <list>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.labelled → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.labelled → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.labelled → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.labelled → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.labelled → <mNum>

**<mRest>** Complete measure rest in any meter.

att.labelled → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.labelled → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.labelled → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.labelled → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.labelled → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.labelled → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.labelled → <mapping>

**<marker>** MIDI marker meta-event.

att.labelled → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.labelled → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.labelled → <measure>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more <mei> elements, each with its own complete header.

att.labelled → <meiCorpus>

**<meiHead>** Supplies the descriptive and declarative metadata prefixed to every MEI-conformant text.

att.labelled → <meiHead>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.labelled → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.labelled → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.labelled → <metaMark>

**<metaText>** MIDI text meta-event.

att.labelled → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.labelled → <meter>

**<meterSig>** Written meter signature.

att.labelled → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.labelled → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.labelled → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.labelled → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.labelled → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.labelled → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.labelled → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an étude, opera, song cycle, symphony, or anthology of piano solos.

att.labelled → <music>

**<name>** Proper noun or noun phrase.

att.labelled → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.labelled → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.labelled → <namespace>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.labelled → <nc>

**<ncGrp>** Collection of one or more neume components.

att.labelled → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.labelled → <neume>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.labelled → <normalization>

**<note>** A single pitched event.

att.labelled → <note>

**<noteOff>** MIDI note-off event.

att.labelled → <noteOff>

**<noteOn>** MIDI note-on event.

att.labelled → <noteOn>

**<notesStmt>** (notes statement)– Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.labelled → <notesStmt>

**<num>** Numeric information in any form.

att.labelled → <num>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.labelled → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.labelled → <oStaff>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.labelled → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.labelled → <orig>

**<oriscus>** Oriscus.

att.labelled → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.labelled → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.labelled → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.labelled → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.labelled → <p>

**<pad>** An indication of extra visual space between notational elements.

att.labelled → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.labelled → <part>

**<parts>** Provides a container for performers' parts.

att.labelled → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.labelled → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.labelled → <pb>

**<pedal>** Piano pedal mark.

att.labelled → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.labelled → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.labelled → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.labelled → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.labelled → <perfResList>

**<performance>** A presentation of one or more musical works.

att.labelled → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.labelled → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.labelled → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.labelled → <pgDesc>

**<pgFoot>** A running footer.

att.labelled → <pgFoot>

**<pgHead>** A running header.

att.labelled → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.labelled → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.labelled → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.labelled → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.labelled → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.labelled → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.labelled → <playingSpeed>

**<plica>** Plica

att.labelled → <plica>

**<port>** MIDI port.

att.labelled → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.labelled → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.labelled → <postCode>

**<price>** The cost of access to a bibliographic item.

att.labelled → <price>

**<prog>** MIDI program change.

att.labelled → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.labelled → <projectDesc>

**<propName>** Name of a property of the symbol.

att.labelled → <propName>

**<propValue>** A single property value.

att.labelled → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.labelled → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.labelled → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.labelled → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.labelled → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.labelled → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.labelled → <publisher>

**<q>** Contains material which is distinguished from the surrounding phrase-level text using quotation marks or a similar method. Use **<quote>** for block-level quotations.

att.labelled → <q>

**<quilisma>** Quilisma.

att.labelled → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.labelled → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.labelled → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.labelled → <recipient>

**<recording>** A recorded performance.

att.labelled → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.labelled → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.labelled → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.labelled → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.labelled → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.labelled → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.labelled → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.labelled → <relation>

**<relationList>** Gathers relation elements.

att.labelled → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.labelled → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.labelled → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.labelled → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.labelled → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.labelled → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.labelled → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.labelled → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.labelled → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.labelled → <role>

**<roleDesc>** Describes a character's role in a drama.

att.labelled → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.labelled → <roleName>

**<rubric>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.labelled → <rubric>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.labelled → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.labelled → <sb>

**<score>** Full score view of the musical content.

att.labelled → <score>

**<scoreDef>** Container for score meta-information.

att.labelled → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.labelled → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.labelled → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.labelled → <scriptNote>

**<seal>** A single seal or similar attachment.

att.labelled → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.labelled → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.labelled → <secFolio>

**<section>** Segment of music data.

att.labelled → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.labelled → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.labelled → <segmentation>

**<seqNum>** MIDI sequence number.

att.labelled → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.labelled → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.labelled → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.labelled → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.labelled → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.labelled → <signatures>

**<signifLet>** Significantive letter(s).

att.labelled → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.labelled → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.labelled → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.labelled → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.labelled → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.labelled → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.labelled → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.labelled → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.labelled → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.labelled → <sponsor>

**<stack>** An inline table with a single column.

att.labelled → <stack>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.labelled → <staff>

**<staffDef>** Container for staff meta-information.

att.labelled → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.labelled → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.labelled → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.labelled → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.labelled → <stdVals>

**<stem>** A stem element.

att.labelled → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.labelled → <street>

**<strophicus>** Strophicus.

att.labelled → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.labelled → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.labelled → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.labelled → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.labelled → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.labelled → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.labelled → <surface>

**<syl>** Individual lyric syllable.

att.labelled → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.labelled → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.labelled → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.labelled → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.labelled → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.labelled → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.labelled → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.labelled → <sysReq>

**<table>** Contains text displayed in tabular form.

att.labelled → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.labelled → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.labelled → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.labelled → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.labelled → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.labelled → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.labelled → <term>

**<termList>** Collection of text phrases which describe a resource.

att.labelled → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.labelled → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.labelled → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.labelled → <tie>

**<title>** Title of a bibliographic entity.

att.labelled → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.labelled → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.labelled → <titlePart>

**<titleStmt>** Container for title and responsibility meta-data.

att.labelled → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a

**<table>**.

att.labelled → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.labelled → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.labelled → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.labelled → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.labelled → <trill>

**<trkName>** MIDI track/sequence name.

att.labelled → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.labelled → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.labelled → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.labelled → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.labelled → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.labelled → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.labelled → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.labelled → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.labelled → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.labelled → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.labelled → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.labelled → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.labelled → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.labelled → <when>

**<width>** Description of the horizontal size of an object.

att.labelled → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.labelled → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.labelled → <workList>

**<zone>** Defines an area of interest within a <**surface**> or graphic file.

att.labelled → <zone>

## Declaration

```
<classSpec ident="att.labelled" module="MEI.shared" type="atts">
  <attList>
    <attDef ident="label" usage="opt">
      <desc xml:lang="en">Captures text to be used to generate a label for the element to which it's attached, a "tool tip" or prefatory text, for example. Should not be used to record document content.</desc>
      <datatype>
        <rng:data type="string"/>
      </datatype>
      <remarks xml:lang="en">
```

```
<p> <att>label</att> is used to provide a display label for an element's contents,  
for example in the form of a "tool tip" or as the "name" when the element's  
contents are treated as the "value" in a "name-value pair". Unlike <att>n</att>,  
<att>label</att> may contain space characters.</p>  
<p>Don't confuse this attribute with the <gi scheme="MEI">label</gi> element, which  
records document content.</p>  
</remarks>  
</attDef>  
</attList>  
</classSpec>
```

## att.lang

Language attributes common to text elements.

### Referenced in chapters

[2.3.1 Attributes from the XML-namespace](#)

### Module

[MEI.shared](#)

### Attributes

**@translit** (*optional*) Specifies the transliteration technique used. Value is a [NMOKEN](#).

att.lang → @translit

**@xml:lang** (*optional*) Identifies the language of the element's content. The values for this attribute are language 'tags' as defined in BCP 47. All language tags that make use of private use sub-tags must be documented in a corresponding language element in the MEI header whose id attribute is the same as the language tag's value. Value is a [language](#).

att.lang → @xml:lang

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.lang → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.lang → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.lang → <accessRestrict>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.lang → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.lang → <actor>

**<add>** Marks an addition to the text.

att.lang → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.lang → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.lang → <addName>

**<addrLine>** Single line of a postal address.

att.lang → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.lang → <address>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.lang → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.lang → <annot>

**<argument>** Contains a formal list or prose description of topics addressed.

att.lang → <argument>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.lang → <arranger>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.lang → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.lang → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.lang → <author>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.lang → <back>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.lang → <bibl>

**<biblList>** List of bibliographic references.

att.lang → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.lang → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.lang → <biblStruct>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.lang → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.lang → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.lang → <bloc>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.lang → <byline>

**<caption>** A label which accompanies an illustration or a table.

att.lang → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.lang → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.lang → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.lang → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.lang → <castItem>

**<castList>** Contains a single cast list or *dramatis personae*.

att.lang → <castList>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.lang → <catchwords>

**<changeDesc>** Description of a revision of the MEI file.

att.lang → <changeDesc>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.lang → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.lang → <colophon>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.lang → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.lang → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.lang → <contentItem>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.lang → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.lang → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.lang → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.lang → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.lang → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.lang → <country>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.lang → <creation>

**<cue>** MIDI cue point.

att.lang → <cue>

**<damage>** Contains an area of damage to the physical medium.

att.lang → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.lang → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.lang → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.lang → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.lang → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.lang → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.lang → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.lang → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.lang → <desc>

**<dim>** Any single dimensional specification.

att.lang → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.lang → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.lang → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.lang → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.lang → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.lang → <div>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.lang → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.lang → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.lang → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.lang → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.lang → <editorialDecl>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.lang → <epigraph>

**<event>** Contains a free-text event description.

att.lang → <event>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.lang → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.lang → <expan>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.lang → <explicit>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.lang → <extent>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.lang → <famName>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.lang → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.lang → <fileChar>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.lang → <foliation>

**<foreName>** Contains a forename, given or baptismal name.

att.lang → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.lang → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.lang → <funder>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.lang → <genName>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.lang → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.lang → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.lang → <geogName>

**<hand>** Defines a distinct scribe or handwriting style.

att.lang → <hand>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.lang → <head>

**<height>** Description of the vertical size of an object.

att.lang → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.lang → <heraldry>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.lang → <imprimatur>

**<incipText>** Opening words of a musical composition.

att.lang → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.lang → <inscription>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.lang → <interpretation>

**<l>** Contains a single line of text within a line group.

att.lang → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.lang → <label>

**<labelAbbr>** A label on the pages following the first.

att.lang → <labelAbbr>

**<language>** Description of a language used in the document.

att.lang → <language>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.lang → <layout>

**<layoutDesc>** Collects layout descriptions.

att.lang → <layoutDesc>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.lang → <lg>

**<li>** Single item in a <list>.

att.lang → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.lang → <librettist>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.lang → <list>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.lang → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.lang → <locusGrp>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.lang → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.lang → <mNum>

**<marker>** MIDI marker meta-event.

att.lang → <marker>

**<meiHead>** Supplies the descriptive and declarative metadata prefixed to every MEI-conformant text.

att.lang → <meiHead>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.lang → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.lang → <metaMark>

**<metaText>** MIDI text meta-event.

att.lang → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.lang → <meter>

**<name>** Proper noun or noun phrase.

att.lang → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.lang → <nameLink>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.lang → <normalization>

**<num>** Numeric information in any form.

att.lang → <num>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.lang → <orig>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.lang → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.lang → <p>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.lang → <perfDuration>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.lang → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.lang → <perfResList>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.lang → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.lang → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.lang → <pgDesc>

**<pgFoot>** A running footer.

att.lang → <pgFoot>

**<pgHead>** A running header.

att.lang → <pgHead>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.lang → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.lang → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.lang → <playingSpeed>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.lang → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.lang → <postCode>

**<price>** The cost of access to a bibliographic item.

att.lang → <price>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.lang → <projectDesc>

**<provenance>** The record of ownership or custodianship of an item.

att.lang → <provenance>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.lang → <pubPlace>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.lang → <publisher>

**<q>** Contains material which is distinguished from the surrounding phrase-level text using quotation marks or a similar method. Use **<quote>** for block-level quotations.

att.lang → <q>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.lang → <quote>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.lang → <recipient>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.lang → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.lang → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.lang → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.lang → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.lang → <reh>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.lang → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.lang → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.lang → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.lang → <resp>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.lang → <restore>

**<role>** Name of a dramatic role, as given in a cast list.

att.lang → <role>

**<roleDesc>** Describes a character's role in a drama.

att.lang → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.lang → <roleName>

**<rubric>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.lang → <rubric>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.lang → <samplingDecl>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.lang → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.lang → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.lang → <scriptNote>

**<seal>** A single seal or similar attachment.

att.lang → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.lang → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.lang → <secFolio>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.lang → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.lang → <segmentation>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.lang → <series>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.lang → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.lang → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.lang → <signatures>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.lang → <soundChan>

**<sp>** Contains an individual speech in a performance text.

att.lang → <sp>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.lang → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.lang → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.lang → <sponsor>

**<stack>** An inline table with a single column.

att.lang → <stack>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.lang → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.lang → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.lang → <stdVals>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.lang → <street>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.lang → <styleName>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.lang → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.lang → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.lang → <supportDesc>

**<syl>** Individual lyric syllable.

att.lang → <syl>

**<sysReq>** System requirements for using the electronic item.

att.lang → <sysReq>

**<table>** Contains text displayed in tabular form.

att.lang → <table>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.lang → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.lang → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.lang → <term>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.lang → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.lang → <th>

**<title>** Title of a bibliographic entity.

att.lang → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.lang → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.lang → <titlePart>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.lang → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.lang → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.lang → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.lang → <treatSched>

**<trkName>** MIDI track/sequence name.

att.lang → <trkName>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.lang → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.lang → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.lang → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.lang → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.lang → <useRestrict>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.lang → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.lang → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.lang → <watermark>

**<width>** Description of the horizontal size of an object.

att.lang → <width>

## Remarks

BCP 47 is described at <https://tools.ietf.org/html/bcp47>. The IANA Subtag Registry, from which BCP 47 language tags are constructed, may be found at [www.iana.org/assignments/language-subtag-registry](http://www.iana.org/assignments/language-subtag-registry). A tool for locating subtags and validating language tags is available at <https://r12a.github.io/apps/subtags>.

## Declaration

```
<classSpec ident="att.lang" module="MEI.shared" type="atts">
  <desc xml:lang="en">Language attributes common to text elements.</desc>

## att.layer.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<layer>** An independent stream of events on a staff.

att.layer.anl → <layer>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.layer.anl → <oLayer>

### Declaration

```
<classSpec ident="att.layer.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.layer.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<layer>** An independent stream of events on a staff.

att.layer.ges → <layer>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.layer.ges → <oLayer>

### Declaration

```
<classSpec ident="att.layer.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.layer.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@cue** (*optional*) Value conforms to [data.BOOLEAN](#).

att.layer.log → @cue

**@def** (*optional*) Provides a mechanism for linking the layer to a layerDef element. Value conforms to [data.URI](#).

att.layer.log → @def

**@metcon** (*optional*) Indicates the relationship between the content of a staff or layer and the prevailing meter. Allowed values are: "**c**" (*Complete; , conformant with the prevailing meter.*), "**i**" (*Incomplete; , not enough beats.*), "**o**" (*Overfull; , too many beats.*)

att.layer.log → @metcon

### Available at

[\*\*<layer>\*\*](#) An independent stream of events on a staff.

att.layer.log → <layer>

[\*\*<oLayer>\*\*](#) A layer that contains an alternative to material in another layer.

att.layer.log → <oLayer>

### Constraints

@def attribute should have content.

The value in @def should correspond to the @xml:id attribute of a layerDef element.

### Declaration

```
<classSpec ident="att.layer.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.cue"/>
    <memberOf key="att.meterConformance"/>
  </classes>

    <attDef ident="def" usage="opt">
      <desc xml:lang="en">Provides a mechanism for linking the layer to a layerDef element.</desc>
      <datatype>
        <rng:ref name="data.URI"/>
      </datatype>
    <constraintSpec ident="check_defTarget_layer" scheme="schematron">
```

```
<constraint>
  <sch:rule context="mei:layer/@def">
    <sch:assert role="warning" test="not(normalize-space(.) eq '')">@def
      attribute should have content.</sch:assert>
    <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
      substring($i,2)=//mei:layerDef@Xml:id">The value in @def should correspond
      to the @xml:id attribute of a layerDef element.</sch:assert>
  </sch:rule>
</constraint>
</constraintSpec>
</attDef>
</attList>
</classSpec>
```

## att.layer.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.layer.vis → @visible

### Available at

**<layer>** An independent stream of events on a staff.

att.layer.vis → <layer>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.layer.vis → <oLayer>

### Declaration

```
<classSpec ident="att.layer.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.visibility"/>
  </classes>
</classSpec>
```

## att.layerDef.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<layerDef>** Container for layer meta-information.

att.layerDef.anl → <layerDef>

#### Declaration

```
<classSpec ident="att.layerDef.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.layerDef.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@instr** (*optional*) Provides a way of pointing to a MIDI instrument definition. It must contain the ID of an [<instrDef>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.layerDef.ges → @instr

**@tune.Hz** (*optional*) Holds a value for cycles per second, i.e., Hertz, for a tuning reference pitch. Value is a decimal number.

att.layerDef.ges → @tune.Hz

**@tune.pname** (*optional*) Holds the pitch name of a tuning reference pitch, i.e., the central tone of a tuning system. Value conforms to [data.PITCHNAME](#).

att.layerDef.ges → @tune.pname

**@tune.temper** (*optional*) Provides an indication of the tuning system, just, for example. Value conforms to [data.TEMPERAMENT](#).

att.layerDef.ges → @tune.temper

### Available at

[<layerDef>](#) Container for layer meta-information.

att.layerDef.ges → <layerDef>

### Declaration

```
<classSpec ident="att.layerDef.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.instrumentIdent"/>
    <memberOf key="att.tuning"/>
  </classes>
</classSpec>
```

# att.layerDef.log

Logical domain attributes.

[MEI.shared](#)

## Attributes

**@beam.group** (*optional*) Provides an example of how automated beaming (including secondary beams) is to be performed. Value is plain text.

att.layerDef.log → @beam.group

**@beam.rests** (*optional*) Indicates whether automatically-drawn beams should include rests shorter than a quarter note duration. Value conforms to [data.BOOLEAN](#).

att.layerDef.log → @beam.rests

**@dur.default** (*optional*) Contains a default duration in those situations when the first note, rest, chord, etc. in a measure does not have a duration specified. Value conforms to [data.DURATION](#).

att.layerDef.log → @dur.default

**@num.default** (*optional*) Along with numbase.default, describes the default duration as a ratio. num.default is the first value in the ratio. Value is a positive integer.

att.layerDef.log → @num.default

**@numbase.default** (*optional*) Along with num.default, describes the default duration as a ratio. numbase.default is the second value in the ratio. Value is a positive integer.

att.layerDef.log → @numbase.default

**@oct.default** (*optional*) Contains a default octave specification for use when the first note, rest, chord, etc. in a measure does not have an octave value specified. Value conforms to [data.OCTAVE](#).

att.layerDef.log → @oct.default

**@trans.diat** (*optional*) Records the amount of diatonic pitch shift, e.g., C to C♯ = 0, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.layerDef.log → @trans.diat

**@trans.semi** (*optional*) Records the amount of pitch shift in semitones, e.g., C to C♯ = 1, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.layerDef.log → @trans.semi

## Available at

**<layerDef>** Container for layer meta-information.

att.layerDef.log → <layerDef>

## Declaration

```

# att.layerDef.log.cmn

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@beam.group** (*optional*) Provides an example of how automated beaming (including secondary beams) is to be performed. Value is plain text.

att.layerDef.log.cmn → @beam.group

**@beam.rests** (*optional*) Indicates whether automatically-drawn beams should include rests shorter than a quarter note duration. Value conforms to [data.BOOLEAN](#).

att.layerDef.log.cmn → @beam.rests

## Available at

**<layerDef>** Container for layer meta-information.

att.layerDef.log.cmn → <layerDef>

## Declaration

```
<classSpec ident="att.layerDef.log.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.beaming.log"/>
  </classes>
</classSpec>
```

## att.layerDef.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@beam.color** (*optional*) Color of beams, including those associated with tuples. Value conforms to [data.COLOR](#).

att.layerDef.vis → @beam.color

**@beam.rend** (*optional*) Encodes whether a beam is "feathered" and in which direction. Allowed values are: "**acc**" (*Beam lines grow farther apart from left to right.*), "**rit**" (*Beam lines grow closer together from left to right.*), "**norm**" (*Beam lines are equally-spaced over the entire length of the beam.*)

att.layerDef.vis → @beam.rend

**@beam.slope** (*optional*) Captures beam slope. Value is a decimal number.

att.layerDef.vis → @beam.slope

**@text.fam** (*optional*) Provides a default value for the font family name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTFAMILY](#).

att.layerDef.vis → @text.fam

**@text.name** (*optional*) Provides a default value for the font name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTNAME](#).

att.layerDef.vis → @text.name

**@text.size** (*optional*) Provides a default value for the font size of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSIZE](#).

att.layerDef.vis → @text.size

**@text.style** (*optional*) Provides a default value for the font style of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSTYLE](#).

att.layerDef.vis → @text.style

**@text.weight** (*optional*) Provides a default value for the font weight for text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTWEIGHT](#).

att.layerDef.vis → @text.weight

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.layerDef.vis → @visible

## att.layerIdent

Attributes that identify the layer to which a feature applies.

### Referenced in chapters

[8.4 Vocally Performed Text Encoded Separately](#)

### Module

[MEI.shared](#)

### Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.layerIdent → @layer

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.layerIdent → <accid>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.layerIdent → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.layerIdent → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.layerIdent → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.layerIdent → <attacca>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.layerIdent → <bTrem>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.layerIdent → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.layerIdent → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.layerIdent → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.layerIdent → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.layerIdent → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.layerIdent → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.layerIdent → <caesura>

**<cc>** MIDI parameter/control change.

att.layerIdent → <cc>

**<chan>** MIDI channel assignment.

att.layerIdent → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.layerIdent → <chanPr>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.layerIdent → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.layerIdent → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.layerIdent → <clefGrp>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.layerIdent → <cpMark>

**<cue>** MIDI cue point.

att.layerIdent → <cue>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.layerIdent → <dir>

**<dot>** Dot of augmentation or division.

att.layerIdent → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.layerIdent → <dynam>

**<episema>** Episema.

att.layerIdent → <episema>

**<f>** Single element of a figured bass indication.

att.layerIdent → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.layerIdent → <fTrem>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.layerIdent → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.layerIdent → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.layerIdent → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.layerIdent → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.layerIdent → <graceGrp>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.layerIdent → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.layerIdent → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.layerIdent → <harm>

**<harpPedal>** Harp pedal diagram.

att.layerIdent → <harpPedal>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.layerIdent → <hex>

**<hispanTick>** Hispanic tick.

att.layerIdent → <hispanTick>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.layerIdent → <lg>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.layerIdent → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.layerIdent → <lv>

**<mRest>** Complete measure rest in any meter.

att.layerIdent → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.layerIdent → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.layerIdent → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.layerIdent → <mSpace>

**<marker>** MIDI marker meta-event.

att.layerIdent → <marker>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.layerIdent → <metaMark>

**<metaText>** MIDI text meta-event.

att.layerIdent → <metaText>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.layerIdent → <midi>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.layerIdent → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.layerIdent → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.layerIdent → <multiRpt>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.layerIdent → <nc>

**<ncGrp>** Collection of one or more neume components.

att.layerIdent → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.layerIdent → <neume>

**<note>** A single pitched event.

att.layerIdent → <note>

**<noteOff>** MIDI note-off event.

att.layerIdent → <noteOff>

**<noteOn>** MIDI note-on event.

att.layerIdent → <noteOn>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.layerIdent → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.layerIdent → <ornam>

**<pad>** An indication of extra visual space between notational elements.

att.layerIdent → <pad>

**<pedal>** Piano pedal mark.

att.layerIdent → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.layerIdent → <phrase>

**<port>** MIDI port.

att.layerIdent → <port>

**<prog>** MIDI program change.

att.layerIdent → <prog>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.layerIdent → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.layerIdent → <rest>

**<seqNum>** MIDI sequence number.

att.layerIdent → <seqNum>

**<signifLet>** Significantive letter(s).

att.layerIdent → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.layerIdent → <slur>

**<sp>** Contains an individual speech in a performance text.

att.layerIdent → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.layerIdent → <space>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.layerIdent → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.layerIdent → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.layerIdent → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.layerIdent → <trill>

**<trkName>** MIDI track/sequence name.

att.layerIdent → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.layerIdent → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.layerIdent → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.layerIdent → <turn>

**<vel>** MIDI Note-on/off velocity.

att.layerIdent → <vel>

## Declaration

```
<classSpec ident="att.layerIdent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that identify the layer to which a feature applies.</desc>
  <attList>
    <attDef ident="layer" usage="opt">
      <desc xml:lang="en">Identifies the layer to which a feature applies.</desc>

</classSpec>
```

## att.ligature.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.ligature.anl → <ligature>

#### Declaration

```
<classSpec ident="att.ligature.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.ligature.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.ligature.ges → <ligature>

#### Declaration

```
<classSpec ident="att.ligature.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.ligature.log

Logical domain attributes.

### Module

[MEI.mensural](#)

### Attributes

#### Available at

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.ligature.log → <ligature>

#### Declaration

```
<classSpec ident="att.ligature.log" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
</classSpec>
```

# att.ligature.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.ligature.vis → @color

**@form** (*optional*) Provides an indication of the function of the ligature. Value conforms to [data.LIGATUREFORM](#).

att.ligature.vis → @form

## Available at

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.ligature.vis → <ligature>

## Declaration

```

<classSpec ident="att.ligature.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.color"/>
  </classes>
  <attList>
    <attDef ident="form" usage="opt">
      <desc xml:lang="en">Provides an indication of the function of the ligature.</desc>
      <datatype>
        <rng:ref name="data.LIGATUREFORM"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.line.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.line.anl → <line>

#### Declaration

```
<classSpec ident="att.line.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.line.ges

Attributes for describing the performed components of a line.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.line.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.line.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.line.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.line.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.line.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.line.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.line.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.line.ges → @tstamp2.real

### Available at

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.line.ges → <line>

### Declaration

```
<classSpec ident="att.line.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Attributes for describing the performed components of a line.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

## att.line.log

Attributes for describing the logical behavior of a line.

### Module

[MEI.usersymbols](#)

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.line.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.line.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.line.log → @evaluate

**@func** (*recommended*) Indicates the function of the line. Allowed values are: "**coloration**" (*Indicates coloration in material transcribed from a source originally in mensural notation.*), "**ligature**" (*Marks a ligature in material transcribed from a source originally in mensural notation.*), "**unknown**" (*The function of the line is unknown.*)

att.line.log → @func

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.line.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.line.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.line.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.line.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.line.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.line.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.line.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.line.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.line.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.line.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.line.log → @when

## Available at

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.line.log → <line>

## Declaration

```

<classSpec ident="att.line.log" module="MEI.usersymbols" type="atts">

```

## att.line.vis

Attributes for describing the visual appearance of a line.

### Module

[MEI.visual](#)

### Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.line.vis → @color

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.line.vis → @endho

**@endsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.line.vis → @endsym

**@endsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.line.vis → @endsym.size

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.line.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.line.vis → @endvo

**@form** (*optional*) Visual form of the line. Value conforms to [data.LINEFORM](#).

att.line.vis → @form

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.line.vis → @ho

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.line.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.line.vis → @startho

**@startsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.line.vis → @startsym

**@startsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.line.vis → @startsym.size

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.line.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.line.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.line.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.line.vis → @vo

**@width** (*optional*) Width of the line. Value conforms to [data.LINEWIDTH](#).

att.line.vis → @width

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.line.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.line.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.line.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.line.vis → @y2

## Available at

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.line.vis → <line>

DEVELOPMENT  
VERSION

## att.lineLoc

Attributes for identifying the staff line with which a feature is associated.

### Module

[MEI.shared](#)

### Attributes

**@line** (*optional*) Indicates the line upon which a feature stands. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff. Value conforms to [data.CLEFLINE](#).

att.lineLoc → @line

### Available at

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.lineLoc → <clef>

### Declaration

```

<classSpec ident="att.lineLoc" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes for identifying the staff line with which a feature is
  associated.</desc>
  <attList>
    <attDef ident="line" usage="opt">
      <desc xml:lang="en">Indicates the line upon which a feature stands. The value must be
      in the range between 1 and the number of lines on the staff. The numbering of lines
      starts with the lowest line of the staff.</desc>
      <datatype>
        <rng:ref name="data.CLEFLINE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.lineRend

Attributes that record the visual rendition of lines.

### Module

MEI.shared

### Attributes

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).  
att.lineRend → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).  
att.lineRend → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).  
att.lineRend → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.  
att.lineRend → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).  
att.lineRend → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).  
att.lineRend → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).  
att.lineRend → @lwidth

### Available at

**<attacca>** An instruction to begin the next section or movement of a composition without pause.  
att.lineRend → <attacca>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.  
att.lineRend → <bracketSpan>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).  
att.lineRend → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.  
att.lineRend → <dynam>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.  
att.lineRend → <ending>

**<f>** Single element of a figured bass indication.

att.lineRend → <f>

**<fing>** finger – An individual finger in a fingering indication.

att.lineRend → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.lineRend → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.lineRend → <gliss>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.lineRend → <harm>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.lineRend → <octave>

**<pedal>** Piano pedal mark.

att.lineRend → <pedal>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.lineRend → <repeatMark>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.lineRend → <tempo>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.lineRend → <trill>

## Declaration

```

```

## att.lineRend.base

Attributes that record the basic visual rendition of lines.

### Module

[MEI.shared](#)

### Attributes

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.lineRend.base → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.lineRend.base → @lsegs

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.lineRend.base → @lwidth

### Available at

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.lineRend.base → <attacca>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.lineRend.base → <bracketSpan>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.lineRend.base → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.lineRend.base → <dynam>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.lineRend.base → <ending>

**<f>** Single element of a figured bass indication.

att.lineRend.base → <f>

**<fing>** finger – An individual finger in a fingering indication.

att.lineRend.base → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.lineRend.base → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.lineRend.base → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.lineRend.base → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.lineRend.base → <harm>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.lineRend.base → <octave>

**<pedal>** Piano pedal mark.

att.lineRend.base → <pedal>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.lineRend.base → <repeatMark>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.lineRend.base → <tempo>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.lineRend.base → <trill>

## Constraints

@lform attribute matching "dashed", "dotted", or "wavy" required.

## Declaration

```
<classSpec ident="att.lineRend.base" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record the basic visual rendition of lines.</desc>

```

## att.linking

Attributes that specify element-to-element relationships.

### Referenced in chapters

[2.3.5 Linking Attributes](#), [10.1.1 General Relationships Between Elements](#), [13.2.2 Specifying Link Elements](#)

### Module

[MEI.shared](#)

### Attributes

**@copyof** (*optional*) Points to an element of which the current element is a copy. Value conforms to [data.URI](#).

att.linking → @copyof

**@corresp** (*optional*) Used to point to other elements that correspond to this one in a generic fashion. One or more values from [data.URI](#), separated by spaces.

att.linking → @corresp

**@follows** (*optional*) points to one or more events in a user-defined collection that are known to be predecessors of the current element. One or more values from [data.URI](#), separated by spaces.

att.linking → @follows

**@next** (*optional*) Used to point to the next event(s) in a user-defined collection. One or more values from [data.URI](#), separated by spaces.

att.linking → @next

**@precedes** (*optional*) Points to one or more events in a user-defined collection that are known to be successors of the current element. One or more values from [data.URI](#), separated by spaces.

att.linking → @precedes

**@prev** (*optional*) Points to the previous event(s) in a user-defined collection. One or more values from [data.URI](#), separated by spaces.

att.linking → @prev

**@sameas** (*optional*) Points to an element that is the same as the current element but is not a literal copy of the current element. One or more values from [data.URI](#), separated by spaces.

att.linking → @sameas

**@synch** (*optional*) Points to elements that are synchronous with the current element. One or more values from [data.URI](#), separated by spaces.

att.linking → @synch

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.linking → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.linking → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.link → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.link → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.link → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.link → <actor>

**<add>** Marks an addition to the text.

att.link → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.link → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.link → <addName>

**<addrLine>** Single line of a postal address.

att.link → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.link → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.link → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.link → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.link → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.link → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.link → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.link → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.link → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.link → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.linkin → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.linkin → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.linkin → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.linkin → <arranger>

**<artic>** An indication of how to play a note or chord.

att.linkin → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.linkin → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.linkin → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.linkin → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.linkin → <author>

**<avFile>** References an external digital audio or video file.

att.linkin → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.linkin → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.linkin → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.linkin → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.linkin → <barLine>

**<barre>** A barre in a chord tablature grid.

att.linkin → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.linkin → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.linkin → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.linkin → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.linkin → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.linkin → <bibl>

**<biblList>** List of bibliographic references.

att.linkin → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.linkin → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.linkin → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.linkin → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.linkin → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.linkin → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.linkin → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.linkin → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.linkin → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.linkin → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.linkin → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.linkin → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.linkin → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.linkin → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.linkin → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.linkin → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.linkin → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.linkin → <castList>

**<catRel>** Contains the name of a related category.

att.linkin → <catRel>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.linkin → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.linkin → <category>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.linkin → <cb>

**<cc>** MIDI parameter/control change.

att.linkin → <cc>

**<chan>** MIDI channel assignment.

att.linkin → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.linkin → <chanPr>

**<change>** Individual change within the revision description.

att.linkin → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.linkin → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.linkin → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.linkin → <chord>

**<chordDef>** Chord tablature definition.

att.linkin → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a [<chordDef>](#) element.

att.linkng → <chordMember>

**<chordTable>** Chord/tablature look-up table.

att.linkng → <chordTable>

**<classDecls>** Groups information which describes the nature or topic of an entity.

att.linkng → <classDecls>

**<classification>** Groups information which describes the nature or topic of an entity.

att.linkng → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.linkng → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.linkng → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.linkng → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.linkng → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.linkng → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.linkng → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.linkng → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.linkng → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.linkng → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.linkng → <contentItem>

**<contents>** List of the material contained within a resource.

att.linkng → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.linkng → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.linkin → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.linkin → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.linkin → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.linkin → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.linkin → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.linkin → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.linkin → <creation>

**<cue>** MIDI cue point.

att.linkin → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.linkin → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.linkin → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.linkin → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.linkin → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.linkin → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.linkin → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.linkin → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.linkin → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.linkin → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.linkin → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.linkng → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.linkng → <desc>

**<dim>** Any single dimensional specification.

att.linkng → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.linkng → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.linkng → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.linkng → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.linkng → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.linkng → <div>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.linkng → <divLine>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.linkng → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.linkng → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.linkng → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.linkng → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.linkng → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.linkng → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.linkng → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.linkin → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.linkin → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.linkin → <epigraph>

**<episema>** Episema.

att.linkin → <episema>

**<event>** Contains a free-text event description.

att.linkin → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.linkin → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.linkin → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.linkin → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.linkin → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.linkin → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.linkin → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.linkin → <expressionList>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.linkin → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.linkin → <extent>

**<f>** Single element of a figured bass indication.

att.linkin → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.linkin → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.linkin → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.linkng → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.linkng → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.linkng → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.linkng → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.linkng → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.linkng → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.linkng → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.linkng → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.linkng → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.linkng → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.linkng → <foliation>

**<folium>** Describes a single leaf of paper.

att.linkng → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.linkng → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.linkng → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.linkng → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.linkng → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.linkng → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.linkin → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.linkin → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.linkin → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.linkin → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.linkin → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.linkin → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.linkin → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.linkin → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.linkin → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.linkin → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.linkin → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.linkin → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.linkin → <hand>

**<handList>** Container for one or more hand elements.

att.linkin → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.linkin → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.linkin → <harm>

**<harpPedal>** Harp pedal diagram.

att.linkin → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.linkng → <head>

**<height>** Description of the vertical size of an object.

att.linkng → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.linkng → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.linkng → <hex>

**<hispanTick>** Hispanic tick.

att.linkng → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.linkng → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.linkng → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.linkng → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.linkng → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.linkng → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.linkng → <incipCode>

**<incipText>** Opening words of a musical composition.

att.linkng → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.linkng → <inscription>

**<instrDef>** MIDI instrument declaration.

att.linkng → <instrDef>

**<instrGrp>** Collects MIDI instrument definitions.

att.linkng → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.linkng → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.linkng → <item>

**<itemList>** Gathers bibliographic item entities.

att.linkng → <itemList>

**<key>** Key captures information about tonal center and mode.

att.linkng → <key>

**<keyAccid>** Accidental in a key signature.

att.linkin → <keyAccid>

**<keySig>** Written key signature.

att.linkin → <keySig>

**<l>** Contains a single line of text within a line group.

att.linkin → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.linkin → <label>

**<labelAbbr>** A label on the pages following the first.

att.linkin → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.linkin → <langUsage>

**<language>** Description of a language used in the document.

att.linkin → <language>

**<layer>** An independent stream of events on a staff.

att.linkin → <layer>

**<layerDef>** Container for layer meta-information.

att.linkin → <layerDef>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.linkin → <layout>

**<layoutDesc>** Collects layout descriptions.

att.linkin → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.linkin → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.linkin → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.linkin → <lg>

**<li>** Single item in a <list>.

att.linkin → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.linkin → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.linkin → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.linkin → <line>

**<liquecent>** Liquescent.

att.linking → <liquecent>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.linking → <list>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.linking → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.linking → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.linking → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.linking → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.linking → <mNum>

**<mRest>** Complete measure rest in any meter.

att.linking → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.linking → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.linking → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.linking → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.linking → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.linking → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.linking → <mapping>

**<marker>** MIDI marker meta-event.

att.linking → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.linking → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.linking → <measure>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more **<mei>** elements, each with its own complete header.

att.linkin → <meiCorpus>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.linkin → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.linkin → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.linkin → <metaMark>

**<metaText>** MIDI text meta-event.

att.linkin → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.linkin → <meter>

**<meterSig>** Written meter signature.

att.linkin → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.linkin → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.linkin → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.linkin → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.linkin → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.linkin → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.linkin → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an etude, opera, song cycle, symphony, or anthology of piano solos.

att.linkin → <music>

**<name>** Proper noun or noun phrase.

att.linkin → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.linkin → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.linkng → <namespace>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.linkng → <nc>

**<ncGrp>** Collection of one or more neume components.

att.linkng → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.linkng → <neume>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.linkng → <normalization>

**<note>** A single pitched event.

att.linkng → <note>

**<noteOff>** MIDI note-off event.

att.linkng → <noteOff>

**<noteOn>** MIDI note-on event.

att.linkng → <noteOn>

**<notesStmt>** (notes statement)– Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.linkng → <notesStmt>

**<num>** Numeric information in any form.

att.linkng → <num>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.linkng → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.linkng → <oStaff>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.linkng → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.linkng → <orig>

**<oriscus>** Oriscus.

att.linkng → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.linkng → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.linkng → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.linkning → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.linkning → <p>

**<pad>** An indication of extra visual space between notational elements.

att.linkning → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.linkning → <part>

**<parts>** Provides a container for performers' parts.

att.linkning → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.linkning → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.linkning → <pb>

**<pedal>** Piano pedal mark.

att.linkning → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.linkning → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.linkning → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.linkning → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.linkning → <perfResList>

**<performance>** A presentation of one or more musical works.

att.linkning → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.linkning → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.linkning → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.linkning → <pgDesc>

**<pgFoot>** A running footer.

att.linkning → <pgFoot>

**<pgHead>** A running header.

att.linkning → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.linkin → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.linkin → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.linkin → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.linkin → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.linkin → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.linkin → <playingSpeed>

**<plica>** Plica

att.linkin → <plica>

**<port>** MIDI port.

att.linkin → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.linkin → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.linkin → <postCode>

**<price>** The cost of access to a bibliographic item.

att.linkin → <price>

**<prog>** MIDI program change.

att.linkin → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.linkin → <projectDesc>

**<propName>** Name of a property of the symbol.

att.linkin → <propName>

**<propValue>** A single property value.

att.linkin → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.linkin → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.linkin → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.linkin → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.linkin → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.linkin → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.linkin → <publisher>

**<q>** Contains material which is distinguished from the surrounding phrase-level text using quotation marks or a similar method. Use **<quote>** for block-level quotations.

att.linkin → <q>

**<quilisma>** Quilisma.

att.linkin → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.linkin → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.linkin → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.linkin → <recipient>

**<recording>** A recorded performance.

att.linkin → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.linkin → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.linkin → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.linkin → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.linkin → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.linkin → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.linkin → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.linkin → <relation>

**<relationList>** Gathers relation elements.

att.linkin → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.linkin → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.linkin → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.linkin → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.linkin → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.linkin → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.linkin → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.linkin → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.linkin → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.linkin → <role>

**<roleDesc>** Describes a character's role in a drama.

att.linkin → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.linkin → <roleName>

**<rubic>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.linkin → <rubic>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.linkin → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.linkin → <sb>

**<score>** Full score view of the musical content.

att.linkin → <score>

**<scoreDef>** Container for score meta-information.

att.linkin → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.linkin → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.linkin → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.linkin → <scriptNote>

**<seal>** A single seal or similar attachment.

att.linkin → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.linkin → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.linkin → <secFolio>

**<section>** Segment of music data.

att.linkin → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.linkin → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.linkin → <segmentation>

**<seqNum>** MIDI sequence number.

att.linkin → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.linkin → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.linkin → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.linkin → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.linkin → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.linkin → <signatures>

**<signifLet>** Significantive letter(s).

att.linkin → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.linkin → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.linkng → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.linkng → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.linkng → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.linkng → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.linkng → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.linkng → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.linkng → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.linkng → <sponsor>

**<stack>** An inline table with a single column.

att.linkng → <stack>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.linkng → <staff>

**<staffDef>** Container for staff meta-information.

att.linkng → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.linkng → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.linkng → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.linkng → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.linkng → <stdVals>

**<stem>** A stem element.

att.linkng → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.linkng → <street>

**<strophicus>** Strophicus.

att.linkin → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.linkin → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.linkin → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.linkin → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.linkin → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.linkin → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.linkin → <surface>

**<syl>** Individual lyric syllable.

att.linkin → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.linkin → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.linkin → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.linkin → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.linkin → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.linkin → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.linkin → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.linkin → <sysReq>

**<table>** Contains text displayed in tabular form.

att.linkin → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.linkin → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.linkin → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.linkin → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.linkin → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.linkin → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.linkin → <term>

**<termList>** Collection of text phrases which describe a resource.

att.linkin → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.linkin → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.linkin → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.linkin → <tie>

**<title>** Title of a bibliographic entity.

att.linkin → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.linkin → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.linkin → <titlePart>

**<titleStmt>** Container for title and responsibility meta-data.

att.linkin → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.linkin → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.linkin → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.linkin → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.linkin → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.linkin → <trill>

**<trkName>** MIDI track/sequence name.

att.linkin → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.linkin → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.linkin → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.linkin → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.linkin → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.linkin → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.linkin → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.linkin → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.linkin → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.linkin → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.linkin → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.linkin → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.linkin → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.linkin → <when>

**<width>** Description of the horizontal size of an object.

att.linkin → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.linkin → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.linkin → <workList>

**<zone>** Defines an area of interest within a <surface> or graphic file.

att.link → <zone>

## Constraints

An element with a copyof attribute can only have comment or processing instruction descendants.  
 @copyof attribute should have content.  
 The value in @copyof should correspond to the @xml:id attribute of an element.  
 @corresp attribute should have content.  
 Each value in @corresp should correspond to the @xml:id attribute of an element.  
 @follows attribute should have content.  
 Each value in @follows must correspond to the @xml:id attribute of an element.  
 @next attribute should have content.  
 Each value in @next should correspond to the @xml:id attribute of an element.  
 @precedes attribute should have content.  
 Each value in @precedes must correspond to the @xml:id attribute of an element.  
 @prev attribute should have content.  
 Each value in @prev should correspond to the @xml:id attribute of an element.  
 @sameas attribute should have content.  
 Each value in @sameas should correspond to the @xml:id attribute of an element.  
 @synch attribute should have content.  
 Each value in @synch should correspond to the @xml:id attribute of an element.

# att.liquescent.vis

Visual domain attributes.

## Referenced in chapters

[6.4.5 Liquescent attributes](#)

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.liquescent.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.liquescent.vis → @color

**@curve** (*optional*) Records direction of curvature. Allowed values are: "**a**" (*Anti-clockwise curvature.*), "**c**" (*Clockwise curvature.*)

att.liquescent.vis → @curve

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.liquescent.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.liquescent.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.liquescent.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.liquescent.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.liquescent.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.liquescent.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout.*)

att.liquescent.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.liquescent.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.liquescent.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.liquescent.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.liquescent.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.liquescent.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.liquescent.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.liquescent.vis → @loc

**@looped** (*optional*) Indicates whether curve is closed. Value conforms to [data.BOOLEAN](#).

att.liquescent.vis → @looped

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.liquescent.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facsc` attribute. Value is a decimal number.

att.liquescent.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facsc` attribute. Value is a decimal number.

att.liquescent.vis → @y

## Available at

**<liquescent>** Liquescent.

att.liquescent.vis → <liquescent>

## Declaration

```

## att.lv.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.lv.anl → <lv>

#### Declaration

```
<classSpec ident="att.lv.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.lv.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.lv.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.lv.ges → @tstamp2.real

### Available at

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.lv.ges → <lv>

### Declaration

```
<classSpec ident="att.lv.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

## att.lv.log

Logical domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.lv.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.lv.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.lv.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.lv.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.lv.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.lv.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.lv.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.lv.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.lv.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.lv.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.lv.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.lv.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.lv.log → @when

## Available at

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.lv.log → <lv>

## Declaration

```
<classSpec ident="att.lv.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.lv.vis

Visual domain attributes. The vo attribute is the vertical offset (from its normal position) of the entire rendered tie. The startho, startvo, endho, and endvo attributes describe the horizontal and vertical offsets of the start and end points of the sign in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Startto and endto describe the start and end points in terms of time; that is, beats.

### Module

[MEI.visual](#)

### Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.lv.vis → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.lv.vis → @bulge

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.lv.vis → @color

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (*Upward curve.*), "**below**" (*Downward curve.*), "**mixed**" (*A "meandering" curve, both above and below the items it pertains to.*)

att.lv.vis → @curvedir

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.lv.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.lv.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.lv.vis → @endvo

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.lv.vis → @ho

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.lv.vis → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.lv.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.lv.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.lv.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.lv.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.lv.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.lv.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.lv.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.lv.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.lv.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.lv.vis → @y2

## Available at

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.lv.vis → <lv>

## Declaration

```
<classSpec ident="att.lv.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes. The vo attribute is the vertical offset
  (from its normal position) of the entire rendered tie. The startho, startvo, endho, and

  <memberOf key="att.curveRend"/>
</classes>
</classSpec>
```

## att.lvPresent

Attributes that indicate the presence of an l.v. (laissez vibrer) marking attached to a feature. If visual information about the lv sign needs to be recorded, then an [lv](#) element should be employed.

### Module

[MEI.cmn](#)

### Attributes

**@lv** (*optional*) Indicates the attachment of an l.v. (laissez vibrer) sign to this element. Value conforms to [data.BOOLEAN](#).

att.lvPresent → @lv

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.lvPresent → <chord>

**<note>** A single pitched event.

att.lvPresent → <note>

### Declaration

```

<classSpec ident="att.lvPresent" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that indicate the presence of an l.v. (laissez vibrer)
  marking attached to a feature. If visual information about the lv sign needs to be
  recorded, then an
    <gi scheme="MEI">lv</gi>
  element should be employed.</desc>
  <attList>
    <attDef ident="lv" usage="opt">

      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.lyricStyle

Attributes that describe default typography of lyrics.

### Referenced in chapters

[4.2.2 Defining Score Parameters for CMN](#)

### Module

[MEI.shared](#)

### Attributes

**@lyric.align** (*optional*) Describes the alignment of lyric syllables associated with a note or chord. Value conforms to [data.MEASUREMENTSIGNED](#).

att.lyricStyle → @lyric.align

**@lyric.fam** (*optional*) Sets the font family default value for lyrics. Value conforms to [data.FONTFAMILY](#).  
att.lyricStyle → @lyric.fam

**@lyric.name** (*optional*) Sets the font name default value for lyrics. Value conforms to [data.FONTNAME](#).  
att.lyricStyle → @lyric.name

**@lyric.size** (*optional*) Sets the default font size value for lyrics. Value conforms to [data.FONTSIZE](#).  
att.lyricStyle → @lyric.size

**@lyric.style** (*optional*) Sets the default font style value for lyrics. Value conforms to [data.FONTSTYLE](#).  
att.lyricStyle → @lyric.style

**@lyric.weight** (*optional*) Sets the default font weight value for lyrics. Value conforms to [data.FONTWEIGHT](#).  
att.lyricStyle → @lyric.weight

### Available at

**<scoreDef>** Container for score meta-information.  
att.lyricStyle → <scoreDef>

**<staffDef>** Container for staff meta-information.  
att.lyricStyle → <staffDef>

### Declaration

```

# att.lyrics.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.lyrics.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.lyrics.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.lyrics.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.lyrics.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.lyrics.vis → @fontweight

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.lyrics.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.lyrics.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.lyrics.vis → @place

## Available at

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.lyrics.vis → <lg>

## att.mNum.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.mNum.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.mNum.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.mNum.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.mNum.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.mNum.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.mNum.vis → @fontweight

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.mNum.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.mNum.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.mNum.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.mNum.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.mNum.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.mNum.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.mNum.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.mNum.vis → @y

## Available at

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the `n` attribute on **<measure>** does not adequately capture the appearance or placement of the measure number/label.

att.mNum.vis → <mNum>

## Declaration

```
<classSpec ident="att.mNum.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>

```

# att.mRest.ges

Gestural domain attributes.

## Module

[MEI.gestural](#)

## Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.mRest.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration. Value conforms to [data.DURATION.GESTURAL](#).

att.mRest.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.mRest.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.mRest.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.mRest.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.mRest.ges → @dur.recip

## Available at

**<mRest>** Complete measure rest in any meter.

att.mRest.ges → <mRest>

## Declaration

```
<classSpec ident="att.mRest.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
  </classes>
</classSpec>
```

## att.mRest.log

Logical domain attributes.

### Module

MEI.cmn

### Attributes

**@cue** (*optional*) Value conforms to [data.BOOLEAN](#).

att.mRest.log → @cue

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.mRest.log → @dur

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.mRest.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.mRest.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mRest.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mRest.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.mRest.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.mRest.log → @when

### Available at

**<mRest>** Complete measure rest in any meter.

att.mRest.log → <mRest>

### Declaration

```
<classSpec ident="att.mRest.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.cue"/>
    <memberOf key="att.duration.additive"/>
```

```
<memberOf key="att.event"/>
</classes>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.mRest.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.mRest.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.mRest.vis → @color

**@cutout** (*optional*) "Cut-out" style. Allowed values are: "**cutout**" (*The staff lines should not be drawn.*)

att.mRest.vis → @cutout

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.mRest.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.mRest.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.mRest.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.mRest.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.mRest.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout.*)

att.mRest.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.mRest.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.mRest.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.mRest.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.mRest.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.mRest.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.mRest.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.mRest.vis → @loc

**@oloc** (*optional*) Records staff location in terms of written octave. Value conforms to [data.OCTAVE](#).

att.mRest.vis → @oloc

**@ploc** (*optional*) Captures staff location in terms of written pitch name. Value conforms to [data.PITCHNAME](#).

att.mRest.vis → @ploc

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.mRest.vis → @to

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.mRest.vis → @visible

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.mRest.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.mRest.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.mRest.vis → @y

## Available at

**<mRest>** Complete measure rest in any meter.

att.mRest.vis → <mRest>

## Declaration

```
<classSpec ident="att.mRest.vis" module="MEI.visual" type="atts">

# att.mRpt.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.mRpt.log → @layer

**@num** (*optional*) Records a number or count accompanying a notational feature. Value is a positive integer.

att.mRpt.log → @num

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.mRpt.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mRpt.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mRpt.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.mRpt.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.mRpt.log → @when

## Available at

**<mRpt>** An indication that the previous measure should be repeated.

att.mRpt.log → <mRpt>

## Declaration

```
<classSpec ident="att.mRpt.log" module="MEI.cmn" type="atts">

    <memberOf key="att.numbered"/>
  </classes>
</classSpec>
```

## att.mRpt.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.mRpt.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.mRpt.vis → @color

**@expand** (*optional*) Indicates whether to render a repeat symbol or the source material to which it refers. A value of 'true' renders the source material, while 'false' displays the repeat symbol. Value conforms to [data.BOOLEAN](#).

att.mRpt.vis → @expand

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.mRpt.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.mRpt.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.mRpt.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.mRpt.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.mRpt.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.mRpt.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.mRpt.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.mRpt.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.mRpt.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.mRpt.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.mRpt.vis → @lineheight

**@num.place** (*optional*) States where the tuplet number will be placed in relation to the note heads. Value conforms to [data.STAFFREL.basic](#).

att.mRpt.vis → @num.place

**@num.visible** (*optional*) Determines if the tuplet number is visible. Value conforms to [data.BOOLEAN](#).

att.mRpt.vis → @num.visible

## Available at

**<mRpt>** An indication that the previous measure should be repeated.

att.mRpt.vis → <mRpt>

## Declaration

```
<classSpec ident="att.mRpt.vis" module="MEI.visual" type="atts">

    <memberOf key="att.typography"/>
  </classes>
</classSpec>
```

## att.mSpace.anl

Analytical domain attributes in the CMN repertoire. Use the n attribute to explicitly encode this measure's position in a string of measures containing only [mRest](#) elements.

### Module

[MEI.analytical](#)

### Attributes

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.mSpace.anl → @fermata

### Available at

**<mSpace>** A measure containing only empty space in any meter.

att.mSpace.anl → <mSpace>

### Declaration

```
<classSpec ident="att.mSpace.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes in the CMN repertoire. Use the n
  attribute to explicitly encode this measure's position in a string of measures containing
  only
    <gi scheme="MEI">mRest</gi>
  elements.</desc>
  <classes>
    <memberOf key="att.fermataPresent"/>
  </classes>
</classSpec>
```

## att.mSpace.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.mSpace.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.mSpace.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.mSpace.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.mSpace.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.mSpace.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.mSpace.ges → @dur.recip

### Available at

**<mSpace>** A measure containing only empty space in any meter.

att.mSpace.ges → <mSpace>

### Declaration

```
<classSpec ident="att.mSpace.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
  </classes>
</classSpec>
```

# att.mSpace.log

Logical domain attributes in the CMN repertoire.

## Module

[MEI.cmn](#)

## Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.mSpace.log → @dur

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.mSpace.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.mSpace.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mSpace.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mSpace.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.mSpace.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.mSpace.log → @when

## Available at

**<mSpace>** A measure containing only empty space in any meter.

att.mSpace.log → <mSpace>

## Declaration

```

<classSpec ident="att.mSpace.log" module="MEI.cmn" type="atts">

### Attributes

#### Available at

**<mdiv>** Contains a subdivision of the body of a musical text.

att.mdiv.anl → <mdiv>

#### Declaration

```
<classSpec ident="att.mdiv.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.mdiv.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@attacca**Indicates that the performance of the next musical division should begin immediately following this one. Value conforms to [data.BOOLEAN](#).

att.mdiv.ges → @attacca

### Available at

**<mdiv>** Contains a subdivision of the body of a musical text.

att.mdiv.ges → <mdiv>

### Declaration

```
<classSpec ident="att.mdiv.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <attList>
    <attDef ident="attacca">
      <desc xml:lang="en">Indicates that the performance of the next musical division should begin immediately following this one.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.mdiv.log

Logical domain attributes.

## Module

MEI.shared

## Attributes

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.mdiv.log → @when

## Available at

**<mdiv>** Contains a subdivision of the body of a musical text.

att.mdiv.log → <mdiv>

## Declaration

```
<classSpec ident="att.mdiv.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.alignment"/>
  </classes>
</classSpec>
```

## att.mdiv.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

#### Available at

**<mdiv>** Contains a subdivision of the body of a musical text.

att.mdiv.vis → <mdiv>

#### Declaration

```
<classSpec ident="att.mdiv.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
</classSpec>
```

# att.measure.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

**@join** (*optional*) Used for linking visually separate entities that form a single logical entity, for example, multiple slurs broken across a system break that form a single musical phrase. Also used to indicate a measure which metrically completes the current one. Record the identifiers of the separately encoded components, excluding the one carrying the attribute. One or more values from [data.URI](#), separated by spaces.

att.measure.anl → @join

## Available at

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.measure.anl → <measure>

## Declaration

```
<classSpec ident="att.measure.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.joined"/>
  </classes>
</classSpec>
```

## att.measure.ges

Gestural domain attributes. The tstamp.ges and tstamp.real attributes encode the onset time of the measure. In reality, this is usually the same as the onset time of the first event in the measure.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).  
att.measure.ges → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).  
att.measure.ges → @tstamp.real

### Available at

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.  
att.measure.ges → <measure>

### Declaration

```
<classSpec ident="att.measure.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes. The tstamp.ges and tstamp.real attributes encode the onset time of the measure. In reality, this is usually the same as the onset time of the first event in the measure.</desc>
  <classes>
    <memberOf key="att.timestamp.ges"/>
  </classes>
</classSpec>
```

## att.measure.log

Logical domain attributes. The n attribute contains a name or number associated with the measure (Read, p. 445). Often, this is an integer, but not always. For example, some measures, especially incomplete measures or those under an ending mark, may have labels that contain an integer plus a suffix, such as '12a'. Measures may even have labels, especially in editorial or analytical uses of MEI, that are entirely non-numeric strings. Measure numbers may be machine-generated instead of encoding them in the markup. However, an explicit measure number should restart numbering with the given value. The join attribute may be used to indicate another measure which metrically completes the current, incomplete one.

### Module

[MEI.cmn](#)

### Attributes

**@control** (*optional*) Indicates whether or not a bar line is "controlling"; that is, if it indicates a point of alignment across all the parts. Bar lines within a score are usually controlling; that is, they "line up". Bar lines within parts may or may not be controlling. When applied to [`<measure>`](#), this attribute indicates the nature of the right bar line but not the left. Value conforms to [data.BOOLEAN](#).

att.measure.log → @control

**@left** (*optional*) Indicates the visual rendition of the left bar line. It is present here only for facilitation of translation from legacy encodings which use it. Usually, it can be safely ignored. Value conforms to [data.BARRENDITION](#).

att.measure.log → @left

**@metcon** (*optional*) Indicates the relationship between the content of a measure and the prevailing meter. Value conforms to [data.BOOLEAN](#).

att.measure.log → @metcon

**@right** (*optional*) Indicates the function of the right bar line and is structurally important. Value conforms to [data.BARRENDITION](#).

att.measure.log → @right

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [`<when>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.measure.log → @when

### Available at

[`<measure>`](#) Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.measure.log → <measure>

### Declaration

```
<classSpec ident="att.measure.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes. The n attribute contains a name or number associated with the measure (Read, p. 445). Often, this is an integer, but not always. For example, some measures, especially incomplete measures or those under an ending mark, may
```

have labels that contain an integer plus a suffix, such as '12a'. Measures may even have labels, especially in editorial or analytical uses of MEI, that are entirely non-numeric strings.     </datatype>
  </attDef>
</attList>
</classSpec>
```

# att.measure.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@bar.len** (*optional*) States the length of bar lines in virtual units. The value must be greater than 0 and is typically equal to 2 times (the number of staff lines - 1); e.g., a value of 8 for a 5-line staff. Value is a decimal number.

att.measure.vis → @bar.len

**@bar.method** (*optional*) Records the method of barring. Value conforms to [data.BARMETHOD](#).

att.measure.vis → @bar.method

**@bar.place** (*optional*) Denotes the staff location of bar lines, if the length is non-standard; that is, not equal to 2 times (the number of staff lines - 1). Value conforms to [data.STAFFLOC](#).

att.measure.vis → @bar.place

**@width** (*optional*) Measurement of the horizontal dimension of an entity. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.measure.vis → @width

## Available at

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.measure.vis → <measure>

## Declaration

```
<classSpec ident="att.measure.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.barring"/>
    <memberOf key="att.width"/>
  </classes>
</classSpec>
```

## att.measureNumbers

Attributes pertaining to measure numbers

### Module

MEI.shared

### Attributes

**@mnum.visible** (*optional*) Indicates whether measure numbers should be displayed. Value conforms to [data.BOOLEAN](#).

att.measureNumbers → @mnum.visible

### Available at

**<scoreDef>** Container for score meta-information.

att.measureNumbers → <scoreDef>

### Declaration

```
<classSpec ident="att.measureNumbers" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes pertaining to measure numbers</desc>
  <attList>
    <attDef ident="mnum.visible" usage="opt">
      <desc xml:lang="en">Indicates whether measure numbers should be displayed.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.measurement

Attributes that record the unit of measurement in which a value is expressed.

### Referenced in chapters

[9.2.10 Numbers](#)

### Module

[MEI.shared](#)

### Attributes

**@unit** (*optional*) Indicates the unit of measurement. Allowed values are: "byte" (Byte.), "char" (Character.), "cm" (Centimeter.), "deg" (Degree.), "in" (Inch.), "issue" (Serial issue.), "ft" (Foot.), "m" (Meter.), "mm" (Millimeter.), "page" (Page.), "pc" (Pica.), "pt" (Point.), "px" (Pixel.), "rad" (Radian.), "record" (Record.), "vol" (Serial volume.), "vu" (MEI virtual unit.)

att.measurement → @unit

### Available at

**<add>** Marks an addition to the text.

att.measurement → <add>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.measurement → <biblScope>

**<bifolium>** Describes a folded sheet of paper.

att.measurement → <bifolium>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.measurement → <corr>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.measurement → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.measurement → <damage>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.measurement → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.measurement → <depth>

**<dim>** Any single dimensional specification.

att.measurement → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.measurement → <dimensions>

**<expan>** Contains the expansion of an abbreviation.

att.measurement → <expan>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.measurement → <extent>

**<folium>** Describes a single leaf of paper.

att.measurement → <folium>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.measurement → <gap>

**<height>** Description of the vertical size of an object.

att.measurement → <height>

**<num>** Numeric information in any form.

att.measurement → <num>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.measurement → <orig>

**<patch>** Describes a physical writing surface attached to the original document.

att.measurement → <patch>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.measurement → <reg>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.measurement → <restore>

**<sic>** Contains apparently incorrect or inaccurate material.

att.measurement → <sic>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.measurement → <supplied>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.measurement → <unclear>

**<width>** Description of the horizontal size of an object.

att.measurement → <width>

## Declaration

DEVELOPMENT  
VERSION

# att.mediaBounds

Attributes that establish the boundaries of a media object.

## Referenced in chapters

[12.2.1 Overview](#)

## Module

[MEI.shared](#)

## Attributes

**@begin** (*optional*) Specifies a point where the relevant content begins. A numerical value must be less and a time value must be earlier than that given by the end attribute. Value is plain text.

att.mediaBounds → @begin

**@betype** (*optional*) Type of values used in the begin/end attributes. The begin and end attributes can only be interpreted meaningfully in conjunction with this attribute. Value conforms to [data.BETYPE](#).

att.mediaBounds → @betype

**@end** (*optional*) Specifies a point where the relevant content ends. If not specified, the end of the content is assumed to be the end point. A numerical value must be greater and a time value must be later than that given by the begin attribute. Value is plain text.

att.mediaBounds → @end

## Available at

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.mediaBounds → <clip>

**<recording>** A recorded performance.

att.mediaBounds → <recording>

## Declaration

```

<classSpec ident="att.mediaBounds" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that establish the boundaries of a media object.</desc>
  <attList>
    <attDef ident="begin" usage="opt">

    <datatype>  
        <rng:ref name="data.BETYPE"/>  
    </datatype>  
</attDef>  
</attList>  
</classSpec>
```

## att.medium

Attributes describing a writing medium, such as pencil or ink.

### Module

MEI.shared

### Attributes

@medium (*optional*) Describes the writing medium. Value is plain text.

att.medium → @medium

### Available at

**<hand>** Defines a distinct scribe or handwriting style.

att.medium → <hand>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.medium → <handShift>

### Declaration

```
<classSpec ident="att.medium" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes describing a writing medium, such as pencil or ink.</desc>
  <attList>
    <attDef ident="medium" usage="opt">
      <desc xml:lang="en">Describes the writing medium.</desc>
      <datatype>
        <rng:data type="string"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.meiVersion

Attributes that record the version of MEI in use.

### Referenced in chapters

[2.1.1 Document Root Elements](#)

### Module

[MEI.shared](#)

### Attributes

**@meiversion** (*optional*) Specifies a generic MEI version label. Allowed values are: "**5.0.0-dev**"  
(*Development version of MEI 5.0.0*)

att.meiVersion → @meiversion

### Available at

**<mei>** Contains a single MEI-conformant document, consisting of an MEI header and a musical text, either in isolation or as part of an meiCorpus element.

att.meiVersion → <mei>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more **<mei>** elements, each with its own complete header.

att.meiVersion → <meiCorpus>

**<meiHead>** Supplies the descriptive and declarative metadata prefixed to every MEI-conformant text.

att.meiVersion → <meiHead>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an etude, opera, song cycle, symphony, or anthology of piano solos.

att.meiVersion → <music>

### Declaration

```
<classSpec ident="att.meiVersion" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record the version of MEI in use.</desc>
  <attList>
    <attDef ident="meiversion" usage="opt">
      <desc xml:lang="en">Specifies a generic MEI version label.</desc>
      <defaultVal>5.0.0-dev</defaultVal>
      <valList type="closed">
        <valItem ident="5.0.0-dev">
          <desc xml:lang="en">Development version of MEI 5.0.0</desc>
        </valItem>
      </valList>
    </attDef>
  </attList>
</classSpec>
```

## att.melodicFunction

Attributes describing melodic function.

### Referenced in chapters

[10.1.2 Event-Specific Analytical Information](#)

### Module

[MEI.analytical](#)

### Attributes

**@mfunc** (*optional*) Describes melodic function using [Humdrum \\*\\*embel syntax](#). Value conforms to [data.MELODICFUNCTION](#).

att.melodicFunction → @mfunc

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.melodicFunction → <nc>

**<note>** A single pitched event.

att.melodicFunction → <note>

### Declaration

```
<classSpec ident="att.melodicFunction" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Attributes describing melodic function.</desc>
  <attList>
    <attDef ident="mfunc" usage="opt">
      <desc xml:lang="en">Describes melodic function using
        <ref target="https://www.humdrum.org/rep/embel/">Humdrum **embel syntax</ref>
      .</desc>
      <datatype>
        <rng:ref name="data.MELODICFUNCTION"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.mensur.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.mensur.anl → <mensur>

#### Declaration

```
<classSpec ident="att.mensur.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.mensur.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

#### Available at

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.mensur.ges → <mensur>

#### Declaration

```
<classSpec ident="att.mensur.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.mensur.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@divisio** (*optional*) Describes the divisions of the breve in use in 14th-century Italy. Value conforms to [data.DIVISIO](#).

att.mensur.log → @divisio

**@modusmaior** (*optional*) Describes the maxima-long relationship. Value conforms to [data.MODUSMAIOR](#).

att.mensur.log → @modusmaior

**@modusminor** (*optional*) Describes the long-breve relationship. Value conforms to [data.MODUSMINOR](#).

att.mensur.log → @modusminor

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.mensur.log → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.mensur.log → @numbase

**@prolatio** (*optional*) Describes the semibreve-minim relationship. Value conforms to [data.PROLATIO](#).

att.mensur.log → @prolatio

**@tempus** (*optional*) Describes the breve-semibreve relationship. Value conforms to [data.TEMPUS](#).

att.mensur.log → @tempus

### Available at

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.mensur.log → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.mensur.log → <mensuration>

### Declaration

```
<classSpec ident="att.mensur.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ratio"/>
    <memberOf key="att.mensural.shared"/>
  </classes>
</classSpec>
```

## att.mensur.vis

Visual domain attributes. These attributes describe the physical appearance of the mensuration sign/time signature of mensural notation.

### Referenced in chapters

[5.2 Mensuration](#)

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.mensur.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.mensur.vis → @color

**@dot** (*optional*) Specifies whether a dot is to be added to the base symbol. Value conforms to [data.BOOLEAN](#).

att.mensur.vis → @dot

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.mensur.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.mensur.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.mensur.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.mensur.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.mensur.vis → @fontweight

**@form** (*optional*) Indicates whether the base symbol is written vertically or horizontally. Allowed values are: "**horizontal**" (*Horizontally oriented.*), "**vertical**" (*Vertically oriented.*)

att.mensur.vis → @form

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout.*)

att.mensur.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.mensur.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.mensur.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.mensur.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.mensur.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.mensur.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.mensur.vis → @loc

**@orient** (*optional*) Describes the rotation or reflection of the base symbol. Value conforms to [data.ORIENTATION](#).

att.mensur.vis → @orient

**@sign** (*optional*) The base symbol in the mensuration sign/time signature of mensural notation. Value conforms to [data.MENSURATIONSIGN](#).

att.mensur.vis → @sign

**@slash** (*optional*) Indicates the number of slashes present. Value conforms to [data.SLASH](#).

att.mensur.vis → @slash

## Available at

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.mensur.vis → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.mensur.vis → <mensuration>

## att.mensural.log

Used by staffDef and scoreDef to provide default values for attributes in the logical domain related to mensuration. The tempus, prolatio, modusmaior, and modusminor attributes (from the att.mensural.shared class) specify the relationship between the four principle levels of note value, i.e., the long, breve, semibreve and minim, in mensural notation. Modusminor describes the long-breve relationship, while tempus describes the breve-semibreve, and prolatio the semibreve-minim relationship, respectively. Modusmaior is for the maxima-long relationship. The proport.\* attributes describe augmentation or diminution of the normal value of the notes in mensural notation.

### Module

[MEI.mensural](#)

### Attributes

**@divisio** (*optional*) Describes the divisions of the breve in use in 14th-century Italy. Value conforms to [data.DIVISIO](#).

att.mensural.log → @divisio

**@modusmaior** (*optional*) Describes the maxima-long relationship. Value conforms to [data.MODUSMAIOR](#).

att.mensural.log → @modusmaior

**@modusminor** (*optional*) Describes the long-breve relationship. Value conforms to [data.MODUSMINOR](#).

att.mensural.log → @modusminor

**@prolatio** (*optional*) Describes the semibreve-minim relationship. Value conforms to [data.PROLATIO](#).

att.mensural.log → @prolatio

**@proport.num** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.num is for the first value in the ratio. Value is a positive integer.

att.mensural.log → @proport.num

**@proport.numbase** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.numbase is for the second value in the ratio. Value is a positive integer.

att.mensural.log → @proport.numbase

**@tempus** (*optional*) Describes the breve-semibreve relationship. Value conforms to [data.TEMPUS](#).

att.mensural.log → @tempus

### Available at

**<scoreDef>** Container for score meta-information.

att.mensural.log → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.mensural.log → <staffDef>

## att.mensural.shared

Shared attributes in the mensural repertoire.

### Referenced in chapters

[5.2 Mensuration](#), [5.2.3 Italian Divisiones](#)

### Module

[MEI.mensural](#)

### Attributes

**@divisio** (*optional*) Describes the divisions of the breve in use in 14th-century Italy. Value conforms to [data.DIVISIO](#).

att.mensural.shared → @divisio

**@modusmaior** (*optional*) Describes the maxima-long relationship. Value conforms to [data.MODUSMAIOR](#).

att.mensural.shared → @modusmaior

**@modusminor** (*optional*) Describes the long-breve relationship. Value conforms to [data.MODUSMINOR](#).

att.mensural.shared → @modusminor

**@prolatio** (*optional*) Describes the semibreve-minim relationship. Value conforms to [data.PROLATIO](#).

att.mensural.shared → @prolatio

**@tempus** (*optional*) Describes the breve-semibreve relationship. Value conforms to [data.TEMPUS](#).

att.mensural.shared → @tempus

### Available at

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.mensural.shared → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.mensural.shared → <mensuration>

**<scoreDef>** Container for score meta-information.

att.mensural.shared → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.mensural.shared → <staffDef>

### Constraints

When the @divisio attribute is used, the @tempus and @prolatio attributes are not allowed.

### Declaration

```
<classSpec ident="att.mensural.shared" module="MEI.mensural" type="atts">

## att.mensural.vis

Used by staffDef and scoreDef to provide default values for attributes in the visual domain related to mensuration.

### Referenced in chapters

[5.2 Mensuration](#)

### Module

[MEI.visual](#)

### Attributes

**@mensur.color** (*optional*) Records the color of the mensuration sign. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.mensural.vis → @mensur.color

**@mensur.dot** (*optional*) Determines if a dot is to be added to the base symbol. Value conforms to [data.BOOLEAN](#).

att.mensural.vis → @mensur.dot

**@mensur.form** (*optional*) Indicates whether the base symbol is written vertically or horizontally. Allowed values are: "**horizontal**" (*Horizontally oriented.*), "**vertical**" (*Vertically oriented.*)

att.mensural.vis → @mensur.form

**@mensur.loc** (*optional*) Holds the staff location of the mensuration sign. Value conforms to [data.STAFFLOC](#).

att.mensural.vis → @mensur.loc

**@mensur.orient** (*optional*) Describes the rotation or reflection of the base symbol. Value conforms to [data.ORIENTATION](#).

att.mensural.vis → @mensur.orient

**@mensur.sign** (*optional*) The base symbol in the mensuration sign/time signature of mensural notation. Value conforms to [data.MENSURATIONSIGN](#).

att.mensural.vis → @mensur.sign

**@mensur.size** (*optional*) Describes the relative size of the mensuration sign. Value conforms to [data.FONTSIZE](#).

att.mensural.vis → @mensur.size

**@mensur.slash** (*optional*) Indicates the number lines added to the mensuration sign. For example, one slash is added for what we now call 'alla breve'. Value is a positive integer.

att.mensural.vis → @mensur.slash

### Available at

**<scoreDef>** Container for score meta-information.

att.mensural.vis → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.mensural.vis → <staffDef>

## att.metaMark.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.metaMark.anl → <metaMark>

#### Declaration

```
<classSpec ident="att.metaMark.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.metaMark.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.metaMark.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.metaMark.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.metaMark.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.metaMark.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.metaMark.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.metaMark.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.metaMark.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.metaMark.ges → @tstamp2.real

### Available at

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as [<add>](#), [<del>](#), etc.

att.metaMark.ges → <metaMark>

### Declaration

```
<classSpec ident="att.metaMark.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.tstamp2.ges"/>
```

```
</classes>  
</classSpec>
```

DEVELOPMENT  
VERSION

## att.metaMark.log

Logical domain attributes.

### Module

[MEI.edittrans](#)

### Attributes

**@cert** (*optional*) Signifies the degree of certainty or precision associated with a feature. Value conforms to [data.CERTAINTY](#).

att.metaMark.log → @cert

**@decls** (*optional*) Identifies one or more metadata elements (other than classification terms) within the header, which are understood to apply to the element bearing this attribute and its content. One or more values from [data.URI](#), separated by spaces.

att.metaMark.log → @decls

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.metaMark.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.metaMark.log → @evaluate

**@evidence** (*optional*) Indicates the nature of the evidence supporting the reliability or accuracy of the intervention or interpretation. Allowed values are: "**internal**" (*There is evidence within the document to support the intervention.*), "**external**" (*There is evidence outside the document to support the intervention.*), "**conjecture**" (*The assertion has been made by the editor, cataloguer, or scholar on the basis of their expertise.*)

att.metaMark.log → @evidence

**@hand** (*optional*) Signifies the hand responsible for an action. The value must be the ID of a [<hand>](#) element declared in the header. Value conforms to [data.URI](#).

att.metaMark.log → @hand

**@instant** The @instant attribute is syntactic sugar for classifying a scribal intervention as an ad-hoc modification; that is, one which does not interrupt the writing process. Value must conform to [data.BOOLEAN](#) or [unknown](#).

att.metaMark.log → @instant

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype [positiveInteger](#), separated by spaces.

att.metaMark.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.metaMark.log → @part

**@partstaff (optional)** Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.metaMark.log → @partstaff

**@plist (optional)** When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.metaMark.log → @plist

**@seq (optional)** Used to assign a sequence number related to the order in which the encoded features carrying this attribute are believed to have occurred. Value is a positive integer.

att.metaMark.log → @seq

**@source (optional)** Contains a list of one or more pointers indicating the sources which attest to a given reading. Each value should correspond to the ID of a [<source>](#) or [<manifestation>](#) element located in the document header. One or more values from [data.URI](#), separated by spaces.

att.metaMark.log → @source

**@staff (recommended)** Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.metaMark.log → @staff

**@startid (optional)** Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.metaMark.log → @startid

**@state** Points to the genetic state that results from this modification. One or more values from [data.URI](#), separated by spaces.

att.metaMark.log → @state

**@tstamp (optional)** Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.metaMark.log → @tstamp

**@tstamp.ges (optional)** Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.metaMark.log → @tstamp.ges

**@tstamp.real (optional)** Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.metaMark.log → @tstamp.real

**@tstamp2 (optional)** Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.metaMark.log → @tstamp2

**@when (optional)** Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.metaMark.log → @when

## Available at

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.metaMark.log → <metaMark>

## Declaration

```
<classSpec ident="att.metaMark.log" module="MEI.edittrans" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
    <memberOf key="att.edit"/>
    <memberOf key="att.trans"/>
  </classes>
</classSpec>
```

## att.metaMark.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.metaMark.vis → @place

### Available at

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as [<add>](#), [<del>](#), etc.

att.metaMark.vis → <metaMark>

### Declaration

```
<classSpec ident="att.metaMark.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.placementRelStaff"/>
  </classes>
</classSpec>
```

## att.metadataPointing

Provides attributes for elements which may be associated with particular contextual elements within the header.

### Referenced in chapters

[13.2.2 Specifying Link Elements](#)

### Module

[MEI.shared](#)

### Attributes

**@decls** (*optional*) Identifies one or more metadata elements (other than classification terms) within the header, which are understood to apply to the element bearing this attribute and its content. One or more values from [data.URI](#), separated by spaces.

att.metadataPointing → @decls

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.metadataPointing → <abbr>

**<add>** Marks an addition to the text.

att.metadataPointing → <add>

**<ambitus>** Range of a voice, instrument or piece.

att.metadataPointing → <ambitus>

**<argument>** Contains a formal list or prose description of topics addressed.

att.metadataPointing → <argument>

**<avFile>** References an external digital audio or video file.

att.metadataPointing → <avFile>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.metadataPointing → <back>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.metadataPointing → <body>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.metadataPointing → <clip>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.metadataPointing → <corr>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.metadataPointing → <cutout>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.metadataPointing → <del>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.metadataPointing → <div>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.metadataPointing → <epigraph>

**<expan>** Contains the expansion of an abbreviation.

att.metadataPointing → <expan>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.metadataPointing → <facsimile>

**<front>** Bundles prefatory text found before the start of the musical text.

att.metadataPointing → <front>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.metadataPointing → <genDesc>

**<genState>** Describes a distinctive state in the textual development of a work.

att.metadataPointing → <genState>

**<graphic>** Indicates the location of an inline graphic.

att.metadataPointing → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.metadataPointing → <group>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.metadataPointing → <imprimatur>

**<instrDef>** MIDI instrument declaration.

att.metadataPointing → <instrDef>

**<layer>** An independent stream of events on a staff.

att.metadataPointing → <layer>

**<layerDef>** Container for layer meta-information.

att.metadataPointing → <layerDef>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.metadataPointing → <lg>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.metadataPointing → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.metadataPointing → <measure>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.metadataPointing → <metaMark>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an etude, opera, song cycle, symphony, or anthology of piano solos.

att.metadataPointing → <music>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.metadataPointing → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.metadataPointing → <oStaff>

**<p>** One or more text phrases that form a logical prose passage.

att.metadataPointing → <p>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.metadataPointing → <part>

**<parts>** Provides a container for performers' parts.

att.metadataPointing → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.metadataPointing → <patch>

**<performance>** A presentation of one or more musical works.

att.metadataPointing → <performance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.metadataPointing → <ptr>

**<recording>** A recorded performance.

att.metadataPointing → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.metadataPointing → <ref>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.metadataPointing → <restore>

**<score>** Full score view of the musical content.

att.metadataPointing → <score>

**<section>** Segment of music data.

att.metadataPointing → <section>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.metadataPointing → <staff>

**<staffDef>** Container for staff meta-information.

att.metadataPointing → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.metadataPointing → <staffGrp>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.metadataPointing → <subst>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.metadataPointing → <surface>

## Constraints

@decls attribute should have content.

Each value in @decls should correspond to the @xml:id attribute of an element within the metadata header.

No value in @decls should correspond to the @xml:id attribute of a classification term. Use @class for this purpose.

## Declaration

```

<classSpec ident="att.metadataPointing" module="MEI.shared" type="atts">
  <desc xml:lang="en">Provides attributes for elements which may be associated with
  particular contextual elements within the header.</desc>
  <attList>
    <attDef ident="decls" usage="opt">
      <desc xml:lang="en">Identifies one or more metadata elements (other than
      classification terms) within the header, which are understood to apply to the element
      bearing this attribute and its content.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.URI"/>
      </datatype>
      <constraintSpec ident="check_declsTarget" scheme="schematron">
        <constraint>
          <sch:rule context="@decls">
            <sch:assert role="warning" test="not(normalize-space(.) eq '')">@decls
            attribute should have content.</sch:assert>
            <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
            substring($i,2)=//mei:*[ancestor::mei:meiHead]/@xml:id">Each value in
            @decls should correspond to the @xml:id attribute of an element within the
            metadata header.</sch:assert>
            <sch:assert test="every $i in tokenize(., '\s+') satisfies
            not(substring($i,2)=//mei:term/@xml:id)">No value in @decls should

DEVELOPMENT  
VERSION

## att.meterConformance

Attributes that provide information about a structure's conformance to the prevailing meter.

### Referenced in chapters

[10.1.3 Metrical Conformance](#)

### Module

[MEI.shared](#)

### Attributes

**@metcon** (*optional*) Indicates the relationship between the content of a staff or layer and the prevailing meter. Allowed values are: "**c**" (*Complete; , conformant with the prevailing meter.*), "**i**" (*Incomplete; , not enough beats.*), "**o**" (*Overfull; , too many beats.*)

att.meterConformance → @metcon

### Available at

**<layer>** An independent stream of events on a staff.

att.meterConformance → <layer>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.meterConformance → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.meterConformance → <oStaff>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.meterConformance → <staff>

### Declaration

```

<classSpec ident="att.meterConformance" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that provide information about a structure's conformance to
  the prevailing meter.</desc>

## att.meterConformance.bar

Attributes that provide information about a measure's conformance to the prevailing meter.

### Referenced in chapters

[10.1.3 Metrical Conformance](#)

### Module

[MEI.shared](#)

### Attributes

**@control** (*optional*) Indicates whether or not a bar line is "controlling"; that is, if it indicates a point of alignment across all the parts. Bar lines within a score are usually controlling; that is, they "line up". Bar lines within parts may or may not be controlling. When applied to [`<measure>`](#), this attribute indicates the nature of the right bar line but not the left. Value conforms to [data.BOOLEAN](#).

att.meterConformance.bar → @control

**@metcon** (*optional*) Indicates the relationship between the content of a measure and the prevailing meter. Value conforms to [data.BOOLEAN](#).

att.meterConformance.bar → @metcon

### Available at

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.meterConformance.bar → <barLine>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.meterConformance.bar → <measure>

### Declaration

```

<classSpec ident="att.meterConformance.bar" module="MEI.shared" type="atts">

# att.meterSig.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@count** (*optional*) Captures the number of beats in a measure, that is, the top number of the meter signature. It must contain a decimal number or an expression that evaluates to a decimal number, such as 2+3 or 3\*2. Value is plain text.

att.meterSig.log → @count

**@sym** (*optional*) Indicates the use of a meter symbol instead of a numeric meter signature, that is, 'C' for common time or 'C' with a slash for cut time. Value conforms to [data.METERSIGN](#).

att.meterSig.log → @sym

**@unit** (*optional*) Contains the number indicating the beat unit, that is, the bottom number of the meter signature. Value is a decimal number.

att.meterSig.log → @unit

## Available at

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.meterSig.log → <meter>

**<meterSig>** Written meter signature.

att.meterSig.log → <meterSig>

## Declaration

```

<classSpec ident="att.meterSig.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>

  <rng:data type="decimal"/>  
</datatype>  
</attDef>  
</attList>  
</classSpec>
```

# att.meterSig.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.meterSig.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.meterSig.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.meterSig.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.meterSig.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.meterSig.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.meterSig.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.meterSig.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.meterSig.vis → @fontweight

**@form** (*optional*) Contains an indication of how the meter signature should be rendered. Value conforms to [data.METERFORM](#).

att.meterSig.vis → @form

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*).

att.meterSig.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.meterSig.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.meterSig.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).  
att.meterSig.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).  
att.meterSig.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).  
att.meterSig.vis → @lineheight

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).  
att.meterSig.vis → @visible

## Available at

**<meterSig>** Written meter signature.

att.meterSig.vis → <meterSig>

## Declaration

```
<classSpec ident="att.meterSig.vis" module="MEI.visual" type="atts">

VERSION

## att.meterSigGrp.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

#### Available at

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.  
att.meterSigGrp.vis → <meterSigGrp>

#### Declaration

```
<classSpec ident="att.meterSigGrp.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
</classSpec>
```

## att.midi.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<midi>** Container for elements that contain information useful when generating MIDI output.  
att.midi.anl → <midi>

#### Declaration

```
<classSpec ident="att.midi.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.midi.event

Attributes common to MIDI events.

### Module

[MEI.midi](#)

### Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.midi.event → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.midi.event → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.midi.event → @partstaff

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.midi.event → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.midi.event → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.midi.event → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.midi.event → @tstamp.real

### Available at

**<cc>** MIDI parameter/control change.

att.midi.event → <cc>

**<chan>** MIDI channel assignment.

att.midi.event → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.midi.event → <chanPr>

**<cue>** MIDI cue point.

att.midi.event → <cue>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.midi.event → <hex>

**<marker>** MIDI marker meta-event.

att.midi.event → <marker>

**<metaText>** MIDI text meta-event.

att.midi.event → <metaText>

**<noteOff>** MIDI note-off event.

att.midi.event → <noteOff>

**<noteOn>** MIDI note-on event.

att.midi.event → <noteOn>

**<port>** MIDI port.

att.midi.event → <port>

**<prog>** MIDI program change.

att.midi.event → <prog>

**<seqNum>** MIDI sequence number.

att.midi.event → <seqNum>

**<trkName>** MIDI track/sequence name.

att.midi.event → <trkName>

**<vel>** MIDI Note-on/off velocity.

att.midi.event → <vel>

## Declaration

```
<classSpec ident="att.midi.event" module="MEI.midi" type="atts">
  <desc xml:lang="en">Attributes common to MIDI events.</desc>

    <memberOf key="att.staffIdent"/>
    <memberOf key="att.timestamp.log"/>
    <memberOf key="att.timestamp.ges"/>
  </classes>
</classSpec>
```

## att.midi.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<midi>** Container for elements that contain information useful when generating MIDI output.  
att.midi.ges → <midi>

#### Declaration

```
<classSpec ident="att.midi.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.midi.log

Logical domain attributes.

### Module

[MEI.midi](#)

### Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.midi.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.midi.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.midi.log → @partstaff

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.midi.log → @staff

### Available at

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.midi.log → <midi>

### Declaration

```
<classSpec ident="att.midi.log" module="MEI.midi" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.layerIdent"/>
    <memberOf key="att.partIdent"/>
    <memberOf key="att.staffIdent"/>
  </classes>
</classSpec>
```

## att.midInstrument

Attributes that record MIDI instrument information.

### Module

[MEI.midi](#)

### Attributes

**@midi.instrname** (*optional*) Provides a General MIDI label for the MIDI instrument. Value conforms to [data.MIDINAMES](#).

att.midInstrument → @midi.instrname

**@midi.instrnum** (*optional*) Captures the General MIDI instrument number. Use an integer for a 0-based value. An integer preceded by "in" indicates a 1-based value. Value conforms to [data.MIDIValue](#).

att.midInstrument → @midi.instrnum

**@midi.pan** (*optional*) Sets the instrument's position in a stereo field. MIDI values of 0 and 1 both pan left, 127 or 128 pans right, and 63 or 64 pans to the center. Positive percentage values pan to the right, negative ones to the left. 0% is centered. Value conforms to [data.MIDIValue\\_Pan](#).

att.midInstrument → @midi.pan

**@midi.patchname** (*optional*) Records a non-General MIDI patch/instrument name. Value is a [NMToken](#).

att.midInstrument → @midi.patchname

**@midi.patchnum** (*optional*) Records a non-General MIDI patch/instrument number. Value conforms to [data.MIDIValue](#).

att.midInstrument → @midi.patchnum

**@midi.volume** (*optional*) Sets the instrument's volume. Value conforms to [data.MIDIValue\\_Percent](#).

att.midInstrument → @midi.volume

### Available at

**<instrDef>** MIDI instrument declaration.

att.midInstrument → <instrDef>

### Constraints

Only one of @midi.instrname and @midi.instrnum allowed.

Only one of @midi.patchname and @midi.patchnum allowed.

### Declaration

```

<classSpec ident="att.midInstrument" module="MEI.midi" type="atts">

</classSpec>
```

## att.midiNumber

Attributes that record MIDI numbers.

### Module

MEI.midi

### Attributes

**@num** (*required*) MIDI number in the range set by data.MIDIVALEUE. Value conforms to [data.MIDIVALEUE](#).  
att.midiNumber → @num

### Available at

**<cc>** MIDI parameter/control change.

att.midiNumber → <cc>

**<chanPr>** MIDI channel pressure/after touch.

att.midiNumber → <chanPr>

**<noteOff>** MIDI note-off event.

att.midiNumber → <noteOff>

**<noteOn>** MIDI note-on event.

att.midiNumber → <noteOn>

**<port>** MIDI port.

att.midiNumber → <port>

**<prog>** MIDI program change.

att.midiNumber → <prog>

**<vel>** MIDI Note-on/off velocity.

att.midiNumber → <vel>

### Declaration

```
<classSpec ident="att.midiNumber" module="MEI.midi" type="atts">
  <desc xml:lang="en">Attributes that record MIDI numbers.</desc>
  <attList>
    <attDef ident="num" usage="req">

        <rng:ref name="data.MIDIVALEUE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.midiTempo

Attributes that record MIDI tempo information.

### Module

[MEI.midi](#)

### Attributes

**@midi.bpm** (*optional*) Captures the number of \*quarter notes\* per minute. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. Value conforms to [data.MIDIBPM](#).

att.midiTempo → @midi.bpm

**@midi.mspb** (*optional*) Records the number of microseconds per \*quarter note\*. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. At 120 quarter notes per minute, each quarter note will last 500,000 microseconds. Value conforms to [data.MIDIMSPB](#).

att.midiTempo → @midi.mspb

### Available at

**<scoreDef>** Container for score meta-information.

att.midiTempo → <scoreDef>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.midiTempo → <tempo>

### Declaration

```

<classSpec ident="att.midiTempo" module="MEI.midi" type="atts">
  <desc xml:lang="en">Attributes that record MIDI tempo information.</desc>
  <attList>
    <attDef ident="midi.bpm" usage="opt">

```
</datatype>
</attDef>
</attList>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.midiValue

Attributes that record MIDI values.

### Module

[MEI.midi](#)

### Attributes

**@val** (*optional*) MIDI number. Value conforms to [data.MIDIVALEUE](#).

att.midiValue → @val

### Available at

**<cc>** MIDI parameter/control change.

att.midiValue → <cc>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.midiValue → <dynam>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.midiValue → <hairpin>

### Declaration

```
<classSpec ident="att.midiValue" module="MEI.midi" type="atts">
  <desc xml:lang="en">Attributes that record MIDI values.</desc>
  <attList>
    <attDef ident="val" usage="opt">
      <desc xml:lang="en">MIDI number.</desc>
      <datatype>
        <rng:ref name="data.MIDIVALEUE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.midiValue2

Attributes that record terminal MIDI values.

### Module

MEI.midi

### Attributes

**@val2** (*optional*) MIDI number. Value conforms to [data.MIDIVALUE](#).

att.midiValue2 → @val2

### Available at

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.midiValue2 → <dynam>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.midiValue2 → <hairpin>

### Declaration

```
<classSpec ident="att.midiValue2" module="MEI.midi" type="atts">
  <desc xml:lang="en">Attributes that record terminal MIDI values.</desc>
  <attList>
    <attDef ident="val2" usage="opt">
      <desc xml:lang="en">MIDI number.</desc>
      <datatype>
        <rng:ref name="data.MIDIVALUE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.midiVelocity

MIDI attributes pertaining to key velocity.

### Module

MEI.midi

### Attributes

**@vel** (*optional*) MIDI Note-on/off velocity. Value conforms to [data.MIDIVALUE](#).

att.midiVelocity → @vel

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.midiVelocity → <nc>

**<note>** A single pitched event.

att.midiVelocity → <note>

### Declaration

```
<classSpec ident="att.midiVelocity" module="MEI.midi" type="atts">
  <desc xml:lang="en">MIDI attributes pertaining to key velocity.</desc>
  <attList>
    <attDef ident="vel" usage="opt">
      <desc xml:lang="en">MIDI Note-on/off velocity.</desc>
      <datatype>
        <rng:ref name="data.MIDIVALUE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.mmTempo

Attributes that record tempo in terms of beats per minute.

### Module

MEI.shared

### Attributes

**@mm** (*optional*) Used to describe tempo in terms of beats (often the meter signature denominator) per minute, ala M.M. (Maelzel's Metronome). Do not confuse this attribute with midi.bpm or midi.mspb. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. Value conforms to [data.TEMPOVALUE](#).

att.mmTempo → @mm

**@mm.dots** (*optional*) Records the number of augmentation dots required by a dotted metronome unit. Value conforms to [data.AUGMENTDOT](#).

att.mmTempo → @mm.dots

**@mm.unit** (*optional*) Captures the metronomic unit. Value conforms to [data.DURATION](#).

att.mmTempo → @mm.unit

### Available at

**<scoreDef>** Container for score meta-information.

att.mmTempo → <scoreDef>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.mmTempo → <tempo>

### Declaration

```
<classSpec ident="att.mmTempo" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record tempo in terms of beats per minute.</desc>
  <attList>
    <attDef ident="mm" usage="opt">

  </datatype>
</attDef>
</attList>
</classSpec>
```

## att.mordent.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.mordent.anl → <mordent>

#### Declaration

```
<classSpec ident="att.mordent.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.mordent.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.mordent.ges → <mordent>

### Declaration

```
<classSpec ident="att.mordent.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.mordent.log

Logical domain attributes.

### Referenced in chapters

[4.4.2 Mordents](#)

### Module

[MEI.cmnOrnaments](#)

### Attributes

**@accidlower** (*optional*) Records the written accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.mordent.log → @accidlower

**@accidlower.ges** (*optional*) Records the sounding accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.mordent.log → @accidlower.ges

**@accidupper** (*optional*) Records the written accidental associated with an upper neighboring note. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.mordent.log → @accidupper

**@accidupper.ges** (*optional*) Records the sounding accidental associated with an upper neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.mordent.log → @accidupper.ges

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.mordent.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.mordent.log → @evaluate

**@form** (*optional*) Records semantic meaning, i.e., intended performance, of the mordent. The altsym, glyph.name, or glyph.num attributes may be used to specify the appropriate symbol. Allowed values are: "**lower**" (*Starts with the written note, followed by its lower neighbor, with a return to the written note. In modern practice, this is called an "inverted mordent" and indicated by a short wavy line with a vertical line through it.*), "**upper**" (*Starts with the written note, followed by its upper neighbor, with a return to the principal note. In modern practice, the symbol lacks the vertical line used for the inverted form.*)

att.mordent.log → @form

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.mordent.log → @layer

**@long (optional)** When set to 'true', a double or long mordent, sometimes called a "pincé double", consisting of 5 notes, is indicated. Value conforms to [data.BOOLEAN](#).

att.mordent.log → @long

**@part (optional)** Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.mordent.log → @part

**@partstaff (optional)** Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.mordent.log → @partstaff

**@plist (optional)** When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.mordent.log → @plist

**@staff (recommended)** Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.mordent.log → @staff

**@startid (optional)** Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.mordent.log → @startid

**@tstamp (optional)** Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mordent.log → @tstamp

**@tstamp.ges (optional)** Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.mordent.log → @tstamp.ges

**@tstamp.real (optional)** Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.mordent.log → @tstamp.real

**@when (optional)** Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.mordent.log → @when

## Available at

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.mordent.log → <mordent>

## Declaration

# att.mordent.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.mordent.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.mordent.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.mordent.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.mordent.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.mordent.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.mordent.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.mordent.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.mordent.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.mordent.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.mordent.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.mordent.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.mordent.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.mordent.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.mordent.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.mordent.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.mordent.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.mordent.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.mordent.vis → @vo

## Available at

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.mordent.vis → <mordent>

## Declaration

```
<classSpec ident="att.mordent.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>

    <memberOf key="att.extSym"/>
    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.typography"/>
    <memberOf key="att.visualOffset"/>
  </classes>
</classSpec>
```

## att.multiRest.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.  
att.multiRest.anl → <multiRest>

#### Declaration

```
<classSpec ident="att.multiRest.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.multiRest.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.multiRest.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.multiRest.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.multiRest.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.multiRest.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.multiRest.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.multiRest.ges → @dur.recip

### Available at

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.multiRest.ges → <multiRest>

### Declaration

```
<classSpec ident="att.multiRest.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
  </classes>
</classSpec>
```

# att.multiRest.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.multiRest.log → @layer

**@num** (*optional*) Records a number or count accompanying a notational feature. Value is a positive integer.

att.multiRest.log → @num

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.multiRest.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.multiRest.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.multiRest.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.multiRest.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.multiRest.log → @when

## Available at

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.multiRest.log → <multiRest>

## Declaration

```
<classSpec ident="att.multiRest.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.event"/>
    <memberOf key="att.numbered"/>
  </classes>
</classSpec>
```

## att.multiRest.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.multiRest.vis → @altsym

**@block** (*optional*) The block attribute controls whether the multimeasure rest should be rendered as a block rest or as church rests ("Kirchenpausen"), that are combinations of longa, breve and semibreve rests. Value conforms to [data.BOOLEAN](#).

att.multiRest.vis → @block

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.multiRest.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.multiRest.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.multiRest.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.multiRest.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.multiRest.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.multiRest.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.multiRest.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.multiRest.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.multiRest.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.multiRest.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.multiRest.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.multiRest.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.multiRest.vis → @loc

**@num.place** (*optional*) States where the tuplet number will be placed in relation to the note heads. Value conforms to [data.STAFFREL.basic](#).

att.multiRest.vis → @num.place

**@num.visible** (*optional*) Determines if the tuplet number is visible. Value conforms to [data.BOOLEAN](#).

att.multiRest.vis → @num.visible

**@oloc** (*optional*) Records staff location in terms of written octave. Value conforms to [data.OCTAVE](#).

att.multiRest.vis → @oloc

**@ploc** (*optional*) Captures staff location in terms of written pitch name. Value conforms to [data.PITCHNAME](#).

att.multiRest.vis → @ploc

**@width** (*optional*) Measurement of the horizontal dimension of an entity. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.multiRest.vis → @width

## Available at

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.multiRest.vis → <multiRest>

## Declaration

## att.multiRpt.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.multiRpt.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.multiRpt.vis → @color

**@expand** (*optional*) Indicates whether to render a repeat symbol or the source material to which it refers. A value of 'true' renders the source material, while 'false' displays the repeat symbol. Value conforms to [data.BOOLEAN](#).

att.multiRpt.vis → @expand

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.multiRpt.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.multiRpt.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.multiRpt.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.multiRpt.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.multiRpt.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.multiRpt.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.multiRpt.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.multiRpt.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.multiRpt.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.multiRpt.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.multiRpt.vis → @lineheight

## Available at

**<multiRpt>** Multiple repeated measures.

att.multiRpt.vis → <multiRpt>

## Declaration

```
<classSpec ident="att.multiRpt.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

    <memberOf key="att.typography"/>
  </classes>
</classSpec>
```

## att.multinumMeasures

Attributes that indicate programmatic numbering.

### Module

MEI.shared

### Attributes

**@multi.number** (*optional*) Indicates whether programmatically calculated counts of multiple measures of rest (mRest) and whole measure repeats (mRpt) in parts should be rendered. Value conforms to [data.BOOLEAN](#).

att.multinumMeasures → @multi.number

### Available at

**<scoreDef>** Container for score meta-information.

att.multinumMeasures → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.multinumMeasures → <staffDef>

### Declaration

```
<classSpec ident="att.multinumMeasures" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that indicate programmatic numbering.</desc>
  <attList>
    <attDef ident="multi.number" usage="opt">
      <desc xml:lang="en">Indicates whether programmatically calculated counts of multiple
        measures of rest (mRest) and whole measure repeats (mRpt) in parts should be
        rendered.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.nInteger

Attributes used to supply an integer number designation for an element.

### Referenced in chapters

[2.3.2 Label Attributes](#)

### Module

[MEI.shared](#)

### Attributes

**@n** (*optional*) Provides a numeric designation that indicates an element's position in a sequence of similar elements. Its value must be a non-negative integer. Value is a positive integer, including 0.  
`att.nInteger → @n`

### Available at

**<instrDef>** MIDI instrument declaration.

`att.nInteger → <instrDef>`

**<layer>** An independent stream of events on a staff.

`att.nInteger → <layer>`

**<layerDef>** Container for layer meta-information.

`att.nInteger → <layerDef>`

**<oLayer>** A layer that contains an alternative to material in another layer.

`att.nInteger → <oLayer>`

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

`att.nInteger → <oStaff>`

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

`att.nInteger → <staff>`

**<staffDef>** Container for staff meta-information.

`att.nInteger → <staffDef>`

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

`att.nInteger → <titlePart>`

### Declaration

```
<classSpec ident="att.nInteger" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes used to supply an integer number designation for an
  element.</desc>
  <attList>
    <attDef ident="n" usage="opt">
```

```
<desc xml:lang="en">Provides a numeric designation that indicates an element's  
position in a sequence of similar elements. Its value must be a non-negative  
integer.</desc>  
<datatype>  
    <rng:data type="nonNegativeInteger"/>  
</datatype>  
</attDef>  
</attList>  
</classSpec>
```

DEVELOPMENT  
VERSION

## att.nNumberLike

Attributes used to supply a number-like designation for an element.

### Referenced in chapters

[2.1.3 Document Layout Elements](#), [2.3.2 Label Attributes](#)

### Module

[MEI.shared](#)

### Attributes

**@n (optional)** Provides a number-like designation that indicates an element's position in a sequence of similar elements. May not contain space characters. Value conforms to [data.WORD](#).

att.nNumberLike → @n

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.nNumberLike → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.nNumberLike → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.nNumberLike → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.nNumberLike → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.nNumberLike → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.nNumberLike → <actor>

**<add>** Marks an addition to the text.

att.nNumberLike → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.nNumberLike → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.nNumberLike → <addName>

**<addrLine>** Single line of a postal address.

att.nNumberLike → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.nNumberLike → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.nNumberLike → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.nNumberLike → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.nNumberLike → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.nNumberLike → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.nNumberLike → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.nNumberLike → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.nNumberLike → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.nNumberLike → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.nNumberLike → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.nNumberLike → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.nNumberLike → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.nNumberLike → <arranger>

**<artic>** An indication of how to play a note or chord.

att.nNumberLike → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.nNumberLike → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.nNumberLike → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.nNumberLike → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.nNumberLike → <author>

**<avFile>** References an external digital audio or video file.

att.nNumberLike → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.nNumberLike → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.nNumberLike → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.nNumberLike → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.nNumberLike → <barLine>

**<barre>** A barre in a chord tablature grid.

att.nNumberLike → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.nNumberLike → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.nNumberLike → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.nNumberLike → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.nNumberLike → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.nNumberLike → <bibl>

**<biblList>** List of bibliographic references.

att.nNumberLike → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.nNumberLike → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.nNumberLike → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.nNumberLike → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.nNumberLike → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.nNumberLike → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.nNumberLike → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.nNumberLike → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.nNumberLike → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.nNumberLike → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.nNumberLike → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.nNumberLike → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.nNumberLike → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.nNumberLike → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.nNumberLike → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.nNumberLike → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.nNumberLike → <castItem>

**<castList>** Contains a single cast list or *dramatis personae*.

att.nNumberLike → <castList>

**<catRel>** Contains the name of a related category.

att.nNumberLike → <catRel>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.nNumberLike → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.nNumberLike → <category>

**<cc>** MIDI parameter/control change.

att.nNumberLike → <cc>

**<chan>** MIDI channel assignment.

att.nNumberLike → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.nNumberLike → <chanPr>

**<change>** Individual change within the revision description.

att.nNumberLike → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.nNumberLike → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.nNumberLike → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.nNumberLike → <chord>

**<chordDef>** Chord tablature definition.

att.nNumberLike → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a **<chordDef>** element.

att.nNumberLike → <chordMember>

**<chordTable>** Chord(tablature) look-up table.

att.nNumberLike → <chordTable>

**<classDecls>** Groups information which describes the nature or topic of an entity.

att.nNumberLike → <classDecls>

**<classification>** Groups information which describes the nature or topic of an entity.

att.nNumberLike → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.nNumberLike → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.nNumberLike → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.nNumberLike → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.nNumberLike → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.nNumberLike → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.nNumberLike → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.nNumberLike → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.nNumberLike → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.nNumberLike → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.nNumberLike → <contentItem>

**<contents>** List of the material contained within a resource.

att.nNumberLike → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.nNumberLike → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.nNumberLike → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.nNumberLike → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.nNumberLike → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.nNumberLike → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.nNumberLike → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.nNumberLike → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.nNumberLike → <creation>

**<cue>** MIDI cue point.

att.nNumberLike → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.nNumberLike → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.nNumberLike → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.nNumberLike → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.nNumberLike → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.nNumberLike → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.nNumberLike → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.nNumberLike → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.nNumberLike → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.nNumberLike → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.nNumberLike → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.nNumberLike → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.nNumberLike → <desc>

**<dim>** Any single dimensional specification.

att.nNumberLike → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.nNumberLike → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.nNumberLike → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.nNumberLike → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.nNumberLike → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.nNumberLike → <div>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.nNumberLike → <divLine>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.nNumberLike → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.nNumberLike → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.nNumberLike → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.nNumberLike → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.nNumberLike → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.nNumberLike → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.nNumberLike → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.nNumberLike → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.nNumberLike → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.nNumberLike → <epigraph>

**<episema>** Episema.

att.nNumberLike → <episema>

**<event>** Contains a free-text event description.

att.nNumberLike → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.nNumberLike → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.nNumberLike → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.nNumberLike → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.nNumberLike → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.nNumberLike → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.nNumberLike → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.nNumberLike → <expressionList>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.nNumberLike → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.nNumberLike → <extent>

**<f>** Single element of a figured bass indication.

att.nNumberLike → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.nNumberLike → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.nNumberLike → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.nNumberLike → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.nNumberLike → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.nNumberLike → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.nNumberLike → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.nNumberLike → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.nNumberLike → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.nNumberLike → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.nNumberLike → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.nNumberLike → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.nNumberLike → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.nNumberLike → <foliation>

**<folium>** Describes a single leaf of paper.

att.nNumberLike → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.nNumberLike → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.nNumberLike → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.nNumberLike → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.nNumberLike → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.nNumberLike → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.nNumberLike → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.nNumberLike → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.nNumberLike → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.nNumberLike → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.nNumberLike → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.nNumberLike → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.nNumberLike → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.nNumberLike → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.nNumberLike → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.nNumberLike → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.nNumberLike → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.nNumberLike → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.nNumberLike → <hand>

**<handList>** Container for one or more hand elements.

att.nNumberLike → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.nNumberLike → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.nNumberLike → <harm>

**<harpPedal>** Harp pedal diagram.

att.nNumberLike → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.nNumberLike → <head>

**<height>** Description of the vertical size of an object.

att.nNumberLike → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.nNumberLike → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.nNumberLike → <hex>

**<hispanTick>** Hispanic tick.

att.nNumberLike → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.nNumberLike → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.nNumberLike → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.nNumberLike → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.nNumberLike → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.nNumberLike → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.nNumberLike → <incipCode>

**<incipText>** Opening words of a musical composition.

att.nNumberLike → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.nNumberLike → <inscription>

**<instrGrp>** Collects MIDI instrument definitions.

att.nNumberLike → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.nNumberLike → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.nNumberLike → <item>

**<itemList>** Gathers bibliographic item entities.

att.nNumberLike → <itemList>

**<key>** Key captures information about tonal center and mode.

att.nNumberLike → <key>

**<keyAccid>** Accidental in a key signature.

att.nNumberLike → <keyAccid>

**<keySig>** Written key signature.

att.nNumberLike → <keySig>

**<l>** Contains a single line of text within a line group.

att.nNumberLike → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.nNumberLike → <label>

**<labelAbbr>** A label on the pages following the first.

att.nNumberLike → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.nNumberLike → <langUsage>

**<language>** Description of a language used in the document.

att.nNumberLike → <language>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.nNumberLike → <layout>

**<layoutDesc>** Collects layout descriptions.

att.nNumberLike → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.nNumberLike → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.nNumberLike → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.  
att.nNumberLike → <lg>

**<li>** Single item in a **<list>**.  
att.nNumberLike → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.  
att.nNumberLike → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.  
att.nNumberLike → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.  
att.nNumberLike → <line>

**<liquefent>** Liquescent.  
att.nNumberLike → <liquefent>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.  
att.nNumberLike → <list>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.  
att.nNumberLike → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.  
att.nNumberLike → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.  
att.nNumberLike → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.  
att.nNumberLike → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on **<measure>** does not adequately capture the appearance or placement of the measure number/label.  
att.nNumberLike → <mNum>

**<mRest>** Complete measure rest in any meter.  
att.nNumberLike → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.  
att.nNumberLike → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.  
att.nNumberLike → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.  
att.nNumberLike → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.  
att.nNumberLike → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.nNumberLike → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.nNumberLike → <mapping>

**<marker>** MIDI marker meta-event.

att.nNumberLike → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.nNumberLike → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.nNumberLike → <measure>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more **<mei>** elements, each with its own complete header.

att.nNumberLike → <meiCorpus>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.nNumberLike → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.nNumberLike → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.nNumberLike → <metaMark>

**<metaText>** MIDI text meta-event.

att.nNumberLike → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.nNumberLike → <meter>

**<meterSig>** Written meter signature.

att.nNumberLike → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.nNumberLike → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.nNumberLike → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.nNumberLike → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.nNumberLike → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.nNumberLike → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.nNumberLike → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an etude, opera, song cycle, symphony, or anthology of piano solos.

att.nNumberLike → <music>

**<name>** Proper noun or noun phrase.

att.nNumberLike → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.nNumberLike → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.nNumberLike → <namespace>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.nNumberLike → <nc>

**<ncGrp>** Collection of one or more neume components.

att.nNumberLike → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.nNumberLike → <neume>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.nNumberLike → <normalization>

**<note>** A single pitched event.

att.nNumberLike → <note>

**<noteOff>** MIDI note-off event.

att.nNumberLike → <noteOff>

**<noteOn>** MIDI note-on event.

att.nNumberLike → <noteOn>

**<notesStmt>** (notes statement)- Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.nNumberLike → <notesStmt>

**<num>** Numeric information in any form.

att.nNumberLike → <num>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.nNumberLike → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.nNumberLike → <orig>

**<oriscus>** Oriscus.

att.nNumberLike → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.nNumberLike → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.nNumberLike → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.nNumberLike → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.nNumberLike → <p>

**<pad>** An indication of extra visual space between notational elements.

att.nNumberLike → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.nNumberLike → <part>

**<parts>** Provides a container for performers' parts.

att.nNumberLike → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.nNumberLike → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.nNumberLike → <pb>

**<pedal>** Piano pedal mark.

att.nNumberLike → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.nNumberLike → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.nNumberLike → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.nNumberLike → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.nNumberLike → <perfResList>

**<performance>** A presentation of one or more musical works.

att.nNumberLike → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.nNumberLike → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.nNumberLike → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.nNumberLike → <pgDesc>

**<pgFoot>** A running footer.

att.nNumberLike → <pgFoot>

**<pgHead>** A running header.

att.nNumberLike → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.nNumberLike → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.nNumberLike → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.nNumberLike → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.nNumberLike → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.nNumberLike → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.nNumberLike → <playingSpeed>

**<plica>** Plica

att.nNumberLike → <plica>

**<port>** MIDI port.

att.nNumberLike → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.nNumberLike → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.nNumberLike → <postCode>

**<price>** The cost of access to a bibliographic item.

att.nNumberLike → <price>

**<prog>** MIDI program change.

att.nNumberLike → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.nNumberLike → <projectDesc>

**<propName>** Name of a property of the symbol.

att.nNumberLike → <propName>

**<propValue>** A single property value.

att.nNumberLike → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.nNumberLike → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.nNumberLike → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.nNumberLike → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.nNumberLike → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.nNumberLike → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.nNumberLike → <publisher>

**<q>** Contains material which is distinguished from the surrounding phrase-level text using quotation marks or a similar method. Use **<quote>** for block-level quotations.

att.nNumberLike → <q>

**<quilisma>** Quilisma.

att.nNumberLike → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.nNumberLike → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.nNumberLike → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.nNumberLike → <recipient>

**<recording>** A recorded performance.

att.nNumberLike → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.nNumberLike → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.nNumberLike → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.nNumberLike → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.nNumberLike → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.nNumberLike → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.nNumberLike → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.nNumberLike → <relation>

**<relationList>** Gathers relation elements.

att.nNumberLike → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.nNumberLike → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.nNumberLike → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.nNumberLike → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.nNumberLike → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.nNumberLike → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.nNumberLike → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.nNumberLike → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.nNumberLike → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.nNumberLike → <role>

**<roleDesc>** Describes a character's role in a drama.

att.nNumberLike → <roleDesc>

**< roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.nNumberLike → <roleName>

**<rubic>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.nNumberLike → <rubic>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.nNumberLike → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.nNumberLike → <sb>

**<score>** Full score view of the musical content.

att.nNumberLike → <score>

**<scoreDef>** Container for score meta-information.

att.nNumberLike → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.nNumberLike → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.nNumberLike → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.nNumberLike → <scriptNote>

**<seal>** A single seal or similar attachment.

att.nNumberLike → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.nNumberLike → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.nNumberLike → <secFolio>

**<section>** Segment of music data.

att.nNumberLike → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.nNumberLike → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.nNumberLike → <segmentation>

**<seqNum>** MIDI sequence number.

att.nNumberLike → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.nNumberLike → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.nNumberLike → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.nNumberLike → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.nNumberLike → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.nNumberLike → <signatures>

**<signifLet>** Significantive letter(s).

att.nNumberLike → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.nNumberLike → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.nNumberLike → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.nNumberLike → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.nNumberLike → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.nNumberLike → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.nNumberLike → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.nNumberLike → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.nNumberLike → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.nNumberLike → <sponsor>

**<stack>** An inline table with a single column.

att.nNumberLike → <stack>

**<staffGrp>** A group of bracketed or braced staves.

att.nNumberLike → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.nNumberLike → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.nNumberLike → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.nNumberLike → <stdVals>

**<stem>** A stem element.

att.nNumberLike → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.nNumberLike → <street>

**<strophicus>** Strophicus.

att.nNumberLike → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.nNumberLike → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.nNumberLike → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.nNumberLike → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.nNumberLike → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.nNumberLike → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.nNumberLike → <surface>

**<syl>** Individual lyric syllable.

att.nNumberLike → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.nNumberLike → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.nNumberLike → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.nNumberLike → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.nNumberLike → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.nNumberLike → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.nNumberLike → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.nNumberLike → <sysReq>

**<table>** Contains text displayed in tabular form.

att.nNumberLike → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.nNumberLike → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.nNumberLike → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.nNumberLike → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.nNumberLike → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.nNumberLike → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.nNumberLike → <term>

**<termList>** Collection of text phrases which describe a resource.

att.nNumberLike → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.nNumberLike → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.nNumberLike → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.nNumberLike → <tie>

**<title>** Title of a bibliographic entity.

att.nNumberLike → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.nNumberLike → <titlePage>

**<titleStmt>** Container for title and responsibility meta-data.

att.nNumberLike → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.nNumberLike → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.nNumberLike → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.nNumberLike → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.nNumberLike → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.nNumberLike → <trill>

**<trkName>** MIDI track/sequence name.

att.nNumberLike → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.nNumberLike → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.nNumberLike → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.nNumberLike → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.nNumberLike → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.nNumberLike → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.nNumberLike → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.nNumberLike → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.nNumberLike → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.nNumberLike → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.nNumberLike → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.nNumberLike → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.nNumberLike → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.nNumberLike → <when>

**<width>** Description of the horizontal size of an object.

att.nNumberLike → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.nNumberLike → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.nNumberLike → <workList>

**<zone>** Defines an area of interest within a **<surface>** or graphic file.

att.nNumberLike → <zone>

## Declaration

```

```

## att.name

Attributes shared by names.

### Module

[MEI.shared](#)

### Attributes

**@auth** (*optional*) A name or label associated with a controlled vocabulary or other authoritative source for this element or its content. Value is plain text.

att.name → @auth

**@auth.uri** (*optional*) A web-accessible location of the controlled vocabulary or other authoritative source of identification or definition for this element or its content. This attribute may contain a complete URI or a partial URI which is completed by the value of the codedval attribute. Value conforms to [data.URI](#).  
att.name → @auth.uri

**@codedval** (*optional*) A value that represents or identifies other data. Often, it is a primary key in the database or a unique value in the coded list identified by the auth or auth.uri attributes. One or more values of datatype **NMTOKEN**, separated by spaces.

att.name → @codedval

**@enddate** (*optional*) Contains the end point of a date range in standard ISO form. Value conforms to [data.ISODATE](#).

att.name → @enddate

**@isodate** (*optional*) Provides the value of a textual date in standard ISO form. Value conforms to [data.ISODATE](#).

att.name → @isodate

**@nonfiling** (*optional*) Holds the number of initial characters (such as those constituting an article or preposition) that should not be used for sorting a title or name. Value is a positive integer.

att.name → @nonfiling

**@notafter** (*optional*) Contains an upper boundary for an uncertain date in standard ISO form. Value conforms to [data.ISODATE](#).

att.name → @notafter

**@notbefore** (*optional*) Contains a lower boundary, in standard ISO form, for an uncertain date. Value conforms to [data.ISODATE](#).

att.name → @notbefore

**@nymref** (*optional*) Used to record a pointer to the regularized form of the name elsewhere in the document. Value conforms to [data.URI](#).

att.name → @nymref

**@role** (*optional*) Used to specify further information about the entity referenced by this name, for example, the occupation of a person or the status of a place. Value is plain text.

att.name → @role

**@startdate** (*optional*) Contains the starting point of a date range in standard ISO form. Value conforms to [data.ISODATE](#).

att.name → @startdate

**Available at**

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.name → <addName>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.name → <bloc>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.name → <corpName>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.name → <country>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.name → <district>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.name → <famName>

**<foreName>** Contains a forename, given or baptismal name.

att.name → <foreName>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.name → <genName>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.name → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.name → <geogName>

**<name>** Proper noun or noun phrase.

att.name → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.name → <nameLink>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.name → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.name → <persName>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.name → <region>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.name → <repository>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.name → <roleName>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.name → <settlement>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.name → <styleName>

## Constraints

@nymref attribute should have content.

The value in @nymref should correspond to the @xml:id attribute of an element.

## Declaration

```

<classSpec ident="att.name" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes shared by names.</desc>

## att.nc.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@deg** (*optional*) Captures scale degree information using [Humdrum \\*\\*deg syntax](#) -- an optional indicator of melodic approach (^ = ascending approach, v = descending approach), a scale degree value (1 = tonic ... 7 = leading tone), and an optional indication of chromatic alteration, 1, v7, ^1, or v5+, for example. The amount of chromatic alteration is not indicated. Value conforms to [data.SCALEDEGREE](#).  
att.nc.anl → @deg

**@intm** (*optional*) Encodes the melodic interval from the previous pitch. The value may be a general directional indication (u, d, s, etc.), an indication of diatonic interval direction, quality, and size, or a precise numeric value in half steps. Value conforms to [data.INTERVAL.MELODIC](#).

att.nc.anl → @intm

**@mfunc** (*optional*) Describes melodic function using [Humdrum \\*\\*embel syntax](#). Value conforms to [data.MELODICFUNCTION](#).

att.nc.anl → @mfunc

**@pclass** (*optional*) Holds pitch class information. Value conforms to [data.PITCHCLASS](#).

att.nc.anl → @pclass

**@psolfa** (*optional*) Contains sol-fa designation, e.g., do, re, mi, etc., in either a fixed or movable Do system. Value is a [NMTOKEN](#).

att.nc.anl → @psolfa

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.nc.anl → <nc>

### Declaration

```
<classSpec ident="att.nc.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.harmonicFunction"/>
    <memberOf key="att.intervalMelodic"/>
    <memberOf key="att.melodicFunction"/>
    <memberOf key="att.pitchClass"/>
    <memberOf key="att.solfa"/>
  </classes>
</classSpec>
```

## att.nc.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@accid.ges** (*optional*) Records the performed pitch inflection. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.nc.ges → @accid.ges

**@artic.ges** (*optional*) Records performed articulation that differs from the written value. One or more values from [data.ARTICULATION](#), separated by spaces.

att.nc.ges → @artic.ges

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.nc.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration. Value conforms to [data.DURATION.GESTURAL](#).

att.nc.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.nc.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.nc.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.nc.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.nc.ges → @dur.recip

**@instr** (*optional*) Provides a way of pointing to a MIDI instrument definition. It must contain the ID of an [<instrDef>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.nc.ges → @instr

**@oct.ges** (*optional*) Records performed octave information that differs from the written value. Value conforms to [data.OCTAVE](#).

att.nc.ges → @oct.ges

**@pname.ges** (*optional*) Contains a performed pitch name that differs from the written value. Value conforms to [data.PITCHNAME.GESTURAL](#).

att.nc.ges → @pname.ges

**@pnum** (*optional*) Holds a pitch-to-number mapping, a base-40 or MIDI note number, for example. Value conforms to [data.PITCHNUMBER](#).

att.nc.ges → @pnum

**@vel** (optional) MIDI Note-on/off velocity. Value conforms to [data.MIDIVALUE](#).

att.nc.ges → @vel

## Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.nc.ges → <nc>

## Declaration

```

# att.nc.log

Logical domain attributes.

## Referenced in chapters

[6.4.2 Neume component attributes](#)

## Module

[MEI.neumes](#)

## Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.nc.log → @layer

**@oct** (*optional*) Captures written octave information. Value must either conform to **a non-negative integer no larger than 9** or **a string matching the following regular expression: "unknown"**.

att.nc.log → @oct

**@pname** (*optional*) Contains a written pitch name. Value is a [token](#).

att.nc.log → @pname

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.nc.log → @staff

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.nc.log → @when

## Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.nc.log → <nc>

## att.nc.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.nc.vis → @altsym

**@angled** (*optional*) Value conforms to [data.BOOLEAN](#).

att.nc.vis → @angled

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.nc.vis → @color

**@con** (*optional*) Connection to the previous component within the same neume; this attribute should not be used for the first component of a neume. Allowed values are: "**g**" (*Gapped; not connected.*), "**I**" (*Looped.*), "**e**" (*Extended.*)

att.nc.vis → @con

**@curve** (*optional*) Records direction of curvature. Allowed values are: "**a**" (*Anti-clockwise curvature.*), "**c**" (*Clockwise curvature.*)

att.nc.vis → @curve

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.nc.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.nc.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.nc.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.nc.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.nc.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout.*)

att.nc.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.nc.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.nc.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.nc.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.nc.vis → @ho

**@hooked** (*optional*) Pen stroke has an extension; specific to Hispanic notation. Value conforms to [data.BOOLEAN](#).

att.nc.vis → @hooked

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.nc.vis → @letterspacing

**@ligated** (*optional*) Indicates participation in a ligature. Value conforms to [data.BOOLEAN](#).

att.nc.vis → @ligated

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.nc.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.nc.vis → @loc

**@rellen** (*optional*) Length of the pen stroke relative to the previous component within the same neume; this attribute should not be used for the first component of a neume. Allowed values are: "l" (*Longer.*), "s" (*Shorter.*)

att.nc.vis → @rellen

**@s-shape** (*optional*) Direction of the initial direction for an s-shaped pen stroke; i.e., "w" for the standard letter S, "e" for its mirror image, "s" for the letter S turned 90-degrees anti-clockwise, and "n" for its mirror image. Value conforms to [data.COMPASSDIRECTION.basic](#).

att.nc.vis → @s-shape

**@tilt** (*optional*) Direction of the pen stroke. Value conforms to [data.COMPASSDIRECTION](#).

att.nc.vis → @tilt

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.nc.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facsimile` attribute. Value is a decimal number.

att.nc.vis → @x

**@y** (optional) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.nc.vis → @y

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.nc.vis → <nc>

### Declaration

```
<classSpec ident="att.nc.vis" module="MEI.visual" type="atts">

## att.ncForm

Attributes that record visual details of neume notation.

### Referenced in chapters

[6.4.2 Neume component attributes](#)

### Module

[MEI.neumes](#)

### Attributes

**@angled** (*optional*) Value conforms to [data.BOOLEAN](#).

att.ncForm → @angled

**@con** (*optional*) Connection to the previous component within the same neume; this attribute should not be used for the first component of a neume. Allowed values are: "g" (*Gapped; not connected.*), "l" (*Looped.*), "e" (*Extended.*)

att.ncForm → @con

**@curve** (*optional*) Records direction of curvature. Allowed values are: "a" (*Anti-clockwise curvature.*), "c" (*Clockwise curvature.*)

att.ncForm → @curve

**@hooked** (*optional*) Pen stroke has an extension; specific to Hispanic notation. Value conforms to [data.BOOLEAN](#).

att.ncForm → @hooked

**@ligated** (*optional*) Indicates participation in a ligature. Value conforms to [data.BOOLEAN](#).

att.ncForm → @ligated

**@rellen** (*optional*) Length of the pen stroke relative to the previous component within the same neume; this attribute should not be used for the first component of a neume. Allowed values are: "l" (*Longer.*), "s" (*Shorter.*)

att.ncForm → @rellen

**@s-shape** (*optional*) Direction of the initial direction for an s-shaped pen stroke; i.e., "w" for the standard letter S, "e" for its mirror image, "s" for the letter S turned 90-degrees anti-clockwise, and "n" for its mirror image. Value conforms to [data.COMPASSDIRECTION.basic](#).

att.ncForm → @s-shape

**@tilt** (*optional*) Direction of the pen stroke. Value conforms to [data.COMPASSDIRECTION](#).

att.ncForm → @tilt

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.ncForm → <nc>

## att.neume.log

Logical domain attributes.

### Module

[MEI.neumes](#)

### Attributes

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.neume.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.neume.log → @staff

**@syl** (*optional*) Holds an associated sung text syllable. Value is plain text.

att.neume.log → @syl

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [\*\*<when>\*\*](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.neume.log → @when

### Available at

[\*\*<neume>\*\*](#) Sign representing one or more musical pitches.

att.neume.log → <neume>

### Declaration

```
<classSpec ident="att.neume.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <!-- att.event restricted -->
    <memberOf key="att.alignment"/>
    <memberOf key="att.layerIdent"/>
    <memberOf key="att.staffIdent"/>
    <memberOf key="att.sylText"/>
  </classes>
</classSpec>
```

# att.neume.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.neume.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.neume.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.neume.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.neume.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.neume.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.neume.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.neume.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.neume.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.neume.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.neume.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.neume.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.neume.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.neume.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.neume.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.neume.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.neume.vis → @loc

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.neume.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.neume.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.neume.vis → @y

## Available at

**<neume>** Sign representing one or more musical pitches.

att.neume.vis → <neume>

## Declaration

```
<classSpec ident="att.neume.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

  </classes>
</classSpec>
```

## att.notificationStyle

Attributes that capture music font name and size.

### Referenced in chapters

[4.2.2 Defining Score Parameters for CMN](#)

### Module

[MEI.shared](#)

### Attributes

**@music.name** (*optional*) Sets the default music font name. Value conforms to [data.MUSICFONT](#).

att.notificationStyle → @music.name

**@music.size** (*optional*) Sets the default music font size. Value conforms to [data.FONTSIZE](#).

att.notificationStyle → @music.size

### Available at

**<scoreDef>** Container for score meta-information.

att.notificationStyle → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.notificationStyle → <staffDef>

### Declaration

```

<classSpec ident="att.notificationStyle" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that capture music font name and size.</desc>
  <attList>
    <attDef ident="music.name" usage="opt">
      <desc xml:lang="en">Sets the default music font name.</desc>
      <datatype>
        <rng:ref name="data.MUSICFONT"/>
      </datatype>
    </attDef>
    <attDef ident="music.size" usage="opt">
      <desc xml:lang="en">Sets the default music font size.</desc>
      <datatype>
        <rng:ref name="data.FONTSIZE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.notationType

Attributes that provide for classification of notation.

### Referenced in chapters

[5.6.1 Notation Type](#)

### Module

[MEI](#)

### Attributes

**@notationsubtype** (*optional*) Provides any sub-classification of the notation contained or described by the element, additional to that given by its notationtype attribute. Value is a [NMTOKEN](#).

att.notationType → @notationsubtype

**@notationtype** (*optional*) Contains classification of the notation contained or described by the element bearing this attribute. Value conforms to [data.NOTATIONTYPE](#).

att.notationType → @notationtype

### Available at

**<staffDef>** Container for staff meta-information.

att.notationType → <staffDef>

### Constraints

An element with a notationsubtype attribute must have a notationtype attribute.

### Declaration

```
<classSpec ident="att.notationType" module="MEI" type="atts">
  <desc xml:lang="en">Attributes that provide for classification of notation.</desc>
  <attList>
    <attDef ident="notationtype" usage="opt">
      <desc xml:lang="en">Contains classification of the notation contained or described by the element bearing this attribute.</desc>
      <datatype>
        <rng:ref name="data.NOTATIONTYPE"/>
      </datatype>
    </attDef>
    <attDef ident="notationsubtype" usage="opt">
      <desc xml:lang="en">Provides any sub-classification of the notation contained or described by the element, additional to that given by its notationtype attribute.</desc>
      <datatype>
        <rng:data type="NMTOKEN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

```
<constraintSpec ident="When_notationsubtype" scheme="schematron">
  <constraint>
    <sch:rule context="mei:*[@notationsubtype]">

      attribute must have a notationtype attribute.</sch:assert>
    </sch:rule>
  </constraint>
</constraintSpec>
</attDef>
</attList>
</classSpec>
```

## att.note.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@accid** (*optional*) Captures a written accidental. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.note.anl → @accid

**@artic** (*optional*) Encodes the written articulation(s). Articulations are normally encoded in order from the note head outward; that is, away from the stem. See additional notes at att.vis.note. Only articulations should be encoded in the artic attribute; for example, fingerings should be encoded using the [<fing>](#) element. One or more values from [data.ARTICULATION](#), separated by spaces.

att.note.anl → @artic

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.note.anl → @beam

**@deg** (*optional*) Captures scale degree information using [Humdrum \\*\\*deg syntax](#) -- an optional indicator of melodic approach (^ = ascending approach, v = descending approach), a scale degree value (1 = tonic ... 7 = leading tone), and an optional indication of chromatic alteration, 1, v7, ^1, or v5+, for example. The amount of chromatic alternation is not indicated. Value conforms to [data.SCALEDEGREE](#).  
att.note.anl → @deg

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.note.anl → @fermata

**@gliss** (*optional*) Indicates that this element participates in a glissando. If visual information about the glissando needs to be recorded, then a [<gliss>](#) element should be employed instead. Value conforms to [data.GLISSANDO](#).

att.note.anl → @gliss

**@intm** (*optional*) Encodes the melodic interval from the previous pitch. The value may be a general directional indication (u, d, s, etc.), an indication of diatonic interval direction, quality, and size, or a precise numeric value in half steps. Value conforms to [data.INTERVAL.MELODIC](#).

att.note.anl → @intm

**@lv** (*optional*) Indicates the attachment of an l.v. (laissez vibrer) sign to this element. Value conforms to [data.BOOLEAN](#).

att.note.anl → @lv

**@mfunc** (*optional*) Describes melodic function using [Humdrum \\*\\*embel syntax](#). Value conforms to [data.MELODICFUNCTION](#).

att.note.anl → @mfunc

**@ornam** (*optional*) Indicates that this element has an attached ornament. If visual information about the ornament is needed, then one of the elements that represents an ornament (mordent, trill, or turn) should be employed. One or more values from [data.ORNAM.cmn](#), separated by spaces.

att.note.anl → @ornam

**@pclass** (*optional*) Holds pitch class information. Value conforms to [data.PITCHCLASS](#).

att.note.anl → @pclass

**@psolfa** (*optional*) Contains sol-fa designation, e.g., do, re, mi, etc., in either a fixed or movable Do system. Value is a [NMOKEN](#).

att.note.anl → @psolfa

**@slur** (*optional*) Indicates that this element participates in a slur. If visual information about the slur needs to be recorded, then a [<slur>](#) element should be employed. One or more values from [data.SLUR](#), separated by spaces.

att.note.anl → @slur

**@syl** (*optional*) Holds an associated sung text syllable. Value is plain text.

att.note.anl → @syl

**@tie** (*optional*) Indicates that this element participates in a tie. If visual information about the tie needs to be recorded, then a [<tie>](#) element should be employed. One or more values from [data.TIE](#), separated by spaces.

att.note.anl → @tie

**@tuplet** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLET](#), separated by spaces.

att.note.anl → @tuplet

## Available at

**<note>** A single pitched event.

att.note.anl → <note>

## Declaration

```
<classSpec ident="att.note.anl" module="MEI.analytical" type="atts">

DEVELOPMENT  
VERSION

## att.note.anl.cmn

Analytical domain attributes in the CMN repertoire.

### Module

[MEI.cmn](#)

### Attributes

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.note.anl.cmn → @beam

**@gliss** (*optional*) Indicates that this element participates in a glissando. If visual information about the glissando needs to be recorded, then a [<gliss>](#) element should be employed instead. Value conforms to [data.GLISSANDO](#).

att.note.anl.cmn → @gliss

**@lv** (*optional*) Indicates the attachment of an l.v. (laissez vibrer) sign to this element. Value conforms to [data.BOOLEAN](#).

att.note.anl.cmn → @lv

**@ornam** (*optional*) Indicates that this element has an attached ornament. If visual information about the ornament is needed, then one of the elements that represents an ornament (mordent, trill, or turn) should be employed. One or more values from [data.ORNAM.cmn](#), separated by spaces.

att.note.anl.cmn → @ornam

**@slur** (*optional*) Indicates that this element participates in a slur. If visual information about the slur needs to be recorded, then a [<slur>](#) element should be employed. One or more values from [data.SLUR](#), separated by spaces.

att.note.anl.cmn → @slur

**@syl** (*optional*) Holds an associated sung text syllable. Value is plain text.

att.note.anl.cmn → @syl

**@tie** (*optional*) Indicates that this element participates in a tie. If visual information about the tie needs to be recorded, then a [<tie>](#) element should be employed. One or more values from [data.TIE](#), separated by spaces.

att.note.anl.cmn → @tie

**@tuplet** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLET](#), separated by spaces.

att.note.anl.cmn → @tuplet

### Available at

**<note>** A single pitched event.

att.note.anl.cmn → <note>

### Declaration

```
<classSpec ident="att.note.anl.cmn" module="MEI.cmn" type="atts">
```

```

## att.note.anl.mensural

Analytical domain attributes in the Mensural repertoire.

### Module

[MEI.mensural](#)

### Attributes

#### Available at

**<note>** A single pitched event.

att.note.anl.mensural → <note>

#### Declaration

```
<classSpec ident="att.note.anl.mensural" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Analytical domain attributes in the Mensural repertoire.</desc>
</classSpec>
```

## att.note.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@accid.ges** (*optional*) Records the performed pitch inflection. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.note.ges → @accid.ges

**@artic.ges** (*optional*) Records performed articulation that differs from the written value. One or more values from [data.ARTICULATION](#), separated by spaces.

att.note.ges → @artic.ges

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.note.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration. Value conforms to [data.DURATION.GESTURAL](#).

att.note.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.note.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.note.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.note.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.note.ges → @dur.recip

**@extremis** (*optional*) Indicates an extreme, indefinite performed pitch. Allowed values are: "**highest**" (*Highest note the performer can play.*), "**lowest**" (*Lowest note the performer can play.*)

att.note.ges → @extremis

**@instr** (*optional*) Provides a way of pointing to a MIDI instrument definition. It must contain the ID of an [<instrDef>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.note.ges → @instr

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.note.ges → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.note.ges → @numbase

**@oct.ges** (*optional*) Records performed octave information that differs from the written value. Value conforms to [data.OCTAVE](#).

att.note.ges → @oct.ges

**@pname.ges** (*optional*) Contains a performed pitch name that differs from the written value. Value conforms to [data.PITCHNAME.GESTURAL](#).

att.note.ges → @pname.ges

**@pnum** (*optional*) Holds a pitch-to-number mapping, a base-40 or MIDI note number, for example. Value conforms to [data.PITCHNUMBER](#).

att.note.ges → @pnum

**@tab.fing** (*optional*) Indicates which finger, if any, should be used to play an individual string. The index, middle, ring, and little fingers are represented by the values 1-4, while t is for the thumb. The values x and o indicate muffled and open strings, respectively. Value conforms to [data.FINGER.FRET](#).

att.note.ges → @tab.fing

**@tab.fret** (*optional*) Records the location at which a string should be stopped against a fret. Value conforms to [data.FRETNUMBER](#).

att.note.ges → @tab.fret

**@tab.string** (*optional*) Records which string is to be played. Value conforms to [data.STRINGNUMBER](#).

att.note.ges → @tab.string

**@vel** (*optional*) MIDI Note-on/off velocity. Value conforms to [data.MIDIVALUE](#).

att.note.ges → @vel

## Available at

**<note>** A single pitched event.

att.note.ges → <note>

## Constraints

When the @extremis attribute is used, the @pname.ges and @oct.ges attributes are not allowed.

## Declaration

```

DEVELOPMENT  
VERSION

## att.note.ges.mensural

Gestural domain attributes in the Mensural repertoire.

### Module

[MEI.mensural](#)

### Attributes

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.note.ges.mensural → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.note.ges.mensural → @numbase

### Available at

**<note>** A single pitched event.

att.note.ges.mensural → <note>

### Declaration

```
<classSpec ident="att.note.ges.mensural" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Gestural domain attributes in the Mensural repertoire.</desc>
  <classes>
    <memberOf key="att.duration.ratio"/>
  </classes>
</classSpec>
```

# att.note.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@colored** (*optional*) Indicates this feature is 'colored'; that is, it is a participant in a change in rhythmic values. In mensural notation, coloration is indicated by colored notes (red, black, etc.) where void notes would otherwise occur. In CMN, coloration is indicated by an inverse color; that is, the note head is void when it would otherwise be filled and vice versa. Value conforms to [data.BOOLEAN](#).

att.note.log → @colored

**@cue** (*optional*) Value conforms to [data.BOOLEAN](#).

att.note.log → @cue

**@dots** (*optional*) Records the number of augmentation dots required by a written dotted duration. Value conforms to [data.AUGMENTDOT](#).

att.note.log → @dots

**@dur** (*optional*) Records the duration of a feature using the relative durational values provided by the [data.DURATION](#) datatype. Value conforms to [data.DURATION](#).

att.note.log → @dur

**@dur.quality** (*recommended*) Encodes the durational quality of a mensural note using the values provided by the [data.DURQUALITY.mensural](#) datatype (i.e., the perfect / imperfect / altered / major / minor / duplex quality of a note). Value conforms to [data.DURQUALITY.mensural](#).

att.note.log → @dur.quality

**@grace** (*optional*) Marks a note or chord as a "grace" (without a definite performed duration) and records from which other note/chord it should "steal" time. Value conforms to [data.GRACE](#).

att.note.log → @grace

**@grace.time** (*optional*) Records the amount of time to be "stolen" from a non-grace note/chord. Value conforms to [data.PERCENT](#).

att.note.log → @grace.time

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.note.log → @layer

**@oct** (*optional*) Captures written octave information. Value conforms to [data.OCTAVE](#).

att.note.log → @oct

**@pname** (*optional*) Contains a written pitch name. Value conforms to [data.PITCHNAME](#).

att.note.log → @pname

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.note.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.note.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.note.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.note.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.note.log → @when

## Available at

**<note>** A single pitched event.

att.note.log → <note>

## Declaration

```
<classSpec ident="att.note.log" module="MEI.shared" type="atts">

```

# att.note.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.note.vis → @altsym

**@breaksec** (*optional*) Presence of this attribute indicates that the secondary beam should be broken following this note/chord. The value of the attribute records the number of beams which should remain unbroken. Value is a positive integer.

att.note.vis → @breaksec

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.note.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.note.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.note.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.note.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.note.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.note.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.note.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.note.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.note.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.note.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of glyph.name or glyph.num is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.note.vis → @glyph.uri

**@head.altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [symbolDef](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.note.vis → @head.altsym

**@head.auth** (*optional*) A name or label associated with the controlled vocabulary from which a numerical value of head.shape is taken. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.note.vis → @head.auth

**@head.color** (*optional*) Captures the overall color of a notehead. Value conforms to [data.COLOR](#).

att.note.vis → @head.color

**@head.fill** (*optional*) Describes how/if the notehead is filled. Value conforms to [data.FILL](#).

att.note.vis → @head.fill

**@head.fillcolor** (*optional*) Captures the fill color of a notehead if different from the overall note color. Value conforms to [data.COLOR](#).

att.note.vis → @head.fillcolor

**@head.mod** (*optional*) Records any additional symbols applied to the notehead. One or more values from [data.NOTEHEADMODIFIER](#), separated by spaces.

att.note.vis → @head.mod

**@head.rotation** (*optional*) Describes rotation applied to the basic notehead shape. A positive value rotates the notehead in a counter-clockwise fashion, while negative values produce clockwise rotation. Value conforms to [data.ROTATION](#).

att.note.vis → @head.rotation

**@head.shape** (*optional*) Used to override the head shape normally used for the given duration. Value conforms to [data.HEADSHAPE](#).

att.note.vis → @head.shape

**@head.visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.note.vis → @head.visible

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.note.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.note.vis → @letterspacing

**@lig** (*optional*) Indicates this element's participation in a ligature. Value conforms to [data.LIGATUREFORM](#).

att.note.vis → @lig

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.note.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.note.vis → @loc

**@stem.dir** (*optional*) Describes the direction of a stem. Value conforms to [data.STEMDIRECTION](#).

att.note.vis → @stem.dir

**@stem.form** (*optional*) Records the form of the stem. Value conforms to [data.STEMFORM.mensural](#).

att.note.vis → @stem.form

**@stem.len** (*optional*) Encodes the stem length. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.note.vis → @stem.len

**@stem.mod** (*optional*) Encodes any stem "modifiers"; that is, symbols rendered on the stem, such as tremolo or Sprechstimme indicators. Value conforms to [data.STEMMODIFIER](#).

att.note.vis → @stem.mod

**@stem.pos** (*optional*) Records the position of the stem in relation to the note head(s). Value conforms to [data.STEMPOSITION](#).

att.note.vis → @stem.pos

**@stem.sameas** (*optional*) Points to a note element in a different layer whose stem is shared. The linked notes should be rendered like a chord though they are part of different layers. Value conforms to [data.URI](#).

att.note.vis → @stem.sameas

**@stem.visible** (*optional*) Determines whether a stem should be displayed. Value conforms to [data.BOOLEAN](#).

att.note.vis → @stem.visible

**@stem.with** (*optional*) Contains an indication of which staff a note or chord that logically belongs to the current staff should be visually placed on; that is, the one above or the one below. Value conforms to [data.NEIGHBORINGLAYER](#).

att.note.vis → @stem.with

**@stem.x** (*optional*) Records the output x coordinate of the stem's attachment point. Value is a decimal number.

att.note.vis → @stem.x

**@stem.y** (*optional*) Records the output y coordinate of the stem's attachment point. Value is a decimal number.

att.note.vis → @stem.y

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.note.vis → @to

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.note.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facsimile` attribute. Value is a decimal number.

att.note.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the *facs* attribute. Value is a decimal number.

att.note.vis → @y

## Available at

**<note>** A single pitched event.

att.note.vis → <note>

## Declaration

```
<classSpec ident="att.note.vis" module="MEI.visual" type="atts">

## att.note.vis.cmn

Visual domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@breaksec** (*optional*) Presence of this attribute indicates that the secondary beam should be broken following this note/chord. The value of the attribute records the number of beams which should remain unbroken. Value is a positive integer.

att.note.vis.cmn → @breaksec

### Available at

**<note>** A single pitched event.

att.note.vis.cmn → <note>

### Declaration

```
<classSpec ident="att.note.vis.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.beamSecondary"/>
  </classes>
</classSpec>
```

## att.note.vis.mensural

Visual domain attributes in the Mensural repertoire.

### Module

[MEI.mensural](#)

### Attributes

**@lig** (*optional*) Indicates this element's participation in a ligature. Value conforms to [data.LIGATUREFORM](#).

att.note.vis.mensural → @lig

### Available at

**<note>** A single pitched event.

att.note.vis.mensural → <note>

### Declaration

```
<classSpec ident="att.note.vis.mensural" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Visual domain attributes in the Mensural repertoire.</desc>
  <attList>
    <attDef ident="lig" usage="opt">
      <desc xml:lang="en">Indicates this element's participation in a ligature.</desc>
      <datatype>
        <rng:ref name="data.LIGATUREFORM"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.noteHeads

Attributes pertaining to the notehead part of a note.

### Module

[MEI.shared](#)

### Attributes

**@head.altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).  
 att.noteHeads → @head.altsym

**@head.auth** (*optional*) A name or label associated with the controlled vocabulary from which a numerical value of head.shape is taken. Allowed values are: "smufl" (*Standard Music Font Layout*).  
 att.noteHeads → @head.auth

**@head.color** (*optional*) Captures the overall color of a notehead. Value conforms to [data.COLOR](#).  
 att.noteHeads → @head.color

**@head.fill** (*optional*) Describes how/if the notehead is filled. Value conforms to [data.FILL](#).  
 att.noteHeads → @head.fill

**@head.fillcolor** (*optional*) Captures the fill color of a notehead if different from the overall note color. Value conforms to [data.COLOR](#).

att.noteHeads → @head.fillcolor

**@head.mod** (*optional*) Records any additional symbols applied to the notehead. One or more values from [data.NOTEHEADMODIFIER](#), separated by spaces.

att.noteHeads → @head.mod

**@head.rotation** (*optional*) Describes rotation applied to the basic notehead shape. A positive value rotates the notehead in a counter-clockwise fashion, while negative values produce clockwise rotation. Value conforms to [data.ROTATION](#).

att.noteHeads → @head.rotation

**@head.shape** (*optional*) Used to override the head shape normally used for the given duration. Value conforms to [data.HEADSHAPE](#).

att.noteHeads → @head.shape

**@head.visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.noteHeads → @head.visible

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.noteHeads → <ambNote>

**<note>** A single pitched event.

att.noteHeads → <note>

### Constraints

@head.altsym attribute should have content.

The value in @head.altsym should correspond to the @xml:id attribute of a symbolDef element.

When @head.auth matches 'smufl', @head.shape must contain a numeric glyph reference in hexadecimal notation, like "#xE000" or "U+E000".

SMuFL version 1.18 uses the range U+E000 - U+ECBF.

## Declaration

# att.numberPlacement

Attributes that record the placement and visibility of numbers that accompany a bowed tremolo or tuplet.

## Module

[MEI.cmn](#)

## Attributes

**@num.place** (*optional*) States where the tuplet number will be placed in relation to the note heads.

Value conforms to [data.STAFFREL.basic](#).

att.numberPlacement → @num.place

**@num.visible** (*optional*) Determines if the tuplet number is visible. Value conforms to [data.BOOLEAN](#).

att.numberPlacement → @num.visible

## Available at

**<bTrem>** A rapid alternation on a single pitch or chord.

att.numberPlacement → <bTrem>

**<mRpt>** An indication that the previous measure should be repeated.

att.numberPlacement → <mRpt>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.numberPlacement → <multiRest>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.numberPlacement → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.numberPlacement → <tupletSpan>

## Declaration

```

<classSpec ident="att.numberPlacement" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that record the placement and visibility of numbers that
  accompany a bowed tremolo or tuplet.</desc>
  <attList>

<datatype>
  <rng:ref name="data.BOOLEAN"/>
</datatype>
</attDef>
</attList>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.numbered

Attributes that record numbers to be displayed with a feature.

### Module

[MEI.cmn](#)

### Attributes

**@num** (*optional*) Records a number or count accompanying a notational feature. Value is a positive integer.

att.numbered → @num

### Available at

**<bTrem>** A rapid alternation on a single pitch or chord.

att.numbered → <bTrem>

**<mRpt>** An indication that the previous measure should be repeated.

att.numbered → <mRpt>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.numbered → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.numbered → <multiRpt>

### Declaration

```
<classSpec ident="att.numbered" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that record numbers to be displayed with a feature.</desc>
  <attList>
    <attDef ident="num" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">number</gloss>
      <desc xml:lang="en">Records a number or count accompanying a notational feature.</desc>

        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.octave

Attributes that record written octave.

### Referenced in chapters

[6.4.3 Custos attributes](#)

### Module

[MEI.shared](#)

### Attributes

**@oct** (*optional*) Captures written octave information. Value conforms to [data.OCTAVE](#).

att.octave → @oct

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.octave → <ambNote>

**<chordMember>** An individual pitch in a chord defined by a [<chordDef>](#) element.

att.octave → <chordMember>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.octave → <clef>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line.

Sometimes called a "direct".

att.octave → <custos>

**<keyAccid>** Accidental in a key signature.

att.octave → <keyAccid>

**<note>** A single pitched event.

att.octave → <note>

### Declaration

```
<classSpec ident="att.octave" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record written octave.</desc>
  <attList>
    <attDef ident="oct" usage="opt">

      <desc xml:lang="en">Captures written octave information.</desc>
      <datatype>
        <rng:ref name="data.OCTAVE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.octave.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.octave.anl → <octave>

#### Declaration

```

## att.octave.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.octave.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.octave.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.octave.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.octave.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.octave.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum [\\*\\*recip value](#). Value is a [token](#).

att.octave.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.octave.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.octave.ges → @tstamp2.real

### Available at

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.octave.ges → <octave>

### Declaration

```
<classSpec ident="att.octave.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
```

</classSpec>

DEVELOPMENT  
VERSION

## att.octave.log

Logical domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@coll** (*optional*) Indicates whether the octave displacement should be performed simultaneously with the written notes, i.e., "coll' ottava". Unlike other octave signs which are indicated by broken lines, coll' ottava typically uses an unbroken line or a series of longer broken lines, ending with a short vertical stroke. See Read, p. 47-48. Allowed values are: "**coll**" (*Coll' ottava (with the octave).*)

att.octave.log → @coll

**@dis** (*optional*) Records the amount of octave displacement. Value conforms to [data.OCTAVE.DIS](#).

att.octave.log → @dis

**@dis.place** (*optional*) Records the direction of octave displacement. Value conforms to [data.STAFFREL.basic](#).

att.octave.log → @dis.place

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.octave.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.octave.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.octave.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.octave.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.octave.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.octave.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.octave.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.octave.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.octave.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.octave.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.octave.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.octave.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.octave.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.octave.log → @when

## Available at

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.octave.log → <octave>

## Declaration

# att.octave.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.octave.vis → @color

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.octave.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.octave.vis → @endto

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.octave.vis → @extender

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.octave.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.octave.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.octave.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.octave.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.octave.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.octave.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.octave.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.octave.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.octave.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.octave.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.octave.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.octave.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.octave.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.octave.vis → @y

## Available at

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.octave.vis → <octave>

## Declaration

```
<classSpec ident="att.octave.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

    <memberOf key="att.visualOffset2.ho"/>
    <memberOf key="att.visualOffset2.to"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.octaveDefault

Attributes that record a default value for octave.

### Module

[MEI.shared](#)

### Attributes

**@oct.default** (*optional*) Contains a default octave specification for use when the first note, rest, chord, etc. in a measure does not have an octave value specified. Value conforms to [data.OCTAVE](#).

att.octaveDefault → @oct.default

### Available at

**<layerDef>** Container for layer meta-information.

att.octaveDefault → <layerDef>

**<scoreDef>** Container for score meta-information.

att.octaveDefault → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.octaveDefault → <staffDef>

### Declaration

```
<classSpec ident="att.octaveDefault" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record a default value for octave.</desc>
  <attList>
    <attDef ident="oct.default" usage="opt">
      <desc xml:lang="en">Contains a default octave specification for use when the first
          note, rest, chord, etc. in a measure does not have an octave value specified.</desc>
      <datatype>
        <rng:ref name="data.OCTAVE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.octaveDisplacement

Attributes describing the amount and direction of octave displacement.

### Module

MEI.shared

### Attributes

**@dis** (*optional*) Records the amount of octave displacement. Value conforms to [data.OCTAVE.DIS](#).  
att.octaveDisplacement → @dis

**@dis.place** (*optional*) Records the direction of octave displacement. Value conforms to [data.STAFFREL.basic](#).  
att.octaveDisplacement → @dis.place

### Available at

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.  
att.octaveDisplacement → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.  
att.octaveDisplacement → <cpMark>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.  
att.octaveDisplacement → <octave>

### Declaration

```
<classSpec ident="att.octaveDisplacement" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes describing the amount and direction of octave
  displacement.</desc>
  <attList>
    <attDef ident="dis" usage="opt">
      <desc xml:lang="en">Records the amount of octave displacement.</desc>
      <datatype>
        <rng:ref name="data.OCTAVE.DIS"/>
      </datatype>
    </attDef>
    <attDef ident="dis.place" usage="opt">
      <desc xml:lang="en">Records the direction of octave displacement.</desc>
      <datatype>
        <rng:ref name="data.STAFFREL.basic"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.oneLineStaff

Attributes that record placement of notes on a single-line staff.

### Module

[MEI.shared](#)

### Attributes

**@ontheline** (*optional*) Determines the placement of notes on a 1-line staff. A value of 'true' places all notes on the line, while a value of 'false' places stems-up notes above the line and stems-down notes below the line. Value conforms to [data.BOOLEAN](#).

att.oneLineStaff → @ontheline

### Available at

**<scoreDef>** Container for score meta-information.

att.oneLineStaff → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.oneLineStaff → <staffDef>

### Declaration

```
<classSpec ident="att.oneLineStaff" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record placement of notes on a single-line
  staff.</desc>
  <attList>
    <attDef ident="ontheline" usage="opt">
      <desc xml:lang="en">Determines the placement of notes on a 1-line staff. A value of '
        <val>true</val>
      ' places all notes on the line, while a value of '
        <val>false</val>
      ' places stems-up notes above the line and stems-down notes below the line.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.optimization

Attributes pertaining to layout optimization.

### Module

MEI.shared

### Attributes

**@optimize** (*optional*) Indicates whether staves without notes, rests, etc. should be displayed. When the value is 'true', empty staves are displayed. Value conforms to [data.BOOLEAN](#).

att.optimization → @optimize

### Available at

**<scoreDef>** Container for score meta-information.

att.optimization → <scoreDef>

### Declaration

```
<classSpec ident="att.optimization" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes pertaining to layout optimization.</desc>
  <attList>
    <attDef ident="optimize" usage="opt">
      <desc xml:lang="en">Indicates whether staves without notes, rests, etc. should be displayed. When the value is 'true', empty staves are displayed.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.origin.layerIdent

Attributes that identify the layer associated with a distant feature.

## Module

[MEI.shared](#)

## Attributes

**@origin.layer** (*optional*) identifies the layer on which referenced notation occurs. One or more of **positiveInteger**.

att.origin.layerIdent → @origin.layer

## Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.origin.layerIdent → <cpMark>

## Declaration

```

<classSpec ident="att.origin.layerIdent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that identify the layer associated with a distant
  feature.</desc>
  <attList>
    <attDef ident="origin.layer" usage="opt">
      <desc xml:lang="en">identifies the layer on which referenced notation occurs.</desc>
      <datatype>
        <rng:list>
          <rng:oneOrMore>
            <rng:data type="positiveInteger"/>
          </rng:oneOrMore>
        </rng:list>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.origin.staffIdent

Attributes for identifying the staff associated with a distant feature.

### Module

MEI.shared

### Attributes

@origin.staff (*recommended*) signifies the staff on which referenced notation occurs. Defaults to the same value as the local staff. Mandatory when applicable. One or more of **positiveInteger**.

att.origin.staffIdent → @origin.staff

### Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.origin.staffIdent → <cpMark>

### Declaration

```
<classSpec ident="att.origin.staffIdent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes for identifying the staff associated with a distant
  feature.</desc>
  <attList>
    <attDef ident="origin.staff" usage="rec">
      <desc xml:lang="en">signifies the staff on which referenced notation occurs. Defaults
      to the same value as the local staff. Mandatory when applicable.</desc>
      <datatype>
        <rng:list>
          <rng:oneOrMore>
            <rng:data type="positiveInteger" />
          </rng:oneOrMore>
        </rng:list>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.origin.startEndId

Attributes recording the identifiers of the first and last elements of a sequence of distant elements.

### Module

[MEI.shared](#)

### Attributes

**@origin.startid** (*optional*) indicates the first element in a sequence of events. Value conforms to [data.URI](#).

att.origin.startEndId → @origin.startid

**@origin.endid** (*optional*) indicates the final element in a sequence of events. Value conforms to [data.URI](#).

att.origin.startEndId → @origin.endid

### Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.origin.startEndId → <cpMark>

### Declaration

```

<classSpec ident="att.origin.startEndId" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes recording the identifiers of the first and last elements of
  a sequence of distant elements.</desc>
  <attList>
    <attDef ident="origin.startid" usage="opt">
      <desc xml:lang="en">indicates the first element in a sequence of events.</desc>
      <datatype>
        <rng:ref name="data.URI"/>
      </datatype>
    </attDef>
    <attDef ident="origin.endid" usage="opt">
      <desc xml:lang="en">indicates the final element in a sequence of events.</desc>
      <datatype>
        <rng:ref name="data.URI"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.origin.timestamp.log

Attributes that identify a musical range in terms of musical time.

### Module

MEI.shared

### Attributes

**@origin.timestamp** (*optional*) encodes the starting point of musical material in terms of musical time, i.e., a (potentially negative) count of measures plus a beat location. Value conforms to [data.MEASUREBEATOFFSET](#).

att.origin.timestamp.log → @origin.timestamp

**@origin.timestamp2** (*recommended*) encodes the ending point of musical material in terms of musical time, i.e., a count of measures plus a beat location. The values are relative to the measure identified by origin.timestamp. Value conforms to [data.MEASUREBEAT](#).

att.origin.timestamp.log → @origin.timestamp2

### Available at

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.origin.timestamp.log → <cpMark>

### Constraints

When @origin.timestamp2 is used @origin.timestamp must also be present.

### Declaration

```
<classSpec ident="att.origin.timestamp.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that identify a musical range in terms of musical
  time.</desc>
  <attList>
    <attDef ident="origin.timestamp" usage="opt">
      <desc xml:lang="en">encodes the starting point of musical material in terms of musical
      time,

</classSpec>
```

# att.oriscus.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.oriscus.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.oriscus.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.oriscus.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.oriscus.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.oriscus.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.oriscus.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.oriscus.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.oriscus.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.oriscus.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.oriscus.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.oriscus.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.oriscus.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.oriscus.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.oriscus.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.oriscus.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.oriscus.vis → @loc

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.oriscus.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.oriscus.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.oriscus.vis → @y

## Available at

[\*\*<oriscus>\*\*](#) Oriscus.

att.oriscus.vis → <oriscus>

## Declaration

```

## att.ornam.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.ornam.anl → <ornam>

#### Declaration

```
<classSpec ident="att.ornam.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.ornam.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.ornam.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.ornam.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.ornam.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.ornam.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.ornam.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum [\\*\\*recip value](#). Value is a [token](#).

att.ornam.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.ornam.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.ornam.ges → @tstamp2.real

### Available at

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.ornam.ges → <ornam>

### Declaration

```
<classSpec ident="att.ornam.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

# att.ornam.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@accidlower** (*optional*) Records the written accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.ornam.log → @accidlower

**@accidlower.ges** (*optional*) Records the sounding accidental associated with a lower neighboring note.

Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.ornam.log → @accidlower.ges

**@accidupper** (*optional*) Records the written accidental associated with an upper neighboring note.

Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.ornam.log → @accidupper

**@accidupper.ges** (*optional*) Records the sounding accidental associated with an upper neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.ornam.log → @accidupper.ges

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.ornam.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.ornam.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.ornam.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.ornam.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\n\d][\c]+)"**, separated by spaces.

att.ornam.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+?)"**, separated by spaces.

att.ornam.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.ornam.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.ornam.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.ornam.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.ornam.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.ornam.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.ornam.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.ornam.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.ornam.log → @when

## Available at

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.ornam.log → <ornam>

## Declaration

```
<classSpec ident="att.ornam.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>

DEVELOPMENT  
VERSION

## att.ornam.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.ornam.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.ornam.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.ornam.vis → @enclose

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.ornam.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.ornam.vis → @endto

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.ornam.vis → @ho

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.ornam.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.ornam.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.ornam.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.ornam.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.ornam.vis → @vo

**@x (optional)** Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.ornam.vis → @x

**@y (optional)** Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.ornam.vis → @y

## Available at

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.ornam.vis → <ornam>

## Declaration

```
<classSpec ident="att.ornam.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.enclosingChars"/>
    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.visualOffset2.ho"/>
    <memberOf key="att.visualOffset2.to"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.ornamPresent

Attributes for marking the presence of an ornament.

### Module

[MEI.cmnOrnaments](#)

### Attributes

**@ornam** (*optional*) Indicates that this element has an attached ornament. If visual information about the ornament is needed, then one of the elements that represents an ornament (mordent, trill, or turn) should be employed. One or more values from [data.ORNAM.cmn](#), separated by spaces.

att.ornamPresent → @ornam

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.ornamPresent → <chord>

**<note>** A single pitched event.

att.ornamPresent → <note>

### Declaration

```
<classSpec ident="att.ornamPresent" module="MEI.cmnOrnaments" type="atts">
  <desc xml:lang="en">Attributes for marking the presence of an ornament.</desc>
  <attList>
    <attDef ident="ornam" usage="opt">
      <gloss versionDate="2022-10-30" xml:lang="en">ornament</gloss>

        information about the ornament is needed, then one of the elements that represents an
        ornament (mordent, trill, or turn) should be employed.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.ORNAM.cmn"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.ornamentAccid

Accidentals associated with ornaments.

### Referenced in chapters

[4.4.2 Mordents](#), [4.4.3 Trills](#), [4.4.4 Turns](#)

### Module

[MEI.cmnOrnaments](#)

### Attributes

**@accidlower** (*optional*) Records the written accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.ornamentAccid → @accidlower

**@accidlower.ges** (*optional*) Records the sounding accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.ornamentAccid → @accidlower.ges

**@accidupper** (*optional*) Records the written accidental associated with an upper neighboring note.

Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.ornamentAccid → @accidupper

**@accidupper.ges** (*optional*) Records the sounding accidental associated with an upper neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.ornamentAccid → @accidupper.ges

### Available at

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.ornamentAccid → <mordent>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.ornamentAccid → <ornam>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.ornamentAccid → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.ornamentAccid → <turn>

### Declaration

```
<classSpec ident="att.ornamentAccid" module="MEI.cmnOrnaments" type="atts">
  <desc xml:lang="en">Accidentals associated with ornaments.</desc>
  <classes>
    <memberOf key="att.ornamentAccid.ges"/>

```

## att.partIdent

Attributes for identifying the part in which the current feature appears.

### Module

MEI.shared

### Attributes

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.partIdent → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.partIdent → @partstaff

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.partIdent → <accid>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.partIdent → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.partIdent → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.partIdent → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.partIdent → <attacca>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.partIdent → <beamSpan>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.partIdent → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.partIdent → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.partIdent → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.partIdent → <caesura>

**<cc>** MIDI parameter/control change.

att.partIdent → <cc>

**<chan>** MIDI channel assignment.

att.partIdent → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.partIdent → <chanPr>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.partIdent → <cpMark>

**<cue>** MIDI cue point.

att.partIdent → <cue>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.partIdent → <dir>

**<dot>** Dot of augmentation or division.

att.partIdent → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.partIdent → <dynam>

**<episema>** Episema.

att.partIdent → <episema>

**<f>** Single element of a figured bass indication.

att.partIdent → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.partIdent → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.partIdent → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.partIdent → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.partIdent → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.partIdent → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.partIdent → <harm>

**<harpPedal>** Harp pedal diagram.

att.partIdent → <harpPedal>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.partIdent → <hex>

**<hispanTick>** Hispanic tick.

att.partIdent → <hispanTick>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.partIdent → <lg>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.partIdent → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.partIdent → <lv>

**<marker>** MIDI marker meta-event.

att.partIdent → <marker>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.partIdent → <metaMark>

**<metaText>** MIDI text meta-event.

att.partIdent → <metaText>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.partIdent → <midi>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.partIdent → <mordent>

**<noteOff>** MIDI note-off event.

att.partIdent → <noteOff>

**<noteOn>** MIDI note-on event.

att.partIdent → <noteOn>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.partIdent → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.partIdent → <ornam>

**<pedal>** Piano pedal mark.

att.partIdent → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.partIdent → <phrase>

**<port>** MIDI port.

att.partIdent → <port>

**<prog>** MIDI program change.

att.partIdent → <prog>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.partIdent → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.partIdent → <repeatMark>

**<seqNum>** MIDI sequence number.

att.partIdent → <seqNum>

**<signifLet>** Significantive letter(s).

att.partIdent → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.partIdent → <slur>

**<sp>** Contains an individual speech in a performance text.

att.partIdent → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.partIdent → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.partIdent → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.partIdent → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.partIdent → <trill>

**<trkName>** MIDI track/sequence name.

att.partIdent → <trkName>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.partIdent → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.partIdent → <turn>

**<vel>** MIDI Note-on/off velocity.

att.partIdent → <vel>

## Constraints

'%all' cannot be mixed with other values.

'%all' cannot be mixed with other values.

</classSpec>
```

## att.pedal.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.pedal.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.pedal.ges → @tstamp2.real

### Available at

**<pedal>** Piano pedal mark.

att.pedal.ges → <pedal>

### Declaration

```
<classSpec ident="att.pedal.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

# att.pedal.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@dir** (*required*) Records the position of the piano damper pedal. Allowed values are: "down" (*Depress the pedal.*), "up" (*Release the pedal.*), "half" (*Half pedal.*), "bounce" (*Release then immediately depress the pedal.*)  
att.pedal.log → @dir

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.pedal.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "all" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "one" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "none" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
att.pedal.log → @evaluate

**@func** (*optional*) Indicates the function of the depressed pedal, but not necessarily the text associated with its use. Use the [<dir>](#) element for such text. Allowed values are: "sustain" (*The sustain pedal, also referred to as the "damper" pedal, allows the piano strings to vibrate sympathetically with the struck strings. It is the right-most and the most frequently used pedal on modern pianos.*), "soft" (*The soft pedal, sometimes called the "una corda", "piano", or "half-blow" pedal, reduces the volume and modifies the timbre of the piano. On the modern piano, it is the left-most pedal.*), "sostenuto" (*The sostenuto or tone-sustaining pedal allows notes already undamped to continue to ring while other notes are damped normally; that is, on their release by the fingers. This is usually the center pedal of the modern piano.*), "silent" (*The silent or practice pedal mutes the volume of the piano so that one may practice quietly. It is sometimes a replacement for the sostenuto pedal, especially on an upright or vertical instrument.*)

att.pedal.log → @func

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.pedal.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.pedal.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.pedal.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.pedal.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.pedal.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.pedal.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.pedal.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.pedal.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.pedal.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.pedal.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.pedal.log → @when

## Available at

**<pedal>** Piano pedal mark.

att.pedal.log → <pedal>

DEVELOPMENT  
VERSION

## att.pedal.vis

Visual domain attributes. The place attribute captures the placement of the pedal marking with respect to the staff with which it is associated. Modern publishing standards require the place to be below; however, for transcriptions of manuscript works, this attribute class allows the full range of values.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.pedal.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.pedal.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.pedal.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.pedal.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.pedal.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.pedal.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.pedal.vis → @fontweight

**@form** (*optional*) Determines whether piano pedal marks should be rendered as lines or as terms. Value conforms to [data.PEDALSTYLE](#).

att.pedal.vis → @form

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.pedal.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.pedal.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.pedal.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.pedal.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.pedal.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).  
att.pedal.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.pedal.vis → @lendsym.size

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.pedal.vis → @letterspacing

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).  
att.pedal.vis → @lform

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.pedal.vis → @lineheight

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.pedal.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).  
att.pedal.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.pedal.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).  
att.pedal.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.pedal.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.pedal.vis → @to

**@vgrp** (*optional*) Provides a label for members of a vertically aligned group. Value is a positive integer.  
att.pedal.vis → @vgrp

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.pedal.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the *facs* attribute. Value is a decimal number.

att.pedal.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the *facs* attribute. Value is a decimal number.

att.pedal.vis → @y

## Available at

**<pedal>** Piano pedal mark.

att.pedal.vis → <pedal>

## Declaration

```

<classSpec ident="att.pedal.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes. The place attribute captures the placement
  of the pedal marking with respect to the staff with which it is associated. Modern
  publishing standards require the place to be
    <val>below</val>
  ; however, for transcriptions of manuscript works, this attribute class allows the full
  range of values.</desc>

## att.perfRes

Attributes that define the characteristics and components of the performance resource.

### Module

MEI.header

### Attributes

**@adlib** (*optional*) Marks a performance resource as ad libitum (optional). Value conforms to [data.BOOLEAN](#).

att.perfRes → @adlib

**@count** (*optional*) Indicates the number of performers. Value is a positive integer.

att.perfRes → @count

**@solo** (*optional*) Use this attribute to identify the performance resource as a soloist especially in an accompanied work, such as a concerto or vocal solo. Value conforms to [data.BOOLEAN](#).

att.perfRes → @solo

**@trans.diat** (*optional*) Records the amount of diatonic pitch shift, e.g., C to C♯ = 0, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.perfRes → @trans.diat

**@trans.semi** (*optional*) Records the amount of pitch shift in semitones, e.g., C to C♯ = 1, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.perfRes → @trans.semi

### Available at

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.perfRes → <perfRes>

### Declaration

```
<classSpec ident="att.perfRes" module="MEI.header" type="atts">
  <desc xml:lang="en">Attributes that define the characteristics and components of the
  performance resource.</desc>
  <classes>

</attList>  
</classSpec>
```

DEVELOPMENT  
VERSION

## att.perfRes.basic

Attributes that define the characteristics and components of the performance resource or a performance resource list.

### Module

[MEI.header](#)

### Attributes

**@adlib** (*optional*) Marks a performance resource as ad libitum (optional). Value conforms to [data.BOOLEAN](#).

att.perfRes.basic → @adlib

**@count** (*optional*) Indicates the number of performers. Value is a positive integer.

att.perfRes.basic → @count

### Available at

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.perfRes.basic → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.perfRes.basic → <perfResList>

### Declaration

```
<classSpec ident="att.perfRes.basic" module="MEI.header" type="atts">
  <desc xml:lang="en">Attributes that define the characteristics and components of the
  performance resource or a performance resource list.</desc>
  <classes>

  </classes>
  <attList>
    <attDef ident="count" usage="opt">
      <desc xml:lang="en">Indicates the number of performers.</desc>
      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.phrase.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

**@join** (*optional*) Used for linking visually separate entities that form a single logical entity, for example, multiple slurs broken across a system break that form a single musical phrase. Also used to indicate a measure which metrically completes the current one. Record the identifiers of the separately encoded components, excluding the one carrying the attribute. One or more values from [data.URI](#), separated by spaces.

att.phrase.anl → @join

## Available at

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.phrase.anl → <phrase>

## Declaration

```
<classSpec ident="att.phrase.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.joined"/>
  </classes>
</classSpec>
```

## att.phrase.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.phrase.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration. Value conforms to [data.DURATION.GESTURAL](#).

att.phrase.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.phrase.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.phrase.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.phrase.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum [\\*\\*recip value](#). Value is a [token](#).

att.phrase.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.phrase.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.phrase.ges → @tstamp2.real

### Available at

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.phrase.ges → <phrase>

### Declaration

```
<classSpec ident="att.phrase.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

# att.phrase.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.phrase.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.phrase.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.phrase.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.phrase.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.phrase.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.phrase.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.phrase.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.phrase.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.phrase.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.phrase.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.phrase.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.phrase.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.phrase.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.phrase.log → @when

## Available at

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.phrase.log → <phrase>

## Declaration

```
<classSpec ident="att.phrase.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

# att.phrase.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.phrase.vis → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.phrase.vis → @bulge

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.phrase.vis → @color

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (*Upward curve.*), "**below**" (*Downward curve.*), "**mixed**" (*A "meandering" curve, both above and below the items it pertains to.*)

att.phrase.vis → @curvedir

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.phrase.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.phrase.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.phrase.vis → @endvo

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.phrase.vis → @ho

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.phrase.vis → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.phrase.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.phrase.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.phrase.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.phrase.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.phrase.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.phrase.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.phrase.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.phrase.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.phrase.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.phrase.vis → @y2

## Available at

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.phrase.vis → <phrase>

## Declaration

```
<classSpec ident="att.phrase.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.color"/>

    <memberOf key="att.xy"/>
    <memberOf key="att.xy2"/>
```

```
<memberOf key="att.phrase.vis.cmn"/>
</classes>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.phrase.vis.cmn

Visual domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.phrase.vis.cmn → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.phrase.vis.cmn → @bulge

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (*Upward curve*), "**below**" (*Downward curve*), "**mixed**" (*A "meandering" curve, both above and below the items it pertains to*.)

att.phrase.vis.cmn → @curvedir

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.phrase.vis.cmn → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.phrase.vis.cmn → @lwidth

### Available at

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.phrase.vis.cmn → <phrase>

### Declaration

```
<classSpec ident="att.phrase.vis.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.curvature"/>
    <memberOf key="att.curveRend"/>
  </classes>
</classSpec>
```

## att.pianoPedals

Used by scoreDef and staffDef to provide default description of piano pedal rendition.

### Module

MEI.cmn

### Attributes

**@pedal.style** (*optional*) Determines whether piano pedal marks should be rendered as lines or as terms. Value conforms to [data.PEDALSTYLE](#).

att.pianoPedals → @pedal.style

### Available at

**<scoreDef>** Container for score meta-information.

att.pianoPedals → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.pianoPedals → <staffDef>

### Declaration

```
<classSpec ident="att.pianoPedals" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Used by scoreDef and staffDef to provide default description of piano
  pedal rendition.</desc>
  <attList>
    <attDef ident="pedal.style" usage="opt">
      <desc xml:lang="en">Determines whether piano pedal marks should be rendered as lines
      or as terms.</desc>
      <datatype>
        <rng:ref name="data.PEDALSTYLE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.pitch

Attributes that record written pitch name.

### Referenced in chapters

[6.4.3 Custos attributes](#)

### Module

[MEI.shared](#)

### Attributes

**@pname** (*optional*) Contains a written pitch name. Value conforms to [data.PITCHNAME](#).

att.pitch → @pname

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.pitch → <ambNote>

**<chordMember>** An individual pitch in a chord defined by a [<chordDef>](#) element.

att.pitch → <chordMember>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.pitch → <custos>

**<key>** Key captures information about tonal center and mode.

att.pitch → <key>

**<keyAccid>** Accidental in a key signature.

att.pitch → <keyAccid>

**<keySig>** Written key signature.

att.pitch → <keySig>

**<note>** A single pitched event.

att.pitch → <note>

### Declaration

```
<classSpec ident="att.pitch" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record written pitch name.</desc>
  <attList>
    <attDef ident="pname" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">pitch name</gloss>
      <desc xml:lang="en">Contains a written pitch name.</desc>
      <datatype>
        <rng:ref name="data.PITCHNAME"/>
      </datatype>
    </attDef>
  </attList>
```

</classSpec>

DEVELOPMENT  
VERSION

## att.pitchClass

Attributes that describe pitch class.

### Referenced in chapters

[10.1.2 Event-Specific Analytical Information](#)

### Module

[MEI.analytical](#)

### Attributes

**@pclass** (*optional*) Holds pitch class information. Value conforms to [data.PITCHCLASS](#).

att.pitchClass → @pclass

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.pitchClass → <nc>

**<note>** A single pitched event.

att.pitchClass → <note>

### Declaration

```
<classSpec ident="att.pitchClass" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Attributes that describe pitch class.</desc>
  <attList>
    <attDef ident="pclass" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">pitch class</gloss>
      <desc xml:lang="en">Holds pitch class information.</desc>
      <datatype>
        <rng:ref name="data.PITCHCLASS"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.pitched

Attributes that record written pitch name and octave number.

### Module

[MEI.shared](#)

### Attributes

**@oct** (*optional*) Captures written octave information. Value conforms to [data.OCTAVE](#).

att.pitched → @oct

**@pname** (*optional*) Contains a written pitch name. Value conforms to [data.PITCHNAME](#).

att.pitched → @pname

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.pitched → <ambNote>

**<chordMember>** An individual pitch in a chord defined by a [<chordDef>](#) element.

att.pitched → <chordMember>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.pitched → <custos>

**<keyAccid>** Accidental in a key signature.

att.pitched → <keyAccid>

**<note>** A single pitched event.

att.pitched → <note>

### Declaration

```
<classSpec ident="att.pitched" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record written pitch name and octave number.</desc>
  <classes>
    <memberOf key="att.pitch"/>
    <memberOf key="att.octave"/>
  </classes>
</classSpec>
```

## att.placementOnStaff

Attributes capturing placement on a staff.

### Module

MEI.shared

### Attributes

**@onstaff** (*optional*) Indicates the placement of the item within the staff. A value of 'true' means on the staff, and 'false' off the staff. Value conforms to [data.BOOLEAN](#).

att.placementOnStaff → @onstaff

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.placementOnStaff → <accid>

**<artic>** An indication of how to play a note or chord.

att.placementOnStaff → <artic>

### Declaration

```
<classSpec ident="att.placementOnStaff" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes capturing placement on a staff.</desc>
  <attList>
    <attDef ident="onstaff" usage="opt">
      <desc xml:lang="en">Indicates the placement of the item within the staff. A value of 'true' means on the staff, and 'false' off the staff.</desc>
      <val>true</val>
      <val>false</val>
    </attDef>
  </attList>
</classSpec>
```

## att.placementRelEvent

Attributes capturing placement information with respect to an event.

### Module

MEI.shared

### Attributes

**@place** (*optional*) Captures the placement of the item with respect to the event with which it is associated. Value conforms to data.STAFFREL.

att.placementRelEvent → @place

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.placementRelEvent → <accid>

**<artic>** An indication of how to play a note or chord.

att.placementRelEvent → <artic>

### Declaration

```
<classSpec ident="att.placementRelEvent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes capturing placement information with respect to an
  event.</desc>
  <attList>
    <attDef ident="place" usage="opt">
      <desc xml:lang="en">Captures the placement of the item with respect to the event with
      which it is associated.</desc>
      <datatype>
        <rng:ref name="data.STAFFREL"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.placementRelStaff

Attributes capturing placement information with respect to the staff.

### Module

MEI.shared

### Attributes

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.placementRelStaff → @place

### Available at

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.placementRelStaff → <attacca>

**<breathe>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.placementRelStaff → <breathe>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.placementRelStaff → <caesura>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.placementRelStaff → <cpMark>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#),

[<dynam>](#) or [<repeatMark>](#).

att.placementRelStaff → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.placementRelStaff → <dynam>

**<f>** Single element of a figured bass indication.

att.placementRelStaff → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.placementRelStaff → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.placementRelStaff → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.placementRelStaff → <fingGrp>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.placementRelStaff → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.placementRelStaff → <harm>

**<harpPedal>** Harp pedal diagram.

att.placementRelStaff → <harpPedal>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.placementRelStaff → <lg>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.placementRelStaff → <line>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.placementRelStaff → <mNum>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.placementRelStaff → <metaMark>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.placementRelStaff → <mordent>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.placementRelStaff → <ornam>

**<pedal>** Piano pedal mark.

att.placementRelStaff → <pedal>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.placementRelStaff → <refrain>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.placementRelStaff → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.placementRelStaff → <repeatMark>

**<sp>** Contains an individual speech in a performance text.

att.placementRelStaff → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.placementRelStaff → <stageDir>

**<syl>** Individual lyric syllable.

att.placementRelStaff → <syl>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.placementRelStaff → <tempo>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.placementRelStaff → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.placementRelStaff → <turn>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.placementRelStaff → <verse>

## Declaration

```
<classSpec ident="att.placementRelStaff" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes capturing placement information with respect to the
  staff.</desc>
  <attList>
    <attDef ident="place" usage="opt">

  <desc xml:lang="en">Gestural domain attributes that describe the properties of a plica in
  the mensural repertoire.</desc>
</classSpec>
```

## att.plica.log

Logical domain attributes that describe the properties of a plica in the mensural repertoire.

### Module

[MEI.mensural](#)

### Attributes

#### Available at

**<plica>** Plica  
att.plica.log → <plica>

#### Declaration

```
<classSpec ident="att.plica.log" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Logical domain attributes that describe the properties of a plica in
  the mensural repertoire.</desc>
</classSpec>
```

## att.plica.vis

Visual domain attributes that describe the properties of a plica stem in the mensural repertoire.

### Referenced in chapters

5.6.3 Plicas

### Module

MEI.visual

### Attributes

**@dir** (*optional*) Describes the direction of a stem. Value conforms to [data.STEMDIRECTION.basic](#).

att.plica.vis → @dir

**@len** (*optional*) Encodes the stem length. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.plica.vis → @len

### Available at

**<plica>** Plica

att.plica.vis → <plica>

### Declaration

```
<classSpec ident="att.plica.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes that describe the properties of a plica stem
  in the mensural repertoire.</desc>

      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.plist

Attributes listing the active participants in a user-defined collection.

## Module

[MEI.shared](#)

## Attributes

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.plist → @plist

## Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.plist → <accid>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.plist → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.plist → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.plist → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.plist → <attacca>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.plist → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.plist → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.plist → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.plist → <bracketSpan>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.plist → <cpMark>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.plist → <dir>

**<dot>** Dot of augmentation or division.

att.plist → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.plist → <dynam>

**<episema>** Episema.

att.plist → <episema>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.plist → <expansion>

**<f>** Single element of a figured bass indication.

att.plist → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.plist → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.plist → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.plist → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.plist → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.plist → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.plist → <harm>

**<harpPedal>** Harp pedal diagram.

att.plist → <harpPedal>

**<hispanTick>** Hispanic tick.

att.plist → <hispanTick>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.plist → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.plist → <lv>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.plist → <metaMark>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.plist → <mordent>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.plist → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.plist → <ornam>

**<pedal>** Piano pedal mark.

att.plist → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.plist → <phrase>

**<relation>** Describes a relationship or linkage amongst entities.

att.plist → <relation>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.plist → <repeatMark>

**<signifLet>** Significantive letter(s).

att.plist → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.plist → <slur>

**<sp>** Contains an individual speech in a performance text.

att.plist → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.plist → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.plist → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.plist → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.plist → <trill>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.plist → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.plist → <turn>

## Constraints

@plist attribute should have content.

Each value in @plist should correspond to the @xml:id attribute of an element.

## Declaration

```
<classSpec ident="att.plist" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes listing the active participants in a user-defined
  collection.</desc>
  <attList>
    <attDef ident="plist" usage="opt">
      <desc xml:lang="en">When the target attribute is present, plist identifies the active
      participants; that is, those entities pointed "from", in a relationship with the
      specified target(s). When the target attribute is not present, it identifies
      participants in a mutual relationship.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.URI"/>
      </datatype>
      <constraintSpec ident="check plistTarget" scheme="schematron">
        <constraint>
          <sch:rule context="@plist">
            <sch:assert role="warning" test="not(normalize-space(.) eq '')">@plist
            attribute should have content.</sch:assert>
            <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
            substring($i,2)=//mei:*/@xml:id">Each value in @plist should correspond to
            the @xml:id attribute of an element.</sch:assert>
          </sch:rule>
        </constraint>
      </constraintSpec>
    </attDef>
  </attList>
</classSpec>
```

# att.pointing

Attributes common to all pointing/linking elements.

## Referenced in chapters

[13.2.2 Specifying Link Elements](#)

## Module

[MEI.shared](#)

## Attributes

**@target** (*optional*) Identifies passive participants in a relationship; that is, the entities pointed "to". One or more values from [data.URI](#), separated by spaces.

att.pointing → @target

**@targettype** (*optional*) Characterization of target resource(s) using any convenient classification scheme or typology. Value is a [NMTOKEN](#).

att.pointing → @targettype

**@xlink:actuate** (*optional*) Defines whether a link occurs automatically or must be requested by the user. Allowed values are: "**onLoad**" (*Load the target resource(s) immediately.*), "**onRequest**" (*Load the target resource(s) upon user request.*), "**none**" (*Do not permit loading of the target resource(s).*), "**other**" (*Behavior other than allowed by the other values of this attribute.*)

att.pointing → @xlink:actuate

**@xlink:role** (*optional*) Characterization of the relationship between resources. The value of the role attribute must be a URI. Value conforms to [data.URI](#).

att.pointing → @xlink:role

**@xlink:show** (*optional*) Defines how a remote resource is rendered. Allowed values are: "**new**" (*Open in a new window.*), "**replace**" (*Load the referenced resource in the same window.*), "**embed**" (*Embed the referenced resource at the point of the link.*), "**none**" (*Do not permit traversal to the referenced resource.*), "**other**" (*Behavior other than permitted by the other values of this attribute.*)

att.pointing → @xlink:show

## Available at

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.pointing → <analytic>

**<avFile>** References an external digital audio or video file.

att.pointing → <avFile>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.pointing → <barLine>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.pointing → <bibl>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.pointing → <biblStruct>

**<contents>** List of the material contained within a resource.

att.pointing → <contents>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.pointing → <ending>

**<extData>** Provides a container element for non-MEI data formats.

att.pointing → <extData>

**<genState>** Describes a distinctive state in the textual development of a work.

att.pointing → <genState>

**<graphic>** Indicates the location of an inline graphic.

att.pointing → <graphic>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.pointing → <incipCode>

**<incipText>** Opening words of a musical composition.

att.pointing → <incipText>

**<item>** Single instance or exemplar of a source/manifestation.

att.pointing → <item>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.pointing → <lem>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.pointing → <manifestation>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.pointing → <measure>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.pointing → <metaMark>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.pointing → <monogr>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.pointing → <pb>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.pointing → <ptr>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.pointing → <rdg>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.pointing → <ref>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.pointing → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.pointing → <relation>

**<section>** Segment of music data.

att.pointing → <section>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.pointing → <source>

**<termList>** Collection of text phrases which describe a resource.

att.pointing → <termList>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.pointing → <work>

## Declaration

DEVELOPMENT  
VERSION

## att.proport.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<proport>** Description of note duration as arithmetic ratio.

att.proport.anl → <proport>

#### Declaration

```
<classSpec ident="att.proport.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.proport.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<proport>** Description of note duration as arithmetic ratio.

att.proport.ges → <proport>

#### Declaration

```
<classSpec ident="att.proport.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.propor.log

Logical domain attributes. These attributes describe augmentation or diminution of the normal value of the notes in mensural notation as a ratio.

### Module

[MEI.mensural](#)

### Attributes

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.propor.log → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.propor.log → @numbase

### Available at

**<proport>** Description of note duration as arithmetic ratio.

att.propor.log → <proport>

### Declaration

```
<classSpec ident="att.propor.log" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Logical domain attributes. These attributes describe augmentation or
  diminution of the normal value of the notes in mensural notation as a ratio.</desc>
  <classes>
    <memberOf key="att.duration.ratio"/>
  </classes>
</classSpec>
```

# att.proport.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.proport.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.proport.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.proport.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.proport.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.proport.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.proport.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.proport.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*).

att.proport.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.proport.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.proport.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.proport.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPGRAPHYSIGNED](#).

att.proport.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.propor.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.propor.vis → @loc

## Available at

**<proport>** Description of note duration as arithmetic ratio.

att.propor.vis → <proport>

## Declaration

```
<classSpec ident="att.propor.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.extSym"/>
    <memberOf key="att.staffLoc"/>
    <memberOf key="att.typography"/>
  </classes>
</classSpec>
```

## att.quantity

Attributes that specify a measurement in numerical terms.

### Module

[MEI.shared](#)

### Attributes

**@atleast** (*optional*) Gives a minimum estimated value for an approximate measurement. Value is a decimal number.

att.quantity → @atleast

**@atmost** (*optional*) Gives a maximum estimated value for an approximate measurement. Value is a decimal number.

att.quantity → @atmost

**@confidence** (*optional*) Specifies the degree of statistical confidence (between zero and one) that a value falls within the range specified by min and max, or the proportion of observed values that fall within that range. Value conforms to [data.CONFIDENCE](#).

att.quantity → @confidence

**@max** (*optional*) Where the measurement summarizes more than one observation or a range of values, supplies the maximum value observed. Value is a decimal number.

att.quantity → @max

**@min** (*optional*) Where the measurement summarizes more than one observation or a range of values, supplies the minimum value observed. Value is a decimal number.

att.quantity → @min

**@quantity** (*optional*) Numeric value capturing a measurement or count. Can only be interpreted in combination with the unit attribute. Value is a decimal number.

att.quantity → @quantity

**@unit** (*optional*) Indicates the unit of measurement. Allowed values are: "byte" (Byte.), "char" (Character.), "cm" (Centimeter.), "deg" (Degree.), "in" (Inch.), "issue" (Serial issue.), "ft" (Foot.), "m" (Meter.), "mm" (Millimeter.), "page" (Page.), "pc" (Pica.), "pt" (Point.), "px" (Pixel.), "rad" (Radian.), "record" (Record.), "vol" (Serial volume.), "vu" (MEI virtual unit.).

att.quantity → @unit

### Available at

**<depth>** Description of a measurement taken through a three-dimensional object.

att.quantity → <depth>

**<dim>** Any single dimensional specification.

att.quantity → <dim>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.quantity → <extent>

**<height>** Description of the vertical size of an object.

att.quantity → <height>

**<width>** Description of the horizontal size of an object.

att.quantity → <width>

## Declaration

```
<classSpec ident="att.quantity" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that specify a measurement in numerical terms.</desc>
  <classes>
    <memberOf key="att.measurement"/>
    <memberOf key="att.ranging"/>
  </classes>
  <attList>
    <attDef ident="quantity" usage="opt">
      <desc xml:lang="en">Numeric value capturing a measurement or count. Can only be
      interpreted in combination with the unit attribute.</desc>
      <datatype>
        <rng:data type="decimal">
          <rng:param name="minInclusive">0</rng:param>
        </rng:data>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.quilisma.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

[\*\*<quilisma>\*\*](#) Quilisma.

att.quilisma.anl → <quilisma>

#### Declaration

```
<classSpec ident="att.quilisma.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.quilisma.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

[\*\*<quilisma>\*\*](#) Quilisma.

att.quilisma.ges → [\*\*<quilisma>\*\*](#)

#### Declaration

```
<classSpec ident="att.quilisma.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.quilisma.log

Logical domain attributes.

### Module

MEI.neumes

### Attributes

#### Available at

**<quilisma>** Quilisma.  
att.quilisma.log → <quilisma>

#### Declaration

```
<classSpec ident="att.quilisma.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
</classSpec>
```

## att.quilisma.vis

Visual domain attributes.

### Referenced in chapters

[6.4.7 Quilisma attribute](#)

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.quilisma.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.quilisma.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.quilisma.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.quilisma.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.quilisma.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.quilisma.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.quilisma.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.quilisma.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.quilisma.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.quilisma.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.quilisma.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).  
 att.quilisma.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.quilisma.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.quilisma.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.quilisma.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.quilisma.vis → @loc

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.quilisma.vis → @visible

**@waves** (*optional*) Number of "crests" of a wavy line. Value is a positive integer.

att.quilisma.vis → @waves

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.quilisma.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.quilisma.vis → @y

## Available at

[\*\*<quilisma>\*\*](#) Quilisma.

att.quilisma.vis → <quilisma>

## Declaration

```
<classSpec ident="att.quilisma.vis" module="MEI.visual" type="atts">
<desc xml:lang="en">Visual domain attributes.</desc>
<classes>
  <memberOf key="att.altSym"/>
  <memberOf key="att.color"/>
  <memberOf key="att.enclosingChars"/>
  <memberOf key="att.extSym"/>
  <memberOf key="att.staffLoc"/>
```

```
<memberOf key="att.typography"/>
<memberOf key="att.visibility"/>
<memberOf key="att.visualOffset.ho"/>
<memberOf key="att.xy"/>
</classes>
<attList>
  <attDef ident="waves" usage="opt">
    <desc xml:lang="en">Number of "crests" of a wavy line.</desc>
    <datatype>
      <rng:data type="positiveInteger">
        <rng:param name="minInclusive">2</rng:param>
        <rng:param name="maxInclusive">4</rng:param>
      </rng:data>
    </datatype>
  </attDef>
</attList>
</classSpec>
```

## att.ranging

Groups attributes that describe a numerical range.

### Module

[MEI.shared](#)

### Attributes

**@atleast** (*optional*) Gives a minimum estimated value for an approximate measurement. Value is a decimal number.

att.ranging → @atleast

**@atmost** (*optional*) Gives a maximum estimated value for an approximate measurement. Value is a decimal number.

att.ranging → @atmost

**@confidence** (*optional*) Specifies the degree of statistical confidence (between zero and one) that a value falls within the range specified by min and max, or the proportion of observed values that fall within that range. Value conforms to [data.CONFIDENCE](#).

att.ranging → @confidence

**@max** (*optional*) Where the measurement summarizes more than one observation or a range of values, supplies the maximum value observed. Value is a decimal number.

att.ranging → @max

**@min** (*optional*) Where the measurement summarizes more than one observation or a range of values, supplies the minimum value observed. Value is a decimal number.

att.ranging → @min

### Available at

**<add>** Marks an addition to the text.

att.ranging → <add>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.ranging → <biblScope>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.ranging → <corr>

**<damage>** Contains an area of damage to the physical medium.

att.ranging → <damage>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.ranging → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.ranging → <depth>

**<dim>** Any single dimensional specification.

att.ranging → <dim>

**<expan>** Contains the expansion of an abbreviation.

att.ranging → <expan>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.ranging → <extent>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.ranging → <gap>

**<height>** Description of the vertical size of an object.

att.ranging → <height>

**<num>** Numeric information in any form.

att.ranging → <num>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.ranging → <orig>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.ranging → <reg>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.ranging → <restore>

**<sic>** Contains apparently incorrect or inaccurate material.

att.ranging → <sic>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.ranging → <supplied>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.ranging → <unclear>

**<width>** Description of the horizontal size of an object.

att.ranging → <width>

## Constraints

The attributes @min and @max are required when @confidence is present.

## Declaration

```

## att.rdg.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.rdg.anl → <lem>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.rdg.anl → <rdg>

### Declaration

```
<classSpec ident="att.rdg.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.rdg.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.rdg.ges → <lem>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.rdg.ges → <rdg>

### Declaration

```
<classSpec ident="att.rdg.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.rdg.log

Logical domain attributes.

### Module

MEI.critapp

### Attributes

#### Available at

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.rdg.log → <lem>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.rdg.log → <rdg>

### Declaration

### Module

MEI.visual

### Attributes

#### Available at

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.rdg.vis → <lem>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.rdg.vis → <rdg>

### Declaration

```
<classSpec ident="att.rdg.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
</classSpec>
```

## att.reasonIdent

Attributes that identify the reason why an editorial feature is used.

### Referenced in chapters

[11.2.4 Additions, Deletions, and Omissions](#)

### Module

[MEI.edittrans](#)

### Attributes

**@reason** (*optional*) Holds a short phrase describing the reason for missing textual material (gap), why material is supplied (supplied), or why transcription is difficult (unclear). Value is plain text.

att.reasonIdent → @reason

### Available at

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.reasonIdent → <gap>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.reasonIdent → <supplied>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.reasonIdent → <unclear>

### Declaration

```
<classSpec ident="att.reasonIdent" module="MEI.edittrans" type="atts">
  <desc xml:lang="en">Attributes that identify the reason why an editorial feature is
  used.</desc>
  <attList>
    <attDef ident="reason" usage="opt">
      <desc xml:lang="en">Holds a short phrase describing the reason for missing textual
      material (gap), why material is supplied (supplied), or why transcription is difficult
      (unclear).</desc>
      <datatype>
        <rng:data type="string"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.recordType

Attributes that define the characteristics and components of the bibliographic description.

### Module

[MEI.header](#)

### Attributes

**@recordtype** Allowed values are: "a" (*Language material.*), "c" (*Notated music.*), "d" (*Manuscript notated music.*), "e" (*Non-manuscript cartographic material.*), "f" (*Manuscript cartographic material.*), "g" (*Projected medium.*), "i" (*Nonmusical sound recording.*), "j" (*Musical sound recording.*), "k" (*Two-dimensional nonprojectable graphic.*), "m" (*Computer file.*), "o" (*Kit.*), "p" (*Mixed materials.*), "r" (*Three-dimensional artifact or naturally occurring object.*), "t" (*Manuscript language material.*)

att.recordType → @recordtype

### Available at

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.recordType → <analytic>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.recordType → <biblStruct>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.recordType → <manifestation>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.recordType → <monogr>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.recordType → <source>

### Remarks

The recordtype attribute may be used to determine the appropriateness and validity of certain data elements in the description.

- a** Use for non-manuscript language material, including microforms and electronic resources that are basically textual in nature, whether they are reproductions from print or originally produced.
- c** Use for printed, microform, or electronic notated music.
- d** Use for manuscript notated music or a microform of manuscript music.
- e** Use for non-manuscript cartographic material or a microform of non-manuscript cartographic material.

- f** Use for manuscript cartographic material or a microform of manuscript cartographic material.
- g** Use for motion pictures, videorecordings (including digital video), filmstrips, slide transparencies or material specifically designed for projection.
- i** Use for recordings of nonmusical sounds (e.g., speech).
- j** Use for musical sound recording (e.g., phonodiscs, compact discs, or cassette tapes).
- k** Use for two-dimensional nonprojectable graphics such as, activity cards, charts, collages, computer graphics, digital pictures, drawings, duplication masters, flash cards, paintings, photo CDs, photomechanical reproductions, photonegatives, photoprints, pictures, postcards, posters, prints, spirit masters, study prints, technical drawings, transparency masters, and reproductions of any of these.
- m** Use for computer software (including programs, games, fonts), numeric data, computer-oriented multimedia, online systems or services. Other classes of electronic resources are coded for their most significant aspect (e.g., language material, graphic, cartographic material, sound, music, moving image). In case of doubt or if the most significant aspect cannot be determined, consider the item a computer file.
- o** Use for a mixture of various components issued as a unit and intended primarily for instructional purposes where no one item is the predominant component of the kit. Examples are packages of assorted materials, such as a set of school social studies curriculum material (books, workbooks, guides, activities, etc.), or packages of educational test materials (tests, answer sheets, scoring guides, score charts, interpretative manuals, etc.).
- p** Use for materials in two or more forms that are usually related by virtue of their having been accumulated by or about a person or body. Includes archival fonds and manuscript collections of mixed forms of materials, such as text, photographs, and sound recordings. Intended primary purpose is other than for instructional purposes (i.e., materials coded as "o").
- r** Includes man-made objects such as models, dioramas, games, puzzles, simulations, sculptures and other three-dimensional art works, exhibits, machines, clothing, toys, and stitchery. Also includes naturally occurring objects such as, microscope specimens (or representations of them) and other specimens mounted for viewing.
- t** This category is applied to items for language material in handwriting, typescript, or computer printout including printed materials completed by hand or by keyboard or a microform of these categories. At the time it is created, this material is usually intended, either implicitly or explicitly, to exist as a single instance. Examples include marked or corrected galley and page proofs, manuscript books, legal papers, and unpublished theses and dissertations.

# att.refrain.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.refrain.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.refrain.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.refrain.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.refrain.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.refrain.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.refrain.vis → @fontweight

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.refrain.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.refrain.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.refrain.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.refrain.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.refrain.vis → @vo

**@voltasym** (*optional*) Specifies the symbol used to group lyrics. Allowed values are: "**brace**" (*Curved symbol, , {}.*), "**bracket**" (*Square symbol, , [, but with curved/angled top and bottom segments.],*), "**bracketsq**" (*Square symbol, , [, with horizontal top and bottom segments.],*), "**line**" (*Line symbol, , |, (wide) line without top and bottom curved/horizontal segments.],*), "**none**" (*Grouping symbol missing.*)

att.refrain.vis → @voltasym

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.refrain.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.refrain.vis → @y

## Available at

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.refrain.vis → <refrain>

## Declaration

# att.regularMethod

Attributes that describe correction and normalization methods.

## Module

[MEI.header](#)

## Attributes

**@method** (*optional*) Indicates the method employed to mark corrections and normalizations. Allowed values are: "silent" (*Corrections and normalizations made silently.*), "tags" (*Corrections and normalizations indicated using elements.*)  
att.regularMethod → @method

## Available at

**<correction>** States how and under what circumstances corrections have been made in the text.

att.regularMethod → <correction>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.regularMethod → <normalization>

## Declaration

    </attDef>
  </attList>
</classSpec>
```

## att.reh.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.reh.anl → <reh>

#### Declaration

```
<classSpec ident="att.reh.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.reh.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.reh.ges → <reh>

#### Declaration

```
<classSpec ident="att.reh.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.reh.log

Logical domain attributes.

### Module

MEI.cmn

### Attributes

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.reh.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.reh.log → @partstaff

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.reh.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.reh.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.reh.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.reh.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.reh.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.reh.log → @when

### Available at

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.reh.log → <reh>

### Declaration

```
<classSpec ident="att.reh.log" module="MEI.cmn" type="atts">
<desc xml:lang="en">Logical domain attributes.</desc>

  <memberOf key="att.timestamp.ges"/>
</classes>
</classSpec>
```

## att.reh.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.reh.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.reh.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.reh.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.reh.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.reh.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.reh.vis → @fontweight

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.reh.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.reh.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.reh.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.reh.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.reh.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.reh.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.reh.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facets attribute. Value is a decimal number.

att.reh.vis → @y

## Available at

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.reh.vis → <reh>

## Declaration

  </classes>
</classSpec>
```

## att.rehearsal

Attributes used by scoreDef and staffDef to provide default information about rehearsal numbers/letters.

### Module

MEI.cmn

### Attributes

**@reh.enclose** (*optional*) Describes the enclosing shape for rehearsal marks. Allowed values are: "**box**" (*Enclosed by box.*), "**circle**" (*Enclosed by circle.*), "**none**" (*No enclosing shape.*)

att.rehearsal → @reh.enclose

### Available at

**<scoreDef>** Container for score meta-information.

att.rehearsal → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.rehearsal → <staffDef>

### Declaration

```
<classSpec ident="att.rehearsal" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes used by scoreDef and staffDef to provide default
  information about rehearsal numbers/letters.</desc>

        </valItem>
      </valList>
    </attDef>
  </attList>
</classSpec>
```

# att.repeatMark.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

### Available at

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.repeatMark.anl → <repeatMark>

### Declaration

```
<classSpec ident="att.repeatMark.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.repeatMark.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.repeatMark.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.repeatMark.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.repeatMark.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.repeatMark.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.repeatMark.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.repeatMark.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.repeatMark.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.repeatMark.ges → @tstamp2.real

### Available at

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.repeatMark.ges → <repeatMark>

### Declaration

```
<classSpec ident="att.repeatMark.ges" module="MEI.gestural" type="atts">

    <memberOf key="att.timestamp2.ges"/>
  </classes>
```

</classSpec>

DEVELOPMENT  
VERSION

## att.repeatMark.log

Logical domain attributes.

### Module

[MEI.shared](#)

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.repeatMark.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.repeatMark.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.repeatMark.log → @evaluate

**@func** (*required*) Indicates the function of the mark, usually implying a corresponding form. Allowed values are: "**coda**" (*Coda (SMuFL E048 or Unicode 1D10C).*), "**segno**" (*Segno (SMuFL E047 or Unicode 1D10B).*), "**dalSegno**" (*Dal segno (SMuFL E045 or Unicode 1D109).*), "**daCapo**" (*Da capo (SMuFL E046 or Unicode 1D10A).*), "**fine**" (*Fine. (text)*)

att.repeatMark.log → @func

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.repeatMark.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\n\d][\c]+)"**, separated by spaces.

att.repeatMark.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.repeatMark.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.repeatMark.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.repeatMark.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.repeatMark.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.repeatMark.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.repeatMark.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.repeatMark.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.repeatMark.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.repeatMark.log → @when

## Available at

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.repeatMark.log → <repeatMark>

## Declaration

```

# att.repeatMark.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.repeatMark.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.repeatMark.vis → @endto

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.repeatMark.vis → @extender

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.repeatMark.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.repeatMark.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.repeatMark.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.repeatMark.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.repeatMark.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.repeatMark.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.repeatMark.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.repeatMark.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.repeatMark.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).  
att.repeatMark.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.repeatMark.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.repeatMark.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.repeatMark.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.repeatMark.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.repeatMark.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.repeatMark.vis → @to

**@vgrp** (*optional*) Provides a label for members of a vertically aligned group. Value is a positive integer.

att.repeatMark.vis → @vgrp

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.repeatMark.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.repeatMark.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.repeatMark.vis → @y

## Available at

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.repeatMark.vis → <repeatMark>

## Declaration

## att.responsibility

Attributes capturing information regarding responsibility for some aspect of the text's creation, transcription, editing, or encoding.

### Referenced in chapters

[2.3.4 Responsibility Attributes](#), [11.2 Editorial Markup](#), [11.2.2 Apparent Errors](#), [13.2.2 Specifying Link Elements](#)

### Module

[MEI.shared](#)

### Attributes

**@resp** (*optional*) Indicates the agent(s) responsible for some aspect of the text's transcription, editing, or encoding. Its value must point to one or more identifiers declared in the document header. One or more values from [data.URI](#), separated by spaces.

att.responsibility → @resp

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.responsibility → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.responsibility → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.responsibility → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.responsibility → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.responsibility → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.responsibility → <actor>

**<add>** Marks an addition to the text.

att.responsibility → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.responsibility → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.responsibility → <addName>

**<addrLine>** Single line of a postal address.

att.responsibility → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.responsibility → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.responsibility → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.responsibility → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.responsibility → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.responsibility → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.responsibility → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.responsibility → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.responsibility → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.responsibility → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.responsibility → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.responsibility → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.responsibility → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.responsibility → <arranger>

**<artic>** An indication of how to play a note or chord.

att.responsibility → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.responsibility → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.responsibility → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.responsibility → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.responsibility → <author>

**<avFile>** References an external digital audio or video file.

att.responsibility → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.responsibility → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.responsibility → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.responsibility → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.responsibility → <barLine>

**<barre>** A barre in a chord tablature grid.

att.responsibility → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.responsibility → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.responsibility → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.responsibility → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.responsibility → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.responsibility → <bibl>

**<biblList>** List of bibliographic references.

att.responsibility → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.responsibility → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.responsibility → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.responsibility → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.responsibility → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.responsibility → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.responsibility → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.responsibility → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.responsibility → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.responsibility → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.responsibility → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.responsibility → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.responsibility → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.responsibility → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.responsibility → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.responsibility → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.responsibility → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.responsibility → <castList>

**<catRel>** Contains the name of a related category.

att.responsibility → <catRel>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.responsibility → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.responsibility → <category>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.responsibility → <cb>

**<cc>** MIDI parameter/control change.

att.responsibility → <cc>

**<chan>** MIDI channel assignment.

att.responsibility → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.responsibility → <chanPr>

**<change>** Individual change within the revision description.

att.responsibility → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.responsibility → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.responsibility → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.responsibility → <chord>

**<chordDef>** Chord tablature definition.

att.responsibility → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a <chordDef> element.

att.responsibility → <chordMember>

**<chordTable>** Chord/tablature look-up table.

att.responsibility → <chordTable>

**<classDecls>** Groups information which describes the nature or topic of an entity.

att.responsibility → <classDecls>

**<classification>** Groups information which describes the nature or topic of an entity.

att.responsibility → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.responsibility → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.responsibility → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.responsibility → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.responsibility → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.responsibility → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.responsibility → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.responsibility → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.responsibility → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.responsibility → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.responsibility → <contentItem>

**<contents>** List of the material contained within a resource.

att.responsibility → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.responsibility → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.responsibility → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.responsibility → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.responsibility → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.responsibility → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.responsibility → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.responsibility → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.responsibility → <creation>

**<cue>** MIDI cue point.

att.responsibility → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.responsibility → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.responsibility → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.responsibility → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.responsibility → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.responsibility → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.responsibility → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.responsibility → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.responsibility → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.responsibility → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.responsibility → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.responsibility → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.responsibility → <desc>

**<dim>** Any single dimensional specification.

att.responsibility → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.responsibility → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.responsibility → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.responsibility → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.responsibility → <district>

**<div>** Major structural division of text, such as a preface, chapter or section.

att.responsibility → <div>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.responsibility → <divLine>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.responsibility → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.responsibility → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.responsibility → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.responsibility → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.responsibility → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.responsibility → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.responsibility → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.responsibility → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.responsibility → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.responsibility → <epigraph>

**<episema>** Episema.

att.responsibility → <episema>

**<event>** Contains a free-text event description.

att.responsibility → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.responsibility → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.responsibility → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.responsibility → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.responsibility → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.responsibility → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.responsibility → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.responsibility → <expressionList>

**<extData>** Provides a container element for non-MEI data formats.

att.responsibility → <extData>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.responsibility → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.responsibility → <extent>

**<f>** Single element of a figured bass indication.

att.responsibility → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.responsibility → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.responsibility → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.responsibility → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.responsibility → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.responsibility → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.responsibility → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.responsibility → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.responsibility → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.responsibility → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.responsibility → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.responsibility → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.responsibility → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.responsibility → <foliation>

**<folium>** Describes a single leaf of paper.

att.responsibility → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.responsibility → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.responsibility → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.responsibility → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.responsibility → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.responsibility → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.responsibility → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.responsibility → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.responsibility → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.responsibility → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.responsibility → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.responsibility → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.responsibility → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.responsibility → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.responsibility → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.responsibility → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.responsibility → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.responsibility → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.responsibility → <hand>

**<handList>** Container for one or more hand elements.

att.responsibility → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.responsibility → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.responsibility → <harm>

**<harpPedal>** Harp pedal diagram.

att.responsibility → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.responsibility → <head>

**<height>** Description of the vertical size of an object.

att.responsibility → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.responsibility → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.responsibility → <hex>

**<hispanTick>** Hispanic tick.

att.responsibility → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.responsibility → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.responsibility → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.responsibility → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.responsibility → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.responsibility → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.responsibility → <incipCode>

**<incipText>** Opening words of a musical composition.

att.responsibility → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.responsibility → <inscription>

**<instrDef>** MIDI instrument declaration.

att.responsibility → <instrDef>

**<instrGrp>** Collects MIDI instrument definitions.

att.responsibility → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.responsibility → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.responsibility → <item>

**<itemList>** Gathers bibliographic item entities.

att.responsibility → <itemList>

**<key>** Key captures information about tonal center and mode.

att.responsibility → <key>

**<keyAccid>** Accidental in a key signature.

att.responsibility → <keyAccid>

**<keySig>** Written key signature.

att.responsibility → <keySig>

**<l>** Contains a single line of text within a line group.

att.responsibility → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.responsibility → <label>

**<labelAbbr>** A label on the pages following the first.

att.responsibility → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.responsibility → <langUsage>

**<language>** Description of a language used in the document.

att.responsibility → <language>

**<layer>** An independent stream of events on a staff.

att.responsibility → <layer>

**<layerDef>** Container for layer meta-information.

att.responsibility → <layerDef>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.responsibility → <layout>

**<layoutDesc>** Collects layout descriptions.

att.responsibility → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.responsibility → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.responsibility → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.responsibility → <lg>

**<li>** Single item in a <list>.

att.responsibility → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.responsibility → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.responsibility → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.responsibility → <line>

**<liquefiant>** Liquescent.

att.responsibility → <liquefiant>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.responsibility → <list>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.responsibility → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.responsibility → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.responsibility → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.responsibility → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on [<measure>](#) does not adequately capture the appearance or placement of the measure number/label.

att.responsibility → <mNum>

**<mRest>** Complete measure rest in any meter.

att.responsibility → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.responsibility → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.responsibility → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.responsibility → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.responsibility → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.responsibility → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.responsibility → <mapping>

**<marker>** MIDI marker meta-event.

att.responsibility → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.responsibility → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.responsibility → <measure>

**<mei>** Contains a single MEI-conformant document, consisting of an MEI header and a musical text, either in isolation or as part of an meiCorpus element.

att.responsibility → <mei>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more <mei> elements, each with its own complete header.

att.responsibility → <meiCorpus>

**<meiHead>** Supplies the descriptive and declarative metadata prefixed to every MEI-conformant text.

att.responsibility → <meiHead>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.responsibility → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.responsibility → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.responsibility → <metaMark>

**<metaText>** MIDI text meta-event.

att.responsibility → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.responsibility → <meter>

**<meterSig>** Written meter signature.

att.responsibility → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.responsibility → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.responsibility → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.responsibility → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.responsibility → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.responsibility → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.responsibility → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an étude, opera, song cycle, symphony, or anthology of piano solos.

att.responsibility → <music>

**<name>** Proper noun or noun phrase.

att.responsibility → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.responsibility → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.responsibility → <namespace>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.responsibility → <nc>

**<ncGrp>** Collection of one or more neume components.

att.responsibility → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.responsibility → <neume>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.responsibility → <normalization>

**<note>** A single pitched event.

att.responsibility → <note>

**<noteOff>** MIDI note-off event.

att.responsibility → <noteOff>

**<noteOn>** MIDI note-on event.

att.responsibility → <noteOn>

**<notesStmt>** (notes statement)– Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.responsibility → <notesStmt>

**<num>** Numeric information in any form.

att.responsibility → <num>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.responsibility → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.responsibility → <oStaff>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.responsibility → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.responsibility → <orig>

**<oriscus>** Oriscus.

att.responsibility → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.responsibility → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.responsibility → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.responsibility → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.responsibility → <p>

**<pad>** An indication of extra visual space between notational elements.

att.responsibility → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.responsibility → <part>

**<parts>** Provides a container for performers' parts.

att.responsibility → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.responsibility → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.responsibility → <pb>

**<pedal>** Piano pedal mark.

att.responsibility → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.responsibility → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.responsibility → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.responsibility → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.responsibility → <perfResList>

**<performance>** A presentation of one or more musical works.

att.responsibility → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.responsibility → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.responsibility → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.responsibility → <pgDesc>

**<pgFoot>** A running footer.

att.responsibility → <pgFoot>

**<pgHead>** A running header.

att.responsibility → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.responsibility → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.responsibility → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.responsibility → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.responsibility → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.responsibility → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.responsibility → <playingSpeed>

**<plica>** Plica

att.responsibility → <plica>

**<port>** MIDI port.

att.responsibility → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.responsibility → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.responsibility → <postCode>

**<price>** The cost of access to a bibliographic item.

att.responsibility → <price>

**<prog>** MIDI program change.

att.responsibility → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.responsibility → <projectDesc>

**<propName>** Name of a property of the symbol.

att.responsibility → <propName>

**<propValue>** A single property value.

att.responsibility → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.responsibility → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.responsibility → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.responsibility → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.responsibility → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.responsibility → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.responsibility → <publisher>

**<q>** Contains material which is distinguished from the surrounding phrase-level text using quotation marks or a similar method. Use **<quote>** for block-level quotations.

att.responsibility → <q>

**<quilisma>** Quilisma.

att.responsibility → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.responsibility → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.responsibility → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.responsibility → <recipient>

**<recording>** A recorded performance.

att.responsibility → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.responsibility → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.responsibility → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.responsibility → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.responsibility → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.responsibility → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.responsibility → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.responsibility → <relation>

**<relationList>** Gathers relation elements.

att.responsibility → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.responsibility → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.responsibility → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.responsibility → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.responsibility → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.responsibility → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.responsibility → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.responsibility → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.responsibility → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.responsibility → <role>

**<roleDesc>** Describes a character's role in a drama.

att.responsibility → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.responsibility → <roleName>

**<rubric>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.responsibility → <rubric>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.responsibility → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.responsibility → <sb>

**<score>** Full score view of the musical content.

att.responsibility → <score>

**<scoreDef>** Container for score meta-information.

att.responsibility → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.responsibility → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.responsibility → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.responsibility → <scriptNote>

**<seal>** A single seal or similar attachment.

att.responsibility → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.responsibility → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.responsibility → <secFolio>

**<section>** Segment of music data.

att.responsibility → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.responsibility → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.responsibility → <segmentation>

**<seqNum>** MIDI sequence number.

att.responsibility → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.responsibility → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.responsibility → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.responsibility → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.responsibility → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.responsibility → <signatures>

**<signifLet>** Significantive letter(s).

att.responsibility → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.responsibility → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.responsibility → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.responsibility → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.responsibility → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.responsibility → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.responsibility → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.responsibility → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.responsibility → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.responsibility → <sponsor>

**<stack>** An inline table with a single column.

att.responsibility → <stack>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.responsibility → <staff>

**<staffDef>** Container for staff meta-information.

att.responsibility → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.responsibility → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.responsibility → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.responsibility → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.responsibility → <stdVals>

**<stem>** A stem element.

att.responsibility → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.responsibility → <street>

**<strophicus>** Strophicus.

att.responsibility → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.responsibility → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.responsibility → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.responsibility → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.responsibility → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.responsibility → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.responsibility → <surface>

**<syl>** Individual lyric syllable.

att.responsibility → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.responsibility → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.responsibility → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.responsibility → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.responsibility → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.responsibility → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.responsibility → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.responsibility → <sysReq>

**<table>** Contains text displayed in tabular form.

att.responsibility → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.responsibility → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.responsibility → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.responsibility → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.responsibility → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.responsibility → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.responsibility → <term>

**<termList>** Collection of text phrases which describe a resource.

att.responsibility → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.responsibility → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.responsibility → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.responsibility → <tie>

**<title>** Title of a bibliographic entity.

att.responsibility → <title>

**<titlePage>** Contains a transcription of the title page of a text.

att.responsibility → <titlePage>

**<titlePart>** Contains a subsection or division of the title of a bibliographic entity.

att.responsibility → <titlePart>

**<titleStmt>** Container for title and responsibility meta-data.

att.responsibility → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a **<table>**.

att.responsibility → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.responsibility → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.responsibility → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.responsibility → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.responsibility → <trill>

**<trkName>** MIDI track/sequence name.

att.responsibility → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.responsibility → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.responsibility → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.responsibility → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.responsibility → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.responsibility → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.responsibility → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.responsibility → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.responsibility → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.responsibility → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.responsibility → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.responsibility → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.responsibility → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.responsibility → <when>

**<width>** Description of the horizontal size of an object.

att.responsibility → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.responsibility → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.responsibility → <workList>

**<zone>** Defines an area of interest within a <surface> or graphic file.

att.responsibility → <zone>

## Constraints

@resp attribute should have content.

The value in @resp should correspond to the @xml:id attribute of an element within the metadata header.

## Declaration

```

<classSpec ident="att.responsibility" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes capturing information regarding responsibility for some
  aspect of the text's creation, transcription, editing, or encoding.</desc>
  <attList>
    <attDef ident="resp" usage="opt">
      <desc xml:lang="en">Indicates the agent(s) responsible for some aspect of the text's
      transcription, editing, or encoding. Its value must point to one or more identifiers
      declared in the document header.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.URI"/>
      </datatype>
      <constraintSpec ident="check_respTarget" scheme="schematron">
        <constraint>
          <sch:rule context="@resp">
            <sch:assert role="warning" test="not(normalize-space(.) eq '')">@resp
            attribute should have content.</sch:assert>
            <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
            substring($i,2)=//mei:*[ancestor::mei:meiHead]/@xml:id">The value in @resp
            should correspond to the @xml:id attribute of an element within the
            metadata header.</sch:assert>
          </sch:rule>
        </constraint>
      </constraintSpec>
    </attDef>
  </attList>
</classSpec>

```

## att.rest.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.rest.anl → @beam

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.rest.anl → @fermata

**@tuplet** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLET](#), separated by spaces.

att.rest.anl → @tuplet

### Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.anl → <rest>

### Declaration

```
<classSpec ident="att.rest.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.rest.anl.cmn"/>
  </classes>
</classSpec>
```

## att.rest.anl.cmn

Analytical domain attributes in the CMN repertoire.

### Module

[MEI.cmn](#)

### Attributes

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.rest.anl.cmn → @beam

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.rest.anl.cmn → @fermata

**@tuplet** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLE](#), separated by spaces.

att.rest.anl.cmn → @tuplet

### Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.anl.cmn → <rest>

### Declaration

```

<classSpec ident="att.rest.anl.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Analytical domain attributes in the CMN repertoire.</desc>
  <classes>
    <memberOf key="att.beamPresent"/>
    <memberOf key="att.fermataPresent"/>
    <memberOf key="att.tupletPresent"/>
  </classes>
</classSpec>

```

## att.rest.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.rest.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.rest.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.rest.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.rest.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.rest.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.rest.ges → @dur.recip

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.rest.ges → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.rest.ges → @numbase

### Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.ges → <rest>

### Declaration

```
<classSpec ident="att.rest.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.rest.ges.mensural"/>
  </classes>
</classSpec>
```

# att.rest.ges.mensural

Gestural domain attributes.

## Module

[MEI.mensural](#)

## Attributes

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.rest.ges.mensural → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.rest.ges.mensural → @numbase

## Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.ges.mensural → <rest>

## Declaration

```
<classSpec ident="att.rest.ges.mensural" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ratio"/>
  </classes>
</classSpec>
```

## att.rest.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@cue** (*optional*) Value conforms to [data.BOOLEAN](#).

att.rest.log → @cue

**@dots** (*optional*) Records the number of augmentation dots required by a written dotted duration. Value conforms to [data.AUGMENTDOT](#).

att.rest.log → @dots

**@dur** (*optional*) Records the duration of a rest using the relative durational values provided by the data.DURATIONRESTS datatype. Value conforms to [data.DURATIONRESTS](#).

att.rest.log → @dur

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.rest.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.rest.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.rest.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.rest.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.rest.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.rest.log → @when

### Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.log → <rest>

### Declaration

```
<classSpec ident="att.rest.log" module="MEI.shared" type="atts">
<desc xml:lang="en">Logical domain attributes.</desc>
```

```
<classes>
  <memberOf key="att.augmentDots"/>
  <memberOf key="att.cue"/>

VERSION

## att.rest.log.cmn

Logical domain attributes in the CMN repertoire.

### Module

MEI.cmn

### Attributes

#### Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.log.cmn → <rest>

#### Declaration

```
<classSpec ident="att.rest.log.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes in the CMN repertoire.</desc>
</classSpec>
```

# att.rest.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.rest.vis → @altsym

**@breaksec** (*optional*) Presence of this attribute indicates that the secondary beam should be broken following this note/chord. The value of the attribute records the number of beams which should remain unbroken. Value is a positive integer.

att.rest.vis → @breaksec

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.rest.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.rest.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.rest.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.rest.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.rest.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.rest.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.rest.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.rest.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.rest.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.rest.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.rest.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.rest.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.rest.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.rest.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.rest.vis → @loc

**@oloc** (*optional*) Records staff location in terms of written octave. Value conforms to [data.OCTAVE](#).

att.rest.vis → @oloc

**@ploc** (*optional*) Captures staff location in terms of written pitch name. Value conforms to [data.PITCHNAME](#).

att.rest.vis → @ploc

**@spaces** (*optional*) States how many spaces are covered by the rest. Value is a positive integer.

att.rest.vis → @spaces

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.rest.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.rest.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.rest.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.rest.vis → @y

## Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.vis → <rest>

## Declaration

```
<classSpec ident="att.rest.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.enclosingChars"/>

    <memberOf key="att.rest.vis.cmn"/>
    <memberOf key="att.rest.vis.mensural"/>
    <memberOf key="att.staffLoc"/>
    <memberOf key="att.staffLoc.pitched"/>
    <memberOf key="att.typography"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.rest.vis.cmn

Visual domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@breaksec** (*optional*) Presence of this attribute indicates that the secondary beam should be broken following this note/chord. The value of the attribute records the number of beams which should remain unbroken. Value is a positive integer.

att.rest.vis.cmn → @breaksec

### Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.vis.cmn → <rest>

### Declaration

```
<classSpec ident="att.rest.vis.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.beamSecondary"/>
  </classes>
</classSpec>
```

# att.rest.vis.mensural

Visual domain attributes.

## Module

[MEI.mensural](#)

## Attributes

**@spaces** (*optional*) States how many spaces are covered by the rest. Value is a positive integer.

att.rest.vis.mensural → @spaces

## Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.rest.vis.mensural → <rest>

## Declaration

```
<classSpec ident="att.rest.vis.mensural" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <attList>
    <attDef ident="spaces" usage="opt">
      <desc xml:lang="en">States how many spaces are covered by the rest.</desc>
      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.restduration.log

Attributes that express duration of rests in musical terms.

### Module

MEI.shared

### Attributes

**@dur** (*optional*) Records the duration of a rest using the relative durational values provided by the data.DURATIONRESTS datatype. Value conforms to [data.DURATIONRESTS](#).

att.restduration.log → @dur

### Available at

**<rest>** A non-sounding event found in the source being transcribed.

att.restduration.log → <rest>

### Declaration

```
<classSpec ident="att.restduration.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that express duration of rests in musical terms.</desc>
  <attList>
    <attDef ident="dur" usage="opt">
      <desc xml:lang="en">Records the duration of a rest using the relative durational
      values provided by the data.DURATIONRESTS datatype.</desc>
      <datatype>
        <rng:ref name="data.DURATIONRESTS"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.sb.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.sb.anl → <sb>

#### Declaration

```
<classSpec ident="att.sb.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.sb.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.sb.ges → <sb>

#### Declaration

```
<classSpec ident="att.sb.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.sb.log

Logical domain attributes.

## Module

MEI.shared

## Attributes

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a `<when>` element elsewhere in the document. Value conforms to [data.URI](#).

att.sb.log → @when

## Available at

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.sb.log → <sb>

## Declaration

```
<classSpec ident="att.sb.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.alignment"/>
  </classes>
</classSpec>
```

## att.sb.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.sb.vis → @altsym

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.sb.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.sb.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.sb.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.sb.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.sb.vis → @fontweight

**@form** (*optional*) Indicates whether hash marks should be rendered between systems. See Read, p. 436, ex. 26-3. Allowed values are: "**hash**" (*Display hash marks between systems*.)

att.sb.vis → @form

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.sb.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.sb.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.sb.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.sb.vis → @glyph.uri

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPGRAPHYSIGNED](#).

att.sb.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.sb.vis → @lineheight

## Available at

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.sb.vis → <sb>

## Declaration

```
<classSpec ident="att.sb.vis" module="MEI.visual" type="atts">

## att.scalable

Attributes that describe relative size.

### Module

[MEI.shared](#)

### Attributes

**@scale** (*optional*) Scale factor to be applied to the feature to make it the desired display size. Value conforms to [data.PERCENT](#).

att.scalable → @scale

### Available at

**<staffDef>** Container for staff meta-information.

att.scalable → <staffDef>

**<symbol>** A reference to a previously defined symbol.

att.scalable → <symbol>

### Declaration

```
<classSpec ident="att.scalable" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe relative size.</desc>
  <attList>
    <attDef ident="scale" usage="opt">
      <desc xml:lang="en">Scale factor to be applied to the feature to make it the desired
      display size.</desc>
      <datatype>
        <rng:ref name="data.PERCENT"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.score.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<score>** Full score view of the musical content.

att.score.anl → <score>

#### Declaration

```
<classSpec ident="att.score.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.score.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

#### Available at

**<score>** Full score view of the musical content.

att.score.ges → <score>

#### Declaration

```
<classSpec ident="att.score.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.score.log

Logical domain attributes.

### Module

[MEI.shared](#)

### Attributes

#### Available at

**<score>** Full score view of the musical content.

att.score.log → <score>

#### Declaration

```
<classSpec ident="att.score.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
</classSpec>
```

## att.score.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

#### Available at

**<score>** Full score view of the musical content.

att.score.vis → <score>

#### Declaration

```
<classSpec ident="att.score.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
</classSpec>
```

# att.scoreDef.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

**@key.accid** (*optional*) Contains an accidental for the tonic key, if one is required, e.g., if key.pname equals c and key.accid equals s, then a tonic of C# is indicated. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.scoreDef.anl → @key.accid

**@key.mode** (*optional*) Indicates major, minor, or other tonality. Value conforms to [data.MODE](#).

att.scoreDef.anl → @key.mode

**@key.pname** (*optional*) Holds the pitch name of the tonic key, e.g., c for the key of C. Value conforms to [data.PITCHNAME](#).

att.scoreDef.anl → @key.pname

## Available at

**<scoreDef>** Container for score meta-information.

att.scoreDef.anl → <scoreDef>

## Declaration

```
<classSpec ident="att.scoreDef.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.keySigDefault.anl"/>
  </classes>
</classSpec>
```

## att.scoreDef.ges

Gestural domain attributes for scoreDef. The values set in these attributes act as score-wide defaults for attributes that are not set in descendant elements. For example, the grace attribute value here applies to all the grace attribute values in the score (or, more accurately, until the next `<scoreDef>` element) without having to individually set each note's grace attribute value. The midi.\* attributes function as default values when creating sounding output. The tune.\* attributes provide the capability of recording a tuning reference pitch.

### Module

[MEI.gestural](#)

### Attributes

**@midi.bpm** (*optional*) Captures the number of \*quarter notes\* per minute. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. Value conforms to [data.MIDIBPM](#).

att.scoreDef.ges → @midi.bpm

**@midi.channel** (*optional*) Records a MIDI channel value. Value conforms to [data.MIDICHANNEL](#).

att.scoreDef.ges → @midi.channel

**@midi.duty** (*optional*) Specifies the 'on' part of the duty cycle as a percentage of a note's duration. Value conforms to [data.PERCENT.LIMITED](#).

att.scoreDef.ges → @midi.duty

**@midi.mspb** (*optional*) Records the number of microseconds per \*quarter note\*. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. At 120 quarter notes per minute, each quarter note will last 500,000 microseconds. Value conforms to [data.MIDIMSPB](#).

att.scoreDef.ges → @midi.mspb

**@midi.port** (*optional*) Sets the MIDI port value. Value conforms to [data.MIDIVALUE\\_NAME](#).

att.scoreDef.ges → @midi.port

**@midi.track** (*optional*) Sets the MIDI track. Value is a positive integer.

att.scoreDef.ges → @midi.track

**@mm** (*optional*) Used to describe tempo in terms of beats (often the meter signature denominator) per minute, ala M.M. (Maelzel's Metronome). Do not confuse this attribute with midi.bpm or midi.mspb. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. Value conforms to [data.TEMPOVALUE](#).

att.scoreDef.ges → @mm

**@mm.dots** (*optional*) Records the number of augmentation dots required by a dotted metronome unit. Value conforms to [data.AUGMENTDOT](#).

att.scoreDef.ges → @mm.dots

**@mm.unit** (*optional*) Captures the metronomic unit. Value conforms to [data.DURATION](#).

att.scoreDef.ges → @mm.unit

**@ppq** (*optional*) Indicates the number of pulses (sometimes referred to as ticks or divisions) per quarter note. Unlike MIDI, MEI permits different values for a score and individual staves. Value is a positive integer.

att.scoreDef.ges → @ppq

**@tune.Hz** (*optional*) Holds a value for cycles per second, i.e., Hertz, for a tuning reference pitch. Value is a decimal number.

att.scoreDef.ges → @tune.Hz

**@tune.pname** (*optional*) Holds the pitch name of a tuning reference pitch, i.e., the central tone of a tuning system. Value conforms to [data.PITCHNAME](#).

att.scoreDef.ges → @tune.pname

**@tune.temper** (*optional*) Provides an indication of the tuning system, just, for example. Value conforms to [data.TEMPERAMENT](#).

att.scoreDef.ges → @tune.temper

## Available at

**<scoreDef>** Container for score meta-information.

att.scoreDef.ges → <scoreDef>

## Declaration

```
<classSpec ident="att.scoreDef.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes for scoreDef. The values set in these
  attributes act as score-wide defaults for attributes that are not set in descendant

```

## att.scoreDef.log

Logical domain attributes for scoreDef in the CMN repertoire. The values set in these attributes act as score-wide defaults for attributes that are not set in descendant elements.

### Module

[MEI.shared](#)

### Attributes

**@beam.group** (*optional*) Provides an example of how automated beaming (including secondary beams) is to be performed. Value is plain text.

att.scoreDef.log → @beam.group

**@beam.rests** (*optional*) Indicates whether automatically-drawn beams should include rests shorter than a quarter note duration. Value conforms to [data.BOOLEAN](#).

att.scoreDef.log → @beam.rests

**@clef.dis** (*optional*) Records the amount of octave displacement to be applied to the clef. Value conforms to [data.OCTAVE.DIS](#).

att.scoreDef.log → @clef.dis

**@clef.dis.place** (*optional*) Records the direction of octave displacement to be applied to the clef. Value conforms to [data.STAFFREL.basic](#).

att.scoreDef.log → @clef.dis.place

**@clef.line** (*optional*) Contains a default value for the position of the clef. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff. Value conforms to [data.CLEFLINE](#).

att.scoreDef.log → @clef.line

**@clef.shape** (*optional*) Encodes a value for the clef symbol. Value conforms to [data.CLEFSHAPE](#).

att.scoreDef.log → @clef.shape

**@divisio** (*optional*) Describes the divisions of the breve in use in 14th-century Italy. Value conforms to [data.DIVISIO](#).

att.scoreDef.log → @divisio

**@dur.default** (*optional*) Contains a default duration in those situations when the first note, rest, chord, etc. in a measure does not have a duration specified. Value conforms to [data.DURATION](#).

att.scoreDef.log → @dur.default

**@keysig** (*optional*) Written key signature. One or more values from [data.KEYFIFTHS](#), separated by spaces.

att.scoreDef.log → @keysig

**@meter.count** (*optional*) Captures the number of beats in a measure, that is, the top number of the meter signature. It must contain a decimal number or an expression that evaluates to a decimal number, such as 2+3 or 3\*2. Value is plain text.

att.scoreDef.log → @meter.count

**@meter.sym** (*optional*) Indicates the use of a meter symbol instead of a numeric meter signature, that is, 'C' for common time or 'C' with a slash for cut time. Value conforms to [data.METERSIGN](#).

att.scoreDef.log → @meter.sym

**@meter.unit** (*optional*) Contains the number indicating the beat unit, that is, the bottom number of the meter signature. Value is a decimal number.

att.scoreDef.log → @meter.unit

**@modusmaior** (*optional*) Describes the maxima-long relationship. Value conforms to [data.MODUSMAIOR](#).

att.scoreDef.log → @modusmaior

**@modusminor** (*optional*) Describes the long-breve relationship. Value conforms to [data.MODUSMINOR](#).

att.scoreDef.log → @modusminor

**@num.default** (*optional*) Along with numbase.default, describes the default duration as a ratio. num.default is the first value in the ratio. Value is a positive integer.

att.scoreDef.log → @num.default

**@numbase.default** (*optional*) Along with num.default, describes the default duration as a ratio. numbase.default is the second value in the ratio. Value is a positive integer.

att.scoreDef.log → @numbase.default

**@oct.default** (*optional*) Contains a default octave specification for use when the first note, rest, chord, etc. in a measure does not have an octave value specified. Value conforms to [data.OCTAVE](#).

att.scoreDef.log → @oct.default

**@prolatio** (*optional*) Describes the semibreve-minim relationship. Value conforms to [data.PROLATIO](#).

att.scoreDef.log → @prolatio

**@proport.num** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.num is for the first value in the ratio. Value is a positive integer.

att.scoreDef.log → @proport.num

**@proport.numbase** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.numbase is for the second value in the ratio. Value is a positive integer.

att.scoreDef.log → @proport.numbase

**@tempus** (*optional*) Describes the breve-semibreve relationship. Value conforms to [data.TEMPUS](#).

att.scoreDef.log → @tempus

**@trans.diat** (*optional*) Records the amount of diatonic pitch shift, e.g., C to C♯ = 0, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.scoreDef.log → @trans.diat

**@trans.semi** (*optional*) Records the amount of pitch shift in semitones, e.g., C to C♯ = 1, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.scoreDef.log → @trans.semi

## Available at

**<scoreDef>** Container for score meta-information.

att.scoreDef.log → <scoreDef>

## Declaration

```
<classSpec ident="att.scoreDef.log" module="MEI.shared" type="atts">

```

## att.scoreDef.log.mensural

Logical domain attributes for a score in the mensural repertoire. The values set in these attributes act as score-wide defaults for attributes that are not set in descendant elements.

### Module

[MEI.mensural](#)

### Attributes

**@divisio** (*optional*) Describes the divisions of the breve in use in 14th-century Italy. Value conforms to [data.DIVISIO](#).

att.scoreDef.log.mensural → @divisio

**@modusmaior** (*optional*) Describes the maxima-long relationship. Value conforms to [data.MODUSMAIOR](#).

att.scoreDef.log.mensural → @modusmaior

**@modusminor** (*optional*) Describes the long-breve relationship. Value conforms to [data.MODUSMINOR](#).

att.scoreDef.log.mensural → @modusminor

**@prolatio** (*optional*) Describes the semibreve-minim relationship. Value conforms to [data.PROLATIO](#).  
att.scoreDef.log.mensural → @prolatio

**@proport.num** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.num is for the first value in the ratio. Value is a positive integer.

att.scoreDef.log.mensural → @proport.num

**@proport.numbase** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.numbase is for the second value in the ratio. Value is a positive integer.

att.scoreDef.log.mensural → @proport.numbase

**@tempus** (*optional*) Describes the breve-semibreve relationship. Value conforms to [data.TEMPUS](#).

att.scoreDef.log.mensural → @tempus

### Available at

**<scoreDef>** Container for score meta-information.

att.scoreDef.log.mensural → <scoreDef>

### Declaration

```
<classSpec ident="att.scoreDef.log.mensural" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Logical domain attributes for a score in the mensural repertoire. The values set in these attributes act as score-wide defaults for attributes that are not set in descendant elements.</desc>
  <classes>
    <memberOf key="att.mensural.log"/>
  </classes>
</classSpec>
```

## att.scoreDef.vis

Visual domain attributes for scoreDef in the CMN repertoire.

### Module

[MEI.visual](#)

### Attributes

**@aboveorder** Describes vertical order of items printed above a staff, from closest to farthest away from the staff. One or more values from [data.STAFFITEM](#), separated by spaces.

att.scoreDef.vis → @aboveorder

**@bar.len** (*optional*) States the length of bar lines in virtual units. The value must be greater than 0 and is typically equal to 2 times (the number of staff lines - 1); e.g., a value of 8 for a 5-line staff. Value is a decimal number.

att.scoreDef.vis → @bar.len

**@bar.method** (*optional*) Records the method of barring. Value conforms to [data.BARMETHOD](#).

att.scoreDef.vis → @bar.method

**@bar.place** (*optional*) Denotes the staff location of bar lines, if the length is non-standard; that is, not equal to 2 times (the number of staff lines - 1). Value conforms to [data.STAFFLOC](#).

att.scoreDef.vis → @bar.place

**@beam.color** (*optional*) Color of beams, including those associated with tuplets. Value conforms to [data.COLOR](#).

att.scoreDef.vis → @beam.color

**@beam.rend** (*optional*) Encodes whether a beam is "feathered" and in which direction. Allowed values are: "**acc**" (*Beam lines grow farther apart from left to right.*), "**rit**" (*Beam lines grow closer together from left to right.*), "**norm**" (*Beam lines are equally-spaced over the entire length of the beam.*)

att.scoreDef.vis → @beam.rend

**@beam.slope** (*optional*) Captures beam slope. Value is a decimal number.

att.scoreDef.vis → @beam.slope

**@beloworder** Describes vertical order of items printed below a staff, from closest to farthest away from the staff. One or more values from [data.STAFFITEM](#), separated by spaces.

att.scoreDef.vis → @beloworder

**@betweenorder** Describes vertical order of items printed between staves, from top to bottom. One or more values from [data.STAFFITEM](#), separated by spaces.

att.scoreDef.vis → @betweenorder

**@clef.color** (*optional*) Describes the color of the clef. Value conforms to [data.COLOR](#).

att.scoreDef.vis → @clef.color

**@clef.visible** (*optional*) Determines whether the clef is to be displayed. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @clef.visible

**@dir.dist** (*optional*) Records the default distance from the staff for directives. Value conforms to [data.MEASUREMENTSIGNED](#).

att.scoreDef.vis → @dir.dist

**@dynam.dist** (*optional*) Records the default distance from the staff for dynamic marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.scoreDef.vis → @dynam.dist

**@ending.rend** (*optional*) Describes where ending marks should be displayed. Allowed values are: "**top**" (*Ending rendered only above top staff.*), "**barred**" (*Ending rendered above staves that have bar lines drawn across them.*), "**grouped**" (*Endings rendered above staff groups.*)

att.scoreDef.vis → @ending.rend

**@grid.show** (*optional*) Determines whether to display guitar chord grids. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @grid.show

**@harm.dist** (*optional*) Records the default distance from the staff of harmonic indications, such as guitar chord grids or functional labels. Value conforms to [data.MEASUREMENTSIGNED](#).

att.scoreDef.vis → @harm.dist

**@keysig.cancelaccid** (*optional*) Determines where cautionary accidentals should be displayed at a key change. Value conforms to [data.CANCELACCID](#).

att.scoreDef.vis → @keysig.cancelaccid

**@keysig.visible** (*optional*) Determines whether the key signature is to be displayed. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @keysig.visible

**@lyric.align** (*optional*) Describes the alignment of lyric syllables associated with a note or chord. Value conforms to [data.MEASUREMENTSIGNED](#).

att.scoreDef.vis → @lyric.align

**@lyric.fam** (*optional*) Sets the font family default value for lyrics. Value conforms to [data.FONTFAMILY](#).

att.scoreDef.vis → @lyric.fam

**@lyric.name** (*optional*) Sets the font name default value for lyrics. Value conforms to [data.FONTNAME](#).

att.scoreDef.vis → @lyric.name

**@lyric.size** (*optional*) Sets the default font size value for lyrics. Value conforms to [data.FONTSIZE](#).

att.scoreDef.vis → @lyric.size

**@lyric.style** (*optional*) Sets the default font style value for lyrics. Value conforms to [data.FONTSTYLE](#).

att.scoreDef.vis → @lyric.style

**@lyric.weight** (*optional*) Sets the default font weight value for lyrics. Value conforms to [data.FONTWEIGHT](#).

att.scoreDef.vis → @lyric.weight

**@mensur.color** (*optional*) Records the color of the mensuration sign. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.scoreDef.vis → @mensur.color

**@mensur.dot** (*optional*) Determines if a dot is to be added to the base symbol. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @mensur.dot

**@mensur.form** (*optional*) Indicates whether the base symbol is written vertically or horizontally. Allowed values are: "**horizontal**" (*Horizontally oriented.*), "**vertical**" (*Vertically oriented.*)

att.scoreDef.vis → @mensur.form

**@mensur.loc** (*optional*) Holds the staff location of the mensuration sign. Value conforms to [data.STAFFLOC](#).

att.scoreDef.vis → @mensur.loc

**@mensur.orient** (*optional*) Describes the rotation or reflection of the base symbol. Value conforms to [data.ORIENTATION](#).

att.scoreDef.vis → @mensur.orient

**@mensur.sign** (*optional*) The base symbol in the mensuration sign/time signature of mensural notation. Value conforms to [data.MENSURATIONSIGN](#).

att.scoreDef.vis → @mensur.sign

**@mensur.size** (*optional*) Describes the relative size of the mensuration sign. Value conforms to [data.FONTSIZE](#).

att.scoreDef.vis → @mensur.size

**@mensur.slash** (*optional*) Indicates the number lines added to the mensuration sign. For example, one slash is added for what we now call 'alla breve'. Value is a positive integer.

att.scoreDef.vis → @mensur.slash

**@meter.form** (*optional*) Contains an indication of how the meter signature should be rendered. Value conforms to [data.METERFORM](#).

att.scoreDef.vis → @meter.form

**@meter.showchange** (*optional*) Determines whether the old meter signature should be displayed when the meter signature changes. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @meter.showchange

**@meter.visible** (*optional*) Determines whether the meter signature is to be displayed. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @meter.visible

**@mnum.visible** (*optional*) Indicates whether measure numbers should be displayed. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @mnum.visible

**@multi.number** (*optional*) Indicates whether programmatically calculated counts of multiple measures of rest (mRest) and whole measure repeats (mRpt) in parts should be rendered. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @multi.number

**@music.name** (*optional*) Sets the default music font name. Value conforms to [data.MUSICFONT](#).

att.scoreDef.vis → @music.name

**@music.size** (*optional*) Sets the default music font size. Value conforms to [data.FONTSIZE](#).

att.scoreDef.vis → @music.size

**@ontheline** (*optional*) Determines the placement of notes on a 1-line staff. A value of 'true' places all notes on the line, while a value of 'false' places stems-up notes above the line and stems-down notes below the line. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @ontheline

**@optimize** (*optional*) Indicates whether staves without notes, rests, etc. should be displayed. When the value is 'true', empty staves are displayed. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @optimize

**@page.botmar** (*optional*) Indicates the amount of whitespace at the bottom of a page. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @page.botmar

**@page.height** (*optional*) Specifies the height of the page; may be expressed in real-world units or staff steps. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @page.height

**@page.leftmar** (*optional*) Indicates the amount of whitespace at the left side of a page. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @page.leftmar

**@page.panels** (*optional*) Indicates the number of logical pages to be rendered on a single physical page. Value conforms to [data.PAGE.PANELS](#).

att.scoreDef.vis → @page.panels

**@page.rightmar** (*optional*) Indicates the amount of whitespace at the right side of a page. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @page.rightmar

**@page.scale** (*optional*) Indicates how the page should be scaled when rendered. Value conforms to [data.PGSCALE](#).

att.scoreDef.vis → @page.scale

**@page.topmar** (*optional*) Indicates the amount of whitespace at the top of a page. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @page.topmar

**@page.width** (*optional*) Describes the width of the page; may be expressed in real-world units or staff steps. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @page.width

**@pedal.style** (*optional*) Determines whether piano pedal marks should be rendered as lines or as terms. Value conforms to [data.PEDALSTYLE](#).

att.scoreDef.vis → @pedal.style

**@reh.dist** (*optional*) Records the default distance from the staff for rehearsal marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.scoreDef.vis → @reh.dist

**@reh.enclose** (*optional*) Describes the enclosing shape for rehearsal marks. Allowed values are: "**box**" (*Enclosed by box.*), "**circle**" (*Enclosed by circle.*), "**none**" (*No enclosing shape.*)

att.scoreDef.vis → @reh.enclose

**@slur.lform** Value conforms to [data.LINEFORM](#).

att.scoreDef.vis → @slur.lform

**@slur.lwidth** Value conforms to [data.LINEWIDTH](#).

att.scoreDef.vis → @slur.lwidth

**@spacing.packexp** (*optional*) Describes a note's spacing relative to its time value. Value is a decimal number.

att.scoreDef.vis → @spacing.packexp

**@spacing.packfact** (*optional*) Describes the note spacing of output. Value is a decimal number.

att.scoreDef.vis → @spacing.packfact

**@spacing.staff** (*optional*) Specifies the minimum amount of space between adjacent staves in the same system; measured from the bottom line of the staff above to the top line of the staff below. Value conforms to [data.MEASUREMENTSIGNED](#).

att.scoreDef.vis → @spacing.staff

**@spacing.system** (*optional*) Describes the space between adjacent systems; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values from [data.MEASUREMENTSIGNED](#), separated by a space.

att.scoreDef.vis → @spacing.system

**@system.leftline** (*optional*) Indicates whether the system starts with a continuous line connecting all staves, including single-staff systems. Do not confuse this with the heavy vertical line used as a grouping symbol. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis → @system.leftline

**@system.leftmar** (*optional*) Describes the amount of whitespace at the left system margin relative to page.leftmar. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @system.leftmar

**@system.rightmar** (*optional*) Describes the amount of whitespace at the right system margin relative to page.rightmar. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @system.rightmar

**@system.topmar** (*optional*) Describes the distance from page's top edge to the first system; used for first page only. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.scoreDef.vis → @system.topmar

**@tempo.dist** (*optional*) Records the default distance from the staff for tempo marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.scoreDef.vis → @tempo.dist

**@text.fam** (*optional*) Provides a default value for the font family name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTFAMILY](#).

att.scoreDef.vis → @text.fam

**@text.name** (*optional*) Provides a default value for the font name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTNAME](#).

att.scoreDef.vis → @text.name

**@text.size** (*optional*) Provides a default value for the font size of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSIZE](#).

att.scoreDef.vis → @text.size

**@text.style** (*optional*) Provides a default value for the font style of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSTYLE](#).

att.scoreDef.vis → @text.style

**@text.weight** (*optional*) Provides a default value for the font weight for text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTWEIGHT](#).

att.scoreDef.vis → @text.weight

**@tie.lform** Value conforms to [data.LINEFORM](#).

att.scoreDef.vis → @tie.lform

**@tie.lwidth** Value conforms to [data.LINEWIDTH](#).

att.scoreDef.vis → @tie.lwidth

**@vu.height** (*optional*) Defines the height of a "virtual unit" (vu) in terms of real-world units. A single vu is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. Value is a [token](#).

att.scoreDef.vis → @vu.height

## Available at

**<scoreDef>** Container for score meta-information.

att.scoreDef.vis → <scoreDef>

## Declaration

## att.scoreDef.vis.cmn

Visual domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@beam.color** (*optional*) Color of beams, including those associated with tuples. Value conforms to [data.COLOR](#).

att.scoreDef.vis.cmn → @beam.color

**@beam.rend** (*optional*) Encodes whether a beam is "feathered" and in which direction. Allowed values are: "**acc**" (*Beam lines grow farther apart from left to right.*), "**rit**" (*Beam lines grow closer together from left to right.*), "**norm**" (*Beam lines are equally-spaced over the entire length of the beam.*)

att.scoreDef.vis.cmn → @beam.rend

**@beam.slope** (*optional*) Captures beam slope. Value is a decimal number.

att.scoreDef.vis.cmn → @beam.slope

**@grid.show** (*optional*) Determines whether to display guitar chord grids. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis.cmn → @grid.show

**@pedal.style** (*optional*) Determines whether piano pedal marks should be rendered as lines or as terms. Value conforms to [data.PEDALSTYLE](#).

att.scoreDef.vis.cmn → @pedal.style

**@reh.enclose** (*optional*) Describes the enclosing shape for rehearsal marks. Allowed values are: "**box**" (*Enclosed by box.*), "**circle**" (*Enclosed by circle.*), "**none**" (*No enclosing shape.*)

att.scoreDef.vis.cmn → @reh.enclose

**@slur.lform** Value conforms to [data.LINEFORM](#).

att.scoreDef.vis.cmn → @slur.lform

**@slur.lwidth** Value conforms to [data.LINEWIDTH](#).

att.scoreDef.vis.cmn → @slur.lwidth

**@tie.lform** Value conforms to [data.LINEFORM](#).

att.scoreDef.vis.cmn → @tie.lform

**@tie.lwidth** Value conforms to [data.LINEWIDTH](#).

att.scoreDef.vis.cmn → @tie.lwidth

### Available at

**<scoreDef>** Container for score meta-information.

att.scoreDef.vis.cmn → <scoreDef>

### Declaration

## att.scoreDef.vis.mensural

Visual domain attributes for scoreDef in the mensural repertoire.

### Module

[MEI.mensural](#)

### Attributes

**@mensur.color** (*optional*) Records the color of the mensuration sign. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.scoreDef.vis.mensural → @mensur.color

**@mensur.dot** (*optional*) Determines if a dot is to be added to the base symbol. Value conforms to [data.BOOLEAN](#).

att.scoreDef.vis.mensural → @mensur.dot

**@mensur.form** (*optional*) Indicates whether the base symbol is written vertically or horizontally. Allowed values are: "**horizontal**" (*Horizontally oriented.*), "**vertical**" (*Vertically oriented.*)

att.scoreDef.vis.mensural → @mensur.form

**@mensur.loc** (*optional*) Holds the staff location of the mensuration sign. Value conforms to [data.STAFFLOC](#).

att.scoreDef.vis.mensural → @mensur.loc

**@mensur.orient** (*optional*) Describes the rotation or reflection of the base symbol. Value conforms to [data.ORIENTATION](#).

att.scoreDef.vis.mensural → @mensur.orient

**@mensur.sign** (*optional*) The base symbol in the mensuration sign/time signature of mensural notation. Value conforms to [data.MENSURATIONSIGN](#).

att.scoreDef.vis.mensural → @mensur.sign

**@mensur.size** (*optional*) Describes the relative size of the mensuration sign. Value conforms to [data.FONTSIZE](#).

att.scoreDef.vis.mensural → @mensur.size

**@mensur.slash** (*optional*) Indicates the number lines added to the mensuration sign. For example, one slash is added for what we now call 'alla breve'. Value is a positive integer.

att.scoreDef.vis.mensural → @mensur.slash

### Available at

**<scoreDef>** Container for score meta-information.

att.scoreDef.vis.mensural → <scoreDef>

### Declaration

## att.section.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<section>** Segment of music data.

att.section.anl → <section>

#### Declaration

```
<classSpec ident="att.section.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.section.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

@attaccaIndicates that the performance of the next section should begin immediately following this one. Value conforms to [data.BOOLEAN](#).

att.section.ges → @attacca

### Available at

**<section>** Segment of music data.

att.section.ges → <section>

### Declaration

```
<classSpec ident="att.section.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <attList>
    <attDef ident="attacca">
      <desc xml:lang="en">Indicates that the performance of the next section should begin
      immediately following this one.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.section.log

Logical domain attributes.

### Module

MEI.shared

### Attributes

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.section.log → @when

### Available at

[<section>](#) Segment of music data.

att.section.log → <section>

### Declaration

```
<classSpec ident="att.section.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.alignment"/>
  </classes>
</classSpec>
```

## att.section.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@restart** (*optional*) Indicates that staves begin again with this section. Value conforms to [data.BOOLEAN](#).

att.section.vis → @restart

### Available at

**<section>** Segment of music data.

att.section.vis → <section>

### Declaration

```
<classSpec ident="att.section.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <attList>
    <attDef ident="restart" usage="opt">
      <desc xml:lang="en">Indicates that staves begin again with this section.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.sequence

Attributes that describe order within a collection of features.

### Module

MEI.shared

### Attributes

**@seq** (*optional*) Used to assign a sequence number related to the order in which the encoded features carrying this attribute are believed to have occurred. Value is a positive integer.

att.sequence → @seq

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.sequence → <abbr>

**<add>** Marks an addition to the text.

att.sequence → <add>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.sequence → <corr>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.sequence → <cutout>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.sequence → <del>

**<expan>** Contains the expansion of an abbreviation.

att.sequence → <expan>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.sequence → <lem>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.sequence → <metaMark>

**<patch>** Describes a physical writing surface attached to the original document.

att.sequence → <patch>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.sequence → <rdg>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.sequence → <restore>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.sequence → <subst>

## Declaration

```
<classSpec ident="att.sequence" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe order within a collection of features.</desc>
  <attList>
    <attDef ident="seq" usage="opt">
      <desc xml:lang="en">Used to assign a sequence number related to the order in which the
      encoded features carrying this attribute are believed to have occurred.</desc>
      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.signifLet.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<signifLet>** Significantive letter(s).

att.signifLet.anl → <signifLet>

#### Declaration

```
<classSpec ident="att.signifLet.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.signifLet.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<signifLet>** Significantive letter(s).

att.signifLet.ges → <signifLet>

#### Declaration

```
<classSpec ident="att.signifLet.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.signifLet.log

Logical domain attributes.

### Module

[MEI.neumes](#)

### Attributes

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
att.signifLet.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.  
att.signifLet.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.  
att.signifLet.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.  
att.signifLet.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.  
att.signifLet.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.  
att.signifLet.log → @staff

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).  
att.signifLet.log → @when

### Available at

[\*\*<signifLet>\*\*](#) Significantive letter(s).

att.signifLet.log → <signifLet>

### Declaration

```
<classSpec ident="att.signifLet.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <!-- att.controlEvent class expanded here in order to disallow att.timestamp.* -->
    <memberOf key="att.alignment"/>
    <memberOf key="att.layerIdent"/>
    <memberOf key="att.partIdent"/>
    <memberOf key="att.plist"/>
    <memberOf key="att.staffIdent"/>
    <memberOf key="att.targetEval"/>
  </classes>
</classSpec>
```

## att.signifLet.vis

Visual domain attributes.

### Referenced in chapters

[6.4.8 Significative letters attribute](#)

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a [`<symbolDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.signifLet.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.signifLet.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.signifLet.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.signifLet.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.signifLet.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.signifLet.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.signifLet.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.signifLet.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.signifLet.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.signifLet.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.signifLet.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).  
`att.signifLet.vis` → `@glyph.uri`

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

`att.signifLet.vis` → `@ho`

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

`att.signifLet.vis` → `@letterspacing`

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

`att.signifLet.vis` → `@lineheight`

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

`att.signifLet.vis` → `@loc`

**@place** (*recommended*) Captures the placement of the sequence of characters with respect to the neume or neume component with which it is associated. Value conforms to [data.EVENTREL](#).

`att.signifLet.vis` → `@place`

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

`att.signifLet.vis` → `@visible`

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

`att.signifLet.vis` → `@x`

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `fac` attribute. Value is a decimal number.

`att.signifLet.vis` → `@y`

## Available at

**<signifLet>** Significantive letter(s).

`att.signifLet.vis` → `<signifLet>`

## Declaration

```
<classSpec ident="att.signifLet.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>

    <memberOf key="att.enclosingChars"/>
    <memberOf key="att.extSym"/>
```

```
<memberOf key="att.staffLoc"/>
<memberOf key="att.typography"/>
<memberOf key="att.visibility"/>
<memberOf key="att.visualOffset.ho"/>
<memberOf key="att.xy"/>
</classes>
<attList>
  <attDef ident="place" usage="rec">
    <desc xml:lang="en">Captures the placement of the sequence of characters with respect
      to the neume or neume component with which it is associated.</desc>
    <datatype>
      <rng:ref name="data.EVENTREL"/>
    </datatype>
  </attDef>
</attList>
</classSpec>
```

## att.slashCount

Attributes for recording the number of slashes that accompany a feature.

### Referenced in chapters

[5.2 Mensuration](#)

### Module

[MEI.shared](#)

### Attributes

**@slash** (*optional*) Indicates the number of slashes present. Value conforms to [data.SLASH](#).

att.slashCount → @slash

### Available at

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.slashCount → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.slashCount → <mensuration>

### Declaration

```
<classSpec ident="att.slashCount" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes for recording the number of slashes that accompany a
  feature.</desc>
  <attList>
    <attDef ident="slash" usage="opt">
      <desc xml:lang="en">Indicates the number of slashes present.</desc>
      <datatype>
        <rng:ref name="data.SLASH"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.slur.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@join** (*optional*) Used for linking visually separate entities that form a single logical entity, for example, multiple slurs broken across a system break that form a single musical phrase. Also used to indicate a measure which metrically completes the current one. Record the identifiers of the separately encoded components, excluding the one carrying the attribute. One or more values from [data.URI](#), separated by spaces.

att.slur.anl → @join

### Available at

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.slur.anl → <slur>

### Declaration

```
<classSpec ident="att.slur.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.joined"/>
  </classes>
</classSpec>
```

## att.slur.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.slur.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.slur.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.slur.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.slur.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.slur.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.slur.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.slur.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.slur.ges → @tstamp2.real

### Available at

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.slur.ges → <slur>

### Declaration

```
<classSpec ident="att.slur.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

## att.slur.log

Logical domain attributes.

### Module

MEI.cmn

### Attributes

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.slur.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.slur.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.slur.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.slur.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\ij][\c]+)"**, separated by spaces.

att.slur.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.slur.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.slur.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.slur.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.slur.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.slur.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.slur.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.slur.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.slur.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.slur.log → @when

## Available at

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.slur.log → <slur>

## Declaration

```
<classSpec ident="att.slur.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.slur.vis

Visual domain attributes for slur. The vo attribute is the vertical offset (from its normal position) of the entire rendered slur/phrase mark.

### Module

[MEI.visual](#)

### Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.slur.vis → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.slur.vis → @bulge

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.slur.vis → @color

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (Upward curve.), "**below**" (Downward curve.), "**mixed**" (A "meandering" curve, both above and below the items it pertains to.)

att.slur.vis → @curvedir

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.slur.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.slur.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.slur.vis → @endvo

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.slur.vis → @ho

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.slur.vis → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.slur.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.slur.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.slur.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.slur.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.slur.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.slur.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.slur.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.slur.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.slur.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.slur.vis → @y2

## Available at

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.slur.vis → <slur>

## Declaration

```

<classSpec ident="att.slur.vis" module="MEI.visual" type="atts">

DEVELOPMENT  
VERSION

## att.slurPresent

Attributes for marking the presence of a slur.

### Module

[MEI.shared](#)

### Attributes

**@slur** (*optional*) Indicates that this element participates in a slur. If visual information about the slur needs to be recorded, then a [<slur>](#) element should be employed. One or more values from [data.SLUR](#), separated by spaces.

att.slurPresent → @slur

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.slurPresent → <chord>

**<note>** A single pitched event.

att.slurPresent → <note>

### Declaration

```

<classSpec ident="att.slurPresent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes for marking the presence of a slur.</desc>
  <attList>
    <attDef ident="slur" usage="opt">
      <desc xml:lang="en">Indicates that this element participates in a slur. If visual
      information about the slur needs to be recorded, then a
        <gi scheme="MEI">slur</gi>
      element should be employed.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.SLUR"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.slurRend

Attributes that describe the rendition of slurs.

### Module

MEI.cmn

### Attributes

**@slur.lform** Value conforms to [data.LINEFORM](#).

att.slurRend → @slur.lform

**@slur.lwidth** Value conforms to [data.LINEWIDTH](#).

att.slurRend → @slur.lwidth

### Available at

**<scoreDef>** Container for score meta-information.

att.slurRend → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.slurRend → <staffDef>

### Declaration

```
<classSpec ident="att.slurRend" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that describe the rendition of slurs.</desc>
  <attList>
    <attDef ident="slur.lform">

      </datatype>
    </attDef>
    <attDef ident="slur.lwidth">
      <datatype>
        <rng:ref name="data.LINEWIDTH"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.solfa

Attributes that specify pitch using sol-fa.

### Referenced in chapters

[10.1.2 Event-Specific Analytical Information](#)

### Module

[MEI.analytical](#)

### Attributes

**@psolfa** (*optional*) Contains sol-fa designation, e.g., do, re, mi, etc., in either a fixed or movable Do system. Value is a [NMTOKEN](#).

att.solfa → @psolfa

### Available at

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.solfa → <nc>

**<note>** A single pitched event.

att.solfa → <note>

### Declaration

```

<classSpec ident="att.solfa" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Attributes that specify pitch using sol-fa.</desc>
  <attList>
    <attDef ident="psolfa" usage="opt">
      <gloss versionDate="2022-10-18" xml:lang="en">pitch sol-fa</gloss>
      <desc xml:lang="en">Contains sol-fa designation,
        <abbr>e.g. </abbr>
        , do, re, mi, etc., in either a fixed or movable Do system.</desc>
      <datatype>
        <rng:data type="NMTOKEN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.soundLocation

Attributes that locate a sound source within 3-D space.

### Module

MEI.gestural

### Attributes

**@azimuth** (*optional*) The lateral or left-to-right plane. Value conforms to [data.DEGREES](#).

att.soundLocation → @azimuth

**@elevation** (*optional*) The above-to-below axis. Value conforms to [data.DEGREES](#).

att.soundLocation → @elevation

### Available at

**<instrDef>** MIDI instrument declaration.

att.soundLocation → <instrDef>

### Declaration

```
<classSpec ident="att.soundLocation" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Attributes that locate a sound source within 3-D space.</desc>
  <attList>
    <attDef ident="azimuth" usage="opt">
      <desc xml:lang="en">The lateral or left-to-right plane.</desc>
      <datatype>
        <rng:ref name="data.DEGREES"/>
      </datatype>
      <remarks xml:lang="en">
        <p>A value of 0, 360, or -360 is directly in front of the listener, while a value of 180 or -180 is directly behind.</p>
      </remarks>
    </attDef>
    <attDef ident="elevation" usage="opt">
      <desc xml:lang="en">The above-to-below axis.</desc>
      <datatype>
        <rng:ref name="data.DEGREES"/>
      </datatype>
      <remarks xml:lang="en">
        <p>A value of 0, 360, or -360 is directly above the listener, while a value of 180 or -180 is directly below.</p>
      </remarks>
    </attDef>
  </attList>
</classSpec>
```

## att.source

Attributes common to elements that may refer to a source.

### Module

[MEI.shared](#)

### Attributes

**@source** (*optional*) Contains a list of one or more pointers indicating the sources which attest to a given reading. Each value should correspond to the ID of a [<source>](#) or [<manifestation>](#) element located in the document header. One or more values from [data.URI](#), separated by spaces.

att.source → @source

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.source → <abbr>

**<add>** Marks an addition to the text.

att.source → <add>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.source → <addName>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.source → <annot>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.source → <bloc>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.source → <cb>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.source → <colLayout>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.source → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.source → <corr>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.source → <country>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.source → <custos>

**<date>** A string identifying a point in time or the time period between two such points.

att.source → <date>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.source → <del>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.source → <desc>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.source → <district>

**<event>** Contains a free-text event description.

att.source → <event>

**<expan>** Contains the expansion of an abbreviation.

att.source → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.source → <expansion>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.source → <famName>

**<foreName>** Contains a forename, given or baptismal name.

att.source → <foreName>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.source → <gap>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.source → <genName>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.source → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.source → <geogName>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.source → <handShift>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.source → <label>

**<labelAbbr>** A label on the pages following the first.

att.source → <labelAbbr>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.source → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.source → <lem>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.source → <metaMark>

**<name>** Proper noun or noun phrase.

att.source → <name>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.source → <nameLink>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.source → <orig>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.source → <pb>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.source → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.source → <perfResList>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.source → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.source → <persName>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.source → <rdg>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.source → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.source → <region>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.source → <restore>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.source → <roleName>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.source → <sb>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.source → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.source → <sic>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.source → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.source → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.source → <supplied>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.source → <unclear>

## Constraints

@source attribute should have content.

Each value in @source should correspond to the @xml:id attribute of a source or manifestation element.

## Declaration

```

<classSpec ident="att.source" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes common to elements that may refer to a source.</desc>

## att.sp.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<sp>** Contains an individual speech in a performance text.

att.sp.anl → <sp>

#### Declaration

```
<classSpec ident="att.sp.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.sp.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.sp.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.sp.ges → @tstamp2.real

### Available at

**<sp>** Contains an individual speech in a performance text.

att.sp.ges → <sp>

### Declaration

```
<classSpec ident="att.sp.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

## att.sp.log

Logical domain attributes.

### Module

[MEI.drama](#)

### Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.sp.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.sp.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.sp.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.sp.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.sp.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.sp.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.sp.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.sp.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.sp.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.sp.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.sp.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.sp.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.sp.log → @when

## Available at

**<sp>** Contains an individual speech in a performance text.

att.sp.log → <sp>

## Declaration

```
<classSpec ident="att.sp.log" module="MEI.drama" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.sp.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.sp.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.sp.vis → @endto

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.sp.vis → @ho

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.sp.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.sp.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.sp.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.sp.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.sp.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.sp.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.sp.vis → @y

**Available at**

**<sp>** Contains an individual speech in a performance text.

att.sp.vis → <sp>

**Declaration**

```
<classSpec ident="att.sp.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.visualOffset2.ho"/>
    <memberOf key="att.visualOffset2.to"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.space.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.space.anl → @beam

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.space.anl → @fermata

**@tuplet** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLET](#), separated by spaces.

att.space.anl → @tuplet

### Available at

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.space.anl → <space>

### Declaration

```
<classSpec ident="att.space.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.space.anl.cmn"/>
  </classes>
</classSpec>
```

# att.space.anl.cmn

Analytical domain attributes in the CMN repertoire.

## Module

[MEI.cmn](#)

## Attributes

**@beam** (*optional*) Indicates that this event is "under a beam". One or more values from [data.BEAM](#), separated by spaces.

att.space.anl.cmn → @beam

**@fermata** (*optional*) Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a [<fermata>](#) element should be employed instead. Value conforms to [data.STAFFREL.basic](#).

att.space.anl.cmn → @fermata

**@tuplet** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLE](#), separated by spaces.

att.space.anl.cmn → @tuplet

## Available at

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.space.anl.cmn → <space>

## Declaration

```
<classSpec ident="att.space.anl.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Analytical domain attributes in the CMN repertoire.</desc>
  <classes>
    <memberOf key="att.beamPresent"/>
    <memberOf key="att.fermataPresent"/>
    <memberOf key="att.tupletPresent"/>
  </classes>
</classSpec>
```

## att.space.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.space.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.space.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.space.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.space.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.space.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.space.ges → @dur.recip

### Available at

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.space.ges → <space>

### Declaration

```
<classSpec ident="att.space.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
  </classes>
</classSpec>
```

# att.space.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@dots** (*optional*) Records the number of augmentation dots required by a written dotted duration. Value conforms to [data.AUGMENTDOT](#).

att.space.log → @dots

**@dur** (*optional*) Records the duration of a feature using the relative durational values provided by the [data.DURATION](#) datatype. Value conforms to [data.DURATION](#).

att.space.log → @dur

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.space.log → @layer

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.space.log → @staff

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.space.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.space.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.space.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.space.log → @when

## Available at

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.space.log → <space>

## Declaration

```
<classSpec ident="att.space.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.augmentDots"/>
```

```
<memberOf key="att.duration.log"/>
<memberOf key="att.event"/>
<memberOf key="att.space.log.cmn"/>
</classes>
</classSpec>
```

DEVELOPMENT  
VERSION

## att.space.log.cmn

Logical domain attributes in the CMN repertoire.

### Module

[MEI.cmn](#)

### Attributes

#### Available at

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.space.log.cmn → <space>

#### Declaration

```
<classSpec ident="att.space.log.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes in the CMN repertoire.</desc>
</classSpec>
```

## att.space.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@compressable** (*optional*) Indicates whether a space is 'compressible', i.e., if it may be removed at the discretion of processing software. Value conforms to [data.BOOLEAN](#).

att.space.vis → @compressable

**@cutout** (*optional*) "Cut-out" style. Allowed values are: "**cutout**" (*The staff lines should not be drawn.*)

att.space.vis → @cutout

### Available at

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.space.vis → <space>

### Declaration

```
<classSpec ident="att.space.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.cutout"/>
  </classes>
  <attList>
    <attDef ident="compressable" usage="opt">
      <desc xml:lang="en">Indicates whether a space is 'compressible',
        <abbr>i.e.</abbr>
        , if it may be removed at the discretion of processing software.</desc>
      <datatype>
        <rng:ref name="data.BOOLEAN"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.spacing

Attributes that capture notation spacing information.

## Module

[MEI.shared](#)

## Attributes

**@spacing.packexp** (*optional*) Describes a note's spacing relative to its time value. Value is a decimal number.

att.spacing → @spacing.packexp

**@spacing.packfact** (*optional*) Describes the note spacing of output. Value is a decimal number.

att.spacing → @spacing.packfact

**@spacing.staff** (*optional*) Specifies the minimum amount of space between adjacent staves in the same system; measured from the bottom line of the staff above to the top line of the staff below. Value conforms to [data.MEASUREMENTSIGNED](#).

att.spacing → @spacing.staff

**@spacing.system** (*optional*) Describes the space between adjacent systems; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values from [data.MEASUREMENTSIGNED](#), separated by a space.

att.spacing → @spacing.system

## Available at

**<scoreDef>** Container for score meta-information.

att.spacing → <scoreDef>

## Declaration

```

<classSpec ident="att.spacing" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that capture notation spacing information.</desc>
  <attList>
    <attDef ident="spacing.packexp" usage="opt">
      <desc xml:lang="en">Describes a note's spacing relative to its time value.</desc>
      <datatype>
        <rng:data type="decimal"/>
      </datatype>
    </attDef>
    <attDef ident="spacing.packfact" usage="opt">
      <desc xml:lang="en">Describes the note spacing of output.</desc>
      <datatype>
        <rng:data type="decimal"/>
      </datatype>
    </attDef>

    </datatype>  
</attDef>  
</attList>  
</classSpec>
```

## att.staff.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.staff.anl → <oStaff>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.staff.anl → <staff>

### Declaration

```
<classSpec ident="att.staff.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.staff.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.staff.ges → <oStaff>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.staff.ges → <staff>

### Declaration

```
<classSpec ident="att.staff.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.staff.log

Logical domain attributes.

## Module

[MEI.shared](#)

## Attributes

**@def** (*optional*) Provides a mechanism for linking the staff to a staffDef element. Value conforms to [data.URI](#).

att.staff.log → @def

**@metcon** (*optional*) Indicates the relationship between the content of a staff or layer and the prevailing meter. Allowed values are: "**c**" (*Complete; , conformant with the prevailing meter.*), "**i**" (*Incomplete; , not enough beats.*), "**o**" (*Overfull; , too many beats.*)

att.staff.log → @metcon

## Available at

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.  
att.staff.log → <oStaff>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.staff.log → <staff>

## Constraints

@def attribute should have content.

The value in @def should correspond to the @xml:id attribute of a staffDef element.

## Declaration

```

<classSpec ident="att.staff.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.meterConformance"/>
  </classes>
  <attList>
    <attDef ident="def" usage="opt">
      <desc xml:lang="en">Provides a mechanism for linking the staff to a staffDef element.</desc>
      <datatype>
        <rng:ref name="data.URI"/>
      </datatype>
      <constraintSpec ident="check_defTarget_staff" scheme="schematron">
        <constraint>

```

```
<sch:rule context="mei:staff/@def">
    <sch:assert role="warning" test="not(normalize-space(.) eq '')">@def
        attribute should have content.</sch:assert>
        <sch:assert role="warning" test="every $i in tokenize(., '\s+') satisfies
            substring($i,2)=//mei:staffDef/@xml:id">The value in @def should correspond
            to the @xml:id attribute of a staffDef element.</sch:assert>
    </sch:rule>
</constraint>
</constraintSpec>
</attDef>
</attList>
</classSpec>
```

## att.staff.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.staff.vis → @visible

### Available at

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.staff.vis → <oStaff>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.staff.vis → <staff>

### Declaration

```
<classSpec ident="att.staff.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.visibility"/>
  </classes>
</classSpec>
```

## att.staffDef.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

**@key.accid** (*optional*) Contains an accidental for the tonic key, if one is required, e.g., if key.pname equals c and key.accid equals s, then a tonic of C# is indicated. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.staffDef.anl → @key.accid

**@key.mode** (*optional*) Indicates major, minor, or other tonality. Value conforms to [data.MODE](#).

att.staffDef.anl → @key.mode

**@key.pname** (*optional*) Holds the pitch name of the tonic key, e.g., c for the key of C. Value conforms to [data.PITCHNAME](#).

att.staffDef.anl → @key.pname

### Available at

**<staffDef>** Container for staff meta-information.

att.staffDef.anl → <staffDef>

### Declaration

```
<classSpec ident="att.staffDef.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.keySigDefault.anl"/>
  </classes>
</classSpec>
```

## att.staffDef.ges

Gestural domain attributes for staffDef in the CMN repertoire.

### Module

[MEI.gestural](#)

### Attributes

**@instr** (*optional*) Provides a way of pointing to a MIDI instrument definition. It must contain the ID of an [`<instrDef>`](#) element elsewhere in the document. Value conforms to [data.URI](#).

`att.staffDef.ges → @instr`

**@ppq** (*optional*) Indicates the number of pulses (sometimes referred to as ticks or divisions) per quarter note. Unlike MIDI, MEI permits different values for a score and individual staves. Value is a positive integer.

`att.staffDef.ges → @ppq`

**@tab.strings** (*optional*) Provides a \*written\* pitch and octave for each open string or course of strings. One or more values conforming to the pattern "[a-

**g][0-9](s|f|ss|x|ff|xs|sx|ts|tf|n|nf|ns|su|sd|fu|fd|nu|nd|1qf|3qf|1qs|3qs)?([a-**  
**g][0-9](s|f|ss|x|ff|xs|sx|ts|tf|n|nf|ns|su|sd|fu|fd|nu|nd|1qf|3qf|1qs|3qs)?)\*".**

`att.staffDef.ges → @tab.strings`

**@tune.Hz** (*optional*) Holds a value for cycles per second, i.e., Hertz, for a tuning reference pitch. Value is a decimal number.

`att.staffDef.ges → @tune.Hz`

**@tune.pname** (*optional*) Holds the pitch name of a tuning reference pitch, i.e., the central tone of a tuning system. Value conforms to [data.PITCHNAME](#).

`att.staffDef.ges → @tune.pname`

**@tune.temper** (*optional*) Provides an indication of the tuning system, just, for example. Value conforms to [data.TEMPERAMENT](#).

`att.staffDef.ges → @tune.temper`

### Available at

[`<staffDef>`](#) Container for staff meta-information.

`att.staffDef.ges → <staffDef>`

### Declaration

```

<classSpec ident="att.staffDef.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes for staffDef in the CMN repertoire.</desc>
  <classes>
    <memberOf key="att.instrumentIdent"/>
    <memberOf key="att.stringtab.tuning"/>
    <memberOf key="att.timeBase"/>
    <memberOf key="att.tuning"/>
  </classes>
</classSpec>

```

## att.staffDef.log

Logical domain attributes for staffDef.

### Referenced in chapters

[1.2.1 Musical Domains](#)

### Module

[MEI.shared](#)

### Attributes

**@beam.group** (*optional*) Provides an example of how automated beaming (including secondary beams) is to be performed. Value is plain text.

att.staffDef.log → @beam.group

**@beam.rests** (*optional*) Indicates whether automatically-drawn beams should include rests shorter than a quarter note duration. Value conforms to [data.BOOLEAN](#).

att.staffDef.log → @beam.rests

**@clef.dis** (*optional*) Records the amount of octave displacement to be applied to the clef. Value conforms to [data.OCTAVE.DIS](#).

att.staffDef.log → @clef.dis

**@clef.dis.place** (*optional*) Records the direction of octave displacement to be applied to the clef. Value conforms to [data.STAFFREL.basic](#).

att.staffDef.log → @clef.dis.place

**@clef.line** (*optional*) Contains a default value for the position of the clef. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff. Value conforms to [data.CLEFLINE](#).

att.staffDef.log → @clef.line

**@clef.shape** (*optional*) Encodes a value for the clef symbol. Value conforms to [data.CLEFSHAPE](#).

att.staffDef.log → @clef.shape

**@divisio** (*optional*) Describes the divisions of the breve in use in 14th-century Italy. Value conforms to [data.DIVISIO](#).

att.staffDef.log → @divisio

**@dur.default** (*optional*) Contains a default duration in those situations when the first note, rest, chord, etc. in a measure does not have a duration specified. Value conforms to [data.DURATION](#).

att.staffDef.log → @dur.default

**@keysig** (*optional*) Written key signature. One or more values from [data.KEYFIFTHS](#), separated by spaces.

att.staffDef.log → @keysig

**@lines** (*optional*) Indicates the number of staff lines. Value is a positive integer.

att.staffDef.log → @lines

**@meter.count** (*optional*) Captures the number of beats in a measure, that is, the top number of the meter signature. It must contain a decimal number or an expression that evaluates to a decimal number, such as 2+3 or 3\*2. Value is plain text.

att.staffDef.log → @meter.count

**@meter.sym** (*optional*) Indicates the use of a meter symbol instead of a numeric meter signature, that is, 'C' for common time or 'C' with a slash for cut time. Value conforms to [data.METERSIGN](#).

att.staffDef.log → @meter.sym

**@meter.unit** (*optional*) Contains the number indicating the beat unit, that is, the bottom number of the meter signature. Value is a decimal number.

att.staffDef.log → @meter.unit

**@modusmaior** (*optional*) Describes the maxima-long relationship. Value conforms to [data.MODUSMAIOR](#).

att.staffDef.log → @modusmaior

**@modusminor** (*optional*) Describes the long-breve relationship. Value conforms to [data.MODUSMINOR](#).

att.staffDef.log → @modusminor

**@notationsubtype** (*optional*) Provides any sub-classification of the notation contained or described by the element, additional to that given by its notationtype attribute. Value is a [NMTOKEN](#).

att.staffDef.log → @notationsubtype

**@notationtype** (*optional*) Contains classification of the notation contained or described by the element bearing this attribute. Value conforms to [data.NOTATIONTYPE](#).

att.staffDef.log → @notationtype

**@num.default** (*optional*) Along with numbase.default, describes the default duration as a ratio. num.default is the first value in the ratio. Value is a positive integer.

att.staffDef.log → @num.default

**@numbase.default** (*optional*) Along with num.default, describes the default duration as a ratio. numbase.default is the second value in the ratio. Value is a positive integer.

att.staffDef.log → @numbase.default

**@oct.default** (*optional*) Contains a default octave specification for use when the first note, rest, chord, etc. in a measure does not have an octave value specified. Value conforms to [data.OCTAVE](#).

att.staffDef.log → @oct.default

**@prolatio** (*optional*) Describes the semibreve-minim relationship. Value conforms to [data.PROLATIO](#).

att.staffDef.log → @prolatio

**@proport.num** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.num is for the first value in the ratio. Value is a positive integer.

att.staffDef.log → @proport.num

**@proport.numbase** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.numbase is for the second value in the ratio. Value is a positive integer.

att.staffDef.log → @proport.numbase

**@tempus** (*optional*) Describes the breve-semibreve relationship. Value conforms to [data.TEMPUS](#).

att.staffDef.log → @tempus

**@trans.diat** (*optional*) Records the amount of diatonic pitch shift, e.g., C to C♯ = 0, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.staffDef.log → @trans.diat

**@trans.semi** (*optional*) Records the amount of pitch shift in semitones, e.g., C to C♯ = 1, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.staffDef.log → @trans.semi

## Available at

**<staffDef>** Container for staff meta-information.

att.staffDef.log → <staffDef>

## Declaration

```
<classSpec ident="att.staffDef.log" module="MEI.shared" type="atts">

```

## att.staffDef.log.cmn

Logical domain attributes for staffDef in the CMN repertoire.

### Module

[MEI.cmn](#)

### Attributes

**@beam.group** (*optional*) Provides an example of how automated beaming (including secondary beams) is to be performed. Value is plain text.

att.staffDef.log.cmn → @beam.group

**@beam.rests** (*optional*) Indicates whether automatically-drawn beams should include rests shorter than a quarter note duration. Value conforms to [data.BOOLEAN](#).

att.staffDef.log.cmn → @beam.rests

### Available at

**<staffDef>** Container for staff meta-information.

att.staffDef.log.cmn → <staffDef>

### Declaration

```
<classSpec ident="att.staffDef.log.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes for staffDef in the CMN repertoire.</desc>
  <classes>
    <memberOf key="att.beaming.log"/>
  </classes>
</classSpec>
```

## att.staffDef.log.mensural

Logical domain attributes for staffDef in the mensural repertoire.

### Module

[MEI.mensural](#)

### Attributes

**@divisio** (*optional*) Describes the divisions of the breve in use in 14th-century Italy. Value conforms to [data.DIVISIO](#).

att.staffDef.log.mensural → @divisio

**@modusmaior** (*optional*) Describes the maxima-long relationship. Value conforms to [data.MODUSMAIOR](#).

att.staffDef.log.mensural → @modusmaior

**@modusminor** (*optional*) Describes the long-breve relationship. Value conforms to [data.MODUSMINOR](#).

att.staffDef.log.mensural → @modusminor

**@prolatio** (*optional*) Describes the semibreve-minim relationship. Value conforms to [data.PROLATIO](#).

att.staffDef.log.mensural → @prolatio

**@proport.num** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.num is for the first value in the ratio. Value is a positive integer.

att.staffDef.log.mensural → @proport.num

**@proport.numbase** (*optional*) Together, proport.num and proport.numbase specify a proportional change as a ratio, e.g., 1:3. Proport.numbase is for the second value in the ratio. Value is a positive integer.

att.staffDef.log.mensural → @proport.numbase

**@tempus** (*optional*) Describes the breve-semibreve relationship. Value conforms to [data.TEMPUS](#).

att.staffDef.log.mensural → @tempus

### Available at

**<staffDef>** Container for staff meta-information.

att.staffDef.log.mensural → <staffDef>

### Declaration

```
<classSpec ident="att.staffDef.log.mensural" module="MEI.mensural" type="atts">

    <memberOf key="att.mensural.log"/>
  </classes>
</classSpec>
```

## att.staffDef.vis

Visual domain attributes for staffDef.

### Module

[MEI.visual](#)

### Attributes

**@aboveorder** Describes vertical order of items printed above a staff, from closest to farthest away from the staff. One or more values from [data.STAFFITEM](#), separated by spaces.

att.staffDef.vis → @aboveorder

**@bar.len** (*optional*) States the length of bar lines in virtual units. The value must be greater than 0 and is typically equal to 2 times (the number of staff lines - 1); e.g., a value of 8 for a 5-line staff. Value is a decimal number.

att.staffDef.vis → @bar.len

**@bar.method** (*optional*) Records the method of barring. Value conforms to [data.BARMETHOD](#).

att.staffDef.vis → @bar.method

**@bar.place** (*optional*) Denotes the staff location of bar lines, if the length is non-standard; that is, not equal to 2 times (the number of staff lines - 1). Value conforms to [data.STAFFLOC](#).

att.staffDef.vis → @bar.place

**@beam.color** (*optional*) Color of beams, including those associated with tuplets. Value conforms to [data.COLOR](#).

att.staffDef.vis → @beam.color

**@beam.rend** (*optional*) Encodes whether a beam is "feathered" and in which direction. Allowed values are: "**acc**" (*Beam lines grow farther apart from left to right.*), "**rit**" (*Beam lines grow closer together from left to right.*), "**norm**" (*Beam lines are equally-spaced over the entire length of the beam.*)

att.staffDef.vis → @beam.rend

**@beam.slope** (*optional*) Captures beam slope. Value is a decimal number.

att.staffDef.vis → @beam.slope

**@beloworder** Describes vertical order of items printed below a staff, from closest to farthest away from the staff. One or more values from [data.STAFFITEM](#), separated by spaces.

att.staffDef.vis → @beloworder

**@betweenorder** Describes vertical order of items printed between staves, from top to bottom. One or more values from [data.STAFFITEM](#), separated by spaces.

att.staffDef.vis → @betweenorder

**@clef.color** (*optional*) Describes the color of the clef. Value conforms to [data.COLOR](#).

att.staffDef.vis → @clef.color

**@clef.visible** (*optional*) Determines whether the clef is to be displayed. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @clef.visible

**@dir.dist** (*optional*) Records the default distance from the staff for directives. Value conforms to [data.MEASUREMENTSIGNED](#).

att.staffDef.vis → @dir.dist

**@dynam.dist** (*optional*) Records the default distance from the staff for dynamic marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.staffDef.vis → @dynam.dist

**@grid.show** (*optional*) Determines whether to display guitar chord grids. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @grid.show

**@harm.dist** (*optional*) Records the default distance from the staff of harmonic indications, such as guitar chord grids or functional labels. Value conforms to [data.MEASUREMENTSIGNED](#).

att.staffDef.vis → @harm.dist

**@keysig.cancelaccid** (*optional*) Determines where cautionary accidentals should be displayed at a key change. Value conforms to [data.CANCELACCID](#).

att.staffDef.vis → @keysig.cancelaccid

**@keysig.visible** (*optional*) Determines whether the key signature is to be displayed. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @keysig.visible

**@layerscheme** (*optional*) Indicates the number of layers and their stem directions. Value conforms to [data.LAYERSCHEME](#).

att.staffDef.vis → @layerscheme

**@lines.color** (*optional*) Captures the colors of the staff lines. One or more values from [data.COLOR](#), separated by spaces.

att.staffDef.vis → @lines.color

**@lines.visible** (*optional*) Records whether all staff lines are visible. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @lines.visible

**@lyric.align** (*optional*) Describes the alignment of lyric syllables associated with a note or chord. Value conforms to [data.MEASUREMENTSIGNED](#).

att.staffDef.vis → @lyric.align

**@lyric.fam** (*optional*) Sets the font family default value for lyrics. Value conforms to [data.FONTFAMILY](#).

att.staffDef.vis → @lyric.fam

**@lyric.name** (*optional*) Sets the font name default value for lyrics. Value conforms to [data.FONTNAME](#).

att.staffDef.vis → @lyric.name

**@lyric.size** (*optional*) Sets the default font size value for lyrics. Value conforms to [data.FONTSIZE](#).

att.staffDef.vis → @lyric.size

**@lyric.style** (*optional*) Sets the default font style value for lyrics. Value conforms to [data.FONTSTYLE](#).

att.staffDef.vis → @lyric.style

**@lyric.weight** (*optional*) Sets the default font weight value for lyrics. Value conforms to [data.FONTWEIGHT](#).

att.staffDef.vis → @lyric.weight

**@mensur.color** (*optional*) Records the color of the mensuration sign. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.staffDef.vis → @mensur.color

**@mensur.dot** (*optional*) Determines if a dot is to be added to the base symbol. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @mensur.dot

**@mensur.form** (*optional*) Indicates whether the base symbol is written vertically or horizontally. Allowed values are: "**horizontal**" (*Horizontally oriented.*), "**vertical**" (*Vertically oriented.*)

att.staffDef.vis → @mensur.form

**@mensur.loc** (*optional*) Holds the staff location of the mensuration sign. Value conforms to [data.STAFFLOC](#).

att.staffDef.vis → @mensur.loc

**@mensur.orient** (*optional*) Describes the rotation or reflection of the base symbol. Value conforms to [data.ORIENTATION](#).

att.staffDef.vis → @mensur.orient

**@mensur.sign** (*optional*) The base symbol in the mensuration sign/time signature of mensural notation. Value conforms to [data.MENSURATIONSIGN](#).

att.staffDef.vis → @mensur.sign

**@mensur.size** (*optional*) Describes the relative size of the mensuration sign. Value conforms to [data.FONTSIZE](#).

att.staffDef.vis → @mensur.size

**@mensur.slash** (*optional*) Indicates the number lines added to the mensuration sign. For example, one slash is added for what we now call 'alla breve'. Value is a positive integer.

att.staffDef.vis → @mensur.slash

**@meter.form** (*optional*) Contains an indication of how the meter signature should be rendered. Value conforms to [data.METERFORM](#).

att.staffDef.vis → @meter.form

**@meter.showchange** (*optional*) Determines whether the old meter signature should be displayed when the meter signature changes. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @meter.showchange

**@meter.visible** (*optional*) Determines whether the meter signature is to be displayed. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @meter.visible

**@multi.number** (*optional*) Indicates whether programmatically calculated counts of multiple measures of rest (mRest) and whole measure repeats (mRpt) in parts should be rendered. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @multi.number

**@music.name** (*optional*) Sets the default music font name. Value conforms to [data.MUSICFONT](#).

att.staffDef.vis → @music.name

**@music.size** (*optional*) Sets the default music font size. Value conforms to [data.FONTSIZE](#).

att.staffDef.vis → @music.size

**@ontheline** (*optional*) Determines the placement of notes on a 1-line staff. A value of 'true' places all notes on the line, while a value of 'false' places stems-up notes above the line and stems-down notes below the line. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @ontheline

**@pedal.style** (*optional*) Determines whether piano pedal marks should be rendered as lines or as terms. Value conforms to [data.PEDALSTYLE](#).

att.staffDef.vis → @pedal.style

**@reh.dist** (*optional*) Records the default distance from the staff for rehearsal marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.staffDef.vis → @reh.dist

**@reh.enclose** (*optional*) Describes the enclosing shape for rehearsal marks. Allowed values are: "**box**" (*Enclosed by box.*), "**circle**" (*Enclosed by circle.*), "**none**" (*No enclosing shape.*)

att.staffDef.vis → @reh.enclose

**@scale** (*optional*) Scale factor to be applied to the feature to make it the desired display size. Value conforms to [data.PERCENT](#).

att.staffDef.vis → @scale

**@slur.lform** Value conforms to [data.LINEFORM](#).

att.staffDef.vis → @slur.lform

**@slur.lwidth** Value conforms to [data.LINEWIDTH](#).

att.staffDef.vis → @slur.lwidth

**@spacing** (*optional*) Records the absolute distance (as opposed to the relative distances recorded in [<scoreDef>](#) elements) between this staff and the preceding one in the same system. This value is meaningless for the first staff in a system since the [spacing.system](#) attribute indicates the spacing between systems. Value conforms to [data.MEASUREMENTSIGNED](#).

att.staffDef.vis → @spacing

**@tempo.dist** (*optional*) Records the default distance from the staff for tempo marks. Value conforms to [data.MEASUREMENTSIGNED](#).

att.staffDef.vis → @tempo.dist

**@text.fam** (*optional*) Provides a default value for the font family name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTFAMILY](#).

att.staffDef.vis → @text.fam

**@text.name** (*optional*) Provides a default value for the font name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTNAME](#).

att.staffDef.vis → @text.name

**@text.size** (*optional*) Provides a default value for the font size of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSIZE](#).

att.staffDef.vis → @text.size

**@text.style** (*optional*) Provides a default value for the font style of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSTYLE](#).

att.staffDef.vis → @text.style

**@text.weight** (*optional*) Provides a default value for the font weight for text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTWEIGHT](#).

att.staffDef.vis → @text.weight

**@tie.lform** Value conforms to [data.LINEFORM](#).

att.staffDef.vis → @tie.lform

**@tie.lwidth** Value conforms to [data.LINEWIDTH](#).

att.staffDef.vis → @tie.lwidth

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis → @visible

## Available at

# att.staffDef.vis.mensural

Visual domain attributes for the mensural repertoire.

## Module

[MEI.mensural](#)

## Attributes

**@mensur.color** (*optional*) Records the color of the mensuration sign. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.staffDef.vis.mensural → @mensur.color

**@mensur.dot** (*optional*) Determines if a dot is to be added to the base symbol. Value conforms to [data.BOOLEAN](#).

att.staffDef.vis.mensural → @mensur.dot

**@mensur.form** (*optional*) Indicates whether the base symbol is written vertically or horizontally. Allowed values are: "**horizontal**" (*Horizontally oriented.*), "**vertical**" (*Vertically oriented.*)

att.staffDef.vis.mensural → @mensur.form

**@mensur.loc** (*optional*) Holds the staff location of the mensuration sign. Value conforms to [data.STAFFLOC](#).

att.staffDef.vis.mensural → @mensur.loc

**@mensur.orient** (*optional*) Describes the rotation or reflection of the base symbol. Value conforms to [data.ORIENTATION](#).

att.staffDef.vis.mensural → @mensur.orient

**@mensur.sign** (*optional*) The base symbol in the mensuration sign/time signature of mensural notation. Value conforms to [data.MENSURATIONSIGN](#).

att.staffDef.vis.mensural → @mensur.sign

**@mensur.size** (*optional*) Describes the relative size of the mensuration sign. Value conforms to [data.FONTSIZE](#).

att.staffDef.vis.mensural → @mensur.size

**@mensur.slash** (*optional*) Indicates the number lines added to the mensuration sign. For example, one slash is added for what we now call 'alla breve'. Value is a positive integer.

att.staffDef.vis.mensural → @mensur.slash

## Available at

DEVELOPMENT  
VERSION

## att.staffGroupingSym

Attributes that describe the symbol used to group a set of staves.

### Module

[MEI.shared](#)

### Attributes

**@symbol** (*optional*) Specifies the symbol used to group a set of staves. Allowed values are: "**brace**" (*Curved symbol, , {,}*), "**bracket**" (*Square symbol, , [, but with curved/angled top and bottom segments.*), "**bracketsq**" (*Square symbol, , [, with horizontal top and bottom segments.*), "**line**" (*Line symbol, , |, (wide) line without top and bottom curved/horizontal segments.*), "**none**" (*Grouping symbol missing.*)  
 att.staffGroupingSym → @symbol

### Available at

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.staffGroupingSym → <grpSym>

**<staffGrp>** A group of bracketed or braced staves.

att.staffGroupingSym → <staffGrp>

### Declaration

```
<classSpec ident="att.staffGroupingSym" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe the symbol used to group a set of staves.</desc>
  <attList>

## att.staffGrp.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@bar.len** (*optional*) States the length of bar lines in virtual units. The value must be greater than 0 and is typically equal to 2 times (the number of staff lines - 1); e.g., a value of 8 for a 5-line staff. Value is a decimal number.

att.staffGrp.vis → @bar.len

**@bar.method** (*optional*) Records the method of barring. Value conforms to [data.BARMETHOD](#).

att.staffGrp.vis → @bar.method

**@bar.place** (*optional*) Denotes the staff location of bar lines, if the length is non-standard; that is, not equal to 2 times (the number of staff lines - 1). Value conforms to [data.STAFFLOC](#).

att.staffGrp.vis → @bar.place

**@bar.thru** (*optional*) Indicates whether bar lines go across the space between staves (true) or are only drawn across the lines of each staff (false). Value conforms to [data.BOOLEAN](#).

att.staffGrp.vis → @bar.thru

**@symbol** (*optional*) Specifies the symbol used to group a set of staves. Allowed values are: "**brace**" (*Curved symbol, , {,}*), "**bracket**" (*Square symbol, , [, but with curved/angled top and bottom segments.*), "**bracketsq**" (*Square symbol, , [, with horizontal top and bottom segments.*), "**line**" (*Line symbol, , |, (wide) line without top and bottom curved/horizontal segments.*), "**none**" (*Grouping symbol missing.*)

att.staffGrp.vis → @symbol

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.staffGrp.vis → @visible

### Available at

**<staffGrp>** A group of bracketed or braced staves.

att.staffGrp.vis → <staffGrp>

### Declaration

```

## att.staffIdent

Attributes for identifying the staff associated with the current feature.

### Referenced in chapters

[8.4 Vocally Performed Text Encoded Separately](#)

### Module

[MEI.shared](#)

### Attributes

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.staffIdent → @staff

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.staffIdent → <accid>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.staffIdent → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.staffIdent → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.staffIdent → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.staffIdent → <attacca>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.staffIdent → <bTrem>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.staffIdent → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.staffIdent → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.staffIdent → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.staffIdent → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.staffIdent → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.staffIdent → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.staffIdent → <caesura>

**<cc>** MIDI parameter/control change.

att.staffIdent → <cc>

**<chan>** MIDI channel assignment.

att.staffIdent → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.staffIdent → <chanPr>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.staffIdent → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.staffIdent → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.staffIdent → <clefGrp>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.staffIdent → <cpMark>

**<cue>** MIDI cue point.

att.staffIdent → <cue>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.staffIdent → <dir>

**<dot>** Dot of augmentation or division.

att.staffIdent → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.staffIdent → <dynam>

**<episema>** Episema.

att.staffIdent → <episema>

**<f>** Single element of a figured bass indication.

att.staffIdent → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.staffIdent → <fTrem>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.staffIdent → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.staffIdnt → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.staffIdnt → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.staffIdnt → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.staffIdnt → <graceGrp>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.staffIdnt → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.staffIdnt → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.staffIdnt → <harm>

**<harpPedal>** Harp pedal diagram.

att.staffIdnt → <harpPedal>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.staffIdnt → <hex>

**<hispanTick>** Hispanic tick.

att.staffIdnt → <hispanTick>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.staffIdnt → <lg>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.staffIdnt → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.staffIdnt → <lv>

**<mRest>** Complete measure rest in any meter.

att.staffIdnt → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.staffIdnt → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.staffIdnt → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.staffIdnt → <mSpace>

**<marker>** MIDI marker meta-event.

att.staffIdnt → <marker>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.staffIdent → <metaMark>

**<metaText>** MIDI text meta-event.

att.staffIdent → <metaText>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.staffIdent → <midi>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.staffIdent → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.staffIdent → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.staffIdent → <multiRpt>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.staffIdent → <nc>

**<ncGrp>** Collection of one or more neume components.

att.staffIdent → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.staffIdent → <neume>

**<note>** A single pitched event.

att.staffIdent → <note>

**<noteOff>** MIDI note-off event.

att.staffIdent → <noteOff>

**<noteOn>** MIDI note-on event.

att.staffIdent → <noteOn>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.staffIdent → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.staffIdent → <ornam>

**<pad>** An indication of extra visual space between notational elements.

att.staffIdent → <pad>

**<pedal>** Piano pedal mark.

att.staffIdent → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.staffIdent → <phrase>

**<port>** MIDI port.

att.staffIdent → <port>

**<prog>** MIDI program change.

att.staffIdenti → <prog>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.staffIdenti → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.staffIdenti → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.staffIdenti → <rest>

**<seqNum>** MIDI sequence number.

att.staffIdenti → <seqNum>

**<signifLet>** Significantive letter(s).

att.staffIdenti → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.staffIdenti → <slur>

**<sp>** Contains an individual speech in a performance text.

att.staffIdenti → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.staffIdenti → <space>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.staffIdenti → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.staffIdenti → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.staffIdenti → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.staffIdenti → <trill>

**<trkName>** MIDI track/sequence name.

att.staffIdenti → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.staffIdenti → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.staffIdenti → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.staffIdenti → <turn>

**<vel>** MIDI Note-on/off velocity.

att.staffIdent → <vel>

## Declaration

## att.staffItems

Attributes that describe items printed near (above, below, or between) staves

### Module

MEI.shared

### Attributes

**@aboveorder** Describes vertical order of items printed above a staff, from closest to farthest away from the staff. One or more values from [data.STAFFITEM](#), separated by spaces.

att.staffItems → @aboveorder

**@beloworder** Describes vertical order of items printed below a staff, from closest to farthest away from the staff. One or more values from [data.STAFFITEM](#), separated by spaces.

att.staffItems → @beloworder

**@betweenorder** Describes vertical order of items printed between staves, from top to bottom. One or more values from [data.STAFFITEM](#), separated by spaces.

att.staffItems → @betweenorder

### Available at

**<scoreDef>** Container for score meta-information.

att.staffItems → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.staffItems → <staffDef>

### Declaration

DEVELOPMENT  
VERSION

## att.staffLoc

Attributes that identify location on a staff in terms of lines and spaces.

### Referenced in chapters

[6.4.3 Custos attributes](#)

### Module

[MEI.shared](#)

### Attributes

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.staffLoc → @loc

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.staffLoc → <accid>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.staffLoc → <ambNote>

**<artic>** An indication of how to play a note or chord.

att.staffLoc → <artic>

**<breathe>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.staffLoc → <breathe>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.staffLoc → <caesura>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.staffLoc → <custos>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.staffLoc → <divLine>

**<dot>** Dot of augmentation or division.

att.staffLoc → <dot>

**<episema>** Episema.

att.staffLoc → <episema>

**<hispanTick>** Hispanic tick.

att.staffLoc → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.staffLoc → <keyAccid>

**<liquegent>** Liquescent.

att.staffLoc → <liquegent>

**<mRest>** Complete measure rest in any meter.

att.staffLoc → <mRest>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.staffLoc → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.staffLoc → <mensuration>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.staffLoc → <multiRest>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.staffLoc → <nc>

**<ncGrp>** Collection of one or more neume components.

att.staffLoc → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.staffLoc → <neume>

**<note>** A single pitched event.

att.staffLoc → <note>

**<oriscus>** Oriscus.

att.staffLoc → <oriscus>

**<proport>** Description of note duration as arithmetic ratio.

att.staffLoc → <proport>

**<quilisma>** Quilisma.

att.staffLoc → <quilisma>

**<rest>** A non-sounding event found in the source being transcribed.

att.staffLoc → <rest>

**<signifLet>** Significantive letter(s).

att.staffLoc → <signifLet>

**<strophicus>** Strophicus.

att.staffLoc → <strophicus>

## att.staffLoc.pitched

Attributes that identify location on a staff in terms of pitch and octave.

### Module

[MEI.shared](#)

### Attributes

**@oloc** (*optional*) Records staff location in terms of written octave. Value conforms to [data.OCTAVE](#).  
att.staffLoc.pitched → @oloc

**@ploc** (*optional*) Captures staff location in terms of written pitch name. Value conforms to [data.PITCHNAME](#).  
att.staffLoc.pitched → @ploc

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.staffLoc.pitched → <accid>

**<artic>** An indication of how to play a note or chord.

att.staffLoc.pitched → <artic>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.staffLoc.pitched → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.staffLoc.pitched → <caesura>

**<dot>** Dot of augmentation or division.

att.staffLoc.pitched → <dot>

**<mRest>** Complete measure rest in any meter.

att.staffLoc.pitched → <mRest>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.staffLoc.pitched → <multiRest>

**<rest>** A non-sounding event found in the source being transcribed.

att.staffLoc.pitched → <rest>

### Declaration

## att.stageDir.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.stageDir.anl → <stageDir>

#### Declaration

```
<classSpec ident="att.stageDir.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.stageDir.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.stageDir.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.stageDir.ges → @tstamp2.real

### Available at

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.stageDir.ges → <stageDir>

### Declaration

```
<classSpec ident="att.stageDir.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

# att.stageDir.log

Logical domain attributes.

## Module

[MEI.drama](#)

## Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.stageDir.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.stageDir.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.stageDir.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.stageDir.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.stageDir.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.stageDir.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.stageDir.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.stageDir.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.stageDir.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.stageDir.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.stageDir.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.stageDir.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.stageDir.log → @when

## Available at

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.stageDir.log → <stageDir>

## Declaration

```
<classSpec ident="att.stageDir.log" module="MEI.drama" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>

    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

# att.stageDir.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.stageDir.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.stageDir.vis → @endto

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.stageDir.vis → @ho

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.stageDir.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.stageDir.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.stageDir.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.stageDir.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.stageDir.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.stageDir.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.stageDir.vis → @y

**Available at**

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.stageDir.vis → <stageDir>

**Declaration**

```
<classSpec ident="att.stageDir.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.visualOffset2.ho"/>
    <memberOf key="att.visualOffset2.to"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.startEndId

Attributes recording the identifiers of the first and last elements of a sequence of elements to which the current element is associated.

### Referenced in chapters

[1.2.2 Events and Controlevents](#)

### Module

[MEI.shared](#)

### Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.startEndId → @endid

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.startEndId → @startid

### Available at

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.startEndId → <annot>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.startEndId → <attacca>

**<barre>** A barre in a chord tablature grid.

att.startEndId → <barre>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.startEndId → <beamSpan>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.startEndId → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.startEndId → <bracketSpan>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.startEndId → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.startEndId → <curve>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#),

[<dynam>](#) or [<repeatMark>](#).

att.startEndId → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.startEndId → <dynam>

**<f>** Single element of a figured bass indication.

att.startEndId → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.startEndId → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.startEndId → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.startEndId → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.startEndId → <gliss>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.startEndId → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.startEndId → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.startEndId → <harm>

**<harpPedal>** Harp pedal diagram.

att.startEndId → <harpPedal>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.startEndId → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.startEndId → <lv>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.startEndId → <metaMark>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.startEndId → <mordent>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.startEndId → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.startEndId → <ornam>

**<pedal>** Piano pedal mark.

att.startEndId → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.startEndId → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.startEndId → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.startEndId → <slur>

**<sp>** Contains an individual speech in a performance text.

att.startEndId → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.startEndId → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.startEndId → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.startEndId → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.startEndId → <trill>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.startEndId → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.startEndId → <tupletSpan>

## Constraints

@endid attribute should have content.

The value in @endid should correspond to the @xml:id attribute of an element.

## Declaration

```

<classSpec ident="att.startEndId" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes recording the identifiers of the first and last elements of

## att.startId

Attributes that identify a relative starting point.

### Referenced in chapters

[1.2.2 Events and Controlevents](#)

### Module

[MEI.shared](#)

### Attributes

**@startId** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.startId → @startid

### Available at

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.startId → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.startId → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.startId → <arpeg>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.startId → <attacca>

**<barre>** A barre in a chord tablature grid.

att.startId → <barre>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.startId → <beamSpan>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.startId → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.startId → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.startId → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.startId → <caesura>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.startId → <clip>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.startId → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.startId → <curve>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.startId → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.startId → <dynam>

**<f>** Single element of a figured bass indication.

att.startId → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.startId → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.startId → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.startId → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.startId → <gliss>

**<graphic>** Indicates the location of an inline graphic.

att.startId → <graphic>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.startId → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.startId → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.startId → <harm>

**<harpPedal>** Harp pedal diagram.

att.startId → <harpPedal>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.startId → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.startId → <lv>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.startId → <metaMark>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.startId → <mordent>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.startId → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.startId → <ornam>

**<pedal>** Piano pedal mark.

att.startId → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.startId → <phrase>

**<recording>** A recorded performance.

att.startId → <recording>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.startId → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.startId → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.startId → <slur>

**<sp>** Contains an individual speech in a performance text.

att.startId → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.startId → <stageDir>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.startId → <surface>

**<symbol>** A reference to a previously defined symbol.

att.startId → <symbol>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.startId → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.startId → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.startId → <trill>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.startId → <tuplet>

**<tupletSpan>** Alternative element for encoding tuples, especially useful for tuples that extend across bar lines.

att.startId → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.startId → <turn>

## Constraints

@startid attribute should have content.

The value in @startid should correspond to the @xml:id attribute of an element.

## Declaration

```
<classSpec ident="att.startId" module="MEI.shared" type="atts">

## att.stem.anl

Analytical domain attributes that describe the properties of a stem in the mensural repertoire.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<stem>** A stem element.

att.stem.anl → <stem>

#### Declaration

```
<classSpec ident="att.stem.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes that describe the properties of a stem in
  the mensural repertoire.</desc>
</classSpec>
```

## att.stem.ges

Gestural domain attributes that describe the properties of a stem in the mensural repertoire.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<stem>** A stem element.

att.stem.ges → <stem>

#### Declaration

```
<classSpec ident="att.stem.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes that describe the properties of a stem in
  the mensural repertoire.</desc>
</classSpec>
```

## att.stem.log

Logical domain attributes that describe the properties of a stem in the mensural repertoire.

### Module

[MEI.mensural](#)

### Attributes

#### Available at

**<stem>** A stem element.

att.stem.log → <stem>

#### Declaration

```
<classSpec ident="att.stem.log" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Logical domain attributes that describe the properties of a stem in
  the mensural repertoire.</desc>
</classSpec>
```

## att.stem.vis

Visual domain attributes that describe the properties of a stem in the mensural repertoire.

### Referenced in chapters

[5.6.2 Stems](#)

### Module

[MEI.visual](#)

### Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.stem.vis → @color

**@dir** (*optional*) Describes the direction of a stem. Value conforms to [data.STEMDIRECTION](#).

att.stem.vis → @dir

**@flag.form** (*optional*) Encodes the form of the flag using the values provided by the data.FLAGFORM.mensural datatype. Value conforms to [data.FLAGFORM.mensural](#).

att.stem.vis → @flag.form

**@flag.pos** (*optional*) Records the position of the flag using the values provided by the data.FLAGPOS.mensural datatype. Value conforms to [data.FLAGPOS.mensural](#).

att.stem.vis → @flag.pos

**@form** (*optional*) Encodes the form of the stem using the values provided by the data.STEMFORM.mensural datatype. Value conforms to [data.STEMFORM.mensural](#).

att.stem.vis → @form

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of glyph.name or glyph.num is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.stem.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.stem.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.stem.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of glyph.name or glyph.num is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.stem.vis → @glyph.uri

**@len** (*optional*) Encodes the stem length. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.stem.vis → @len

**@pos** (*optional*) Records the position of the stem in relation to the note head(s). Value conforms to [data.STEMPOSITION](#).

att.stem.vis → @pos

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.stem.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the *facsimile* attribute. Value is a decimal number.

att.stem.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the *facsimile* attribute. Value is a decimal number.

att.stem.vis → @y

## Available at

**<stem>** A stem element.

att.stem.vis → <stem>

## att.stems

Attributes that describe the properties of stemmed features; that is, chords and notes.

### Referenced in chapters

[2.2.3 Basic Music Events](#), [5.6.2 Stems](#)

### Module

[MEI.shared](#)

### Attributes

**@stem.dir** (*optional*) Describes the direction of a stem. Value conforms to [data.STEMDIRECTION](#).

att.stems → @stem.dir

**@stem.form** (*optional*) Records the form of the stem. Value conforms to [data.STEMFORM.mensural](#).

att.stems → @stem.form

**@stem.len** (*optional*) Encodes the stem length. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.stems → @stem.len

**@stem.mod** (*optional*) Encodes any stem "modifiers"; that is, symbols rendered on the stem, such as tremolo or Sprechstimme indicators. Value conforms to [data.STEMMODIFIER](#).

att.stems → @stem.mod

**@stem.pos** (*optional*) Records the position of the stem in relation to the note head(s). Value conforms to [data.STEMPOSITION](#).

att.stems → @stem.pos

**@stem.sameas** (*optional*) Points to a note element in a different layer whose stem is shared. The linked notes should be rendered like a chord though they are part of different layers. Value conforms to [data.URI](#).

att.stems → @stem.sameas

**@stem.visible** (*optional*) Determines whether a stem should be displayed. Value conforms to [data.BOOLEAN](#).

att.stems → @stem.visible

**@stem.with** (*optional*) Contains an indication of which staff a note or chord that logically belongs to the current staff should be visually placed on; that is, the one above or the one below. Value conforms to [data.NEIGHBORINGLAYER](#).

att.stems → @stem.with

**@stem.x** (*optional*) Records the output x coordinate of the stem's attachment point. Value is a decimal number.

att.stems → @stem.x

**@stem.y** (*optional*) Records the output y coordinate of the stem's attachment point. Value is a decimal number.

att.stems → @stem.y

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.stems → <ambNote>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.stems → <chord>

**<note>** A single pitched event.

att.stems → <note>

## Constraints

@stem.sameas attribute should have content.

The value in @stem.sameas should correspond to the @xml:id attribute of the linked note element of a different layer.

The linked notes by @stem.sameas should have the same @dur values.

## Declaration

```
<classSpec ident="att.stems" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe the properties of stemmed features; that is,
  chords and notes.</desc>
  <classes>
    <memberOf key="att.stems.cmn"/>
    <memberOf key="att.stems.mensural"/>
  </classes>
  <attList>
    <attDef ident="stem.dir" usage="opt">

DEVELOPMENT  
VERSION

## att.stems.cmn

Attributes that describe the properties of stemmed features; that is, chords and notes.

### Referenced in chapters

[4.2.5.2.2 Stem Modifications](#)

### Module

[MEI.cmn](#)

### Attributes

**@stem.with** (*optional*) Contains an indication of which staff a note or chord that logically belongs to the current staff should be visually placed on; that is, the one above or the one below. Value conforms to [data.NEIGHBORINGLAYER](#).

att.stems.cmn → @stem.with

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.stems.cmn → <ambNote>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.stems.cmn → <chord>

**<note>** A single pitched event.

att.stems.cmn → <note>

### Declaration

```

<classSpec ident="att.stems.cmn" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that describe the properties of stemmed features; that is,
  chords and notes.</desc>
  <attList>
    <attDef ident="stem.with" usage="opt">
      <desc xml:lang="en">Contains an indication of which staff a note or chord that
      logically belongs to the current staff should be visually placed on; that is, the one
      above or the one below.</desc>
      <datatype>
        <rng:ref name="data.NEIGHBORINGLAYER"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

## att.stems.mensural

Attributes that describe the properties of stemmed features specific to mensural repertoires.

### Referenced in chapters

[5.6.2 Stems](#)

### Module

[MEI.mensural](#)

### Attributes

**@stem.form** (*optional*) Records the form of the stem. Value conforms to [data.STEMFORM.mensural](#).

att.stems.mensural → @stem.form

### Available at

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.stems.mensural → <ambNote>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.stems.mensural → <chord>

**<note>** A single pitched event.

att.stems.mensural → <note>

### Declaration

```
<classSpec ident="att.stems.mensural" module="MEI.mensural" type="atts">
  <desc xml:lang="en">Attributes that describe the properties of stemmed features specific
  to mensural repertoires.</desc>
  <attList>
    <attDef ident="stem.form" usage="opt">
      <desc xml:lang="en">Records the form of the stem.</desc>
      <datatype maxOccurs="1" minOccurs="1">
        <rng:ref name="data.STEMFORM.mensural"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.stringtab

String tablature string and fret information.

### Referenced in chapters

[10.2.1.1 Interpreted Chord Data in scoreDef](#)

### Module

[MEI.stringtab](#)

### Attributes

**@tab.fing** (*optional*) Indicates which finger, if any, should be used to play an individual string. The index, middle, ring, and little fingers are represented by the values 1-4, while t is for the thumb. The values x and o indicate muffled and open strings, respectively. Value conforms to [data.FINGER.FRET](#).

att.stringtab → @tab.fing

**@tab.fret** (*optional*) Records the location at which a string should be stopped against a fret. Value conforms to [data.FRETNUMBER](#).

att.stringtab → @tab.fret

**@tab.string** (*optional*) Records which string is to be played. Value conforms to [data.STRINGNUMBER](#).

att.stringtab → @tab.string

### Available at

**<chordMember>** An individual pitch in a chord defined by a [<chordDef>](#) element.

att.stringtab → <chordMember>

**<note>** A single pitched event.

att.stringtab → <note>

### Declaration

```

<classSpec ident="att.stringtab" module="MEI.stringtab" type="atts">
  <desc xml:lang="en">String tablature string and fret information.</desc>
  <attList>
    <attDef ident="tab.fing" usage="opt">
      <desc xml:lang="en">Indicates which finger, if any, should be used to play an
      individual string. The index, middle, ring, and little fingers are represented by the
      values 1-4, while
        <val>t</val>
      is for the thumb. The values
        <val>x</val>
      and
        <val>o</val>
      indicate muffled and open strings, respectively.</desc>
      <datatype>
        <rng:ref name="data.FINGER.FRET"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>

```

```
</attDef>
<attDef ident="tab.fret" usage="opt">
    <desc xml:lang="en">Records the location at which a string should be stopped against a
    fret.</desc>
    <datatype>
        <rng:ref name="data.FRETNUMBER"/>
    </datatype>
</attDef>
<attDef ident="tab.string" usage="opt">
    <desc xml:lang="en">Records which string is to be played.</desc>
    <datatype>
        <rng:ref name="data.STRINGNUMBER"/>
    </datatype>
</attDef>
</attList>
</classSpec>
```

## att.stringtab.position

String tablature position information.

### Referenced in chapters

[10.2.1.1 Interpreted Chord Data in scoreDef](#)

### Module

[MEI.stringtab](#)

### Attributes

**@tab.pos** (*optional*) Records fret position. Value is a positive integer.

att.stringtab.position → @tab.pos

### Available at

**<chordDef>** Chord tablature definition.

att.stringtab.position → <chordDef>

### Declaration

```
<classSpec ident="att.stringtab.position" module="MEI.stringtab" type="atts">
  <desc xml:lang="en">String tablature position information.</desc>
  <attList>
    <attDef ident="tab.pos" usage="opt">
      <desc xml:lang="en">Records fret position.</desc>
      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.stringtab.tuning

String tablature tuning information.

### Module

[MEI.stringtab](#)

### Attributes

**@tab.strings** (*optional*) Provides a \*written\* pitch and octave for each open string or course of strings.  
One or more values conforming to the pattern "[a-g][0-9](s|f|ss|x|ff|xs|sx|ts|tf|n|nf|ns|su|sd|fu|fd|nu|nd|1qf|3qf|1qs|3qs)?([a-g][0-9](s|f|ss|x|ff|xs|sx|ts|tf|n|nf|ns|su|sd|fu|fd|nu|nd|1qf|3qf|1qs|3qs)?)\*".  
att.stringtab.tuning → @tab.strings

### Available at

**<chordDef>** Chord tablature definition.

att.stringtab.tuning → <chordDef>

**<staffDef>** Container for staff meta-information.

att.stringtab.tuning → <staffDef>

### Declaration

```
<classSpec ident="att.stringtab.tuning" module="MEI.stringtab" type="atts">
  <desc xml:lang="en">String tablature tuning information.</desc>
  <attList>
    <attDef ident="tab.strings" usage="opt">
      <desc xml:lang="en">Provides a *written* pitch and octave for each open string or
      course of strings.</desc>
      <datatype>
        <rng:list>
          <rng:oneOrMore>
            <rng:data type="token">
              <rng:param name="pattern">
                [a-g][0-9](s|f|ss|x|ff|xs|sx|ts|tf|n|nf|ns|su|sd|fu|fd|nu|nd
                |1qf|3qf|1qs|3qs)?([a-g][0-9](s|f|ss|x|ff|xs|sx|ts|tf|n|nf|n
                s|su|sd|fu|fd|nu|nd|1qf|3qf|1qs|3qs)?)*
              </rng:param>
            </rng:data>
          </rng:oneOrMore>
        </rng:list>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.strophicus.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

### Available at

**<strophicus>** Strophicus.

att.strophicus.anl → <strophicus>

### Declaration

```
<classSpec ident="att.strophicus.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.strophicus.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

[\*\*<strophicus>\*\*](#) Strophicus.

att.strophicus.ges → <strophicus>

#### Declaration

```
<classSpec ident="att.strophicus.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.strophicus.log

Logical domain attributes.

## Module

[MEI.neumes](#)

## Attributes

### Available at

**<strophicus>** Strophicus.

att.strophicus.log → <strophicus>

### Declaration

```
<classSpec ident="att.strophicus.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
</classSpec>
```

## att.strophicus.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.strophicus.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.strophicus.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.strophicus.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.strophicus.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.strophicus.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.strophicus.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.strophicus.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.strophicus.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "**smufl**" (*Standard Music Font Layout*.)

att.strophicus.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.strophicus.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.strophicus.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.strophicus.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.strophicus.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPGRAPHYSIGNED](#).

att.strophicus.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.strophicus.vis → @lineheight

**@loc** (*optional*) Holds the staff location of the feature. Value conforms to [data.STAFFLOC](#).

att.strophicus.vis → @loc

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.strophicus.vis → @visible

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.strophicus.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `fac`s attribute. Value is a decimal number.

att.strophicus.vis → @y

## Available at

**<strophicus>** Strophicus.

att.strophicus.vis → <strophicus>

## Declaration

```
<classSpec ident="att.strophicus.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

  </classes>
</classSpec>
```

## att.syl.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<syl>** Individual lyric syllable.

att.syl.anl → <syl>

#### Declaration

```
<classSpec ident="att.syl.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.syl.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<syll>** Individual lyric syllable.

att.syl.ges → <syll>

#### Declaration

```
<classSpec ident="att.syl.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.syl.log

Logical domain attributes.

### Referenced in chapters

[8.2 Lyric Syllables](#)

### Module

[MEI.shared](#)

### Attributes

**@con** (*optional*) Describes the symbols typically used to indicate breaks between syllables and their functions. Allowed values are: "**s**" (Space (word separator).), "**d**" (Dash (syllable separator).), "**u**" (Underscore (syllable extension).), "**t**" (Tilde (syllable elision).), "**c**" (Circumflex [angled line above] (syllable elision).), "**v**" (Caron [angled line below] (syllable elision).), "**i**" (Inverted breve [curved line above] (syllable elision).), "**b**" (Breve [curved line below] (syllable elision).)

att.syl.log → @con

**@wordpos** (*optional*) Records the position of a syllable within a word. Allowed values are: "**i**" ((*initial*) first syllable.), "**m**" ((*medial*) neither first nor last syllable.), "**s**" ((*single*) single syllable.), "**t**" ((*terminal*) last syllable.)

att.syl.log → @wordpos

### Available at

**<syl>** Individual lyric syllable.

att.syl.log → <syl>

### Declaration

```
<classSpec ident="att.syl.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <attList>

## att.syl.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.syl.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.syl.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.syl.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.syl.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.syl.vis → @fontweight

**@halign** (*optional*) Records horizontal alignment. Value conforms to [data.HORIZONTALALIGNMENT](#).

att.syl.vis → @halign

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.syl.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.syl.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.syl.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.syl.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.syl.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.syl.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `fac` attribute. Value is a decimal number.

`att.syl.vis` → `@x`

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `fac` attribute. Value is a decimal number.

`att.syl.vis` → `@y`

## Available at

**<sy|>** Individual lyric syllable.

`att.syl.vis` → `<sy|>`

## Declaration

```
<classSpec ident="att.syl.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.placementRelStaff"/>
    <memberOf key="att.typography"/>

    <memberOf key="att.xy"/>
    <memberOf key="att.horizontalAlign"/>
  </classes>
  <!-- Is this constraint true in all cases? -->
  <!-- <constraintSpec ident="check_sylAncestor" scheme="schematron"> <constraint> <sch:rule
context="mei:syl[@place]"> <sch:assert test="not(ancestor::mei:verse or
ancestor::mei:refrain)">When syl is a descendant of a verse or refrain element, it cannot
have a @place attribute.</sch:assert> </sch:rule> </constraint> </constraintSpec> -->
</classSpec>
```

## att.sylText

Attributes that hold associated sung text syllables.

### Module

MEI.shared

### Attributes

**@syl** (*optional*) Holds an associated sung text syllable. Value is plain text.

att.sylText → @syl

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.  
att.sylText → <chord>

**<ncGrp>** Collection of one or more neume components.  
att.sylText → <ncGrp>

**<neume>** Sign representing one or more musical pitches.  
att.sylText → <neume>

**<note>** A single pitched event.  
att.sylText → <note>

### Declaration

```
<classSpec ident="att.sylText" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that hold associated sung text syllables.</desc>
  <attList>
    <attDef ident="syl" usage="opt">
      <desc xml:lang="en">Holds an associated sung text syllable.</desc>
      <datatype>
        <rng:data type="string"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.syllable.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.syllable.anl → <syllable>

#### Declaration

```
<classSpec ident="att.syllable.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.syllable.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.syllable.ges → <syllable>

### Declaration

```
<classSpec ident="att.syllable.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.syllable.log

Logical domain attributes.

## Module

MEI.neumes

## Attributes

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.syllable.log → @when

## Available at

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.syllable.log → <syllable>

## Declaration

```
<classSpec ident="att.syllable.log" module="MEI.neumes" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.alignment"/>
  </classes>
</classSpec>
```

## att.syllable.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

#### Available at

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.syllable.vis → <syllable>

#### Declaration

```
<classSpec ident="att.syllable.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
</classSpec>
```

## att.symbol.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<symbol>** A reference to a previously defined symbol.

att.symbol.anl → <symbol>

#### Declaration

```
<classSpec ident="att.symbol.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.symbol.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

#### Available at

**<symbol>** A reference to a previously defined symbol.

att.symbol.ges → <symbol>

#### Declaration

```
<classSpec ident="att.symbol.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

# att.symbol.log

Logical domain attributes.

## Module

MEI.shared

## Attributes

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.symbol.log → @startid

## Available at

**<symbol>** A reference to a previously defined symbol.

att.symbol.log → <symbol>

## Declaration

```
<classSpec ident="att.symbol.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.startId"/>
  </classes>
</classSpec>
```

## att.symbol.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.symbol.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.symbol.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.symbol.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.symbol.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.symbol.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.symbol.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.symbol.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.symbol.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.symbol.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.symbol.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.symbol.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.symbol.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.symbol.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.symbol.vis → @lineheight

**@scale** (*optional*) Scale factor to be applied to the feature to make it the desired display size. Value conforms to [data.PERCENT](#).

att.symbol.vis → @scale

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.symbol.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.symbol.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.symbol.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.symbol.vis → @y

## Available at

**<symbol>** A reference to a previously defined symbol.

att.symbol.vis → <symbol>

## Declaration

```
<classSpec ident="att.symbol.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.altSym"/>
    <memberOf key="att.color"/>
    <memberOf key="att.extSym"/>
    <memberOf key="att.scalable"/>
    <memberOf key="att.typography"/>
    <memberOf key="att.visualOffset"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.systems

Attributes that capture system layout information.

### Referenced in chapters

[4.2.2 Defining Score Parameters for CMN](#)

### Module

[MEI.shared](#)

### Attributes

**@system.leftline** (*optional*) Indicates whether the system starts with a continuous line connecting all staves, including single-staff systems. Do not confuse this with the heavy vertical line used as a grouping symbol. Value conforms to [data.BOOLEAN](#).

att.systems → @system.leftline

**@system.leftmar** (*optional*) Describes the amount of whitespace at the left system margin relative to page.leftmar. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.systems → @system.leftmar

**@system.rightmar** (*optional*) Describes the amount of whitespace at the right system margin relative to page.rightmar. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.systems → @system.rightmar

**@system.topmar** (*optional*) Describes the distance from page's top edge to the first system; used for first page only. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.systems → @system.topmar

### Available at

**<scoreDef>** Container for score meta-information.

att.systems → <scoreDef>

### Declaration

```
<classSpec ident="att.systems" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that capture system layout information.</desc>
  <attList>
    <attDef ident="system.leftline" usage="opt">

    <rng:ref name="data.MEASUREMENTUNSIGNED"/>
  </datatype>
</attDef>
</attList>
</classSpec>
```

## att.tabular

Attributes shared by table cells.

### Module

[MEI.figtable](#)

### Attributes

**@colspan** (*optional*) The number of columns spanned by this cell. Value is a positive integer.

att.tabular → @colspan

**@rowspan** (*optional*) The number of rows spanned by this cell. Value is a positive integer.

att.tabular → @rowspan

### Available at

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.tabular → <td>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.tabular → <th>

### Declaration

```
<classSpec ident="att.tabular" module="MEI.figtable" type="atts">
  <desc xml:lang="en">Attributes shared by table cells.</desc>
  <attList>
    <attDef ident="colspan" usage="opt">
      <desc xml:lang="en">The number of columns spanned by this cell.</desc>
      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
    <attDef ident="rowspan" usage="opt">

      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.targetEval

Attributes that deal with resolution of values in plist or target attributes.

### Module

[MEI.shared](#)

### Attributes

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)  
 att.targetEval → @evaluate

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.targetEval → <accid>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.targetEval → <analytic>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.targetEval → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.targetEval → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.targetEval → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.targetEval → <attacca>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.targetEval → <barLine>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.targetEval → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.targetEval → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.targetEval → <bend>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.targetEval → <biblStruct>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.targetEval → <bracketSpan>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.targetEval → <cpMark>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.targetEval → <dir>

**<dot>** Dot of augmentation or division.

att.targetEval → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.targetEval → <dynam>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.targetEval → <ending>

**<episema>** Episema.

att.targetEval → <episema>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.targetEval → <expansion>

**<f>** Single element of a figured bass indication.

att.targetEval → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.targetEval → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.targetEval → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.targetEval → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.targetEval → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.targetEval → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.targetEval → <harm>

**<harpPedal>** Harp pedal diagram.

att.targetEval → <harpPedal>

**<hispanTick>** Hispanic tick.

att.targetEval → <hispanTick>

**<item>** Single instance or exemplar of a source/manifestation.

att.targetEval → <item>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.targetEval → <lem>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.targetEval → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.targetEval → <lv>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.targetEval → <manifestation>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.targetEval → <measure>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.targetEval → <metaMark>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.targetEval → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.targetEval → <mordent>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.targetEval → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.targetEval → <ornam>

**<pedal>** Piano pedal mark.

att.targetEval → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.targetEval → <phrase>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.targetEval → <ptr>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.targetEval → <rdg>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.targetEval → <ref>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.targetEval → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.targetEval → <relation>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.targetEval → <repeatMark>

**<section>** Segment of music data.

att.targetEval → <section>

**<signifLet>** Significantive letter(s).

att.targetEval → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.targetEval → <slur>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.targetEval → <source>

**<sp>** Contains an individual speech in a performance text.

att.targetEval → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.targetEval → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.targetEval → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.targetEval → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.targetEval → <trill>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.targetEval → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.targetEval → <turn>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.targetEval → <work>

## Declaration

</attList>
</classSpec>
```

## att.tempo.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.tempo.anl → <tempo>

#### Declaration

```
<classSpec ident="att.tempo.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.tempo.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@midi.bpm** (*optional*) Captures the number of \*quarter notes\* per minute. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. Value conforms to [data.MIDIBPM](#).

att.tempo.ges → @midi.bpm

**@midi.mspb** (*optional*) Records the number of microseconds per \*quarter note\*. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. At 120 quarter notes per minute, each quarter note will last 500,000 microseconds. Value conforms to [data.MIDIMSPB](#).

att.tempo.ges → @midi.mspb

### Available at

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.tempo.ges → <tempo>

### Declaration

```
<classSpec ident="att.tempo.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.midiTempo"/>
  </classes>
</classSpec>
```

## att.tempo.log

Logical domain attributes.

### Module

[MEI.shared](#)

### Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tempo.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.tempo.log → @evaluate

**@func** Records the function of a tempo indication. Allowed values are: "**continuous**" (*Marks a gradual change of tempo, such as "accel." or "rit."*), "**instantaneous**" (*Represents a static tempo instruction, such as a textual term like "Adagio", a metronome marking like "J=70", or a combination of text and metronome indication.*), "**metricmod**" (*Captures a change in pulse rate (tempo) and/or pulse grouping (subdivision) in an "equation" of the form [tempo before change] = [tempo after change].*), "**precedente**" (*Indicates a change in pulse rate (tempo) and/or pulse grouping (subdivision) in an "equation" of the form [tempo after change] = [tempo before change]. The term "precedente" often appears following the "equation" to distinguish this kind of historical usage from the modern metric modulation form.*)

att.tempo.log → @func

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.tempo.log → @layer

**@mm** (*optional*) Used to describe tempo in terms of beats (often the meter signature denominator) per minute, ala M.M. (Maelzel's Metronome). Do not confuse this attribute with midi.bpm or midi.mspp. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. Value conforms to [data.TEMPOVALUE](#).

att.tempo.log → @mm

**@mm.dots** (*optional*) Records the number of augmentation dots required by a dotted metronome unit. Value conforms to [data.AUGMENTDOT](#).

att.tempo.log → @mm.dots

**@mm.unit** (*optional*) Captures the metronomic unit. Value conforms to [data.DURATION](#).

att.tempo.log → @mm.unit

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.tempo.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.tempo.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.tempo.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.tempo.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tempo.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tempo.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tempo.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.tempo.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.tempo.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.tempo.log → @when

## Available at

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.tempo.log → <tempo>

## Declaration

# att.tempo.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tempo.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.tempo.vis → @endto

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.tempo.vis → @extender

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tempo.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.tempo.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.tempo.vis → @lendsym.size

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.tempo.vis → @lform

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.tempo.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.tempo.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.tempo.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.tempo.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.tempo.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tempo.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.tempo.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.tempo.vis → @to

**@vgrp** (*optional*) Provides a label for members of a vertically aligned group. Value is a positive integer.

att.tempo.vis → @vgrp

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tempo.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.tempo.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.tempo.vis → @y

## Available at

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.tempo.vis → <tempo>

## Declaration

```
<classSpec ident="att.tempo.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>

    <memberOf key="att.visualOffset2.to"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.textRendition

Attributes that record renditional characteristics.

### Referenced in chapters

[9.2.2 Text Rendition](#)

### Module

[MEI.shared](#)

### Attributes

**@altrend** (*optional*) Used to extend the values of the rend attribute. One or more values of datatype **NMTOKEN**, separated by spaces.

att.textRendition → @altrend

**@rend** (*optional*) Captures the appearance of the element's contents using MEI-defined descriptors. One or more values from [data.TEXTRENDITION](#), separated by spaces.

att.textRendition → @rend

### Available at

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.textRendition → <del>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.textRendition → <rend>

### Declaration

```

<classSpec ident="att.textRendition" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record renditional characteristics.</desc>

DEVELOPMENT  
VERSION

## att.textStyle

Attributes that describe default text typography.

### Referenced in chapters

[4.2.2 Defining Score Parameters for CMN](#)

### Module

[MEI.shared](#)

### Attributes

**@text.fam** (*optional*) Provides a default value for the font family name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTFAMILY](#).

att.textStyle → @text.fam

**@text.name** (*optional*) Provides a default value for the font name of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTNAME](#).

att.textStyle → @text.name

**@text.size** (*optional*) Provides a default value for the font size of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSIZE](#).

att.textStyle → @text.size

**@text.style** (*optional*) Provides a default value for the font style of text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTSTYLE](#).

att.textStyle → @text.style

**@text.weight** (*optional*) Provides a default value for the font weight for text (other than lyrics) when this information is not provided on the individual elements. Value conforms to [data.FONTWEIGHT](#).

att.textStyle → @text.weight

### Available at

**<layerDef>** Container for layer meta-information.

att.textStyle → <layerDef>

**<scoreDef>** Container for score meta-information.

att.textStyle → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.textStyle → <staffDef>

### Declaration

```

```

## att.tie.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.tie.anl → <tie>

#### Declaration

```
<classSpec ident="att.tie.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.tie.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.tie.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.tie.ges → @tstamp2.real

### Available at

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.tie.ges → <tie>

### Declaration

```
<classSpec ident="att.tie.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

# att.tie.log

Logical domain attributes.

## Module

[MEI.cmn](#)

## Attributes

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tie.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.tie.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.tie.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.tie.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.tie.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.tie.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.tie.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tie.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tie.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tie.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).  
att.tie.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.tie.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.tie.log → @when

## Available at

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.tie.log → <tie>

## Declaration

```
<classSpec ident="att.tie.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
</classSpec>
```

## att.tie.vis

Visual domain attributes. The vo attribute is the vertical offset (from its normal position) of the entire rendered tie. The startho, startvo, endho, and endvo attributes describe the horizontal and vertical offsets of the start and end points of the tie in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Startto and endto describe the start and end points in terms of time; that is, beats.

### Module

[MEI.visual](#)

### Attributes

**@bezier** (*optional*) Records the placement of Bezier control points as a series of pairs of space-separated values; e.g., 19 45 -32 118. One or more values, each consisting of a sequence of **decimal** and **decimal** sub-values.

att.tie.vis → @bezier

**@bulge** (*optional*) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line. One or more of **decimal**.

att.tie.vis → @bulge

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.tie.vis → @color

**@curvedir** (*optional*) Describes a curve with a generic term indicating the direction of curvature. Allowed values are: "**above**" (*Upward curve.*), "**below**" (*Downward curve.*), "**mixed**" (*A "meandering" curve, both above and below the items it pertains to.*)

att.tie.vis → @curvedir

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tie.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.tie.vis → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tie.vis → @endvo

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tie.vis → @ho

**@lform** (*optional*) Describes the line style of a curve. Value conforms to [data.LINEFORM](#).

att.tie.vis → @lform

**@lwidth** (*optional*) Width of a curved line. Value conforms to [data.LINEWIDTH](#).

att.tie.vis → @lwidth

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tie.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.tie.vis → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tie.vis → @startvo

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.tie.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.tie.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.tie.vis → @x

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.

att.tie.vis → @x2

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.tie.vis → @y

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.

att.tie.vis → @y2

## Available at

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.tie.vis → <tie>

## Declaration

```
<classSpec ident="att.tie.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes. The vo attribute is the vertical offset
  (from its normal position) of the entire rendered tie. The startho, startvo, endho, and
  endvo attributes describe the horizontal and vertical offsets of the start and end points
```

of the tie in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Startto and endto describe the start and end points in terms of time; that is, beats.</desc>

```
<classes>
  <memberOf key="att.color"/>
  <memberOf key="att.visualOffset"/>
  <memberOf key="att.visualOffset2"/>
  <memberOf key="att.xy"/>
  <memberOf key="att.xy2"/>
  <memberOf key="att.curvature"/>
  <memberOf key="att.curveRend"/>
</classes>
</classSpec>
```

## att.tiePresent

Attributes that indicate the presence of a tie.

### Module

MEI.shared

### Attributes

**@tie** (*optional*) Indicates that this element participates in a tie. If visual information about the tie needs to be recorded, then a `<tie>` element should be employed. One or more values from `data.TIE`, separated by spaces.

att.tiePresent → @tie

### Available at

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.tiePresent → <chord>

**<note>** A single pitched event.

att.tiePresent → <note>

### Declaration

```
<classSpec ident="att.tiePresent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that indicate the presence of a tie.</desc>
  <attList>
    <attDef ident="tie" usage="opt">
      <desc xml:lang="en">Indicates that this element participates in a tie. If visual
      information about the tie needs to be recorded, then a
        <gi scheme="MEI">tie</gi>
      element should be employed.</desc>
      <datatype maxOccurs="unbounded">
        <rng:ref name="data.TIE"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.tieRend

Attributes that describe the rendition of ties.

### Module

MEI.cmn

### Attributes

**@tie.lform** Value conforms to [data.LINEFORM](#).

att.tieRend → @tie.lform

**@tie.lwidth** Value conforms to [data.LINEWIDTH](#).

att.tieRend → @tie.lwidth

### Available at

**<scoreDef>** Container for score meta-information.

att.tieRend → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.tieRend → <staffDef>

### Declaration

```
<classSpec ident="att.tieRend" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that describe the rendition of ties.</desc>
  <attList>
    <attDef ident="tie.lform">
      <datatype>
        <rng:ref name="data.LINEFORM"/>
      </datatype>
    </attDef>
    <attDef ident="tie.lwidth">
      <datatype>
        <rng:ref name="data.LINEWIDTH"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.timeBase

Attributes that record time-base information.

### Module

MEI.midi

### Attributes

**@ppq** (*optional*) Indicates the number of pulses (sometimes referred to as ticks or divisions) per quarter note. Unlike MIDI, MEI permits different values for a score and individual staves. Value is a positive integer.  
att.timeBase → @ppq

### Available at

**<scoreDef>** Container for score meta-information.

att.timeBase → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.timeBase → <staffDef>

### Declaration

```
<classSpec ident="att.timeBase" module="MEI.midi" type="atts">
  <desc xml:lang="en">Attributes that record time-base information.</desc>
  <attList>
    <attDef ident="ppq" usage="opt">
      <desc xml:lang="en">Indicates the number of pulses (sometimes referred to as ticks or
      divisions) per quarter note. Unlike MIDI, MEI permits different values for a score and
      individual staves.</desc>
      <datatype>
        <rng:data type="positiveInteger"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.timestamp.ges

Attributes that record a performed (as opposed to notated) time stamp.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.timestamp.ges → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.timestamp.ges → @tstamp.real

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.timestamp.ges → <accid>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.timestamp.ges → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.timestamp.ges → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.timestamp.ges → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.timestamp.ges → <attacca>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.timestamp.ges → <bTrem>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.timestamp.ges → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.timestamp.ges → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.timestamp.ges → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.timestamp.ges → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.timestamp.ges → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.timestamp.ges → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.timestamp.ges → <caesura>

**<cc>** MIDI parameter/control change.

att.timestamp.ges → <cc>

**<chan>** MIDI channel assignment.

att.timestamp.ges → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.timestamp.ges → <chanPr>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.timestamp.ges → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.timestamp.ges → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.timestamp.ges → <clefGrp>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.timestamp.ges → <cpMark>

**<cue>** MIDI cue point.

att.timestamp.ges → <cue>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.timestamp.ges → <dir>

**<dot>** Dot of augmentation or division.

att.timestamp.ges → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.timestamp.ges → <dynam>

**<f>** Single element of a figured bass indication.

att.timestamp.ges → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.timestamp.ges → <fTrem>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.timestamp.ges → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.timestamp.ges → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.timestamp.ges → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.timestamp.ges → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.timestamp.ges → <graceGrp>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.timestamp.ges → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.timestamp.ges → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.timestamp.ges → <harm>

**<harpPedal>** Harp pedal diagram.

att.timestamp.ges → <harpPedal>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.timestamp.ges → <hex>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.timestamp.ges → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.timestamp.ges → <lv>

**<mRest>** Complete measure rest in any meter.

att.timestamp.ges → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.timestamp.ges → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.timestamp.ges → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.timestamp.ges → <mSpace>

**<marker>** MIDI marker meta-event.

att.timestamp.ges → <marker>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.timestamp.ges → <measure>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.timestamp.ges → <metaMark>

**<metaText>** MIDI text meta-event.

att.timestamp.ges → <metaText>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.timestamp.ges → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.timestamp.ges → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.timestamp.ges → <multiRpt>

**<ncGrp>** Collection of one or more neume components.

att.timestamp.ges → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.timestamp.ges → <neume>

**<note>** A single pitched event.

att.timestamp.ges → <note>

**<noteOff>** MIDI note-off event.

att.timestamp.ges → <noteOff>

**<noteOn>** MIDI note-on event.

att.timestamp.ges → <noteOn>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.timestamp.ges → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.timestamp.ges → <ornam>

**<pad>** An indication of extra visual space between notational elements.

att.timestamp.ges → <pad>

**<pedal>** Piano pedal mark.

att.timestamp.ges → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp.ges → <phrase>

**<port>** MIDI port.

att.timestamp.ges → <port>

**<prog>** MIDI program change.

att.timestamp.ges → <prog>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.timestamp.ges → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.timestamp.ges → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.timestamp.ges → <rest>

**<seqNum>** MIDI sequence number.

att.timestamp.ges → <seqNum>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp.ges → <slur>

**<sp>** Contains an individual speech in a performance text.

att.timestamp.ges → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.timestamp.ges → <space>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.timestamp.ges → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.timestamp.ges → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.timestamp.ges → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.timestamp.ges → <trill>

**<trkName>** MIDI track/sequence name.

att.timestamp.ges → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.timestamp.ges → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.timestamp.ges → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.timestamp.ges → <turn>

**<vel>** MIDI Note-on/off velocity.

att.timestamp.ges → <vel>

## att.timestamp.log

Attributes that record a time stamp in terms of musical time, i.e., beats[fractional beat part].

### Referenced in chapters

[1.2.2 Events and Controlevents](#), [1.2.3 Timestamps in MEI](#), [4.2.6 Timestamps and Durations](#)

### Module

[MEI.shared](#)

### Attributes

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.timestamp.log → @tstamp

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.timestamp.log → <accid>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.timestamp.log → <annot>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.timestamp.log → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.timestamp.log → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.timestamp.log → <attacca>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.timestamp.log → <bTrem>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.timestamp.log → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.timestamp.log → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.timestamp.log → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.timestamp.log → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.timestamp.log → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.timestamp.log → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.timestamp.log → <caesura>

**<cc>** MIDI parameter/control change.

att.timestamp.log → <cc>

**<chan>** MIDI channel assignment.

att.timestamp.log → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.timestamp.log → <chanPr>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.timestamp.log → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.timestamp.log → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.timestamp.log → <clefGrp>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.timestamp.log → <cpMark>

**<cue>** MIDI cue point.

att.timestamp.log → <cue>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.timestamp.log → <dir>

**<dot>** Dot of augmentation or division.

att.timestamp.log → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.timestamp.log → <dynam>

**<f>** Single element of a figured bass indication.

att.timestamp.log → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.timestamp.log → <fTrem>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.timestamp.log → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.timestamp.log → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.timestamp.log → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.timestamp.log → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.timestamp.log → <graceGrp>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.timestamp.log → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.timestamp.log → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.timestamp.log → <harm>

**<harpPedal>** Harp pedal diagram.

att.timestamp.log → <harpPedal>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.timestamp.log → <hex>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.timestamp.log → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.timestamp.log → <lv>

**<mRest>** Complete measure rest in any meter.

att.timestamp.log → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.timestamp.log → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.timestamp.log → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.timestamp.log → <mSpace>

**<marker>** MIDI marker meta-event.

att.timestamp.log → <marker>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.timestamp.log → <metaMark>

**<metaText>** MIDI text meta-event.

att.timestamp.log → <metaText>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.timestamp.log → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.timestamp.log → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.timestamp.log → <multiRpt>

**<note>** A single pitched event.

att.timestamp.log → <note>

**<noteOff>** MIDI note-off event.

att.timestamp.log → <noteOff>

**<noteOn>** MIDI note-on event.

att.timestamp.log → <noteOn>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.timestamp.log → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.timestamp.log → <ornam>

**<pad>** An indication of extra visual space between notational elements.

att.timestamp.log → <pad>

**<pedal>** Piano pedal mark.

att.timestamp.log → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp.log → <phrase>

**<port>** MIDI port.

att.timestamp.log → <port>

**<prog>** MIDI program change.

att.timestamp.log → <prog>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.timestamp.log → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.timestamp.log → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.timestamp.log → <rest>

**<seqNum>** MIDI sequence number.

att.timestamp.log → <seqNum>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp.log → <slur>

**<sp>** Contains an individual speech in a performance text.

att.timestamp.log → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.timestamp.log → <space>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.timestamp.log → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.timestamp.log → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.timestamp.log → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.timestamp.log → <trill>

**<trkName>** MIDI track/sequence name.

att.timestamp.log → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.timestamp.log → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.timestamp.log → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.timestamp.log → <turn>

**<vel>** MIDI Note-on/off velocity.

att.timestamp.log → <vel>

DEVELOPMENT  
VERSION

## att.timestamp2.ges

Attributes that record a performed (as opposed to notated) time stamp for the end of an event.

### Module

[MEI.gestural](#)

### Attributes

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.timestamp2.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.timestamp2.ges → @tstamp2.real

### Available at

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.timestamp2.ges → <annot>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.timestamp2.ges → <attacca>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.timestamp2.ges → <beamSpan>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.timestamp2.ges → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.timestamp2.ges → <bracketSpan>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.timestamp2.ges → <cpMark>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#),

[<dynam>](#) or [<repeatMark>](#).

att.timestamp2.ges → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.timestamp2.ges → <dynam>

**<f>** Single element of a figured bass indication.

att.timestamp2.ges → <f>

**<fing>** finger – An individual finger in a fingering indication.

att.timestamp2.ges → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.timestamp2.ges → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.timestamp2.ges → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.timestamp2.ges → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.timestamp2.ges → <harm>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.timestamp2.ges → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.timestamp2.ges → <lv>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.timestamp2.ges → <metaMark>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.timestamp2.ges → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.timestamp2.ges → <ornam>

**<pedal>** Piano pedal mark.

att.timestamp2.ges → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp2.ges → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.timestamp2.ges → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp2.ges → <slur>

**<sp>** Contains an individual speech in a performance text.

att.timestamp2.ges → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.timestamp2.ges → <stageDir>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.timestamp2.ges → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.timestamp2.ges → <trill>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.timestamp2.ges → <tupletSpan>

## att.timestamp2.log

Attributes that record a time stamp for the end of an event in terms of musical time.

### Referenced in chapters

[1.2.2 Events and Controlevents](#), [1.2.3 Timestamps in MEI](#), [4.2.6 Timestamps and Durations](#)

### Module

[MEI.shared](#)

### Attributes

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.timestamp2.log → @tstamp2

### Available at

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.timestamp2.log → <annot>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.timestamp2.log → <attacca>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.timestamp2.log → <beamSpan>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.timestamp2.log → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.timestamp2.log → <bracketSpan>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.timestamp2.log → <cpMark>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#),

[<dynam>](#) or [<repeatMark>](#).

att.timestamp2.log → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.timestamp2.log → <dynam>

**<f>** Single element of a figured bass indication.

att.timestamp2.log → <f>

**<fing>** finger – An individual finger in a fingering indication.

att.timestamp2.log → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.timestamp2.log → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.timestamp2.log → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.timestamp2.log → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.timestamp2.log → <harm>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.timestamp2.log → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.timestamp2.log → <lv>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.timestamp2.log → <metaMark>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.timestamp2.log → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.timestamp2.log → <ornam>

**<pedal>** Piano pedal mark.

att.timestamp2.log → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp2.log → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.timestamp2.log → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.timestamp2.log → <slur>

**<sp>** Contains an individual speech in a performance text.

att.timestamp2.log → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.timestamp2.log → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.timestamp2.log → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.timestamp2.log → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.timestamp2.log → <trill>

**<tupletSpan>** Alternative element for encoding tuples, especially useful for tuples that extend across bar lines.

att.timestamp2.log → <tupletSpan>

## Declaration

```
<classSpec ident="att.timestamp2.log" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record a time stamp for the end of an event in terms
  of musical time.</desc>
  <attList>
    <attDef ident="tstamp2" usage="opt">
      <desc xml:lang="en">Encodes the ending point of an event,
      <abbr>i.e.</abbr>
      , a count of measures plus a beat location in the ending measure.</desc>
      <datatype>
        <rng:ref name="data.MEASUREBEAT"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.trans

Attributes for elements encoding authorial or scribal intervention when transcribing manuscript or similar sources.

### Module

[MEI.edittrans](#)

### Attributes

**@decls** (*optional*) Identifies one or more metadata elements (other than classification terms) within the header, which are understood to apply to the element bearing this attribute and its content. One or more values from [data.URI](#), separated by spaces.

att.trans → @decls

**@hand** (*optional*) Signifies the hand responsible for an action. The value must be the ID of a [<hand>](#) element declared in the header. Value conforms to [data.URI](#).

att.trans → @hand

**@instant** The @instant attribute is syntactic sugar for classifying a scribal intervention as an ad-hoc modification; that is, one which does not interrupt the writing process. Value must conform to [data.BOOLEAN](#) or [unknown](#).

att.trans → @instant

**@seq** (*optional*) Used to assign a sequence number related to the order in which the encoded features carrying this attribute are believed to have occurred. Value is a positive integer.

att.trans → @seq

**@state** Points to the genetic state that results from this modification. One or more values from [data.URI](#), separated by spaces.

att.trans → @state

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.trans → <abbr>

**<add>** Marks an addition to the text.

att.trans → <add>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.trans → <corr>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.trans → <cutout>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.trans → <del>

**<expan>** Contains the expansion of an abbreviation.

att.trans → <expan>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as **<add>**, **<del>**, etc.

att.trans → <metaMark>

**<patch>** Describes a physical writing surface attached to the original document.

att.trans → <patch>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.trans → <restore>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.trans → <subst>

## Declaration

```
<classSpec ident="att.trans" module="MEI.edittrans" type="atts">
  <desc xml:lang="en">Attributes for elements encoding authorial or scribal intervention
  when transcribing manuscript or similar sources.</desc>
  <classes>
    <memberOf key="att.geneticState"/>
    <memberOf key="att.handIdent"/>
    <memberOf key="att.metadataPointing"/>
    <memberOf key="att.sequence"/>
  </classes>
</classSpec>
```

# att.transposition

Attributes that describe transposition.

## Module

[MEI.shared](#)

## Attributes

**@trans.diat** (*optional*) Records the amount of diatonic pitch shift, e.g., C to C♯ = 0, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.transposition → @trans.diat

**@trans.semi** (*optional*) Records the amount of pitch shift in semitones, e.g., C to C♯ = 1, C to D♭ = 1, necessary to calculate the sounded pitch from the written one. Value is an integer.

att.transposition → @trans.semi

## Available at

**<layerDef>** Container for layer meta-information.

att.transposition → <layerDef>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.transposition → <perfRes>

**<scoreDef>** Container for score meta-information.

att.transposition → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.transposition → <staffDef>

## Remarks

Diatonic transposition requires both trans.diat and trans.semi attributes in order to distinguish the difference, for example, between a transposition from C to C♯ and one from C to D♭.

## Declaration

```

<classSpec ident="att.transposition" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe transposition.</desc>
  <attList>
    <attDef ident="trans.diat" usage="opt">

</remarks>
</classSpec>
```

## att.tremMeasured

Attributes that describe measured tremoland.

### Module

[MEI.cmn](#)

### Attributes

**@unitdur** (*optional*) The performed duration of an individual note in a measured tremolo. Value conforms to [data.DURATION.cmn](#).

att.tremMeasured → @unitdur

### Available at

**<bTrem>** A rapid alternation on a single pitch or chord.

att.tremMeasured → <bTrem>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.tremMeasured → <fTrem>

### Declaration

```
<classSpec ident="att.tremMeasured" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Attributes that describe measured tremoland.</desc>
  <attList>
    <attDef ident="unitdur" usage="opt">
      <desc xml:lang="en">The performed duration of an individual note in a measured tremolo.</desc>
      <datatype>
        <rng:ref name="data.DURATION.cmn"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

## att.trill.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.trill.anl → <trill>

#### Declaration

```
<classSpec ident="att.trill.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.trill.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.trill.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.trill.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.trill.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.trill.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.trill.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum **\*\*recip** value. Value is a [token](#).

att.trill.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.trill.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.trill.ges → @tstamp2.real

### Available at

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.trill.ges → <trill>

### Declaration

```
<classSpec ident="att.trill.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
    <memberOf key="att.timestamp2.ges"/>
  </classes>
</classSpec>
```

## att.trill.log

Logical domain attributes.

### Module

MEI.cmnOrnaments

### Attributes

**@accidlower** (*optional*) Records the written accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.trill.log → @accidlower

**@accidlower.ges** (*optional*) Records the sounding accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.trill.log → @accidlower.ges

**@accidupper** (*optional*) Records the written accidental associated with an upper neighboring note.

Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.trill.log → @accidupper

**@accidupper.ges** (*optional*) Records the sounding accidental associated with an upper neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.trill.log → @accidupper.ges

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.trill.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.trill.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.trill.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.trill.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.trill.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+?)"**, separated by spaces.

att.trill.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.trill.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.trill.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.trill.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.trill.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.trill.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.trill.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.trill.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.trill.log → @when

## Available at

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.trill.log → <trill>

## Declaration

```
<classSpec ident="att.trill.log" module="MEI.cmnOrnaments" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.controlEvent"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.ornamentAccid"/>
    <memberOf key="att.startEndId"/>
    <memberOf key="att.timestamp2.log"/>
  </classes>
```

</classSpec>

DEVELOPMENT  
VERSION

# att.trill.vis

Visual domain attributes.

## Module

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.trill.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.trill.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.trill.vis → @enclose

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.trill.vis → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.trill.vis → @endto

**@extender** (*optional*) Indicates the presence of an extension symbol, typically a line. Value conforms to [data.BOOLEAN](#).

att.trill.vis → @extender

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.trill.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.trill.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.trill.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.trill.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.trill.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.trill.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.trill.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000".

N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.trill.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.trill.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.trill.vis → @ho

**@lendsym** (*optional*) Symbol rendered at end of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.trill.vis → @lendsym

**@lendsym.size** (*optional*) Holds the relative size of the line-end symbol. Value conforms to [data.FONTSCALE](#).

att.trill.vis → @lendsym.size

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.trill.vis → @letterspacing

**@lform** (*optional*) Describes the line style of a line. Value conforms to [data.LINEFORM](#).

att.trill.vis → @lform

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.trill.vis → @lineheight

**@lsegs** (*optional*) Describes the number of segments into which a dashed or dotted line may be divided, or the number of "peaks" of a wavy line; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal. One or two values of datatype **a positive integer no smaller than 2**, separated by a space.

att.trill.vis → @lsegs

**@lstartsym** (*optional*) Symbol rendered at start of line. Value conforms to [data.LINESTARTENDSYMBOL](#).

att.trill.vis → @lstartsym

**@lstartsym.size** (*optional*) Holds the relative size of the line-start symbol. Value conforms to [data.FONTSCALE](#).

att.trill.vis → @lstartsym.size

**@lwidth** (*optional*) Width of a line. Value conforms to [data.LINEWIDTH](#).

att.trill.vis → @lwidth

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.trill.vis → @place

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.trill.vis → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.trill.vis → @startto

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.trill.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.trill.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.trill.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.trill.vis → @y

## Available at

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.trill.vis → <trill>

## Declaration

```
<classSpec ident="att.trill.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>

```

## att.tuning

Attributes that describe tuning.

### Module

MEI.shared

### Attributes

**@tune.Hz** (*optional*) Holds a value for cycles per second, i.e., Hertz, for a tuning reference pitch. Value is a decimal number.

att.tuning → @tune.Hz

**@tune.pname** (*optional*) Holds the pitch name of a tuning reference pitch, i.e., the central tone of a tuning system. Value conforms to [data.PITCHNAME](#).

att.tuning → @tune.pname

**@tune.temper** (*optional*) Provides an indication of the tuning system, just, for example. Value conforms to [data.TEMPERAMENT](#).

att.tuning → @tune.temper

### Available at

**<layerDef>** Container for layer meta-information.

att.tuning → <layerDef>

**<scoreDef>** Container for score meta-information.

att.tuning → <scoreDef>

**<staffDef>** Container for staff meta-information.

att.tuning → <staffDef>

### Declaration

```
<classSpec ident="att.tuning" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe tuning.</desc>
  <attList>
    <attDef ident="tune.Hz" usage="opt">
      <desc xml:lang="en">Holds a value for cycles per second,
      <abbr>i.e.</abbr>
      , Hertz, for a tuning reference pitch.</desc>

```

## att.tuplet.anl

Analytical domain attributes.

### Module

[MEI.analytical](#)

### Attributes

#### Available at

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.tuplet.anl → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.tuplet.anl → <tupletSpan>

### Declaration

```
<classSpec ident="att.tuplet.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.tuplet.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.tuplet.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.tuplet.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.tuplet.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.tuplet.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.tuplet.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted [Humdrum \\*\\*recip value](#). Value is a [token](#).

att.tuplet.ges → @dur.recip

### Available at

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.tuplet.ges → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.tuplet.ges → <tupletSpan>

### Declaration

```

<classSpec ident="att.tuplet.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
  <classes>
    <memberOf key="att.duration.ges"/>
  </classes>
</classSpec>

```

## att.tuplet.log

Logical domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@beam.with** (*optional*) In the case of cross-staff beams, the beam.with attribute is used to indicate which staff the beam is connected to; that is, the staff above or the staff below. Value conforms to [data.NEIGHBORINGLAYER](#).

att.tuplet.log → @beam.with

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.tuplet.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tuplet.log → @endid

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.tuplet.log → @layer

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.tuplet.log → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.tuplet.log → @numbase

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.tuplet.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tuplet.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tuplet.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tuplet.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.tuplet.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.tuplet.log → @when

## Available at

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.tuplet.log → <tuplet>

## Declaration

```
<classSpec ident="att.tuplet.log" module="MEI.cmn" type="atts">
  <desc xml:lang="en">Logical domain attributes.</desc>
  <classes>
    <memberOf key="att.beamedWith"/>
    <memberOf key="att.duration.additive"/>
    <memberOf key="att.duration.ratio"/>
    <memberOf key="att.event"/>
    <memberOf key="att.startEndId"/>
  </classes>
</classSpec>
```

## att.tuplet.vis

Visual domain attributes.

### Module

MEI.visual

### Attributes

**@bracket.place** (*optional*) Used to state where a tuplet bracket will be placed in relation to the note heads. Value conforms to [data.STAFFREL.basic](#).

att.tuplet.vis → @bracket.place

**@bracket.visible** (*optional*) States whether a bracket should be rendered with a tuplet. Value conforms to [data.BOOLEAN](#).

att.tuplet.vis → @bracket.visible

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.tuplet.vis → @color

**@dur.visible** (*optional*) Determines if the tuplet duration is visible. Value conforms to [data.BOOLEAN](#).

att.tuplet.vis → @dur.visible

**@num.format** (*optional*) Controls how the num:numbase ratio is to be displayed. Allowed values are:

"**count**" (*Only the num attribute is displayed, , '7'*), "**ratio**" (*Both the num and numbase attributes are displayed, , '7:4'*.)

att.tuplet.vis → @num.format

**@num.place** (*optional*) States where the tuplet number will be placed in relation to the note heads.

Value conforms to [data.STAFFREL.basic](#).

att.tuplet.vis → @num.place

**@num.visible** (*optional*) Determines if the tuplet number is visible. Value conforms to [data.BOOLEAN](#).

att.tuplet.vis → @num.visible

### Available at

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.tuplet.vis → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.tuplet.vis → <tupletSpan>

### Declaration

```
<classSpec ident="att.tuplet.vis" module="MEI.visual" type="atts">

</classSpec>

```

## att.tupletPresent

Attributes for indicating the presence of a tuplet.

### Module

MEI.shared

### Attributes

**@tuplet** (*optional*) Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a [<tuplet>](#) element should be employed. One or more values from [data.TUPLE](#), separated by spaces.

att.tupletPresent → @tuplet

### Available at

[<chord>](#) A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.tupletPresent → <chord>

[<note>](#) A single pitched event.

att.tupletPresent → <note>

[<rest>](#) A non-sounding event found in the source being transcribed.

att.tupletPresent → <rest>

[<space>](#) A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.tupletPresent → <space>

### Declaration

```
<classSpec ident="att.tupletPresent" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes for indicating the presence of a tuplet.</desc>
  <attList>
    <attDef ident="tuplet" usage="opt">

      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.tupletSpan.anl

Analytical domain attributes.

## Module

MEI.analytical

## Attributes

### Available at

**<tupletSpan>** Alternative element for encoding tuples, especially useful for tuples that extend across bar lines.  
att.tupletSpan.anl → <tupletSpan>

### Declaration

```
<classSpec ident="att.tupletSpan.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
  <classes>
    <memberOf key="att.tuplet.anl"/>
  </classes>
</classSpec>
```

## att.tupletSpan.ges

Gestural domain attributes.

### Module

MEI.gestural

### Attributes

**@dots.ges** (*optional*) Number of dots required for a gestural duration when different from that of the written duration. Value conforms to [data.AUGMENTDOT](#).

att.tupletSpan.ges → @dots.ges

**@dur.ges** (*optional*) Records performed duration information that differs from the written duration.

Value conforms to [data.DURATION.GESTURAL](#).

att.tupletSpan.ges → @dur.ges

**@dur.metrical** (*optional*) Duration as a count of units provided in the time signature denominator. Value is a decimal number.

att.tupletSpan.ges → @dur.metrical

**@dur.ppq** (*optional*) Duration recorded as pulses-per-quarter note, e.g., MIDI clicks or MusicXML divisions. Value is a positive integer, including 0.

att.tupletSpan.ges → @dur.ppq

**@dur.real** (*optional*) Duration in seconds, e.g., 1.732. Value is a decimal number.

att.tupletSpan.ges → @dur.real

**@dur.recip** (*optional*) Duration as an optionally dotted Humdrum [\\*\\*recip value](#). Value is a [token](#).

att.tupletSpan.ges → @dur.recip

**@tstamp2.ges** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.tupletSpan.ges → @tstamp2.ges

**@tstamp2.real** (*optional*) Records the ending point of an event in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.tupletSpan.ges → @tstamp2.real

### Available at

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.tupletSpan.ges → <tupletSpan>

### Declaration

```
<classSpec ident="att.tupletSpan.ges" module="MEI.gestural" type="atts">

  <classes>
    <memberOf key="att.timestamp2.ges"/>
    <memberOf key="att.tuplet.ges"/>
  </classes>
```

</classSpec>

DEVELOPMENT  
VERSION

## att.tupletSpan.log

Logical domain attributes.

### Module

[MEI.cmn](#)

### Attributes

**@beam.with** (*optional*) In the case of cross-staff beams, the beam.with attribute is used to indicate which staff the beam is connected to; that is, the staff above or the staff below. Value conforms to [data.NEIGHBORINGLAYER](#).

att.tupletSpan.log → @beam.with

**@dur** (*optional*) When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used. One or more values from [data.DURATION](#), separated by spaces.

att.tupletSpan.log → @dur

**@endid** (*optional*) Indicates the final element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tupletSpan.log → @endid

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.tupletSpan.log → @evaluate

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.tupletSpan.log → @layer

**@num** (*optional*) Along with numbase, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.tupletSpan.log → @num

**@numbase** (*optional*) Along with num, describes duration as a ratio. num is the first value in the ratio, while numbase is the second. Value is a positive integer.

att.tupletSpan.log → @numbase

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\i][\c]+)"**, separated by spaces.

att.tupletSpan.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.tupletSpan.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.tupletSpan.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.tupletSpan.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.tupletSpan.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tupletSpan.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.tupletSpan.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.tupletSpan.log → @tstamp.real

**@tstamp2** (*optional*) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure. Value conforms to [data.MEASUREBEAT](#).

att.tupletSpan.log → @tstamp2

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.tupletSpan.log → @when

## Available at

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.tupletSpan.log → <tupletSpan>

## Declaration

## att.turn.log

Logical domain attributes.

### Referenced in chapters

[4.4.4 Turns](#)

### Module

[MEI.cmnOrnaments](#)

### Attributes

**@accidlower** (*optional*) Records the written accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.turn.log → @accidlower

**@accidlower.ges** (*optional*) Records the sounding accidental associated with a lower neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.turn.log → @accidlower.ges

**@accidupper** (*optional*) Records the written accidental associated with an upper neighboring note. Value conforms to [data.ACIDENTAL.WRITTEN](#).

att.turn.log → @accidupper

**@accidupper.ges** (*optional*) Records the sounding accidental associated with an upper neighboring note. Value conforms to [data.ACIDENTAL.GESTURAL](#).

att.turn.log → @accidupper.ges

**@delayed** (*optional*) When set to 'true', the turn begins on the second half of the beat. Value conforms to [data.BOOLEAN](#).

att.turn.log → @delayed

**@evaluate** (*optional*) Specifies the intended meaning when a participant in a relationship is itself a pointer. Allowed values are: "**all**" (*If an element pointed to is itself a pointer, then the target of that pointer will be taken, and so on, until an element is found which is not a pointer.*), "**one**" (*If an element pointed to is itself a pointer, then its target (whether a pointer or not) is taken as the target of this pointer.*), "**none**" (*No further evaluation of targets is carried out beyond that needed to find the element(s) specified in plist or target attribute.*)

att.turn.log → @evaluate

**@form** (*optional*) Records meaning; i.e., intended performance, of the turn. The altsym, glyph.name, or glyph.num attributes may be used to specify the appropriate symbol. Allowed values are: "**lower**" (*Begins on the note below the written note.*), "**upper**" (*Begins on the note above the written note.*)

att.turn.log → @form

**@layer** (*optional*) Identifies the layer to which a feature applies. One or more values of datatype **positiveInteger**, separated by spaces.

att.turn.log → @layer

**@part** (*optional*) Indicates the part in which the current feature should appear. Use '%all' when the feature should occur in every part. One or more values of datatype **a string matching the following regular expression: "(%all|#[\v][\c]+)"**, separated by spaces.

att.turn.log → @part

**@partstaff** (*optional*) Signifies the part staff on which a notated feature occurs. Use '%all' when the feature should occur on every staff. One or more values of datatype **a string matching the following regular expression: "(%all|\d+(-\d+)?)"**, separated by spaces.

att.turn.log → @partstaff

**@plist** (*optional*) When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship. One or more values from [data.URI](#), separated by spaces.

att.turn.log → @plist

**@staff** (*recommended*) Signifies the staff on which a notated event occurs or to which a control event applies. Mandatory when applicable. One or more values of datatype **positiveInteger**, separated by spaces.

att.turn.log → @staff

**@startid** (*optional*) Holds a reference to the first element in a sequence of events to which the feature applies. Value conforms to [data.URI](#).

att.turn.log → @startid

**@tstamp** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.turn.log → @tstamp

**@tstamp.ges** (*optional*) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature. Value conforms to [data.BEAT](#).

att.turn.log → @tstamp.ges

**@tstamp.real** (*optional*) Records the onset time in terms of ISO time. Value conforms to [data.ISOTIME](#).

att.turn.log → @tstamp.real

**@when** (*optional*) Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a [<when>](#) element elsewhere in the document. Value conforms to [data.URI](#).

att.turn.log → @when

## Available at

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.turn.log → <turn>

[MEI.visual](#)

## Attributes

**@altsym** (*optional*) Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document. Value conforms to [data.URI](#).

att.turn.vis → @altsym

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.turn.vis → @color

**@enclose** (*optional*) Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14. Value conforms to [data.ENCLOSURE](#).

att.turn.vis → @enclose

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.turn.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.turn.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.turn.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.turn.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.turn.vis → @fontweight

**@glyph.auth** (*optional*) A name or label associated with the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Allowed values are: "smufl" (*Standard Music Font Layout*.)

att.turn.vis → @glyph.auth

**@glyph.name** (*optional*) Glyph name. Value is plain text.

att.turn.vis → @glyph.name

**@glyph.num** (*optional*) Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF. Value conforms to [data.HEXNUM](#).

att.turn.vis → @glyph.num

**@glyph.uri** (*optional*) The web-accessible location of the controlled vocabulary from which the value of `glyph.name` or `glyph.num` is taken, or the textual content of the element. Value conforms to [data.URI](#).

att.turn.vis → @glyph.uri

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.turn.vis → @ho

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.turn.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.turn.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.turn.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.turn.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.turn.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.turn.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.turn.vis → @y

## Available at

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.turn.vis → <turn>

## Declaration

DEVELOPMENT  
VERSION

## att.typed

Attributes which can be used to classify features.

### Referenced in chapters

[2.1.2.1 Divisions of the Body](#), [2.3.3 Classification Attributes](#)

### Module

[MEI.shared](#)

### Attributes

**@class** (*optional*) Contains one or more URIs which denote classification terms that apply to the entity bearing this attribute. One or more values from [data.URI](#), separated by spaces.

att.typed → @class

**@type** (*optional*) Designation which characterizes the element in some sense, using any convenient classification scheme or typology that employs single-token labels. One or more values of datatype

**NMTOKEN**, separated by spaces.

att.typed → @type

### Available at

**<abbr>** A generic element for 1) a shortened form of a word, including an acronym or 2) a shorthand notation.

att.typed → <abbr>

**<accMat>** Holds a description of any additional material bound with an item, such as non-contemporaneous documents or fragments.

att.typed → <accMat>

**<accessRestrict>** Describes the conditions that affect the accessibility of material.

att.typed → <accessRestrict>

**<accid>** Records a temporary alteration to the pitch of a note.

att.typed → <accid>

**<acquisition>** Records information concerning the process by which an item was acquired by the holding institution.

att.typed → <acquisition>

**<actor>** Name of an actor appearing within a cast list.

att.typed → <actor>

**<add>** Marks an addition to the text.

att.typed → <add>

**<addDesc>** Provides a description of significant additions found within an item, such as marginalia or other annotations.

att.typed → <addDesc>

**<addName>** Contains an additional name component, such as a nickname, epithet, or alias, or any other descriptive phrase used within a personal name.

att.typed → <addName>

**<addrLine>** Single line of a postal address.

att.typed → <addrLine>

**<address>** Contains a postal address, for example of a publisher, an organization, or an individual.

att.typed → <address>

**<altId>** May contain a bibliographic identifier that does not fit within the meiHead element's id attribute, for example because the identifier does not fit the definition of an XML id or because multiple identifiers are needed.

att.typed → <altId>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.typed → <ambNote>

**<ambitus>** Range of a voice, instrument or piece.

att.typed → <ambitus>

**<analytic>** Contains bibliographic elements describing an item (e.g., an article or poem) published within a monograph or journal and not as an independent publication.

att.typed → <analytic>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.typed → <anchoredText>

**<annot>** Provides a statement explaining the text or indicating the basis for an assertion.

att.typed → <annot>

**<app>** (apparatus) – Contains one or more alternative encodings.

att.typed → <app>

**<applInfo>** Groups information about applications which have acted upon the MEI file.

att.typed → <applInfo>

**<application>** Provides information about an application which has acted upon the current document.

att.typed → <application>

**<argument>** Contains a formal list or prose description of topics addressed.

att.typed → <argument>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.typed → <arpeg>

**<arranger>** A person or organization who transcribes a musical composition, usually for a different medium from that of the original; in an arrangement the musical substance remains essentially unchanged.

att.typed → <arranger>

**<artic>** An indication of how to play a note or chord.

att.typed → <artic>

**<attUsage>** Documents the usage of a specific attribute of the element.

att.typed → <attUsage>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.typed → <attacca>

**<audience>** Defines the class of user for which the work is intended, as defined by age group (e.g., children, young adults, adults, etc.), educational level (e.g., primary, secondary, etc.), or other categorization.

att.typed → <audience>

**<author>** The name of the creator of the intellectual content of a non-musical, literary work.

att.typed → <author>

**<avFile>** References an external digital audio or video file.

att.typed → <avFile>

**<availability>** Groups elements that describe the availability of and access to a bibliographic item, including an MEI-encoded document.

att.typed → <availability>

**<bTrem>** A rapid alternation on a single pitch or chord.

att.typed → <bTrem>

**<back>** Contains any appendixes, advertisements, indexes, etc. following the main body of a musical text.

att.typed → <back>

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.typed → <barLine>

**<barre>** A barre in a chord tablature grid.

att.typed → <barre>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.typed → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.typed → <beamSpan>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.typed → <beatRpt>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.typed → <bend>

**<bibl>** Provides a loosely-structured bibliographic citation in which the sub-components may or may not be explicitly marked.

att.typed → <bibl>

**<biblList>** List of bibliographic references.

att.typed → <biblList>

**<biblScope>** Defines the scope of a bibliographic reference, for example as a list of page numbers, or a named subdivision of a larger work.

att.typed → <biblScope>

**<biblStruct>** Contains a bibliographic citation in which bibliographic sub-elements must appear in a specified order.

att.typed → <biblStruct>

**<bifolium>** Describes a folded sheet of paper.

att.typed → <bifolium>

**<binding>** Contains a description of one binding, i.e., type of covering, boards, etc. applied to an item.

att.typed → <binding>

**<bindingDesc>** Describes the present and former bindings of an item.

att.typed → <bindingDesc>

**<bloc>** Contains the name of a geopolitical unit consisting of two or more nation states or countries.

att.typed → <bloc>

**<body>** Contains the whole of a single musical text, excluding any front or back matter.

att.typed → <body>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.typed → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.typed → <breath>

**<byline>** Contains the primary statement of responsibility given for a work on its title page.

att.typed → <byline>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.typed → <caesura>

**<caption>** A label which accompanies an illustration or a table.

att.typed → <caption>

**<captureMode>** The means used to record notation, sound, or images in the production of a source/manifestation (e.g., analogue, acoustic, electric, digital, optical etc.).

att.typed → <captureMode>

**<carrierForm>** The specific class of material to which the physical carrier of the source/manifestation belongs (e.g., sound cassette, videodisc, microfilm cartridge, transparency, etc.). The carrier for a manifestation comprising multiple physical components may include more than one form (e.g., a filmstrip with an accompanying booklet, a separate sound disc carrying the sound track for a film, etc.).

att.typed → <carrierForm>

**<castGrp>** Groups one or more individual castItem elements within a cast list.

att.typed → <castGrp>

**<castItem>** Contains a single entry within a cast list, describing either a single role or a list of non-speaking roles.

att.typed → <castItem>

**<castList>** Contains a single cast list or dramatis personae.

att.typed → <castList>

**<catchwords>** Describes the system used to ensure correct ordering of the quires making up an item, typically by means of annotations at the foot of the page.

att.typed → <catchwords>

**<category>** Contains an individual descriptive category in a user-defined taxonomy, possibly nested within a superordinate category.

att.typed → <category>

**<cb>** An empty formatting element that forces text to begin in a new column.

att.typed → <cb>

**<cc>** MIDI parameter/control change.

att.typed → <cc>

**<chan>** MIDI channel assignment.

att.typed → <chan>

**<chanPr>** MIDI channel pressure/after touch.

att.typed → <chanPr>

**<change>** Individual change within the revision description.

att.typed → <change>

**<changeDesc>** Description of a revision of the MEI file.

att.typed → <changeDesc>

**<choice>** Groups a number of alternative encodings for the same point in a text.

att.typed → <choice>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.typed → <chord>

**<chordDef>** Chord tablature definition.

att.typed → <chordDef>

**<chordMember>** An individual pitch in a chord defined by a <chordDef> element.

att.typed → <chordMember>

**<chordTable>** Chord/tablature look-up table.

att.typed → <chordTable>

**<classDecls>** Groups information which describes the nature or topic of an entity.

att.typed → <classDecls>

**<classification>** Groups information which describes the nature or topic of an entity.

att.typed → <classification>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.typed → <clef>

**<clefGrp>** A set of simultaneously-occurring clefs.

att.typed → <clefGrp>

**<clip>** Defines a time segment of interest within a recording or within a digital audio or video file.

att.typed → <clip>

**<colLayout>** An empty formatting element that signals the start of columnar layout.

att.typed → <colLayout>

**<collation>** Records a description of how the leaves or bifolia of an item are physically arranged.

att.typed → <collation>

**<colophon>** Contains a statement providing information regarding the date, place, agency, or reason for production of the item.

att.typed → <colophon>

**<componentList>** Container for intellectual or physical component parts of a bibliographic entity.

att.typed → <componentList>

**<composer>** The name of the creator of the intellectual content of a musical work.

att.typed → <composer>

**<condition>** The physical condition of an item, particularly any variances between the physical make-up of the item and that of other copies of the same item (e.g., missing pages or plates, brittleness, faded images, etc.).

att.typed → <condition>

**<contentItem>** Contains a single entry within a content description element.

att.typed → <contentItem>

**<contents>** List of the material contained within a resource.

att.typed → <contents>

**<context>** The historical, social, intellectual, artistic, or other context within which the work was originally conceived (e.g., the 17th century restoration of the monarchy in England, the aesthetic movement of the late 19th century, etc.) or the historical, social, intellectual, artistic, or other context within which the expression was realized.

att.typed → <context>

**<contributor>** Names of individuals, institutions, or organizations responsible for contributions to the intellectual content of a work, where the specialized elements for authors, editors, etc. do not suffice or do not apply.

att.typed → <contributor>

**<corpName>** Identifies an organization or group of people that acts as a single entity.

att.typed → <corpName>

**<corr>** Contains the correct form of an apparent erroneous passage.

att.typed → <corr>

**<correction>** States how and under what circumstances corrections have been made in the text.

att.typed → <correction>

**<country>** Contains the name of a geopolitical unit, such as a nation, country, colony, or commonwealth, larger than or administratively superior to a region and smaller than a bloc.

att.typed → <country>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.typed → <cpMark>

**<creation>** Non-bibliographic details of the creation of an intellectual entity, in narrative form, such as the date, place, and circumstances of its composition. More detailed information may be captured within the history element.

att.typed → <creation>

**<cue>** MIDI cue point.

att.typed → <cue>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.typed → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.typed → <custos>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.typed → <cutout>

**<damage>** Contains an area of damage to the physical medium.

att.typed → <damage>

**<date>** A string identifying a point in time or the time period between two such points.

att.typed → <date>

**<decoDesc>** Contains a description of the decoration of an item.

att.typed → <decoDesc>

**<decoNote>** Contains a description of one or more decorative features of an item.

att.typed → <decoNote>

**<dedicatee>** Entity to whom a creative work is formally offered.

att.typed → <dedicatee>

**<dedication>** Contains a dedicatory statement.

att.typed → <dedication>

**<del>** Contains information deleted, marked as deleted, or otherwise indicated as superfluous or spurious in the copy text by an author, scribe, annotator, or corrector.

att.typed → <del>

**<depth>** Description of a measurement taken through a three-dimensional object.

att.typed → <depth>

**<desc>** Container for text that briefly describes the feature to which it is attached, including its intended usage, purpose, or application as appropriate.

att.typed → <desc>

**<dim>** Any single dimensional specification.

att.typed → <dim>

**<dimensions>** Information about the physical size of an entity; usually includes numerical data.

att.typed → <dimensions>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.typed → <dir>

**<distributor>** Person or agency, other than a publisher, from which access (including electronic access) to a bibliographic entity may be obtained.

att.typed → <distributor>

**<district>** Contains the name of any kind of subdivision of a settlement, such as a parish, ward, or other administrative or geographic unit.

att.typed → <district>

**<domainsDecl>** Indicates which domains are included in the encoding.

att.typed → <domainsDecl>

**<dot>** Dot of augmentation or division.

att.typed → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.typed → <dynam>

**<edition>** A word or text phrase that indicates a difference in either content or form between the item being described and a related item previously issued by the same publisher/distributor (e.g., 2nd edition, version 2.0, etc.), or simultaneously issued by either the same publisher/distributor or another publisher/distributor (e.g., large print edition, British edition, etc.).

att.typed → <edition>

**<editionStmt>** Container for meta-data pertaining to a particular edition of the material being described.

att.typed → <editionStmt>

**<editor>** The name of the individual(s), institution(s) or organization(s) acting in an editorial capacity.

att.typed → <editor>

**<editorialDecl>** Used to provide details of editorial principles and practices applied during the encoding of musical text.

att.typed → <editorialDecl>

**<encodingDesc>** Documents the relationship between an electronic file and the source or sources from which it was derived as well as applications used in the encoding/editing process.

att.typed → <encodingDesc>

**<ending>** Alternative ending for a repeated passage of music; i.e., prima volta, seconda volta, etc.

att.typed → <ending>

**<epigraph>** Contains a quotation, anonymous or attributed, appearing on a title page.

att.typed → <epigraph>

**<episema>** Episema.

att.typed → <episema>

**<event>** Contains a free-text event description.

att.typed → <event>

**<eventList>** Contains historical information given as a sequence of significant past events.

att.typed → <eventList>

**<exhibHist>** A record of public exhibitions, including dates, venues, etc.

att.typed → <exhibHist>

**<expan>** Contains the expansion of an abbreviation.

att.typed → <expan>

**<expansion>** Indicates how a section may be programmatically expanded into its 'through-composed' form.

att.typed → <expansion>

**<explicit>** Contains the explicit of a manuscript item; that is, the closing words of the text proper, exclusive of any rubric or colophon which might follow it.

att.typed → <explicit>

**<expression>** Intellectual or artistic realization of a work.

att.typed → <expression>

**<expressionList>** Gathers bibliographic expression entities.

att.typed → <expressionList>

**<extData>** Provides a container element for non-MEI data formats.

att.typed → <extData>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.typed → <extMeta>

**<extent>** Used to express size in terms other than physical dimensions, such as number of pages, records, bytes, physical components, etc.

att.typed → <extent>

**<f>** Single element of a figured bass indication.

att.typed → <f>

**<fTrem>** A rapid alternation between a pair of notes (or chords or perhaps between a note and a chord) that are (usually) farther apart than a major second.

att.typed → <fTrem>

**<facsimile>** Contains a representation of a written source in the form of a set of images rather than as transcribed or encoded text.

att.typed → <facsimile>

**<famName>** Contains a family (inherited) name, as opposed to a given, baptismal, or nick name.

att.typed → <famName>

**<fb>** Symbols added to a bass line that indicate harmony. Used to improvise a chordal accompaniment. Sometimes called Generalbass, thoroughbass, or basso continuo.

att.typed → <fb>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.typed → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.typed → <fig>

**<figDesc>** Contains a brief prose description of the appearance or content of a graphic figure, for use when documenting an image without displaying it.

att.typed → <figDesc>

**<fileChar>** Standards or schemes used to encode the file (e.g., ASCII, SGML, etc.), physical characteristics of the file (e.g., recording density, parity, blocking, etc.), and other characteristics that have a bearing on how the file can be processed.

att.typed → <fileChar>

**<fileDesc>** Contains a full bibliographic description of the MEI file.

att.typed → <fileDesc>

**<fing>** finger – An individual finger in a fingering indication.

att.typed → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.typed → <fingGrp>

**<foliaDesc>** Describes the order of folia and bifolia making up the text block of a manuscript or print.

att.typed → <foliaDesc>

**<foliation>** Describes the numbering system or systems used to count the leaves or pages in a codex.

att.typed → <foliation>

**<folium>** Describes a single leaf of paper.

att.typed → <folium>

**<foreName>** Contains a forename, given or baptismal name.

att.typed → <foreName>

**<front>** Bundles prefatory text found before the start of the musical text.

att.typed → <front>

**<funder>** Names of individuals, institutions, or organizations responsible for funding. Funders provide financial support for a project; they are distinct from sponsors, who provide intellectual support and authority.

att.typed → <funder>

**<gap>** Indicates a point where material has been omitted in a transcription, whether as part of sampling practice or for editorial reasons described in the MEI header.

att.typed → <gap>

**<genDesc>** (genetic description) - Bundles information about the textual development of a work.

att.typed → <genDesc>

**<genName>** Contains a name component used to distinguish otherwise similar names on the basis of the relative ages or generations of the persons named.

att.typed → <genName>

**<genState>** Describes a distinctive state in the textual development of a work.

att.typed → <genState>

**<genre>** Term or terms that designate a category characterizing a particular style, form, or content.

att.typed → <genre>

**<geogFeat>** Contains a common noun identifying a geographical feature.

att.typed → <geogFeat>

**<geogName>** The proper noun designation for a place, natural feature, or political jurisdiction.

att.typed → <geogName>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.typed → <gliss>

**<graceGrp>** A container for a sequence of grace notes.

att.typed → <graceGrp>

**<graphic>** Indicates the location of an inline graphic.

att.typed → <graphic>

**<group>** Contains a composite musical text, grouping together a sequence of distinct musical texts (or groups of such musical texts) which are regarded as a unit for some purpose, for example, the collected works of a composer.

att.typed → <group>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.typed → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.typed → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.typed → <halfmRpt>

**<hand>** Defines a distinct scribe or handwriting style.

att.typed → <hand>

**<handList>** Container for one or more hand elements.

att.typed → <handList>

**<handShift>** Marks the beginning of a passage written in a new hand, or of a change in the scribe, writing style, ink or character of the document hand.

att.typed → <handShift>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.typed → <harm>

**<harpPedal>** Harp pedal diagram.

att.typed → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.typed → <head>

**<height>** Description of the vertical size of an object.

att.typed → <height>

**<heraldry>** Contains a heraldic formula or phrase, typically found as part of a blazon, coat of arms, etc.

att.typed → <heraldry>

**<hex>** Arbitrary MIDI data in hexadecimal form.

att.typed → <hex>

**<hispanTick>** Hispanic tick.

att.typed → <hispanTick>

**<history>** Provides a container for information about the history of a resource other than the circumstances of its creation.

att.typed → <history>

**<identifier>** An alpha-numeric string that establishes the identity of the described material.

att.typed → <identifier>

**<imprimatur>** Contains a formal statement authorizing the publication of a work, sometimes required to appear on a title page or its verso.

att.typed → <imprimatur>

**<imprint>** Information relating to the publication or distribution of a bibliographic item.

att.typed → <imprint>

**<incip>** The opening music and/or words of a musical or textual work.

att.typed → <incip>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plaine & Easie Code.

att.typed → <incipCode>

**<incipText>** Opening words of a musical composition.

att.typed → <incipText>

**<inscription>** An inscription added to an item, such as a bookplate, a note designating the item as a gift, and/or the author's signature.

att.typed → <inscription>

**<instrDef>** MIDI instrument declaration.

att.typed → <instrDef>

**<instrGrp>** Collects MIDI instrument definitions.

att.typed → <instrGrp>

**<interpretation>** Describes the scope of any analytic or interpretive information added to the transcription of the music.

att.typed → <interpretation>

**<item>** Single instance or exemplar of a source/manifestation.

att.typed → <item>

**<itemList>** Gathers bibliographic item entities.

att.typed → <itemList>

**<key>** Key captures information about tonal center and mode.

att.typed → <key>

**<keyAccid>** Accidental in a key signature.

att.typed → <keyAccid>

**<keySig>** Written key signature.

att.typed → <keySig>

**<l>** Contains a single line of text within a line group.

att.typed → <l>

**<label>** A container for document text that identifies the feature to which it is attached. For a "tool tip" or other generated label, use the label attribute.

att.typed → <label>

**<labelAbbr>** A label on the pages following the first.

att.typed → <labelAbbr>

**<langUsage>** Groups elements describing the languages, sub-languages, dialects, etc., represented within the encoded resource.

att.typed → <langUsage>

**<language>** Description of a language used in the document.

att.typed → <language>

**<layer>** An independent stream of events on a staff.

att.typed → <layer>

**<layerDef>** Container for layer meta-information.

att.typed → <layerDef>

**<layout>** Describes how text is laid out on the page, including information about any ruling, pricking, or other evidence of page-preparation techniques.

att.typed → <layout>

**<layoutDesc>** Collects layout descriptions.

att.typed → <layoutDesc>

**<lb>** An empty formatting element that forces text to begin on a new line.

att.typed → <lb>

**<lem>** (lemma) – Contains the lemma, or base text, of a textual variation.

att.typed → <lem>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.typed → <lg>

**<li>** Single item in a <list>.

att.typed → <li>

**<librettist>** Person or organization who is a writer of the text of an opera, oratorio, etc.

att.typed → <librettist>

**<ligature>** A mensural notation symbol that combines two or more notes into a single sign.

att.typed → <ligature>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.typed → <line>

**<liquefiant>** Liquescent.

att.typed → <liquefiant>

**<locus>** Defines a location within a manuscript or manuscript component, usually as a (possibly discontinuous) sequence of folio references.

att.typed → <locus>

**<locusGrp>** Groups locations which together form a distinct but discontinuous item within a manuscript or manuscript part, according to a specific foliation.

att.typed → <locusGrp>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.typed → <lv>

**<lyricist>** Person or organization who is a writer of the text of a song.

att.typed → <lyricist>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.typed → <mNum>

**<mRest>** Complete measure rest in any meter.

att.typed → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.typed → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.typed → <mRpt2>

**<mSpace>** A measure containing only empty space in any meter.

att.typed → <mSpace>

**<manifestation>** A bibliographic description of a physical embodiment of an expression of a work.

att.typed → <manifestation>

**<manifestationList>** A container for the descriptions of physical embodiments of an expression of a work.

att.typed → <manifestationList>

**<mapping>** One or more characters which are related to the parent symbol in some respect, as specified by the type attribute.

att.typed → <mapping>

**<marker>** MIDI marker meta-event.

att.typed → <marker>

**<mdiv>** Contains a subdivision of the body of a musical text.

att.typed → <mdiv>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.typed → <measure>

**<meiCorpus>** A group of related MEI documents, consisting of a header for the group, and one or more <mei> elements, each with its own complete header.

att.typed → <meiCorpus>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.typed → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.typed → <mensuration>

**<metaMark>** A graphical or textual statement with additional / explanatory information about the musical text. The textual consequences of this intervention are encoded independently via other means; that is, with elements such as <add>, <del>, etc.

att.typed → <metaMark>

**<metaText>** MIDI text meta-event.

att.typed → <metaText>

**<meter>** Captures information about the time signature within bibliographic descriptions.

att.typed → <meter>

**<meterSig>** Written meter signature.

att.typed → <meterSig>

**<meterSigGrp>** Used to capture alternating, interchanging, mixed or other non-standard meter signatures.

att.typed → <meterSigGrp>

**<midi>** Container for elements that contain information useful when generating MIDI output.

att.typed → <midi>

**<monogr>** Contains bibliographic elements describing an item, for example, a published book or journal, score, recording, or an unpublished manuscript.

att.typed → <monogr>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.typed → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.typed → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.typed → <multiRpt>

**<music>** Contains a single musical text of any kind, whether unitary or composite, for example, an etude, opera, song cycle, symphony, or anthology of piano solos.

att.typed → <music>

**<nameLink>** Contains a connecting phrase or link used within a name but not regarded as part of it, such as "van der" or "of", "from", etc.

att.typed → <nameLink>

**<namespace>** Supplies the formal name of the namespace to which the elements documented by its children belong.

att.typed → <namespace>

**<ncGrp>** Collection of one or more neume components.

att.typed → <ncGrp>

**<normalization>** Indicates the extent of normalization or regularization of the original source carried out in converting it to electronic form.

att.typed → <normalization>

**<note>** A single pitched event.

att.typed → <note>

**<noteOff>** MIDI note-off event.

att.typed → <noteOff>

**<noteOn>** MIDI note-on event.

att.typed → <noteOn>

**<notesStmt>** (notes statement)- Collects any notes providing information about a text additional to that recorded in other parts of the bibliographic description.

att.typed → <notesStmt>

**<num>** Numeric information in any form.

att.typed → <num>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.typed → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.typed → <oStaff>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.typed → <octave>

**<orig>** Contains material which is marked as following the original, rather than being normalized or corrected.

att.typed → <orig>

**<oriscus>** Oriscus.

att.typed → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.typed → <ornam>

**<ossia>** Captures original notation and a differently notated version **\*present in the source being transcribed\***.

att.typed → <ossia>

**<otherChar>** Any characteristic that serves to differentiate a work or expression from another.

att.typed → <otherChar>

**<p>** One or more text phrases that form a logical prose passage.

att.typed → <p>

**<pad>** An indication of extra visual space between notational elements.

att.typed → <pad>

**<part>** An alternative visual rendition of the score from the point of view of a particular performer (or group of performers).

att.typed → <part>

**<parts>** Provides a container for performers' parts.

att.typed → <parts>

**<patch>** Describes a physical writing surface attached to the original document.

att.typed → <patch>

**<pb>** An empty formatting element that forces text to begin on a new page.

att.typed → <pb>

**<pedal>** Piano pedal mark.

att.typed → <pedal>

**<perfDuration>** Used to express the duration of performance of printed or manuscript music or the playing time for a sound recording, videorecording, etc.

att.typed → <perfDuration>

**<perfMedium>** Indicates the number and character of the performing forces used in a musical composition.

att.typed → <perfMedium>

**<perfRes>** Name of an instrument on which a performer plays, a performer's voice range, or a standard performing ensemble designation.

att.typed → <perfRes>

**<perfResList>** Several instrumental or vocal resources treated as a group.

att.typed → <perfResList>

**<performance>** A presentation of one or more musical works.

att.typed → <performance>

**<periodName>** A label that describes a period of time, such as 'Baroque' or '3rd Style period'.

att.typed → <periodName>

**<persName>** Designation for an individual, including any or all of that individual's forenames, surnames, honorific titles, and added names.

att.typed → <persName>

**<pgDesc>** Contains a brief prose description of the appearance or description of the content of a physical page.

att.typed → <pgDesc>

**<pgFoot>** A running footer.

att.typed → <pgFoot>

**<pgHead>** A running header.

att.typed → <pgHead>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.typed → <phrase>

**<physDesc>** Container for information about the appearance, construction, or handling of physical materials, such as their dimension, quantity, color, style, and technique of creation.

att.typed → <physDesc>

**<physLoc>** Groups information about the current physical location of a bibliographic item, such as the repository in which it is located and its shelf mark(s), and its previous locations.

att.typed → <physLoc>

**<physMedium>** Records the physical materials used in the source, such as ink and paper.

att.typed → <physMedium>

**<plateNum>** Designation assigned to a resource by a music publisher, usually printed at the bottom of each page, and sometimes appearing also on the title page.

att.typed → <plateNum>

**<playingSpeed>** Playing speed for a sound recording is the speed at which the carrier must be operated to produce the sound intended (e.g., 33 1/3 rpm, 19 cm/s, etc.).

att.typed → <playingSpeed>

**<plica>** Plica

att.typed → <plica>

**<port>** MIDI port.

att.typed → <port>

**<postBox>** (postal box or post office box) contains a number or other identifier for some postal delivery point other than a street address.

att.typed → <postBox>

**<postCode>** (postal code) contains a numerical or alphanumeric code used as part of a postal address to simplify sorting or delivery of mail.

att.typed → <postCode>

**<price>** The cost of access to a bibliographic item.

att.typed → <price>

**<prog>** MIDI program change.

att.typed → <prog>

**<projectDesc>** Project-level meta-data describing the aim or purpose for which the electronic file was encoded, funding agencies, etc. together with any other relevant information concerning the process by which it was assembled or collected.

att.typed → <projectDesc>

**<propValue>** A single property value.

att.typed → <propValue>

**<proport>** Description of note duration as arithmetic ratio.

att.typed → <proport>

**<provenance>** The record of ownership or custodianship of an item.

att.typed → <provenance>

**<ptr>** Defines a traversible pointer to another location, using only attributes to describe the destination.

att.typed → <ptr>

**<pubPlace>** Name of the place where a bibliographic item was published.

att.typed → <pubPlace>

**<pubStmt>** Container for information regarding the publication or distribution of a bibliographic item, including the publisher's name and address, the date of publication, and other relevant details.

att.typed → <pubStmt>

**<publisher>** Name of the organization responsible for the publication of a bibliographic item.

att.typed → <publisher>

**<quilisma>** Quilisma.

att.typed → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.typed → <quote>

**<rdg>** (reading) – Contains a single reading within a textual variation.

att.typed → <rdg>

**<recipient>** The name of the individual(s), institution(s) or organization(s) receiving correspondence.

att.typed → <recipient>

**<recording>** A recorded performance.

att.typed → <recording>

**<ref>** Defines a traversible reference to another location. May contain text and sub-elements that describe the destination.

att.typed → <ref>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.typed → <refrain>

**<reg>** Contains material which has been regularized or normalized in some sense.

att.typed → <reg>

**<region>** Contains the name of an administrative unit such as a state, province, or county, larger than a settlement, but smaller than a country.

att.typed → <region>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.typed → <reh>

**<relatedItem>** Contains or references another bibliographic item which is related to the present one.

att.typed → <relatedItem>

**<relation>** Describes a relationship or linkage amongst entities.

att.typed → <relation>

**<relationList>** Gathers relation elements.

att.typed → <relationList>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.typed → <rend>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.typed → <repeatMark>

**<repository>** Institution, agency, or individual which holds a bibliographic item.

att.typed → <repository>

**<resp>** A phrase describing the nature of intellectual responsibility.

att.typed → <resp>

**<respStmt>** Transcription of text that names one or more individuals, groups, or in rare cases, mechanical processes, responsible for creation, realization, production, funding, or distribution of the intellectual or artistic content.

att.typed → <respStmt>

**<rest>** A non-sounding event found in the source being transcribed.

att.typed → <rest>

**<restore>** Indicates restoration of material to an earlier state by cancellation of an editorial or authorial marking or instruction.

att.typed → <restore>

**<revisionDesc>** Container for information about alterations that have been made to an MEI file.

att.typed → <revisionDesc>

**<role>** Name of a dramatic role, as given in a cast list.

att.typed → <role>

**<roleDesc>** Describes a character's role in a drama.

att.typed → <roleDesc>

**<roleName>** Contains a name component which indicates that the referent has a particular role or position in society, such as an official title or rank.

att.typed → <roleName>

**<rubric>** Contains a string of words through which a manuscript signals the beginning or end of a text division, often with an assertion as to its author and title, which is in some way set off from the text itself, usually in red ink, or by use of different size or type of script, or some other such visual device.

att.typed → <rubric>

**<samplingDecl>** Contains a prose description of the rationale and methods used in sampling texts in the creation of a corpus or collection.

att.typed → <samplingDecl>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.typed → <sb>

**<score>** Full score view of the musical content.

att.typed → <score>

**<scoreDef>** Container for score meta-information.

att.typed → <scoreDef>

**<scoreFormat>** Describes the type of score used to represent a musical composition (e.g., short score, full score, condensed score, close score, etc.).

att.typed → <scoreFormat>

**<scriptDesc>** Contains a description of the letters or characters used in an autographic item.

att.typed → <scriptDesc>

**<scriptNote>** Describes a particular script distinguished within the description of an autographic item.

att.typed → <scriptNote>

**<seal>** A single seal or similar attachment.

att.typed → <seal>

**<sealDesc>** Describes the seals or similar external attachments applied to an item.

att.typed → <sealDesc>

**<secFolio>** Marks the word or words taken from a fixed point in a codex (typically the beginning of the second leaf) in order to provide a unique identifier for the item.

att.typed → <secFolio>

**<section>** Segment of music data.

att.typed → <section>

**<seg>** (arbitrary segment) represents any segmentation of text below the "text component" level.

att.typed → <seg>

**<segmentation>** Describes the principles according to which the musical text has been segmented, for example into movements, sections, etc.

att.typed → <segmentation>

**<seqNum>** MIDI sequence number.

att.typed → <seqNum>

**<series>** Contains information about the serial publication in which a bibliographic item has appeared.

att.typed → <series>

**<seriesStmt>** Groups information about the series, if any, to which a publication belongs.

att.typed → <seriesStmt>

**<settlement>** Contains the name of a settlement such as a city, town, or village identified as a single geopolitical or administrative unit.

att.typed → <settlement>

**<sic>** Contains apparently incorrect or inaccurate material.

att.typed → <sic>

**<signatures>** Provides a description of the leaf or quire signatures found within a codex.

att.typed → <signatures>

**<signifLet>** Significantive letter(s).

att.typed → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.typed → <slur>

**<soundChan>** Reflects the number of apparent sound channels in the playback of a recording (monaural, stereophonic, quadraphonic, etc.).

att.typed → <soundChan>

**<source>** A bibliographic description of a source used in the creation of the electronic file.

att.typed → <source>

**<sourceDesc>** A container for the descriptions of the source(s) used in the creation of the electronic file.

att.typed → <sourceDesc>

**<sp>** Contains an individual speech in a performance text.

att.typed → <sp>

**<space>** A placeholder used to fill an incomplete measure, layer, etc. most often so that the combined duration of the events equals the number of beats in the measure.

att.typed → <space>

**<speaker>** Contains a specialized form of heading or label, giving the name of one or more speakers in a dramatic text or fragment.

att.typed → <speaker>

**<specRepro>** The equalization system, noise reduction system, etc. used in making the recording (e.g., NAB, DBX, Dolby, etc.).

att.typed → <specRepro>

**<sponsor>** Names of sponsoring individuals, organizations or institutions. Sponsors give their intellectual authority to a project; they are to be distinguished from funders, who provide the funding but do not necessarily take intellectual responsibility.

att.typed → <sponsor>

**<stack>** An inline table with a single column.

att.typed → <stack>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.typed → <staff>

**<staffDef>** Container for staff meta-information.

att.typed → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.typed → <staffGrp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.typed → <stageDir>

**<stamp>** Contains a word or phrase describing an official mark indicating ownership, genuineness, validity, etc.

att.typed → <stamp>

**<stdVals>** Specifies the format used when standardized date or number values are supplied.

att.typed → <stdVals>

**<stem>** A stem element.

att.typed → <stem>

**<street>** full street address including any name or number identifying a building as well as the name of the street or route on which it is located.

att.typed → <street>

**<strophicus>** Strophicus.

att.typed → <strophicus>

**<styleName>** A label for a characteristic style of writing or performance, such as 'bebop' or 'rock-n-roll'.

att.typed → <styleName>

**<subst>** Groups transcriptional elements when the combination is to be regarded as a single intervention in the text.

att.typed → <subst>

**<supplied>** Contains material supplied by the transcriber or editor for any reason.

att.typed → <supplied>

**<support>** Provides a description of the physical support material of a written item.

att.typed → <support>

**<supportDesc>** Groups elements describing the physical support material of an item.

att.typed → <supportDesc>

**<surface>** Defines a writing surface in terms of a rectangular coordinate space, optionally grouping one or more graphic representations of that space, and rectangular zones of interest within it.

att.typed → <surface>

**<syl>** Individual lyric syllable.

att.typed → <syl>

**<syllable>** Neume notation can be thought of as "neumed text". Therefore, the syllable element provides high-level organization in this repertoire.

att.typed → <syllable>

**<symName>** Contains the name of a symbol, expressed following Unicode conventions.

att.typed → <symName>

**<symProp>** Provides a name and value for some property of the parent symbol.

att.typed → <symProp>

**<symbol>** A reference to a previously defined symbol.

att.typed → <symbol>

**<symbolDef>** Declaration of an individual symbol in a symbolTable.

att.typed → <symbolDef>

**<symbolTable>** Contains a set of user-defined symbols.

att.typed → <symbolTable>

**<sysReq>** System requirements for using the electronic item.

att.typed → <sysReq>

**<table>** Contains text displayed in tabular form.

att.typed → <table>

**<tagUsage>** Documents the usage of a specific element within the document.

att.typed → <tagUsage>

**<tagsDecl>** Provides detailed information about the tagging applied to a document.

att.typed → <tagsDecl>

**<taxonomy>** Defines a typology either implicitly, by means of a bibliographic citation, or explicitly by a structured taxonomy.

att.typed → <taxonomy>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.typed → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.typed → <tempo>

**<term>** Keyword or phrase which describes a resource.

att.typed → <term>

**<termList>** Collection of text phrases which describe a resource.

att.typed → <termList>

**<textLang>** Identifies the languages and writing systems within the work described by a bibliographic description, not the language of the description.

att.typed → <textLang>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.typed → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.typed → <tie>

**<titlePage>** Contains a transcription of the title page of a text.

att.typed → <titlePage>

**<titleStmt>** Container for title and responsibility meta-data.

att.typed → <titleStmt>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.typed → <tr>

**<trackConfig>** Number of physical/input tracks on a sound medium (e.g., eight track, twelve track).

att.typed → <trackConfig>

**<treatHist>** A record of the treatment the item has undergone (e.g., de-acidification, restoration, etc.).

att.typed → <treatHist>

**<treatSched>** Scheduled treatment, e.g., de-acidification, restoration, etc., for an item.

att.typed → <treatSched>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.typed → <trill>

**<trkName>** MIDI track/sequence name.

att.typed → <trkName>

**<tuplet>** A group of notes with "irregular" (sometimes called "irrational") rhythmic values, for example, three notes in the time normally occupied by two or nine in the time of five.

att.typed → <tuplet>

**<tupletSpan>** Alternative element for encoding tuplets, especially useful for tuplets that extend across bar lines.

att.typed → <tupletSpan>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.typed → <turn>

**<typeDesc>** Contains a description of the typefaces or other aspects of the printing of a printed source.

att.typed → <typeDesc>

**<typeNote>** Describes a particular font or other significant typographic feature of a printed resource.

att.typed → <typeNote>

**<unclear>** Contains material that cannot be transcribed with certainty because it is illegible or inaudible in the source.

att.typed → <unclear>

**<unpub>** Used to explicitly indicate that a bibliographic resource is unpublished.

att.typed → <unpub>

**<useRestrict>** Container for information about the conditions that affect use of a bibliographic item after access has been granted.

att.typed → <useRestrict>

**<vel>** MIDI Note-on/off velocity.

att.typed → <vel>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.typed → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.typed → <volta>

**<watermark>** Contains a description of a watermark or similar device.

att.typed → <watermark>

**<when>** Indicates a point in time either absolutely (using the absolute attribute), or relative to another when element (using the since, interval and inttype attributes).

att.typed → <when>

**<width>** Description of the horizontal size of an object.

att.typed → <width>

**<work>** Provides a detailed description of a work — a distinct intellectual or artistic creation — specifically its history, language use, and high-level musical attributes (e.g., key, tempo, meter, medium of performance, and intended duration).

att.typed → <work>

**<workList>** Grouping mechanism for information describing non-bibliographic aspects of a text.

att.typed → <workList>

**<zone>** Defines an area of interest within a <surface> or graphic file.

att.typed → <zone>

## Remarks

When appropriate, values from an established typology should be used.

## Declaration

```
<classSpec ident="att.typed" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes which can be used to classify features.</desc>
  <classes>
    <memberOf key="att.classest"/>
  </classes>
  <attList>
    <attDef ident="type" usage="opt">
      <desc xml:lang="en">Designation which characterizes the element in some sense, using
      any convenient classification scheme or typology that employs single-token
      labels.</desc>
      <datatype maxOccurs="unbounded">
        <rng:data type="NMTOKEN"/>
      </datatype>

# att.typography

Typographical attributes.

## Referenced in chapters

[9.2.2 Text Rendition](#)

## Module

[MEI.shared](#)

## Attributes

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.typography → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.typography → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.typography → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.typography → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.typography → @fontweight

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.typography → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.typography → @lineheight

## Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.typography → <accid>

**<ambNote>** Highest or lowest pitch in a score, staff, or layer.

att.typography → <ambNote>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.typography → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.typography → <artic>

**<beatRpt>** An indication that material on a preceding beat should be repeated.

att.typography → <beatRpt>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.typography → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.typography → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.typography → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.typography → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.typography → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.typography → <cpMark>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line.

Sometimes called a "direct".

att.typography → <custos>

**<dot>** Dot of augmentation or division.

att.typography → <dot>

**<episema>** Episema.

att.typography → <episema>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.typography → <fermata>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.typography → <gliss>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.typography → <grpSym>

**<halfmRpt>** A half-measure repeat in any meter.

att.typography → <halfmRpt>

**<harpPedal>** Harp pedal diagram.

att.typography → <harpPedal>

**<hispanTick>** Hispanic tick.

att.typography → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.typography → <keyAccid>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.typography → <lg>

**<liquecent>** Liquescent.

att.typography → <liquecent>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on <measure> does not adequately capture the appearance or placement of the measure number/label.

att.typography → <mNum>

**<mRest>** Complete measure rest in any meter.

att.typography → <mRest>

**<mRpt>** An indication that the previous measure should be repeated.

att.typography → <mRpt>

**<mRpt2>** An indication that the previous two measures should be repeated.

att.typography → <mRpt2>

**<mensur>** Collects information about the metrical relationship between a note value and the next smaller value; that is, either triple or duple.

att.typography → <mensur>

**<mensuration>** Captures information about mensuration within bibliographic descriptions.

att.typography → <mensuration>

**<meterSig>** Written meter signature.

att.typography → <meterSig>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.typography → <mordent>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.typography → <multiRest>

**<multiRpt>** Multiple repeated measures.

att.typography → <multiRpt>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.typography → <nc>

**<ncGrp>** Collection of one or more neume components.

att.typography → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.typography → <neume>

**<note>** A single pitched event.

att.typography → <note>

**<oriscus>** Oriscus.

att.typography → <oriscus>

**<pedal>** Piano pedal mark.

att.typography → <pedal>

**<proport>** Description of note duration as arithmetic ratio.

att.typography → <proport>

**<quilisma>** Quilisma.

att.typography → <quilisma>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.typography → <refrain>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.typography → <reh>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.typography → <rend>

**<rest>** A non-sounding event found in the source being transcribed.

att.typography → <rest>

**<sb>** An empty formatting element that forces musical notation to begin on a new line.

att.typography → <sb>

**<signifLet>** Significantive letter(s).

att.typography → <signifLet>

**<strophicus>** Strophicus.

att.typography → <strophicus>

**<syl>** Individual lyric syllable.

att.typography → <syl>

**<symbol>** A reference to a previously defined symbol.

att.typography → <symbol>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.typography → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.typography → <turn>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.typography → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.typography → <volta>

```

## att.verse.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.verse.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.verse.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.verse.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.verse.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.verse.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.verse.vis → @fontweight

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.verse.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.verse.vis → @lineheight

**@place** (*optional*) Captures the placement of the item with respect to the staff with which it is associated. Value conforms to [data.STAFFREL](#).

att.verse.vis → @place

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.verse.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.verse.vis → @vo

**@voltasym** (*optional*) Specifies the symbol used to group lyrics. Allowed values are: "**brace**" (*Curved symbol, , {, }*), "**bracket**" (*Square symbol, , [, but with curved/angled top and bottom segments.*), "**bracketsq**" (*Square symbol, , [, with horizontal top and bottom segments.*), "**line**" (*Line symbol, , |, (wide) line without top and bottom curved/horizontal segments.*), "**none**" (*Grouping symbol missing.*)

att.verse.vis → @voltasym

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.verse.vis → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.verse.vis → @y

## Available at

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.verse.vis → <verse>

## Declaration

```

    <memberOf key="att.voltaGroupingSym"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.verticalAlign

Attributes that record vertical alignment.

### Referenced in chapters

[9.2.2 Text Rendition](#)

### Module

[MEI.shared](#)

### Attributes

**@valign** (*optional*) Records vertical alignment. Value conforms to [data.VERTICALALIGNMENT](#).

att.verticalAlign → @valign

### Available at

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.  
att.verticalAlign → <fig>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.verticalAlign → <rend>

### Declaration

```
<classSpec ident="att.verticalAlign" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record vertical alignment.</desc>
  <attList>

        <rng:ref name="data.VERTICALALIGNMENT"/>
      </datatype>
    </attDef>
  </attList>
</classSpec>
```

# att.verticalGroup

Attributes that record grouping of vertically aligned elements.

## Module

MEI.shared

## Attributes

**@vgrp** (*optional*) Provides a label for members of a vertically aligned group. Value is a positive integer.  
 att.verticalGroup → @vgrp

## Available at

**<attacca>** An instruction to begin the next section or movement of a composition without pause.  
 att.verticalGroup → <attacca>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.  
 att.verticalGroup → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.  
 att.verticalGroup → <dynam>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.   
 att.verticalGroup → <hairpin>

**<pedal>** Piano pedal mark.  
 att.verticalGroup → <pedal>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.  
 att.verticalGroup → <repeatMark>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").  
 att.verticalGroup → <tempo>

## Declaration

```

<classSpec ident="att.verticalGroup" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that record grouping of vertically aligned elements.</desc>
  <attList>

DEVELOPMENT  
VERSION

# att.visibility

Attributes describing whether a feature should be displayed.

## Module

[MEI.shared](#)

## Attributes

**@visible** (*optional*) Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form. Value conforms to [data.BOOLEAN](#).

att.visibility → @visible

## Available at

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.visibility → <barLine>

**<beam>** A container for a series of explicitly beamed events that begins and ends entirely within a measure.

att.visibility → <beam>

**<beamSpan>** Alternative element for explicitly encoding beams, particularly those which extend across bar lines.

att.visibility → <beamSpan>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.visibility → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.visibility → <clef>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.visibility → <divLine>

**<episema>** Episema.

att.visibility → <episema>

**<hispanTick>** Hispanic tick.

att.visibility → <hispanTick>

**<keySig>** Written key signature.

att.visibility → <keySig>

**<layer>** An independent stream of events on a staff.

att.visibility → <layer>

**<layerDef>** Container for layer meta-information.

att.visibility → <layerDef>

**<liquegent>** Liquescent.

att.visibility → <liquegent>

**<mRest>** Complete measure rest in any meter.

att.visibility → <mRest>

**<meterSig>** Written meter signature.

att.visibility → <meterSig>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.visibility → <nc>

**<ncGrp>** Collection of one or more neume components.

att.visibility → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.visibility → <neume>

**<note>** A single pitched event.

att.visibility → <note>

**<oLayer>** A layer that contains an alternative to material in another layer.

att.visibility → <oLayer>

**<oStaff>** A staff that holds an alternative passage which may be played instead of the original material.

att.visibility → <oStaff>

**<oriscus>** Oriscus.

att.visibility → <oriscus>

**<quilisma>** Quilisma.

att.visibility → <quilisma>

**<signifLet>** Significantive letter(s).

att.visibility → <signifLet>

**<staff>** A group of equidistant horizontal lines on which notes are placed in order to represent pitch or a grouping element for individual 'strands' of notes, rests, etc. that may or may not actually be rendered on staff lines; that is, both diastematic and non-diastematic signs.

att.visibility → <staff>

**<staffDef>** Container for staff meta-information.

att.visibility → <staffDef>

**<staffGrp>** A group of bracketed or braced staves.

att.visibility → <staffGrp>

**<stem>** A stem element.

att.visibility → <stem>

**<strophicus>** Strophicus.

att.visibility → <strophicus>

## Declaration

```

DEVELOPMENT  
VERSION

## att.visualOffset

Visual offset attributes. Some items may have their location recorded in terms of offsets from their programmatically-determined location. The ho attribute records the horizontal offset while vo records the vertical. The to attribute holds a timestamp offset, the most common use of which is as an alternative to the ho attribute.

### Module

MEI.shared

### Attributes

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset → @ho

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.visualOffset → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset → @vo

### Available at

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.visualOffset → <anchoredText>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.visualOffset → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.visualOffset → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.visualOffset → <attacca>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.visualOffset → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.visualOffset → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.visualOffset → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.visualOffset → <caesura>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.visualOffset → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.visualOffset → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.visualOffset → <curve>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like **<tempo>**, **<dynam>** or **<repeatMark>**.

att.visualOffset → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.visualOffset → <dynam>

**<f>** Single element of a figured bass indication.

att.visualOffset → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.visualOffset → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.visualOffset → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.visualOffset → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.visualOffset → <gliss>

**<graphic>** Indicates the location of an inline graphic.

att.visualOffset → <graphic>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.visualOffset → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.visualOffset → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.visualOffset → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.visualOffset → <harm>

**<harpPedal>** Harp pedal diagram.

att.visualOffset → <harpPedal>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.visualOffset → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.visualOffset → <lv>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on **<measure>** does not adequately capture the appearance or placement of the measure number/label.

att.visualOffset → <mNum>

**<mRest>** Complete measure rest in any meter.

att.visualOffset → <mRest>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.visualOffset → <mordent>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.visualOffset → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.visualOffset → <ornam>

**<pedal>** Piano pedal mark.

att.visualOffset → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset → <phrase>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.visualOffset → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.visualOffset → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.visualOffset → <rest>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset → <slur>

**<sp>** Contains an individual speech in a performance text.

att.visualOffset → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.visualOffset → <stageDir>

**<syl>** Individual lyric syllable.

att.visualOffset → <syl>

**<symbol>** A reference to a previously defined symbol.

att.visualOffset → <symbol>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.visualOffset → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.visualOffset → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.visualOffset → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.visualOffset → <turn>

## Declaration

```
<classSpec ident="att.visualOffset" module="MEI.shared" type="atts">

```

## att.visualOffset.ho

Horizontal offset attributes.

### Module

[MEI.shared](#)

### Attributes

**@ho** (*optional*) Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset.ho → @ho

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.visualOffset.ho → <accid>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.visualOffset.ho → <anchoredText>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.visualOffset.ho → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.visualOffset.ho → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.visualOffset.ho → <attacca>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.visualOffset.ho → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.visualOffset.ho → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.visualOffset.ho → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.visualOffset.ho → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.visualOffset.ho → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.visualOffset.ho → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.visualOffset.ho → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.visualOffset.ho → <curve>

**<custos>** Symbol placed at the end of a line of music to indicate the first note of the next line. Sometimes called a "direct".

att.visualOffset.ho → <custos>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.visualOffset.ho → <dir>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.visualOffset.ho → <divLine>

**<dot>** Dot of augmentation or division.

att.visualOffset.ho → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.visualOffset.ho → <dynam>

**<episema>** Episema.

att.visualOffset.ho → <episema>

**<f>** Single element of a figured bass indication.

att.visualOffset.ho → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.visualOffset.ho → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.visualOffset.ho → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.visualOffset.ho → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.visualOffset.ho → <gliss>

**<graphic>** Indicates the location of an inline graphic.

att.visualOffset.ho → <graphic>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.visualOffset.ho → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.visualOffset.ho → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.visualOffset.ho → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.visualOffset.ho → <harm>

**<harpPedal>** Harp pedal diagram.

att.visualOffset.ho → <harpPedal>

**<hispanTick>** Hispanic tick.

att.visualOffset.ho → <hispanTick>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.visualOffset.ho → <line>

**<liquecent>** Liquescent.

att.visualOffset.ho → <liquecent>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.visualOffset.ho → <lv>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on **<measure>** does not adequately capture the appearance or placement of the measure number/label.

att.visualOffset.ho → <mNum>

**<mRest>** Complete measure rest in any meter.

att.visualOffset.ho → <mRest>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.visualOffset.ho → <mordent>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.visualOffset.ho → <nc>

**<ncGrp>** Collection of one or more neume components.

att.visualOffset.ho → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.visualOffset.ho → <neume>

**<note>** A single pitched event.

att.visualOffset.ho → <note>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.visualOffset.ho → <octave>

**<oriscus>** Oriscus.

att.visualOffset.ho → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.visualOffset.ho → <ornam>

**<pedal>** Piano pedal mark.

att.visualOffset.ho → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset.ho → <phrase>

**<quilisma>** Quilisma.

att.visualOffset.ho → <quilisma>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.visualOffset.ho → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.visualOffset.ho → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.visualOffset.ho → <rest>

**<signifLet>** Significantive letter(s).

att.visualOffset.ho → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset.ho → <slur>

**<sp>** Contains an individual speech in a performance text.

att.visualOffset.ho → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.visualOffset.ho → <stageDir>

**<strophicus>** Strophicus.

att.visualOffset.ho → <strophicus>

**<syl>** Individual lyric syllable.

att.visualOffset.ho → <syl>

**<symbol>** A reference to a previously defined symbol.

att.visualOffset.ho → <symbol>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.visualOffset.ho → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.visualOffset.ho → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.visualOffset.ho → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.visualOffset.ho → <turn>

## att.visualOffset.to

Horizontal offset attributes specified in terms of time.

### Module

[MEI.shared](#)

### Attributes

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.visualOffset.to → @to

### Available at

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.visualOffset.to → <anchoredText>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.visualOffset.to → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.visualOffset.to → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.visualOffset.to → <attacca>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.visualOffset.to → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.visualOffset.to → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.visualOffset.to → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.visualOffset.to → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.visualOffset.to → <chord>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.visualOffset.to → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.visualOffset.to → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.visualOffset.to → <curve>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.visualOffset.to → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.visualOffset.to → <dynam>

**<f>** Single element of a figured bass indication.

att.visualOffset.to → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.visualOffset.to → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.visualOffset.to → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.visualOffset.to → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.visualOffset.to → <gliss>

**<graphic>** Indicates the location of an inline graphic.

att.visualOffset.to → <graphic>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.visualOffset.to → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.visualOffset.to → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.visualOffset.to → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.visualOffset.to → <harm>

**<harpPedal>** Harp pedal diagram.

att.visualOffset.to → <harpPedal>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.visualOffset.to → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.visualOffset.to → <lv>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on [<measure>](#) does not adequately capture the appearance or placement of the measure number/label.

att.visualOffset.to → <mNum>

**<mRest>** Complete measure rest in any meter.

att.visualOffset.to → <mRest>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.visualOffset.to → <mordent>

**<note>** A single pitched event.

att.visualOffset.to → <note>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.visualOffset.to → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.visualOffset.to → <ornam>

**<pedal>** Piano pedal mark.

att.visualOffset.to → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset.to → <phrase>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.visualOffset.to → <refrain>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.visualOffset.to → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.visualOffset.to → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.visualOffset.to → <rest>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset.to → <slur>

**<sp>** Contains an individual speech in a performance text.

att.visualOffset.to → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.visualOffset.to → <stageDir>

**<syl>** Individual lyric syllable.

att.visualOffset.to → <syl>

**<symbol>** A reference to a previously defined symbol.

att.visualOffset.to → <symbol>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.visualOffset.to → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.visualOffset.to → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.visualOffset.to → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.visualOffset.to → <turn>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.visualOffset.to → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.visualOffset.to → <volta>

# att.visualOffset.vo

Vertical offset attributes.

## Module

[MEI.shared](#)

## Attributes

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset.vo → @vo

## Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.visualOffset.vo → <accid>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.visualOffset.vo → <anchoredText>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.visualOffset.vo → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.visualOffset.vo → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.visualOffset.vo → <attacca>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.visualOffset.vo → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.visualOffset.vo → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.visualOffset.vo → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.visualOffset.vo → <caesura>

**<clef>** Indication of the exact location of a particular note on the staff and, therefore, the other notes as well.

att.visualOffset.vo → <clef>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.visualOffset.vo → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.visualOffset.vo → <curve>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.visualOffset.vo → <dir>

**<dot>** Dot of augmentation or division.

att.visualOffset.vo → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.visualOffset.vo → <dynam>

**<f>** Single element of a figured bass indication.

att.visualOffset.vo → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.visualOffset.vo → <fermata>

**<fing>** finger – An individual finger in a fingering indication.

att.visualOffset.vo → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.visualOffset.vo → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.visualOffset.vo → <gliss>

**<graphic>** Indicates the location of an inline graphic.

att.visualOffset.vo → <graphic>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.visualOffset.vo → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.visualOffset.vo → <hairpin>

**<halfmRpt>** A half-measure repeat in any meter.

att.visualOffset.vo → <halfmRpt>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.visualOffset.vo → <harm>

**<harpPedal>** Harp pedal diagram.

att.visualOffset.vo → <harpPedal>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.visualOffset.vo → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.visualOffset.vo → <lv>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on [<measure>](#) does not adequately capture the appearance or placement of the measure number/label.

att.visualOffset.vo → <mNum>

**<mRest>** Complete measure rest in any meter.

att.visualOffset.vo → <mRest>

**<mordent>** An ornament indicating rapid alternation of the main note with a secondary note, usually a step below, but sometimes a step above.

att.visualOffset.vo → <mordent>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.visualOffset.vo → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.visualOffset.vo → <ornam>

**<pedal>** Piano pedal mark.

att.visualOffset.vo → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset.vo → <phrase>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.visualOffset.vo → <refrain>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.visualOffset.vo → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.visualOffset.vo → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.visualOffset.vo → <rest>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset.vo → <slur>

**<sp>** Contains an individual speech in a performance text.

att.visualOffset.vo → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.visualOffset.vo → <stageDir>

**<syl>** Individual lyric syllable.

att.visualOffset.vo → <syl>

**<symbol>** A reference to a previously defined symbol.

att.visualOffset.vo → <symbol>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.visualOffset.vo → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.visualOffset.vo → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.visualOffset.vo → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.visualOffset.vo → <turn>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.visualOffset.vo → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.visualOffset.vo → <volta>

## att.visualOffset2

Visual offset attributes. Some items may have their location recorded in terms of pairs of offsets from their programmatically-determined location. The startho and endho attributes record the horizontal offsets of the start and end points of the item, respectively. Similarly, the startvo and endvo attributes record the vertical offsets of the start and end points of the item. The startto and endto attributes hold timestamp offsets, the most common use of which is as alternatives to the ho attributes.

### Module

[MEI.shared](#)

### Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2 → @endho

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.visualOffset2 → @endto

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2 → @endvo

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2 → @startho

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.visualOffset2 → @startto

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2 → @startvo

### Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.visualOffset2 → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.visualOffset2 → <bracketSpan>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.visualOffset2 → <curve>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.visualOffset2 → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.visualOffset2 → <hairpin>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.visualOffset2 → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.visualOffset2 → <lv>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset2 → <phrase>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset2 → <slur>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.visualOffset2 → <tie>

## att.visualOffset2.ho

Horizontal offset requiring a pair of attributes.

### Module

[MEI.shared](#)

### Attributes

**@endho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined end point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2.ho → @endho

**@startho** (*optional*) Records the horizontal adjustment of a feature's programmatically-determined start point. Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2.ho → @startho

### Available at

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.visualOffset2.ho → <attacca>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.visualOffset2.ho → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.visualOffset2.ho → <bracketSpan>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.visualOffset2.ho → <curve>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.visualOffset2.ho → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.visualOffset2.ho → <dynam>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.visualOffset2.ho → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.visualOffset2.ho → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.visualOffset2.ho → <harm>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.visualOffset2.ho → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.visualOffset2.ho → <lv>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.visualOffset2.ho → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.visualOffset2.ho → <ornam>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset2.ho → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.visualOffset2.ho → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset2.ho → <slur>

**<sp>** Contains an individual speech in a performance text.

att.visualOffset2.ho → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.visualOffset2.ho → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.visualOffset2.ho → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.visualOffset2.ho → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.visualOffset2.ho → <trill>

VERSION

## att.visualOffset2.to

Horizontal offset attributes requiring a pair of attributes specified in terms of time.

### Module

MEI.shared

### Attributes

**@endto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined end point. Value conforms to [data.TSTAMPOFFSET](#).

att.visualOffset2.to → @endto

**@startto** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined start point. Value conforms to [data.TSTAMPOFFSET](#).

att.visualOffset2.to → @startto

### Available at

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.visualOffset2.to → <attacca>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.visualOffset2.to → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.visualOffset2.to → <bracketSpan>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.visualOffset2.to → <curve>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like [<tempo>](#), [<dynam>](#) or [<repeatMark>](#).

att.visualOffset2.to → <dir>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.visualOffset2.to → <dynam>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.visualOffset2.to → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.visualOffset2.to → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.visualOffset2.to → <harm>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.visualOffset2.to → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.visualOffset2.to → <lv>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.visualOffset2.to → <octave>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.visualOffset2.to → <ornam>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset2.to → <phrase>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.visualOffset2.to → <repeatMark>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.visualOffset2.to → <slur>

**<sp>** Contains an individual speech in a performance text.

att.visualOffset2.to → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.visualOffset2.to → <stageDir>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.visualOffset2.to → <tempo>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.visualOffset2.to → <tie>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.visualOffset2.to → <trill>

## att.visualOffset2.vo

Vertical offset attributes requiring a pair of attributes.

### Module

[MEI.shared](#)

### Attributes

**@endvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined end point.  
Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2.vo → @endvo

**@startvo** (*optional*) Records a vertical adjustment of a feature's programmatically-determined start point.  
Value conforms to [data.MEASUREMENTSIGNED](#).

att.visualOffset2.vo → @startvo

### Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.  
att.visualOffset2.vo → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.  
att.visualOffset2.vo → <bracketSpan>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.  
att.visualOffset2.vo → <curve>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.  
att.visualOffset2.vo → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.  
att.visualOffset2.vo → <hairpin>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.  
att.visualOffset2.vo → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.  
att.visualOffset2.vo → <lv>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.  
att.visualOffset2.vo → <phrase>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.  
att.visualOffset2.vo → <slur>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.  
att.visualOffset2.vo → <tie>

### Declaration

# att.volta.anl

Analytical domain attributes.

## Module

[MEI.analytical](#)

## Attributes

### Available at

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.volta.anl → <volta>

### Declaration

```
<classSpec ident="att.volta.anl" module="MEI.analytical" type="atts">
  <desc xml:lang="en">Analytical domain attributes.</desc>
</classSpec>
```

## att.volta.ges

Gestural domain attributes.

### Module

[MEI.gestural](#)

### Attributes

#### Available at

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.volta.ges → <volta>

#### Declaration

```
<classSpec ident="att.volta.ges" module="MEI.gestural" type="atts">
  <desc xml:lang="en">Gestural domain attributes.</desc>
</classSpec>
```

## att.volta.log

Logical domain attributes. The n attribute should be used for repetition numbers. Numbers need not be consecutive; they may also be expressed as ranges, e.g., 2-3,6.

### Module

[MEI.lyrics](#)

### Attributes

#### Available at

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.volta.log → <volta>

#### Declaration

```
<classSpec ident="att.volta.log" module="MEI.lyrics" type="atts">
  <desc xml:lang="en">Logical domain attributes. The n attribute should be used for
  repetition numbers. Numbers need not be consecutive; they may also be expressed as ranges,
    <abbr>e.g.</abbr>
    , 2-3,6.</desc>
</classSpec>
```

## att.volta.vis

Visual domain attributes.

### Module

[MEI.visual](#)

### Attributes

**@color** (*optional*) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation. Value conforms to [data.COLOR](#).

att.volta.vis → @color

**@fontfam** (*optional*) Contains the name of a font-family. Value conforms to [data.FONTFAMILY](#).

att.volta.vis → @fontfam

**@fontname** (*optional*) Holds the name of a font. Value conforms to [data.FONTNAME](#).

att.volta.vis → @fontname

**@fontsize** (*optional*) Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%. Value conforms to [data.FONTSIZE](#).

att.volta.vis → @fontsize

**@fontstyle** (*optional*) Records the style of a font, i.e., italic, oblique, or normal. Value conforms to [data.FONTSTYLE](#).

att.volta.vis → @fontstyle

**@fontweight** (*optional*) Used to indicate bold type. Value conforms to [data.FONTWEIGHT](#).

att.volta.vis → @fontweight

**@letterspacing** (*optional*) Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property. Value conforms to [data.MEASUREMENTTYPOGRAPHYSIGNED](#).

att.volta.vis → @letterspacing

**@lineheight** (*optional*) Indicates line height in analogy to the CSS line-height property. Value conforms to either [data.MEASUREMENTTYPOGRAPHYUNSIGNED](#) or [data.PERCENT](#).

att.volta.vis → @lineheight

**@to** (*optional*) Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats. Value conforms to [data.TSTAMPOFFSET](#).

att.volta.vis → @to

**@vo** (*optional*) Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines. Value conforms to [data.MEASUREMENTSIGNED](#).

att.volta.vis → @vo

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.volta.vis → @x

**@y** (optional) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the `facs` attribute. Value is a decimal number.

att.volta.vis → @y

#### Available at

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.volta.vis → <volta>

#### Declaration

```
<classSpec ident="att.volta.vis" module="MEI.visual" type="atts">
  <desc xml:lang="en">Visual domain attributes.</desc>
  <classes>
    <memberOf key="att.color"/>

    <memberOf key="att.visualOffset.vo"/>
    <memberOf key="att.xy"/>
  </classes>
</classSpec>
```

## att.voltaGroupingSym

Attributes that describe the symbol used to group volta elements.

### Module

MEI.shared

### Attributes

**@voltasym** (*optional*) Specifies the symbol used to group lyrics. Allowed values are: "brace" (Curved symbol, , {}), "bracket" (Square symbol, , [, but with curved/angled top and bottom segments.), "bracketsq" (Square symbol, , [, with horizontal top and bottom segments.), "line" (Line symbol, , |, (wide) line without top and bottom curved/horizontal segments.), "none" (Grouping symbol missing.)

att.voltaGroupingSym → @voltasym

### Available at

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.voltaGroupingSym → <refrain>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.voltaGroupingSym → <verse>

### Declaration

```
<classSpec ident="att.voltaGroupingSym" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that describe the symbol used to group volta
  elements.</desc>
  <attList>
    <attDef ident="voltasym" usage="opt">
      <desc xml:lang="en">Specifies the symbol used to group lyrics.</desc>
      <valList type="closed">
        <valItem ident="brace">
          <desc xml:lang="en">Curved symbol,
          <abbr>i.e.</abbr>
          , {}</desc>
        </valItem>
        <valItem ident="bracket">
          <desc xml:lang="en">Square symbol,
          <abbr>i.e.</abbr>
          , [, but with curved/angled top and bottom segments.</desc>
        </valItem>
        <valItem ident="bracketsq">
          <desc xml:lang="en">Square symbol,
          <abbr>i.e.</abbr>
          , [, with horizontal top and bottom segments.</desc>
        </valItem>
      </valList>
    </attDef>
  </attList>
</classSpec>
```

```
</valItem>
<valItem ident="line">
    <desc xml:lang="en">Line symbol,
        <abbr>i.e.</abbr>
    , |, (wide) line without top and bottom curved/horizontal segments.</desc>
</valItem>
<valItem ident="none">
    <desc xml:lang="en">Grouping symbol missing.</desc>
</valItem>
</valList>
</attDef>
</attList>
</classSpec>
```

## att.whitespace

Attributes that address whitespace processing.

### Referenced in chapters

[2.3.1 Attributes from the XML-namespace](#)

### Module

[MEI.shared](#)

### Attributes

**@xml:space** (*optional*) Allows one to signal to an application whether an element's white space is "significant". The behavior of xml:space cascades to all descendant elements, but it can be turned off locally by setting the xml:space attribute to the value "default". Allowed values are: "**default**" (*Allows the application to handle white space as necessary. Not including an xml:space attribute produces the same result as using the default value.*), "**preserve**" (*Instructs the application to maintain white space "as-is", suggesting that it might have meaning.*)

att.whitespace → @xml:space

### Available at

**<extData>** Provides a container element for non-MEI data formats.

att.whitespace → <extData>

**<extMeta>** Provides a container element for non-MEI metadata formats.

att.whitespace → <extMeta>

**<incipCode>** Incipit coded in a non-XML, plain text format, such as Plain & Easie Code.

att.whitespace → <incipCode>

**<rend>** A formatting element indicating special visual rendering, e.g., bold or italicized, of a text word or phrase.

att.whitespace → <rend>

### Declaration

```
<classSpec ident="att.whitespace" module="MEI.shared" type="atts">
  <desc xml:lang="en">Attributes that address whitespace processing.</desc>
  <!--<attDef ident="space" ns="http://www.w3.org/XML/1998/namespace" usage="opt">-->

</attDef>  
</attList>  
</classSpec>
```

## att.width

Attributes that describe horizontal size.

### Referenced in chapters

[3.7.2.2 Specifying page dimensions](#)

### Module

[MEI.shared](#)

### Attributes

**@width** (*optional*) Measurement of the horizontal dimension of an entity. Value conforms to [data.MEASUREMENTUNSIGNED](#).

att.width → @width

### Available at

**<barLine>** Vertical line drawn through one or more staves that divides musical notation into metrical units.

att.width → <barLine>

**<bifolium>** Describes a folded sheet of paper.

att.width → <bifolium>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.width → <cutout>

**<folium>** Describes a single leaf of paper.

att.width → <folium>

**<graphic>** Indicates the location of an inline graphic.

att.width → <graphic>

**<measure>** Unit of musical time consisting of a fixed number of note values of a given type, as determined by the prevailing meter, and delimited in musical notation by bar lines.

att.width → <measure>

**<multiRest>** Multiple measures of rest compressed into a single symbol, frequently found in performer parts.

att.width → <multiRest>

**<pad>** An indication of extra visual space between notational elements.

att.width → <pad>

### Remarks

The width attribute may be used to capture measure width data for interchange with music printing systems that utilize this information for printing. On **<barLine>** the width attribute captures the width of the preceding measure.

### Declaration

```
<classSpec ident="att.width" module="MEI.shared" type="atts">
```

```
<desc xml:lang="en">Attributes that describe horizontal size.</desc>
<attList>

  measure.</p>
</remarks>
</classSpec>
```

## att.xy

Output coordinate attributes. Some elements may have their exact rendered \*output\* coordinates recorded. x and y attributes indicate where to place the rendered output. Recording the coordinates of a feature in a facsimile requires the use of the facs attribute.

### Referenced in chapters

[5.6.2 Stems](#)

### Module

[MEI.shared](#)

### Attributes

**@x** (*optional*) Encodes an x coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facs attribute. Value is a decimal number.

att.xy → @x

**@y** (*optional*) Encodes a y coordinate for a feature in an output coordinate system. When it is necessary to record the placement of a feature in a facsimile image, use the facs attribute. Value is a decimal number.

att.xy → @y

### Available at

**<accid>** Records a temporary alteration to the pitch of a note.

att.xy → <accid>

**<anchoredText>** Container for text that is fixed to a particular page location, regardless of changes made to the layout of the measures around it.

att.xy → <anchoredText>

**<arpeg>** Indicates that the notes of a chord are to be performed successively rather than simultaneously, usually from lowest to highest. Sometimes called a "roll".

att.xy → <arpeg>

**<artic>** An indication of how to play a note or chord.

att.xy → <artic>

**<attacca>** An instruction to begin the next section or movement of a composition without pause.

att.xy → <attacca>

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.

att.xy → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.

att.xy → <bracketSpan>

**<breath>** An indication of a point at which the performer on an instrument requiring breath (including the voice) may breathe.

att.xy → <breath>

**<caesura>** Break, pause, or interruption in the normal tempo of a composition. Typically indicated by "railroad tracks", i.e., two diagonal slashes.

att.xy → <caesura>

**<chord>** A simultaneous sounding of two or more notes in the same layer \*with the same duration\*.

att.xy → <chord>

**<cpMark>** A verbal or graphical indication to copy musical material written elsewhere.

att.xy → <cpMark>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.

att.xy → <curve>

**<cutout>** A cutout is a section of a document sheet that has been removed and is now missing.

att.xy → <cutout>

**<dir>** An instruction expressed as a combination of text and symbols, typically above, below, or between staves, but not on the staff — that is not encoded elsewhere in more specific elements, like <tempo>, <dynam> or <repeatMark>.

att.xy → <dir>

**<divLine>** Represents a division (divisio) in neume notation. Divisions indicate short, medium, or long pauses similar to breath marks in modern notation.

att.xy → <divLine>

**<dot>** Dot of augmentation or division.

att.xy → <dot>

**<dynam>** Indication of the volume of a note, phrase, or section of music.

att.xy → <dynam>

**<episema>** Episema.

att.xy → <episema>

**<f>** Single element of a figured bass indication.

att.xy → <f>

**<fermata>** An indication placed over a note or rest to indicate that it should be held longer than its written value. May also occur over a bar line to indicate the end of a phrase or section. Sometimes called a 'hold' or 'pause'.

att.xy → <fermata>

**<fig>** Groups elements representing or containing graphic information such as an illustration or figure.

att.xy → <fig>

**<fing>** finger – An individual finger in a fingering indication.

att.xy → <fing>

**<fingGrp>** (finger group)– A group of individual fingers in a fingering indication.

att.xy → <fingGrp>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.

att.xy → <gliss>

**<grpSym>** A brace or bracket used to group two or more staves of a score or part.

att.xy → <grpSym>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.

att.xy → <hairpin>

**<harm>** An indication of harmony, e.g., chord names, tablature grids, harmonic analysis, figured bass.

att.xy → <harm>

**<harpPedal>** Harp pedal diagram.

att.xy → <harpPedal>

**<head>** Contains any heading, for example, the title of a section of text, or the heading of a list.

att.xy → <head>

**<hispanTick>** Hispanic tick.

att.xy → <hispanTick>

**<keyAccid>** Accidental in a key signature.

att.xy → <keyAccid>

**<lg>** May be used for any section of text that is organized as a group of lines; however, it is most often used for a group of verse lines functioning as a formal unit, e.g., a stanza, refrain, verse paragraph, etc.

att.xy → <lg>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.

att.xy → <line>

**<liquecent>** Liquescent.

att.xy → <liquecent>

**<list>** A formatting element that contains a series of items separated from one another and arranged in a linear, often vertical, sequence.

att.xy → <list>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.

att.xy → <lv>

**<mNum>** Designation, name, or label for a measure, often but not always consisting of digits. Use this element when the n attribute on **<measure>** does not adequately capture the appearance or placement of the measure number/label.

att.xy → <mNum>

**<mRest>** Complete measure rest in any meter.

att.xy → <mRest>

**<mSpace>** A measure containing only empty space in any meter.

att.xy → <mSpace>

**<nc>** Sign representing a single pitched event, although the exact pitch may not be known.

att.xy → <nc>

**<ncGrp>** Collection of one or more neume components.

att.xy → <ncGrp>

**<neume>** Sign representing one or more musical pitches.

att.xy → <neume>

**<note>** A single pitched event.

att.xy → <note>

**<octave>** An indication that a passage should be performed one or more octaves above or below its written pitch.

att.xy → <octave>

**<oriscus>** Oriscus.

att.xy → <oriscus>

**<ornam>** An element indicating an ornament that is not a mordent, turn, or trill.

att.xy → <ornam>

**<p>** One or more text phrases that form a logical prose passage.

att.xy → <p>

**<patch>** Describes a physical writing surface attached to the original document.

att.xy → <patch>

**<pedal>** Piano pedal mark.

att.xy → <pedal>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.xy → <phrase>

**<quilisma>** Quilisma.

att.xy → <quilisma>

**<quote>** Contains a paragraph-like block of text attributed to an external source, normally set off from the surrounding text by spacing or other typographic distinction.

att.xy → <quote>

**<refrain>** Recurring lyrics, especially at the end of each verse or stanza of a poem or song lyrics; a chorus.

att.xy → <refrain>

**<reh>** In an orchestral score and its corresponding parts, a mark indicating a convenient point from which to resume rehearsal after a break.

att.xy → <reh>

**<repeatMark>** An instruction expressed as a combination of text and symbols – segno and coda – typically above, below, or between staves, but not on the staff.

att.xy → <repeatMark>

**<rest>** A non-sounding event found in the source being transcribed.

att.xy → <rest>

**<signifLet>** Significantive letter(s).

att.xy → <signifLet>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.

att.xy → <slur>

**<sp>** Contains an individual speech in a performance text.

att.xy → <sp>

**<stageDir>** Contains any kind of stage direction within a dramatic text or fragment.

att.xy → <stageDir>

**<stem>** A stem element.

att.xy → <stem>

**<strophicus>** Strophicus.

att.xy → <strophicus>

**<syl>** Individual lyric syllable.

att.xy → <syl>

**<symbol>** A reference to a previously defined symbol.

att.xy → <symbol>

**<table>** Contains text displayed in tabular form.

att.xy → <table>

**<td>** Designates a table cell that contains data as opposed to a cell that contains column or row heading information.

att.xy → <td>

**<tempo>** Text and symbols descriptive of tempo, mood, or style, e.g., "allarg.", "a tempo", "cantabile", "Moderato", "J=60", "Moderato J =60").

att.xy → <tempo>

**<th>** Designates a table cell containing column or row heading information as opposed to one containing data.

att.xy → <th>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.

att.xy → <tie>

**<tr>** A formatting element that contains one or more cells (intersection of a row and a column) in a <table>.

att.xy → <tr>

**<trill>** Rapid alternation of a note with another (usually at the interval of a second above).

att.xy → <trill>

**<turn>** An ornament consisting of four notes — the upper neighbor of the written note, the written note, the lower neighbor, and the written note.

att.xy → <turn>

**<verse>** Division of a poem or song lyrics, sometimes having a fixed length, meter or rhyme scheme; a stanza.

att.xy → <verse>

**<volta>** Sung text for a specific iteration of a repeated section of music.

att.xy → <volta>

## Declaration

```
<classSpec ident="att.xy" module="MEI.shared" type="atts">
  <desc xml:lang="en">Output coordinate attributes. Some elements may have their exact
  rendered *output* coordinates recorded. x and y attributes indicate where to place the
  rendered output. Recording the coordinates of a feature in a facsimile requires the use of
  the facs attribute.</desc>
  <attList>
    <attDef ident="x" usage="opt">
```

```

```

## att.xy2

Output coordinate attributes. Some elements may need 2 coordinate pairs to record their rendered \*output\* coordinates. The attributes indicate where to place the rendered output. Recording the coordinates of a feature in a facsimile requires the use of the `facs` attribute.

### Module

[MEI.shared](#)

### Attributes

**@x2** (*optional*) Encodes the optional 2nd x coordinate. Value is a decimal number.  
att.xy2 → @x2

**@y2** (*optional*) Encodes the optional 2nd y coordinate. Value is a decimal number.  
att.xy2 → @y2

### Available at

**<bend>** A variation in pitch (often micro-tonal) upwards or downwards during the course of a note.  
att.xy2 → <bend>

**<bracketSpan>** Marks a sequence of notational events grouped by a bracket.  
att.xy2 → <bracketSpan>

**<curve>** A curved line that cannot be represented by a more specific element, such as a slur.  
att.xy2 → <curve>

**<gliss>** A continuous or sliding movement from one pitch to another, usually indicated by a straight or wavy line.  
att.xy2 → <gliss>

**<hairpin>** Indicates continuous dynamics expressed on the score as wedge-shaped graphics, e.g., < and >.  
att.xy2 → <hairpin>

**<line>** A visual line that cannot be represented by a more specific; i.e., semantic, element.  
att.xy2 → <line>

**<lv>** A "tie-like" indication that a note should ring beyond its written duration.  
att.xy2 → <lv>

**<phrase>** Indication of 1) a "unified melodic idea" or 2) performance technique.  
att.xy2 → <phrase>

**<slur>** Indication of 1) a "unified melodic idea" or 2) performance technique.  
att.xy2 → <slur>

**<tie>** An indication that two notes of the same pitch form a single note with their combined rhythmic values.  
att.xy2 → <tie>

# Data Type Specifications

## data.ACCIDENTAL.GESTURAL

Gestural/performed standard accidental values.

### Module

MEI

### Used by

[att.accidental.ges/@accid.ges](#) Records the performed pitch inflection.

[att.keySigDefault.anl/@key.accid](#) Contains an accidental for the tonic key, if one is required, e.g., if key.pname equals c and key.accid equals s, then a tonic of C# is indicated.

[att.ornamentAccid.ges/@accidupper.ges](#) Records the sounding accidental associated with an upper neighboring note.

[att.ornamentAccid.ges/@accidllower.ges](#) Records the sounding accidental associated with a lower neighboring note.

### Declaration

```

## data.ARTICULATION

The following list of articulations mostly corresponds to symbols from the Western Musical Symbols portion of the Unicode Standard. The dot and stroke values may be used in cases where interpretation is difficult or undesirable.

### Module

MEI

### Used by

**att.articulation/@artic** Encodes the written articulation(s). Articulations are normally encoded in order from the note head outward; that is, away from the stem. See additional notes at att.vis.note. Only articulations should be encoded in the artic attribute; for example, fingerings should be encoded using the <fing> element.

**att.articulation.ges/@artic.ges** Records performed articulation that differs from the written value.

### Allowed Values

acc Accent (Unicode 1D17B).

acc-inv Inverted accent.

acc-long Long accent, used to indicate an elongated accent mark. It is the responsibility of the encoder to distinguish between accents and hairpins.

acc-soft Soft accent, see SMuFL Articulation supplement (U+ED40–U+ED4F).

stacc Staccato (Unicode 1D17C).

ten Tenuto (Unicode 1D17D).

stacciss Staccatissimo (Unicode 1D17E).

marc Marcato (Unicode 1D17F).

spicc Spiccato.

stress Stress (Unicode 00B4).

unstress Unstress (Unicode 02D8).

doit Main note followed by short slide to higher, indeterminate pitch (Unicode 1D185).

scoop Main note preceded by short slide from lower, indeterminate pitch (Unicode 1D186).

rip Main note preceded by long slide from lower, often indeterminate pitch; also known as "squeeze".

plop Main note preceded by "slide" from higher, indeterminate pitch.

fall Main note followed by short "slide" to lower, indeterminate pitch.

longfall Main note followed by long "slide" to lower, indeterminate pitch.

bend "lip slur" to lower pitch, then return to written pitch.

flip Main note followed by quick upward rise, then descent in pitch (Unicode 1D187).

smear (Unicode 1D188).

shake Alternation between written pitch and next highest overtone (brass instruments) or note minor third higher (woodwinds).

dnbw Down bow (Unicode 1D1AA).

upbow Up bow (Unicode 1D1AB).

harm Harmonic (Unicode 1D1AC).

snap Snap pizzicato (Unicode 1D1AD).

fingernail Fingernail (Unicode 1D1B3).

damp Stop harp string from sounding (Unicode 1D1B4).  
 dampall Stop all harp strings from sounding (Unicode 1D1B5).  
 open Full (as opposed to stopped) tone.  
 stop "muffled" tone.  
 dbltongue Double tongue (Unicode 1D18A).  
 trpltongue Triple tongue (Unicode 1D18B).  
 heel Use heel (organ pedal).  
 toe Use toe (organ pedal).  
 tap Percussive effect on guitar string(s).  
 lhptrizz Left-hand pizzicato.  
 dot Uninterpreted dot.  
 stroke Uninterpreted stroke.

## Constraints

" " contains a deprecated value.  
 " " contains a deprecated value.

## data.AUGMENTDOT

Dots attribute values (number of augmentation dots) (Read, 113-119, ex. 8-21).

### Module

MEI

### Used by

**att.augmentDots/@dots** Records the number of augmentation dots required by a written dotted duration.

**att.duration.ges/@dots.ges** Number of dots required for a gestural duration when different from that of the written duration.

**att.mmTempo/@mm.dots** Records the number of augmentation dots required by a dotted metronome unit.

### Declaration

```
<macroSpec ident="data.AUGMENTDOT" module="MEI" type="dt">
  <desc xml:lang="en">Dots attribute values (number of augmentation dots) (Read, 113-119,
  ex. 8-21).</desc>

  </content>
</macroSpec>
```

## data.BARMETHOD

Records where bar lines are drawn. The value 'staff' describes the traditional placement of bar lines.

### Module

MEI

### Used by

[att.barLine.vis/@method](#) Records the method of barring.

[att.barring/@bar.method](#) Records the method of barring.

### Allowed Values

mensur Between staves only.

staff Between and across staves as necessary.

takt Short bar line through a subset of staff lines.

### Declaration

```
<macroSpec ident="data.BARMETHOD" module="MEI" type="dt">
  <desc xml:lang="en">Records where bar lines are drawn. The value 'staff' describes the
  traditional placement of bar lines.</desc>
  <content>

    </valList>
  </content>
</macroSpec>
```

## data.BARRENDITION

Rendings of bar lines. Some values correspond to the Western Musical Symbols portion of the Unicode Standard.

### Module

[MEI](#)

### Used by

[att.barLine.log/@form](#) Records the appearance and usually the function of the bar line.

[att.measure.log/@left](#) Indicates the visual rendition of the left bar line. It is present here only for facilitation of translation from legacy encodings which use it. Usually, it can be safely ignored.

[att.measure.log/@right](#) Indicates the function of the right bar line and is structurally important.

### Allowed Values

dashed Dashed line (SMuFL E036 and Unicode 1D104).

dotted Dotted line (SMuFL E037).

dbl Double bar line (SMuFL E031 and Unicode 1D101).

dbldashed Double dashed line.

dbldotted Double dotted line.

dblheavy Heavy double bar line (SMuFL E035).

dblsegno Segno serpent with vertical lines (SMuFL E04B).

end End bar line (SMuFL E032 and Unicode 1D102).

heavy Heavy bar line (SMuFL E034).

invis Bar line not rendered.

rptstart Repeat start (SMuFL E040 and Unicode 1D106).

rptboth Repeat start and end (SMuFL E042).

rptend Repeat end (SMuFL E041 and Unicode 1D107).

segno Segno serpent.

single Single bar line (SMuFL E030 and Unicode 1D100).

### Declaration

## data.BEAM

Beam attribute values: initial, medial, terminal. Nested beaming is permitted.

### Module

MEI

### Used by

**att.beamPresent/@beam** Indicates that this event is "under a beam".

### Declaration

```
<macroSpec ident="data.BEAM" module="MEI" type="dt">
  <desc xml:lang="en">Beam attribute values: initial, medial, terminal. Nested beaming is
  permitted.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">[i|m|t][1-6]</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.BEAMPLACE

Location of a beam relative to the events it affects.

### Module

MEI

### Used by

[att.beamRend/@place](#) Records the placement of the beam relative to the events it affects.

### Allowed Values

above The beam is above the events it affects.

below The beam is below the events it affects.

mixed The beam is above and below the events it affects.

### Declaration

```
<macroSpec ident="data.BEAMPLACE" module="MEI" type="dt">
    <desc xml:lang="en">Location of a beam relative to the events it affects.</desc>
    <content>
        <valList type="closed">
            <valItem ident="above">
                <desc xml:lang="en">The beam is above the events it affects.</desc>
            </valItem>
            <valItem ident="below">
                <desc xml:lang="en">The beam is below the events it affects.</desc>
            </valItem>
            <valItem ident="mixed">
                <desc xml:lang="en">The beam is above and below the events it affects.</desc>
            </valItem>
        </valList>
    </content>
</macroSpec>
```

## data.BEAT

A beat location, i.e.,  $[0-9]+(\cdot?[0-9]^{*})$ ? The value must fall between 0 and the numerator of the time signature + 1, where 0 represents the left bar line and the upper boundary represents the right bar line. For example, in 12/8 the value must be in the range from 0 to 13.

### Module

MEI

### Used by

[att.timestamp.ges/@tstamp.ges](#) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature.

[att.timestamp.log/@tstamp](#) Encodes the onset time in terms of musical time, i.e., beats[.fractional beat part], as expressed in the written time signature.

### Declaration

```
<macroSpec ident="data.BEAT" module="MEI" type="dt">
  <desc xml:lang="en">A beat location,
    <abbr>i.e.</abbr>
    ,  $[0-9]+(\cdot?[0-9]^{*})$ ? The value must fall between 0 and the numerator of the time signature + 1, where 0 represents the left bar line and the upper boundary represents the right bar line. For example, in 12/8 the value must be in the range from 0 to 13.</desc>
  <content>
    <rng:data type="decimal">
      <rng:param name="minInclusive">0</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.BEATRPT.REND

Visual and performance information for a repeated beat symbol.

### Module

MEI

### Used by

**att.beatRpt.vis/@slash** Indicates the number of slashes required to render the appropriate beat repeat symbol. When a single beat consisting of a single note or chord is repeated, the repetition symbol is a single thick, slanting slash; therefore, the value 1 should be used. When the beat is divided into even notes, the following values should be used: 4ths or 8ths=1, 16ths=2, 32nds=3, 64ths=4, 128ths=5. When the beat is comprised of mixed duration values, the default rendition is 2 slashes and 2 dots.

### Declaration

```
<macroSpec ident="data.BEATRPT.REND" module="MEI" type="dt">
  <desc xml:lang="en">Visual and performance information for a repeated beat symbol.</desc>
  <content>
    <rng:choice>
      <rng:data type="positiveInteger">

      <rng:data type="token">
        <rng:param name="pattern">mixed</rng:param>
      </rng:data>
    </rng:choice>
  </content>
</macroSpec>
```

## data.BEND.AMOUNT

Either an integer value, a decimal value, or a token. Fractional values are limited to .25, .5, .75, while the token value is restricted to 'full'.

### Module

MEI

### Used by

[att.bend.ges/@amount](#) Records the amount of detuning. The decimal values should be rendered as a fraction (or an integer plus a fraction) along with the bend symbol.

### Declaration

```
<macroSpec ident="data.BEND.AMOUNT" module="MEI" type="dt">
  <desc xml:lang="en">Either an integer value, a decimal value, or a token. Fractional values are limited to .25, .5, .75, while the token value is restricted to 'full'.</desc>

        <rng:param name="pattern">[0-9](\\.25|\\.5|\\.75)?</rng:param>
      </rng:data>
      <rng:data type="token">
        <rng:param name="pattern">full</rng:param>
      </rng:data>
    </rng:choice>
  </content>
</macroSpec>
```

## data.BETYPE

Datatypes for values in begin, end, abstype and inttype attributes.

### Module

[MEI.shared](#)

### Used by

**att.mediaBounds/@betype** Type of values used in the begin/end attributes. The begin and end attributes can only be interpreted meaningfully in conjunction with this attribute.

**<when> / @abstype** Specifies the kind of values used in the absolute attribute.

**<when> / @inttype** Specifies the kind of values used in the interval attribute.

### Allowed Values

byte Bytes.

smil Synchronized Multimedia Integration Language.

midi MIDI clicks.

mmc MIDI machine code.

mtc MIDI time code.

smpte-25 SMPTE 25 EBU.

smpte-24 SMPTE 24 Film Sync.

smpte-df30 SMPTE 30 Drop.

smpte-ndf30 SMPTE 30 Non-Drop.

smpte-df29.97 SMPTE 29.97 Drop.

smpte-ndf29.97 SMPTE 29.97 Non-Drop.

tcf AES Time-code character format.

time ISO 24-hour time format: HH:MM:SS.ss.

### Declaration

```
<macroSpec ident="data.BETYPE" module="MEI.shared" type="dt">
  <desc xml:lang="en">Datatypes for values in begin, end, abstype and inttype

```

## data.BOOLEAN

Boolean attribute values.

### Module

[MEI](#)

### Used by

**att.adlibitum/@adlib** Marks a performance resource as ad libitum (optional).

**att.arpeg.vis/@arrow** Indicates if an arrowhead is to be drawn as part of the arpeggiation symbol.

**att.beamRend/@slash** Indicates presence of slash through the beam.

**att.beaming.log/@beam.rests** Indicates whether automatically-drawn beams should include rests shorter than a quarter note duration.

**att.clef.log/@cautionary** Records the function of the clef. A "cautionary" clef does not change the following pitches.

**att.cleffing.vis/@clef.visible** Determines whether the clef is to be displayed.

**att.coloration/@colored** Indicates this feature is 'colored'; that is, it is a participant in a change in rhythmic values. In mensural notation, coloration is indicated by colored notes (red, black, etc.) where void notes would otherwise occur. In CMN, coloration is indicated by an inverse color; that is, the note head is void when it would otherwise be filled and vice versa.

**att.cue/@cue**

**att.expandable/@expand** Indicates whether to render a repeat symbol or the source material to which it refers. A value of 'true' renders the source material, while 'false' displays the repeat symbol.

**att.extender/@extender** Indicates the presence of an extension symbol, typically a line.

**att.geneticState/@instant** The @instant attribute is syntactic sugar for classifying a scribal intervention as an ad-hoc modification; that is, one which does not interrupt the writing process.

**att.hairpin.log/@niente** Indicates that the hairpin starts from or ends in silence. Often rendered as a small circle attached to the closed end of the hairpin. See Gould, p. 108.

**att.hairpin.vis/@closed** Applies to a "Rossini" hairpin, i.e., one where the normally open side is closed by a connecting line.

**att.hairpin.vis/@opening.vertical** Indicates that the opening points are aligned with an imaginary line that is always 90° perpendicular to the horizontal plane, regardless of any angle or start/end adjustments, including when the hairpin is angled with @angle.optimize or through @endvo/@startvo adjustments.

**att.hairpin.vis/@angle.optimize** Indicates that the slope of the hairpin can be adjusted to follow the content in order to optimize spacing.

**att.keySigDefault.vis/@keysig.visible** Determines whether the key signature is to be displayed.

**att.liquescent.vis/@looped** Indicates whether curve is closed.

**att.lvPresent/@lv** Indicates the attachment of an l.v. (laissez vibrer) sign to this element.

**att.mdiv.ges/@attacca** Indicates that the performance of the next musical division should begin immediately following this one.

**att.measureNumbers/@mnum.visible** Indicates whether measure numbers should be displayed.

**att.mensur.vis/@dot** Specifies whether a dot is to be added to the base symbol.

**att.mensural.vis/@mensur.dot** Determines if a dot is to be added to the base symbol.

**att.meterConformance.bar/@metcon** Indicates the relationship between the content of a measure and the prevailing meter.

**att.meterConformance.bar/@control** Indicates whether or not a bar line is "controlling"; that is, if it indicates a point of alignment across all the parts. Bar lines within a score are usually controlling; that is, they "line up". Bar lines within parts may or may not be controlling. When applied to [<measure>](#), this attribute indicates the nature of the right bar line but not the left.

**att.meterSigDefault.vis/@meter.showchange** Determines whether the old meter signature should be displayed when the meter signature changes.

**att.meterSigDefault.vis/@meter.visible** Determines whether the meter signature is to be displayed.

**att.mordent.log/@long** When set to 'true', a double or long mordent, sometimes called a "pincé double", consisting of 5 notes, is indicated.

**att.multiRest.vis/@block** The block attribute controls whether the multimeasure rest should be rendered as a block rest or as church rests ("Kirchenpausen"), that are combinations of longa, breve and semibreve rests.

**att.multinumMeasures/@multi.number** Indicates whether programmatically calculated counts of multiple measures of rest (mRest) and whole measure repeats (mRpt) in parts should be rendered.

**att.ncForm/@angled**

**att.ncForm/@hooked** Pen stroke has an extension; specific to Hispanic notation.

**att.ncForm/@ligated** Indicates participation in a ligature.

**att.noteHeads/@head.visible** Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form.

**att.numberPlacement/@num.visible** Determines if the tuplet number is visible.

**att.oneLineStaff/@ontheline** Determines the placement of notes on a 1-line staff. A value of 'true' places all notes on the line, while a value of 'false' places stems-up notes above the line and stems-down notes below the line.

**att.optimization/@optimize** Indicates whether staves without notes, rests, etc. should be displayed. When the value is 'true', empty staves are displayed.

**att.perfRes/@solo** Use this attribute to identify the performance resource as a soloist especially in an accompanied work, such as a concerto or vocal solo.

**att.placementOnStaff/@onstaff** Indicates the placement of the item within the staff. A value of 'true' means on the staff, and 'false' off the staff.

**att.scoreDef.vis.cmn/@grid.show** Determines whether to display guitar chord grids.

**att.section.ges/@attacca** Indicates that the performance of the next section should begin immediately following this one.

**att.section.vis/@restart** Indicates that staves begin again with this section.

**att.space.vis/@compressable** Indicates whether a space is 'compressible', i.e., if it may be removed at the discretion of processing software.

**att.staffDef.vis/@grid.show** Determines whether to display guitar chord grids.

**att.staffDef.vis/@lines.visible** Records whether all staff lines are visible.

**att.staffGrp.vis/@bar.thru** Indicates whether bar lines go across the space between staves (true) or are only drawn across the lines of each staff (false).

**att.stems/@stem.visible** Determines whether a stem should be displayed.

**att.systems/@system.leftline** Indicates whether the system starts with a continuous line connecting all staves, including single-staff systems. Do not confuse this with the heavy vertical line used as a grouping symbol.

**att.tuplet.vis/@bracket.visible** States whether a bracket should be rendered with a tuplet.

**att.tuplet.vis/@dur.visible** Determines if the tuplet duration is visible.

**att.turn.log/@delayed** When set to 'true', the turn begins on the second half of the beat.

**att.visibility/@visible** Indicates if a feature should be rendered when the notation is presented graphically or sounded when it is presented in an aural form.

**<binding> / @contemporary**

**<domainsDecl> / @anl**

**<domainsDecl> / @ges**

**<domainsDecl> / @vis**

**<genDesc> / @ordered** When set to "true" the child elements are known to be in chronological order. When set to "false" or when not provided, the order of child elements is unknown.

**<hand> / @initial** Marks this hand as the first one of the document.

**<manifestation> / @singleton** Indicates the manifestation is a unique physical object.

**<seal> / @contemporary**

## Allowed Values

true True.

false False.

## Declaration

```
<macroSpec ident="data.BOOLEAN" module="MEI" type="dt">

## **data.CANCELACCID**

Indicates where cancellation accidentals are shown in a key signature.

### Module

[MEI](#)

### Used by

**att.keySig.vis/@cancelaccid** Determines where cautionary accidentals should be displayed at a key change.

**att.keySigDefault.vis/@keysig.cancelaccid** Determines where cautionary accidentals should be displayed at a key change.

### Allowed Values

none Do not show cancellation accidentals.

before Show cancellation accidentals before the new key accidentals.

after Show cancellation accidentals after the new key accidentals ("Old style" or "French")

before-bar Show cancellation accidentals before the barline (also known as "Russian").

### Declaration

```
<macroSpec ident="data.CANCELACCID" module="MEI" type="dt">

## data.CERTAINTY

Values for certainty attribute. Certainty may be expressed by one of the predefined symbolic values high, medium, or low. The value unknown should be used in cases where the encoder does not wish to assert an opinion about the matter.

### Module

MEI

### Used by

[att.evidence/@cert](#) Signifies the degree of certainty or precision associated with a feature.

### Allowed Values

high High certainty.

medium Medium certainty.

low Low certainty.

unknown An unknown level of certainty.

### Declaration

```
<macroSpec ident="data.CERTAINTY" module="MEI" type="dt">

DEVELOPMENT  
VERSION

## data.CLEFLINE

Clef line attribute values. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff.

### Module

MEI

### Used by

**att.cleffing.log/@clef.line** Contains a default value for the position of the clef. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff.

**att.lineLoc/@line** Indicates the line upon which a feature stands. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff.

### Declaration

```
<macroSpec ident="data.CLEFLINE" module="MEI" type="dt">
  <desc xml:lang="en">Clef line attribute values. The value must be in the range between 1 and the number of lines on the staff. The numbering of lines starts with the lowest line of the staff.</desc>
  <content>
    <rng:data type="positiveInteger"/>
  </content>

```

# data.CLEFSHAPEx

Clef shape attribute values (Read, p.53–56). Some values correspond to the Unicode Standard.

## Module

[MEI](#)

## Used by

[att.clefShape/@shape](#) Describes a clef's shape.

[att.cleffing.log/@clef.shape](#) Encodes a value for the clef symbol.

## Allowed Values

G G clef (Unicode 1D11E).

GG Double G clef. Sounds one octave lower than G clef. (See remarks on usage below.)

F F clef (Unicode 1D122).

C C clef (Unicode 1D121).

perc Drum clef (Unicode 1D125 or Unicode 1D126).

TAB Tablature "clef"; i.e., usually "TAB" rendered vertically.

## Remarks

Double-G clefs sound one octave lower, so do not combine with dis/ dis.place/clef.dis/clef.dis.place. In some cases the double G clef may be used to indicate that two voices share one staff and does not sound one octave lower. In this case the oct attribute may be used to clarify the sounding octave of the instruments for the clef.

## Declaration

```

```

# data.CLUSTER

Tone-cluster rendition.

## Module

[MEI](#)

## Used by

**att.chord.vis/@cluster** Indicates a single, alternative note head should be displayed instead of individual note heads. The highest and lowest notes of the chord usually indicate the upper and lower boundaries of the cluster note head.

## Allowed Values

white White keys.

black Black keys.

chromatic Mixed black and white keys.

## Declaration

```
<macroSpec ident="data.CLUSTER" module="MEI" type="dt">

```

## data.COLOR

A value in one of the following forms is expected: 1) hexadecimal RRGGBB, 2) hexadecimal RRGGBBAA, 3) CSS RGB, 4) CSS RGBA, 5) HSL, 6) HSLA, or 7) CSS color name.

### Module

MEI

### Used by

[att.arpeg.vis/@arrow.color](#) Captures the overall color of the arrow.

[att.arpeg.vis/@arrow.fillcolor](#) Captures the fill color of the arrow if different from the line color.

[att.beaming.vis/@beam.color](#) Color of beams, including those associated with tuplets.

[att.cleffing.vis/@clef.color](#) Describes the color of the clef.

[att.color/@color](#) Used to indicate visual appearance. Do not confuse this with the musical term 'color' as used in pre-CMN notation.

[att.mensural.vis/@mensur.color](#) Records the color of the mensuration sign. Do not confuse this with the musical term 'color' as used in pre-CMN notation.

[att.noteHeads/@head.color](#) Captures the overall color of a notehead.

[att.noteHeads/@head.fillcolor](#) Captures the fill color of a notehead if different from the overall note color.

[att.staffDef.vis/@lines.color](#) Captures the colors of the staff lines.

### Declaration

```
<macroSpec ident="data.COLOR" module="MEI" type="dt">
  <desc xml:lang="en">A value in one of the following forms is expected: 1) hexadecimal

# data.COLORVALUES

Parameterized color values

## Module

MEI

## Used by

**data.COLOR** A value in one of the following forms is expected: 1) hexadecimal RRGGBB, 2) hexadecimal RRGGBAA, 3) CSS RGB, 4) CSS RGBA, 5) HSL, 6) HSLA, or 7) CSS color name.

## Declaration

```
<macroSpec ident="data.COLORVALUES" module="MEI" type="dt">
<desc xml:lang="en">Parameterized color values</desc>

## data.COMPASSDIRECTION

Description of direction with respect to an imaginary compass.

### Module

MEI

### Used by

[att.hispanTick.vis/@tilt](#) Direction toward which the mark points.

[att.ncForm/@tilt](#) Direction of the pen stroke.

### Declaration

```
<macroSpec ident="data.COMPASSDIRECTION" module="MEI" type="dt">
  <desc xml:lang="en">Description of direction with respect to an imaginary compass.</desc>
  <content>
    <alternate>
      <macroRef key="data.COMPASSDIRECTION.basic"/>
      <macroRef key="data.COMPASSDIRECTION.extended"/>
    </alternate>
  </content>
</macroSpec>
```

## data.COMPASSDIRECTION.basic

Basic compass directions.

### Module

MEI

### Used by

**att.ncForm/@s-shape** Direction of the initial direction for an s-shaped pen stroke; i.e., "w" for the standard letter S, "e" for its mirror image, "s" for the letter S turned 90-degrees anti-clockwise, and "n" for its mirror image.

**data.COMPASSDIRECTION** Description of direction with respect to an imaginary compass.

### Allowed Values

- n In a northern direction.
- e In an eastern direction.
- s In a southern direction.
- w In a western direction.

### Declaration

```
<macroSpec ident="data.COMPASSDIRECTION.basic" module="MEI" type="dt">  
  <desc xml:lang="en">Basic compass directions.</desc>  
  <content>  
    <valList type="closed">  
      <valItem ident="n">  
        <desc xml:lang="en">In a northern direction.</desc>  
      </valItem>

      </valItem>  
    </valList>  
  </content>  
</macroSpec>
```

# data.COMPASSDIRECTION.extended

Additional compass directions.

## Module

[MEI](#)

## Used by

[data.COMPASSDIRECTION](#) Description of direction with respect to an imaginary compass.

## Allowed Values

ne In a north-eastern direction.  
nw In a north-western direction.  
se In a south-eastern direction.  
sw In a south-western direction.

## Declaration

```
<macroSpec ident="data.COMPASSDIRECTION.extended" module="MEI" type="dt">
  <desc xml:lang="en">Additional compass directions.</desc>
  <content>
    <valList type="closed">
      <valItem ident="ne">

    </valList>
  </content>
</macroSpec>
```

## data.CONFIDENCE

Confidence is expressed as a real number between 0 and 1; 0 representing certainly false and 1 representing certainly true.

### Module

MEI

### Used by

**att.ranging/@confidence** Specifies the degree of statistical confidence (between zero and one) that a value falls within the range specified by min and max, or the proportion of observed values that fall within that range.

### Declaration

```
<macroSpec ident="data.CONFIDENCE" module="MEI" type="dt">
  <desc xml:lang="en">Confidence is expressed as a real number between 0 and 1; 0
  representing certainly false and 1 representing certainly true.</desc>
  <content>
    <rng:data type="decimal">
      <rng:param name="minInclusive">0</rng:param>
      <rng:param name="maxInclusive">1</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.DEGREES

360th-unit measure of a circle's circumference; optionally signed decimal number between -360 and 360.

### Module

MEI

### Used by

**att.coordinated/@rotate** Indicates the amount by which the contents of this element have been rotated clockwise or, if applicable, how the orientation of the element self should be interpreted, with respect to the normal orientation of the parent surface. The orientation is expressed in arc degrees.

**att.soundLocation/@azimuth** The lateral or left-to-right plane.

**att.soundLocation/@elevation** The above-to-below axis.

**data.ROTATION** Rotation.

**<rend> / @rotation** A positive value for rotation rotates the text in a counter-clockwise fashion, while negative values produce clockwise rotation.

### Declaration

```
<macroSpec ident="data.DEGREES" module="MEI" type="dt">
  <desc xml:lang="en">360th-unit measure of a circle's circumference; optionally signed decimal number between -360 and 360.</desc>

    </rng:data>
  </content>
</macroSpec>
```

# data.DIVISIO

Divisio values.

## Module

[MEI](#)

## Used by

[att.mensural.shared/@divisio](#) Describes the divisions of the breve in use in 14th-century Italy.

## Allowed Values

ternaria Divisio ternaria. Three semibreves in a breve.

quaternaria Divisio quaternaria. Four semibreves in a breve.

senariaimperf Divisio senaria imperfecta. Six semibreves in a breve (breve is divided into two, then into three). Aka senaria gallica.

senariaperf Divisio senaria perfecta. Six semibreves in a breve (breve is divided into three, then into two). Aka senaria italica.

octonaria Divisio octonaria. Eight semibreves in a breve.

novenaria Divisio novenaria. Nine semibreves in a breve.

duodenaria Divisio duodenaria. Twelve semibreves in a breve.

## Declaration

```
<macroSpec ident="data.DIVISIO" module="MEI" type="dt">
  <desc xml:lang="en">Divisio values.</desc>
  <content>
    <valList type="closed">

DEVELOPMENT  
VERSION

## data.DURATION

Logical, that is, written, duration attribute values.

### Module

[MEI](#)

### Used by

**att.duration.additive/@dur** When a duration cannot be represented as a single power-of-two value, multiple space-separated values that add up to the total duration may be used.

**att.duration.default/@dur.default** Contains a default duration in those situations when the first note, rest, chord, etc. in a measure does not have a duration specified.

**att.duration.log/@dur** Records the duration of a feature using the relative durational values provided by the data.DURATION datatype.

**att.mmTempo/@mm.unit** Captures the metronomic unit.

### Declaration

```
<macroSpec ident="data.DURATION" module="MEI" type="dt">
  <desc xml:lang="en">Logical, that is, written, duration attribute values.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.DURATION.cmn"/>
      <rng:ref name="data.DURATION.mensural"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.DURATION.GESTURAL**

Performed duration attribute values.

### Module

[MEI](#)

### Used by

[att.duration.ges/@dur.ges](#) Records performed duration information that differs from the written duration.

### Declaration

```
<macroSpec ident="data.DURATION.GESTURAL" module="MEI" type="dt">
  <desc xml:lang="en">Performed duration attribute values.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.DURATION.cmn"/>
      <rng:ref name="data.DURATION.mensural"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.DURATION.cmn**

Logical, that is, written, duration attribute values for the CMN repertoire.

### **Module**

MEI.cmn

### **Used by**

[att.tremMeasured/@unitdur](#) The performed duration of an individual note in a measured tremolo.

[data.DURATION](#) Logical, that is, written, duration attribute values.

[data.DURATION.GESTURAL](#) Performed duration attribute values.

[data.DURATIONRESTS](#) Logical, that is, written, duration attribute values for rests.

### **Allowed Values**

long Quadruple whole note.

breve Double whole note.

1 Whole note.

2 Half note.

4 Quarter note.

8 8th note.

16 16th note.

32 32nd note.

64 64th note.

128 128th note.

256 256th note.

512 512th note.

1024 1024th note.

2048 2048th note.

### **Declaration**

```
<macroSpec ident="data.DURATION.cmn" module="MEI.cmn" type="dt">
  <desc xml:lang="en">Logical, that is, written, duration attribute values for the CMN
  repertoire.</desc>

## data.DURATION.mensural

Logical, that is, written, note-shape (or note symbol) attribute values for the mensural repertoire.

### Module

[MEI.mensural](#)

### Used by

[data.DURATION](#) Logical, that is, written, duration attribute values.

[data.DURATION.GESTURAL](#) Performed duration attribute values.

[data.DURATIONRESTS.mensural](#) Logical, that is, written, duration attribute values for mensural rests.

### Allowed Values

maxima Two or three times as long as a longa.

longa Two or three times as long as a brevis.

brevis Two or three times as long as a semibreve.

semibrevis Half or one-third as long as a breve/brevis.

minima Half or one-third as long as a semibreve/semibrevis.

semiminima Half as long as a minima.

fusa Half as long as a semiminima.

semifusa Half as long as a fusa.

### Declaration

```
<macroSpec ident="data.DURATION.mensural" module="MEI.mensural" type="dt">
  <desc xml:lang="en">Logical, that is, written, note-shape (or note symbol) attribute
  values for the mensural repertoire.</desc>

      <rng:ref name="data.DURATION.mensural"/>
    </rng:choice>
  </content>
</macroSpec>
```

## data.DURQUALITY.mensural

Duration attribute values of a given note symbol for the mensural repertoire.

### Module

[MEI.mensural](#)

### Used by

**att.duration.quality/@dur.quality** Encodes the durational quality of a mensural note using the values provided by the data.DURQUALITY.mensural datatype (i.e., the perfect / imperfect / altered / major / minor / duplex quality of a note).

### Allowed Values

perfecta Three times the duration of the note in the next smaller degree.

imperfecta Two times the duration of the note in the next smaller degree.

altera Twice the original duration of the note (only usable in perfect mensurations).

minor Category of a regular semibrevis in Ars antiqua, equivalent to a third of a brevis.

maior Category of an altered semibrevis in Ars antiqua, equivalent to two minor semibrevis.

duplex One of the three categories of a longa in Ars antiqua ('duplex', 'perfecta', and 'imperfecta'). A duplex longa is twice as long as a regular longa.

### Declaration

```
<macroSpec ident="data.DURQUALITY.mensural" module="MEI.mensural" type="dt">
  <desc xml:lang="en">Duration attribute values of a given note symbol for the mensural
  repertoire.</desc>
  <content>
    <valList type="closed">
      <valItem ident="perfecta">
        <desc xml:lang="en">Three times the duration of the note in the next smaller

</valItem>  
</valList>  
</content>  
</macroSpec>
```

DEVELOPMENT

## data.ENCLOSURE

Enclosures for editorial notes, accidentals, articulations, etc.

### Module

MEI

### Used by

**att.enclosingChars/@enclose** Records the characters often used to mark accidentals, articulations, and sometimes notes as having a cautionary or editorial function. For an example of cautionary accidentals enclosed in parentheses, see Read, p. 131, ex. 9-14.

### Allowed Values

paren Parentheses: ( and ).  
brack Square brackets: [ and ].  
box Box.  
none None.

### Declaration

```
<macroSpec ident="data.ENCLOSURE" module="MEI" type="dt">
  <desc xml:lang="en">Enclosures for editorial notes, accidentals, articulations,
  etc.</desc>

    </valList>
  </content>
</macroSpec>
```

## data.EVENTREL

Location of musical material relative to a symbol on a staff instead of the staff.

### Module

MEI

### Used by

**att.episema.vis/@place** Captures the placement of the episema with respect to the neume or neume component with which it is associated.

**att.hispanTick.vis/@place** Captures the placement of the tick mark with respect to the neume or neume component with which it is associated.

**att.signifLet.vis/@place** Captures the placement of the sequence of characters with respect to the neume or neume component with which it is associated.

### Declaration

```
<macroSpec ident="data.EVENTREL" module="MEI" type="dt">
  <desc xml:lang="en">Location of musical material relative to a symbol on a staff instead
  of the staff.</desc>
  <content>

        <desc xml:lang="en">Right.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.EVENTREL.extended

Location of musical material relative to a symbol other than a staff.

### Module

[MEI](#)

### Used by

[data.EVENTREL](#) Location of musical material relative to a symbol on a staff instead of the staff.

### Allowed Values

above-left Above and left; north-west.  
above-right Above and right; north-east.  
below-left Below and left; south-west.  
below-right Below and right; south-east.

### Declaration

```
<macroSpec ident="data.EVENTREL.extended" module="MEI" type="dt">
  <desc xml:lang="en">Location of musical material relative to a symbol other than a staff.</desc>
  <content>
    <valList type="closed">
      <valItem ident="above-left">
        <desc xml:lang="en">Above and left; north-west.</desc>
      </valItem>
      <valItem ident="above-right">
        <desc xml:lang="en">Above and right; north-east.</desc>
      </valItem>
      <valItem ident="below-left">
        <desc xml:lang="en">Below and left; south-west.</desc>
      </valItem>
      <valItem ident="below-right">
        <desc xml:lang="en">Below and right; south-east.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.FILL

Describes how a graphical object, such as a note head, should be filled. The relative values — top, bottom, left, and right — indicate these locations *\*after\** rotation is applied.

### Module

MEI

### Used by

[att.noteHeads/@head.fill](#) Describes how/if the notehead is filled.

### Allowed Values

void Unfilled  
solid Filled  
top Top half filled  
bottom Bottom half filled  
left Left half filled  
right Right half filled

### Declaration

```
<macroSpec ident="data.FILL" module="MEI" type="dt">
  <desc xml:lang="en">Describes how a graphical object, such as a note head, should be
  filled. The relative values — top, bottom, left, and right — indicate these locations
  *after* rotation is applied.</desc>
  <content>
    <valList type="closed">
      <valItem ident="void">

      </valItem>
      <valItem ident="top">
        <desc xml:lang="en">Top half filled</desc>
      </valItem>
      <valItem ident="bottom">
        <desc xml:lang="en">Bottom half filled</desc>
      </valItem>
      <valItem ident="left">
        <desc xml:lang="en">Left half filled</desc>
      </valItem>
      <valItem ident="right">
        <desc xml:lang="en">Right half filled</desc>
      </valItem>
```

```
</valList>
</content>
</macroSpec>
```

DEVELOPMENT  
VERSION

## data.FINGER.FRET

In a guitar chord diagram, a label indicating which finger, if any, should be used to play an individual string. The index, middle, ring, and little fingers are represented by the values 1-4, while 't' is for the thumb. The values 'x' and 'o' indicate stopped and open strings, respectively.

### Module

MEI

### Used by

**att.stringtab/@tab.fing** Indicates which finger, if any, should be used to play an individual string. The index, middle, ring, and little fingers are represented by the values 1-4, while t is for the thumb. The values x and o indicate muffled and open strings, respectively.

### Declaration

```
<macroSpec ident="data.FINGER.FRET" module="MEI" type="dt">
  <desc xml:lang="en">In a guitar chord diagram, a label indicating which finger, if any, should be used to play an individual string. # data.FLAGFORM.mensural

Form of the flag.

## Module

[MEI.mensural](#)

## Used by

**att.stem.vis/@flag.form** Encodes the form of the flag using the values provided by the data.FLAGFORM.mensural datatype.

## Allowed Values

straight Flag is a straight horizontal line.  
angled Flag is a straight line at an angle.  
curled Flag is curled.  
flared Flag is flared.  
extended Flag looks extended.  
hooked Flag is hooked-form.

## Remarks

## Declaration

```
<macroSpec ident="data.FLAGFORM.mensural" module="MEI.mensural" type="dt">
  <desc xml:lang="en">Form of the flag.</desc>

</macroSpec>
```

## data.FLAGPOS.mensural

Position of the flag relative to the stem.

### Module

[MEI.mensural](#)

### Used by

**att.stem.vis/@flag.pos** Records the position of the flag using the values provided by the data.FLAGPOS.mensural datatype.

### Allowed Values

- left Flag lies at the left side of the stem.
- right Flag lies at the right side of the stem.
- center Flag is centered in the stem.

### Declaration

```
<macroSpec ident="data.FLAGPOS.mensural" module="MEI.mensural" type="dt">  
  <desc xml:lang="en">Position of the flag relative to the stem.</desc>  
  <content>  
    <valList type="closed">  
      <valItem ident="left">  
        <desc xml:lang="en">Flag lies at the left side of the stem.</desc>  
      </valItem>  
      <valItem ident="right">

      <valItem ident="center">  
        <desc xml:lang="en">Flag is centered in the stem.</desc>  
      </valItem>  
    </valList>  
  </content>  
</macroSpec>
```

## **data.FONTFAMILY**

Font family (for text) attribute values.

### **Module**

[MEI](#)

### **Used by**

**att.lyricStyle/@lyric.fam** Sets the font family default value for lyrics.

**att.textStyle/@text.fam** Provides a default value for the font family name of text (other than lyrics) when this information is not provided on the individual elements.

**att.typography/@fontfam** Contains the name of a font-family.

### **Declaration**

```
<macroSpec ident="data.FONTFAMILY" module="MEI" type="dt">
  <desc xml:lang="en">Font family (for text) attribute values.</desc>
  <content>
    <rng:data type="token"/>
  </content>
</macroSpec>
```

## data.FONTNAME

Font name (for text) attribute values.

### Module

[MEI](#)

### Used by

[att.lyricStyle/@lyric.name](#) Sets the font name default value for lyrics.

[att.textStyle/@text.name](#) Provides a default value for the font name of text (other than lyrics) when this information is not provided on the individual elements.

[att.typography/@fontname](#) Holds the name of a font.

### Declaration

```
<macroSpec ident="data.FONTNAME" module="MEI" type="dt">
  <desc xml:lang="en">Font name (for text) attribute values.</desc>
  <content>
    <rng:data type="token"/>
  </content>
</macroSpec>
```

## data.FONTSIZE

Font size expressions.

### Module

[MEI](#)

### Used by

**att.lyricStyle/@lyric.size** Sets the default font size value for lyrics.

**att.mensural.vis/@mensur.size** Describes the relative size of the mensuration sign.

**att.notationStyle/@music.size** Sets the default music font size.

**att.textStyle/@text.size** Provides a default value for the font size of text (other than lyrics) when this information is not provided on the individual elements.

**att.typography/@fontsize** Indicates the size of a font expressed in printers' points, i.e., 1/72nd of an inch, relative terms, e.g., small, larger, etc., or percentage values relative to normal size, e.g., 125%.

### Declaration

```
<macroSpec ident="data.FONTSIZE" module="MEI" type="dt">
  <desc xml:lang="en">Font size expressions.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.FONTSIZENUMERIC"/>
      <rng:ref name="data.FONTSIZETERM"/>
      <rng:ref name="data.PERCENT"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.FONTSENUMERIC**

Font size expressed as numbers; i.e., points or virtual units.

### Module

MEI

### Used by

**data.FONTSIZE** Font size expressions.

### Declaration

```
<macroSpec ident="data.FONTSENUMERIC" module="MEI" type="dt">
  <desc xml:lang="en">Font size expressed as numbers;
    <abbr>i.e.</abbr>
    , points or virtual units.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">\d*(\.\d+)?(pt|vu)</rng:param>
    <rng:except>
      <!-- disallow no-value or all-zero patterns -->
      <rng:choice>
        <rng:data type="token">
          <rng:param name="pattern">(pt|vu)</rng:param>
        </rng:data>
        <rng:data type="token">
          <rng:param name="pattern">0+(pt|vu)</rng:param>
        </rng:data>
        <rng:data type="token">
          <rng:param name="pattern">0+(\.0+)?(pt|vu)</rng:param>
        </rng:data>
        <rng:data type="token">
          <rng:param name="pattern">\.0+(pt|vu)</rng:param>
        </rng:data>
      </rng:choice>
    </rng:except>
  </rng:data>
</content>
</macroSpec>
```

## **data.FONTSCALE**

Relative size of symbol that may begin/end a line.

### Module

[MEI](#)

### Used by

- [att.arpeg.vis/@arrow.size](#)** Holds the relative size of the arrow symbol.
- [att.line.vis/@endsym.size](#)** Holds the relative size of the line-end symbol.
- [att.line.vis/@startsym.size](#)** Holds the relative size of the line-start symbol.
- [att.lineRend/@lendsym.size](#)** Holds the relative size of the line-end symbol.
- [att.lineRend/@lstartsym.size](#)** Holds the relative size of the line-start symbol.

### Declaration

```
<macroSpec ident="data.FONTSCALE" module="MEI" type="dt">
  <desc xml:lang="en">Relative size of symbol that may begin/end a line.</desc>
  <content>
    <rng:data type="integer">
      <rng:param name="minInclusive">1</rng:param>
      <rng:param name="maxInclusive">9</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

# **data.FONTSIZETERM**

Font size expressed as relative term.

## Module

[MEI](#)

## Used by

[data.FONTSIZE](#) Font size expressions.

## Allowed Values

xx-small Smaller than x-small.  
 x-small Smaller than small, larger than xx-small.  
 small Smaller than normal, larger than x-small.  
 normal Smaller than large, larger than small.  
 large Smaller than x-large, larger than normal.  
 x-large Smaller than xx-large, larger than large.  
 xx-large Larger than x-large.  
 smaller One size smaller than the current size.  
 larger One size larger than the current size.

## Declaration

```
<macroSpec ident="data.FONTSIZETERM" module="MEI" type="dt">
<desc xml:lang="en">Font size expressed as relative term.</desc>
<content>
  <valList type="closed">
    <valItem ident="xx-small">
      <desc xml:lang="en">Smaller than x-small.</desc>
    </valItem>

    </valItem>
```

```
<valItem ident="xx-large">
    <desc xml:lang="en">Larger than x-large.</desc>
</valItem>
<valItem ident="smaller">
    <desc xml:lang="en">One size smaller than the current size.</desc>
</valItem>
<valItem ident="larger">
    <desc xml:lang="en">One size larger than the current size.</desc>
</valItem>
</valList>
</content>
</macroSpec>
```

## **data.FONTSTYLE**

Font style (for text) attribute values.

### Module

[MEI](#)

### Used by

[att.lyricStyle/@lyric.style](#) Sets the default font style value for lyrics.

[att.textStyle/@text.style](#) Provides a default value for the font style of text (other than lyrics) when this information is not provided on the individual elements.

[att.typography/@fontstyle](#) Records the style of a font, i.e., italic, oblique, or normal.

### Allowed Values

italic Text slants to right.

normal Unadorned.

oblique Text slants to the left.

### Declaration

```
<macroSpec ident="data.FONTSTYLE" module="MEI" type="dt">
  <desc xml:lang="en">Font style (for text) attribute values.</desc>
  <content>
    <valList type="closed">
      <valItem ident="italic">
        <desc xml:lang="en">Text slants to right.</desc>
      </valItem>
      <valItem ident="normal">
        <desc xml:lang="en">Unadorned.</desc>
      </valItem>
      <valItem ident="oblique">
        <desc xml:lang="en">Text slants to the left.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## **data.FONTWEIGHT**

Font weight (for text) attribute values.

### **Module**

[MEI](#)

### **Used by**

[att.lyricStyle/@lyric.weight](#) Sets the default font weight value for lyrics.

[att.textStyle/@text.weight](#) Provides a default value for the font weight for text (other than lyrics) when this information is not provided on the individual elements.

[att.typography/@fontweight](#) Used to indicate bold type.

### **Allowed Values**

bold Bold or heavy.

normal Not bold.

### **Declaration**

```
<macroSpec ident="data.FONTWEIGHT" module="MEI" type="dt">
  <desc xml:lang="en">Font weight (for text) attribute values.</desc>
  <content>
    <valList type="closed">
      <valItem ident="bold">
        <desc xml:lang="en">Bold or heavy.</desc>
      </valItem>
      <valItem ident="normal">
        <desc xml:lang="en">Not bold.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

# data.FRBRRELATIONSHIP

Relationships between FRBR entities.

## Module

[MEI.frbr](#)

## Used by

[data.RELATIONSHIP](#) General-purpose relationships

## Allowed Values

hasAbridgement Target is an abridgement, condensation, or expurgation of the current entity.  
isAbridgementOf Reciprocal relationship of hasAbridgement.

hasAdaptation Target is an adaptation, paraphrase, free translation, variation (music), harmonization (music), or fantasy (music) of the current entity.

isAdaptationOf Reciprocal relationship of hasAdaptation.

hasAlternate Target is an alternate format or simultaneously released edition of the current entity.  
isAlternateOf Reciprocal relationship of hasAlternate.

hasArrangement Target is an arrangement (music) of the current entity.

isArrangementOf Reciprocal relationship of hasArrangement.

hasComplement Target is a cadenza, libretto, choreography, ending for unfinished work, incidental music, or musical setting of a text of the current entity.

isComplementOf Reciprocal relationship of hasComplement.

hasEmbodiment Target is a physical embodiment of the current abstract entity; describes the expression-to-manifestation relationship.

isEmbodimentOf Reciprocal relationship of hasEmbodiment.

hasExemplar Target is an exemplar of the class of things represented by the current entity; describes the manifestation-to-item relationship.

isExemplarOf Reciprocal relationship of hasExemplar.

hasImitation Target is a parody, imitation, or travesty of the current entity.

isImitationOf Reciprocal relationship of hasImitation.

hasPart Target is a chapter, section, part, etc.; volume of a multivolume manifestation; volume/issue of serial; intellectual part of a multi-part work; illustration for a text; sound aspect of a film; soundtrack for a film on separate medium; soundtrack for a film embedded in film; monograph in a series; physical component of a particular copy; the binding of a book of the current entity.

isPartOf Reciprocal relationship of hasPart.

hasRealization Target is a realization of the current entity; describes the work-to-expression relationship.

isRealizationOf Reciprocal relationship of hasRealization.

hasReconfiguration Target has been reconfigured: bound with, split into, extracted from the current entity.

isReconfigurationOf Reciprocal relationship of hasReconfiguration.

hasReproduction Target is a reproduction, microreproduction, macroreproduction, reprint, photo-offset reprint, or facsimile of the current entity.

isReproductionOf Reciprocal relationship of hasReproduction.

hasRevision Target is a revised edition, enlarged edition, or new state (graphic) of the current entity.

isRevisionOf Reciprocal relationship of hasRevision.  
 hasSuccessor Target is a sequel or succeeding work of the current entity.  
 isSuccessorOf Reciprocal relationship of hasSuccessor.  
 hasSummarization Target is a digest or abstract of the current entity.  
 isSummarizationOf Reciprocal relationship of hasSummarization.  
 hasSupplement Target is an index, concordance, teacher's guide, gloss, supplement, or appendix of the current entity.  
 isSupplementOf Reciprocal relationship of hasSupplement.  
 hasTransformation Target is a dramatization, novelization, versification, or screenplay of the current entity.  
 isTransformationOf Reciprocal relationship of hasTransformation.  
 hasTranslation Target is a literal translation or transcription (music) of the current entity.  
 isTranslationOf Reciprocal relationship of hasTranslation.

## Declaration

## **data.FRETNUMBER**

In string tablature, the fret number. The value 0 (zero) indicates the open string.

### **Module**

[MEI](#)

### **Used by**

**att.stringtab/@tab.fret** Records the location at which a string should be stopped against a fret.

### **Declaration**

```
<macroSpec ident="data.FRETNUMBER" module="MEI" type="dt">
  <desc xml:lang="en">In string tablature, the fret number. The value
    <val>0</val>
  (zero) indicates the open string.</desc>
  <content>
    <rng:data type="nonNegativeInteger"/>
  </content>
</macroSpec>
```

# data.GLISSANDO

Analytical glissando attribute values.

## Module

MEI

## Used by

**att.glissPresent/@gliss** Indicates that this element participates in a glissando. If visual information about the glissando needs to be recorded, then a `<gliss>` element should be employed instead.

## Allowed Values

- i First note/chord in glissando.
- m Note/chord that's neither first nor last in glissando.
- t Last note in glissando.

## Declaration

```
<macroSpec ident="data.GLISSANDO" module="MEI" type="dt">
  <desc xml:lang="en">Analytical glissando attribute values.</desc>
  <content>
    <valList type="closed">
      <valItem ident="i">

      <valItem ident="t">
        <desc xml:lang="en">Last note in glissando.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.GRACE

Do grace notes get time from the current (acc) or previous (unacc) one?

### Module

MEI

### Used by

**att.graced/@grace** Marks a note or chord as a "grace" (without a definite performed duration) and records from which other note/chord it should "steal" time.

### Allowed Values

acc Time "stolen" from following note.

unacc Time "stolen" from previous note.

unknown No interpretation regarding performed value of grace note.

### Declaration

```
<macroSpec ident="data.GRACE" module="MEI" type="dt">
  <desc xml:lang="en">Do grace notes get time from the current (acc) or previous (unacc)
  one?</desc>
  <content>
    <valList type="closed">
      <valItem ident="acc">
        <desc xml:lang="en">Time "stolen" from following note.</desc>
      </valItem>

      </valItem>
      <valItem ident="unknown">
        <desc xml:lang="en">No interpretation regarding performed value of grace
        note.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.HEADSHAPE

Note head shapes.

### Module

[MEI](#)

### Used by

[att.noteHeads/@head.shape](#) Used to override the head shape normally used for the given duration.

### Declaration

```
<macroSpec ident="data.HEADSHAPE" module="MEI" type="dt">
  <desc xml:lang="en">Note head shapes.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.HEADSHAPE.list"/>
      <rng:ref name="data.HEXNUM"/>
      <rng:ref name="data.NMTOKEN"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.HEADSHAPE.list**

Enumerated note head shapes.

### **Module**

MEI

### **Used by**

[data.HEADSHAPE](#) Note head shapes.

### **Allowed Values**

quarter Filled, rotated oval (Unicode 1D158).  
half Unfilled, rotated oval (Unicode 1D157).  
whole Unfilled, rotated oval (Unicode 1D15D).  
backslash Unfilled backslash (~ reflection of Unicode 1D10D).  
circle Unfilled circle (Unicode 25CB).  
+ Plus sign (Unicode 1D144).  
diamond Unfilled diamond (Unicode 1D1B9).  
isotriangle Unfilled isosceles triangle (Unicode 1D148).  
oval Unfilled, unrotated oval (Unicode 2B2D).  
piwedge Unfilled downward-pointing wedge (Unicode 1D154).  
rectangle Unfilled rectangle (Unicode 25AD).  
rtriangle Unfilled right triangle (Unicode 1D14A).  
semicircle Unfilled semi-circle (Unicode 1D152).  
slash Unfilled slash (~ Unicode 1D10D).  
square Unfilled square (Unicode 1D146).  
x X (Unicode 1D143).

### **Declaration**

```

## data.HEXNUM

Hexadecimal number.

### Module

[MEI](#)

### Used by

**att.extSym.names/@glyph.num** Numeric glyph reference in hexadecimal notation, e.g., "#xE000" or "U+E000". N.B. SMuFL version 1.18 uses the range U+E000 - U+ECBF.

**data.HEADSHAPE** Note head shapes.

### Declaration

```
<macroSpec ident="data.HEXNUM" module="MEI" type="dt">
  <desc xml:lang="en">Hexadecimal number.</desc>
  <content>
    <rng:data type="string">
      <rng:param name="pattern">(#x|U\+)[A-F0-9]+</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

# data.HORIZONTALALIGNMENT

Data values for attributes that capture horizontal alignment.

## Module

MEI

## Used by

- [att.horizontalAlign/@halign](#) Records horizontal alignment.
- [<pgFoot> / @halign](#) Records horizontal alignment of the page footer.
- [<pgHead> / @halign](#) Records horizontal alignment of the page header.

## Allowed Values

- left Left aligned.
- right Right aligned.
- center Centered.
- justify Left and right aligned.

## Declaration

```
<macroSpec ident="data.HORIZONTALALIGNMENT" module="MEI" type="dt">
  <desc xml:lang="en">Data values for attributes that capture horizontal alignment.</desc>
  <content>
    <valList type="closed">
      <valItem ident="left">

      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.INTERVAL.HARMONIC

A token indicating diatonic interval quality and size.

### Module

[MEI](#)

### Used by

[att.intervalHarmonic/@inth](#) Encodes the harmonic interval between pitches occurring at the same time.

### Declaration

```
<macroSpec ident="data.INTERVAL.HARMONIC" module="MEI" type="dt">
  <desc xml:lang="en">A token indicating diatonic interval quality and size.</desc>
  <content>
    <rng:choice>
      <rng:data type="token">
        <rng:param name="pattern">[AdMmP][0-9]+</rng:param>
      </rng:data>
    </rng:choice>
  </content>
</macroSpec>
```

## data.INTERVAL.MELODIC

A token indicating direction of the interval but not its precise value, a diatonic interval (with optional direction and quality), or a decimal value in half steps. Decimal values are permitted to accommodate micro-tuning.

### Module

MEI

### Used by

[att.intervalMelodic/@intm](#) Encodes the melodic interval from the previous pitch. The value may be a general directional indication (u, d, s, etc.), an indication of diatonic interval direction, quality, and size, or a precise numeric value in half steps.

### Remarks

#### Interval direction only:

- u = up/higher,
- d = down/lower,
- s = same,
- n = neutral/unknown,
- sd = same or lower (but not higher),
- su = same or higher (but not lower)

#### Interval direction, quality, and size:

- optional sign,
- **optional quality indicator:**
  - A = augmented,
  - d = diminished,
  - M = major,
  - m = minor,
  - P = perfect
- integer value

#### Interval in half steps:

- optional sign,
- decimal value
- "hs"

## Declaration

```

<macroSpec ident="data.INTERVAL.MELODIC" module="MEI" type="dt">
  <desc xml:lang="en">A token indicating direction of the interval but not its precise value, a diatonic interval (with optional direction and quality), or a decimal value in half steps. Decimal values are permitted to accommodate micro-tuning.</desc>

## data.ISODATE

ISO date formats.

### Module

[MEI](#)

### Used by

- att.datable/@enddate** Contains the end point of a date range in standard ISO form.
- att.datable/@isodate** Provides the value of a textual date in standard ISO form.
- att.datable/@notafter** Contains an upper boundary for an uncertain date in standard ISO form.
- att.datable/@notbefore** Contains a lower boundary, in standard ISO form, for an uncertain date.
- att.datable/@startdate** Contains the starting point of a date range in standard ISO form.

### Declaration

```
<macroSpec ident="data.ISODATE" module="MEI" type="dt">
  <desc xml:lang="en">ISO date formats.</desc>
  <content>
    <rng:choice>
      <rng:data type="date"/>

      </rng:data>
    </rng:choice>
  </content>
</macroSpec>
```

## data.ISOTIME

ISO 24-hour time format: HH:MM:SS.ss, i.e., [0-9][0-9]:[0-9][0-9]:[0-9][0-9](\.[0-9]\*?).

### Module

MEI

### Used by

[att.timestamp.ges/@tstamp.real](#) Records the onset time in terms of ISO time.

[att.timestamp2.ges/@tstamp2.real](#) Records the ending point of an event in terms of ISO time.

### Declaration

```
<macroSpec ident="data.ISOTIME" module="MEI" type="dt">
  <desc xml:lang="en">ISO 24-hour time format: HH:MM:SS.ss,
    <abbr>i.e.</abbr>
    , [0-9][0-9]:[0-9][0-9]:[0-9][0-9](\.[0-9]*?).</desc>
  <content>
    <rng:data type="time"/>
  </content>
</macroSpec>
```

## **data.KEYFIFTHS**

Indicates the location of the tonic in the circle of fifths.

### **Module**

MEI

### **Used by**

[att.keySig.log/@sig](#) Written key signature.

[att.keySigDefault.log/@keysig](#) Written key signature.

### **Declaration**

```
<macroSpec ident="data.KEYFIFTHS" module="MEI" type="dt">
  <desc xml:lang="en">Indicates the location of the tonic in the circle of fifths.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">mixed|0|([1-9]|1[0-2])[f|s]</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.LAYERSCHEM**

Indicates how stems should be drawn when more than one layer is present and stem directions are not indicated on the notes/chords themselves. '1' indicates that there is only a single layer on a staff. '2o' means there are two layers with opposing stems. '2f' indicates two 'free' layers; that is, opposing stems will be drawn unless one of the layers has 'space'. In that case, stem direction in the remaining layer will be determined as if there were only one layer. '3o' and '3f' are analogous to '2o' and '2f' with three layers allowed.

### **Module**

MEI

### **Used by**

[att.staffDef.vis/@layerscheme](#) Indicates the number of layers and their stem directions.

### **Allowed Values**

- 1 Single layer.
- 2o Two layers with opposing stems.
- 2f Two layers with 'floating' stems.
- 3o Three layers with opposing stems.
- 3f Three layers with 'floating' stems.

### **Declaration**

```
<macroSpec ident="data.LAYERSCHEM" module="MEI" type="dt">
  <desc xml:lang="en">Indicates how stems should be drawn when more than one layer is

VERSION

# data.LIGATUREFORM

Ligature forms.

## Module

[MEI](#)

## Used by

[att.ligature.vis/@form](#) Provides an indication of the function of the ligature.

[att.note.vis.mensural/@lig](#) Indicates this element's participation in a ligature.

## Allowed Values

recta Notes are "squeezed" together.

obliqua Individual notes are replaced by an oblique figure.

## Declaration

```
<macroSpec ident="data.LIGATUREFORM" module="MEI" type="dt">
  <desc xml:lang="en">Ligature forms.</desc>

</macroSpec>
```

## data.LINEFORM

Visual form of a line.

### Module

MEI

### Used by

- [att.arpeg.vis/@line.form](#) Visual form of the line.
- [att.curveRend/@lform](#) Describes the line style of a curve.
- [att.line.vis/@form](#) Visual form of the line.
- [att.lineRend.base/@lform](#) Describes the line style of a line.
- [att.slurRend/@slur.lform](#)
- [att.tieRend/@tie.lform](#)

### Allowed Values

- dashed Dashed line.
- dotted Dotted line.
- solid Straight, uninterrupted line.
- wavy Undulating line.

### Declaration

```
<macroSpec ident="data.LINEFORM" module="MEI" type="dt">  
  <desc xml:lang="en">Visual form of a line.</desc>  
  <content>  
    <valList type="closed">

      </valItem>  
    </valList>  
  </content>  
</macroSpec>
```

## **data.LINESTARTENDSYMBOL**

Symbol that may begin/end a line.

### Module

[MEI](#)

### Used by

[att.arpeg.vis/@arrow.shape](#) Symbol rendered at end of the line.

[att.line.vis/@endsym](#) Symbol rendered at end of line.

[att.line.vis/@startsym](#) Symbol rendered at start of line.

[att.lineRend/@lendsym](#) Symbol rendered at end of line.

[att.lineRend/@lstartsym](#) Symbol rendered at start of line.

### Allowed Values

angledown 90 degree turn down (similar to Unicode 231D at end of line, 231C at start).

angleup 90 degree turn up (similar to Unicode 231F at end of line, 231E at start).

angleright 90 degree turn right (syntactic sugar for "angledown" for vertical or angled lines).

angleleft 90 degree turn left (syntactic sugar for "angleup" for vertical or angled lines).

arrow Filled, triangular arrowhead (similar to Unicode U+25C0 or SMuFL U+EB78).

arrowopen Open triangular arrowhead (similar to Unicode U+02C3 or SMuFL U+EB8A).

arrowwhite Unfilled, triangular arrowhead (similar to Unicode U+25C1 or SMuFL U+EB82).

harpoonleft Harpoon-shaped arrowhead left of line (similar to arrowhead of Unicode U+21BD).

harpoonright Harpoon-shaped arrowhead right of line (similar to arrowhead of Unicode U+21BC).

H Hauptstimme (Unicode U+1D1A6 or SMuFL U+E860).

N Nebenstimme (Unicode U+1D1A7 or SMuFL U+E861).

Th Theme (SMuFL U+E864).

ThRetro Theme, retrograde (SMuFL U+E865).

ThRetroInv Theme, retrograde inversion (SMuFL U+E866).

ThInv Theme, inverted (SMuFL U+E867).

T Theme (SMuFL U+E868).

TInv Theme, inverted (SMuFL U+E869).

CH Choralemelodie (SMuFL U+E86A).

RH Hauptrhythmus (SMuFL U+E86B).

none No start/end symbol.

### Declaration

      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.MEASUREBEAT

A count of measures plus a beat location, i.e.,  $[0-9]+m * \backslash+ *[0-9]+(\cdot?[0-9]*?)$ . The measure count is the number of bar lines crossed by the event, while the beat location is a timestamp expressed as a beat with an optional fractional part. For example, "1m+3.5" indicates a point in the next measure on the second half of beat 3. The measure number must be in the range of 0 to the number of remaining measures, while the beat number must be in the range from 0 to the numerator of the time signature plus 1. For example, in 6/8 the beat number must be within the range from 0 (the left bar line) to 7 (the right bar line). A value with a measure number of "0", such as "0m+2", indicates a point within the current measure.

### Module

MEI

### Used by

[att.origin.timestamp.log/@origin.tstamp2](#) encodes the ending point of musical material in terms of musical time, i.e., a count of measures plus a beat location. The values are relative to the measure identified by origin.tstamp.

[att.timestamp2.ges/@tstamp2.ges](#) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure.

[att.timestamp2.log/@tstamp2](#) Encodes the ending point of an event, i.e., a count of measures plus a beat location in the ending measure.

### Declaration

```
<macroSpec ident="data.MEASUREBEAT" module="MEI" type="dt">
  <desc xml:lang="en">A count of measures plus a beat location,
    <abbr>i.e.</abbr>
    ,  $[0-9]+m * \backslash+ *[0-9]+(\cdot?[0-9]*?)$ . The measure count is the number of bar lines crossed by the event, while the beat location is a timestamp expressed as a beat with an optional fractional part. For example, "1m+3.5" indicates a point in the next measure on the second half of beat 3. The measure number must be in the range of 0 to the number of remaining measures, while the beat number must be in the range from 0 to the numerator of the time signature plus 1. For example, in 6/8 the beat number must be within the range from 0 (the left bar line) to 7 (the right bar line). A value with a measure number of "0", such as "0m+2", indicates a point within the current measure.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">
         $([0-9]+m\s*\backslash+\s*)?[0-9]+(\cdot?[0-9]*?)$ 
      </rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.MEASUREBEATOFFSET**

A count of measures plus a beat location, i.e.,  $(\+|\-)?[0-9]+m\+[0-9]+(\.[0-9]*?)$ . The measure count is the number of bar lines crossed by the event, while the beat location is a timestamp expressed as a beat with an optional fractional part. The measure number must be in the range of preceding measures to the number of remaining measures. A value with a positive measure number, such as "1m+3", indicates a point in the following measure, while a value with a negative measure number, such as "-1m+3", marks a point in the preceding measure. The beat number must be in the range from 0 to the numerator of the time signature plus 1. For example, in 6/8 the beat number must be within the range from 0 (the left bar line) to 7 (the right bar line). A value with a measure number of "0", such as "0m+2", indicates a point within the current measure.

### Module

MEI

### Used by

[att.origin.timestamp.log/@origin.tstamp](#) encodes the starting point of musical material in terms of musical time, i.e., a (potentially negative) count of measures plus a beat location.

### Declaration

```
<macroSpec ident="data.MEASUREBEATOFFSET" module="MEI" type="dt">
  <desc xml:lang="en">A count of measures plus a beat location,
    <abbr>i.e.</abbr>
    ,  $(\+|\-)?[0-9]+m\+[0-9]+(\.[0-9]*?)$ . ```

## **data.MEASUREMENTFONT SIGNED**

Measurement expressed relative to properties of the current font, in analogy to the respective CSS length units. Unlike data.MEASUREMENTFONTUNSIGNED, both positive and negative values are allowed.

### **Module**

MEI

### **Used by**

**data.MEASUREMENTTYPOGRAPHYSIGNED** Measurements used for typographical features. Unlike data.MEASUREMENTTYPOGRAPHYSIGNED, both positive and negative values are allowed.

### **Declaration**

```
<macroSpec ident="data.MEASUREMENTFONT SIGNED" module="MEI" type="dt">
  <desc xml:lang="en">Measurement expressed relative to properties of the current font, in
  analogy to the respective CSS length units. Unlike data.MEASUREMENTFONTUNSIGNED, both
  positive and negative values are allowed.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">(\+|-)?\d+(\.\d+)?(ch|em|ex)?</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.MEASUREMENTFONTUNSIGNED**

Measurement expressed relative to properties of the current font, in analogy to the respective CSS length units. Unlike data.MEASUREMENTFONTUNSIGNED, only positive values are allowed.

### **Module**

MEI

### **Used by**

**data.MEASUREMENTTYPOGRAPHYUNSIGNED** Measurements used for typographical features. Unlike data.MEASUREMENTTYPOGRAPHYSIGNED, only positive values are allowed.

### **Declaration**

```
<macroSpec ident="data.MEASUREMENTFONTUNSIGNED" module="MEI" type="dt">
  <desc xml:lang="en">Measurement expressed relative to properties of the current font, in
  analogy to the respective CSS length units. Unlike data.MEASUREMENTFONTUNSIGNED, only
  positive values are allowed.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">\d+(\.\d+)?(ch|em|ex)?</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.MEASUREMENTSIGNED**

Measurement expressed in real-world (e.g., centimeters, millimeters, inches, points, picas, or pixels) or virtual units (vu). 'vu' is the default value. Unlike data.MEASUREMENTUNSIGNED, in which only positive values are allowed, both positive and negative values are permitted.

### **Module**

MEI

### **Used by**

**att.distances/@dir.dist** Records the default distance from the staff for directives.

**att.distances/@dynam.dist** Records the default distance from the staff for dynamic marks.

**att.distances/@harm.dist** Records the default distance from the staff of harmonic indications, such as guitar chord grids or functional labels.

**att.distances/@reh.dist** Records the default distance from the staff for rehearsal marks.

**att.distances/@tempo.dist** Records the default distance from the staff for tempo marks.

**att.lyricStyle/@lyric.align** Describes the alignment of lyric syllables associated with a note or chord.

**att.spacing/@spacing.staff** Specifies the minimum amount of space between adjacent staves in the same system; measured from the bottom line of the staff above to the top line of the staff below.

**att.spacing/@spacing.system** Describes the space between adjacent systems; a pair of space-separated values (minimum and maximum, respectively) provides a range between which a rendering system-supplied value may fall, while a single value indicates a fixed amount of space; that is, the minimum and maximum values are equal.

**att.staffDef.vis/@spacing** Records the absolute distance (as opposed to the relative distances recorded in `<scoreDef>` elements) between this staff and the preceding one in the same system. This value is meaningless for the first staff in a system since the `spacing.system` attribute indicates the spacing between systems.

**att.visualOffset.ho/@ho** Records a horizontal adjustment to a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines.

**att.visualOffset.vo/@vo** Records the vertical adjustment of a feature's programmatically-determined location in terms of staff interline distance; that is, in units of 1/2 the distance between adjacent staff lines.

**att.visualOffset2.ho/@startho** Records the horizontal adjustment of a feature's programmatically-determined start point.

**att.visualOffset2.ho/@endho** Records the horizontal adjustment of a feature's programmatically-determined end point.

**att.visualOffset2.vo/@startvo** Records a vertical adjustment of a feature's programmatically-determined start point.

**att.visualOffset2.vo/@endvo** Records a vertical adjustment of a feature's programmatically-determined end point.

**data.MEASUREMENTTYPOGRAPHYSIGNED** Measurements used for typographical features. Unlike data.MEASUREMENTTYPOGRAPHYSIGNED, both positive and negative values are allowed.

## Declaration

```
<macroSpec ident="data.MEASUREMENTSIGNED" module="MEI" type="dt">
  <desc xml:lang="en">Measurement expressed in real-world (
    <abbr>e.g.</abbr>
    , centimeters, millimeters, inches, points, picas, or pixels) or virtual units (vu). 'vu'
    is the default value. Unlike data.MEASUREMENTUNSIGNED, in which only positive values are
    allowed, both positive and negative values are permitted.</desc>
  <content>
    <rng:data type="token">

        (\+|-)?\d+(\.\d+)?(cm|mm|in|pt|pc|px|vu)?
      </rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.MEASUREMENTTYPOGRAPHYSIGNED**

Measurements used for typographical features. Unlike data.MEASUREMENTTYPOGRAPHYSIGNED, both positive and negative values are allowed.

### **Module**

[MEI](#)

### **Used by**

**att.typography/@letterspacing** Indicates letter spacing (aka tracking) in analogy to the CSS letter-spacing property.

### **Declaration**

```
<macroSpec ident="data.MEASUREMENTTYPOGRAPHYSIGNED" module="MEI" type="dt">
  <desc xml:lang="en">Measurements used for typographical features. Unlike
  data.MEASUREMENTTYPOGRAPHYSIGNED, both positive and negative values are allowed.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.MEASUREMENTFONTSIGNED"/>
      <rng:ref name="data.MEASUREMENTSIGNED"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.MEASUREMENTTYPOGRAPHYUNSIGNED**

Measurements used for typographical features. Unlike data.MEASUREMENTTYPOGRAPHYSIGNED, only positive values are allowed.

### **Module**

MEI

### **Used by**

[att.typography/@lineheight](#) Indicates line height in analogy to the CSS line-height property.

### **Declaration**

```
<macroSpec ident="data.MEASUREMENTTYPOGRAPHYUNSIGNED" module="MEI" type="dt">
  <desc xml:lang="en">Measurements used for typographical features. Unlike
  data.MEASUREMENTTYPOGRAPHYSIGNED, only positive values are allowed.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.MEASUREMENTFONTUNSIGNED"/>
      <rng:ref name="data.MEASUREMENTUNSIGNED"/>
    </rng:choice>
  </content>
</macroSpec>
```

## data.MEASUREMENTUNSIGNED

Measurement expressed in real-world (e.g., centimeters, millimeters, inches, points, picas, or pixels) or virtual units (vu). 'vu' is the default value. Unlike data.MEASUREMENTSIGNED, only positive values are allowed.

### Module

MEI

### Used by

**att.fTrem.vis/@float.gap** Records the amount of separation between floating beams and stems.

**att.hairpin.vis/@opening** Specifies the distance between the lines at the open end of a hairpin dynamic mark.

**att.height/@height** Measurement of the vertical dimension of an entity.

**att.pages/@page.height** Specifies the height of the page; may be expressed in real-world units or staff steps.

**att.pages/@page.width** Describes the width of the page; may be expressed in real-world units or staff steps.

**att.pages/@page.topmar** Indicates the amount of whitespace at the top of a page.

**att.pages/@page.botmar** Indicates the amount of whitespace at the bottom of a page.

**att.pages/@page.leftmar** Indicates the amount of whitespace at the left side of a page.

**att.pages/@page.rightmar** Indicates the amount of whitespace at the right side of a page.

**att.plica.vis/@len** Encodes the stem length.

**att.stem.vis/@len** Encodes the stem length.

**att.stems/@stem.len** Encodes the stem length.

**att.systems/@system.leftmar** Describes the amount of whitespace at the left system margin relative to page.leftmar.

**att.systems/@system.rightmar** Describes the amount of whitespace at the right system margin relative to page.rightmar.

**att.systems/@system.topmar** Describes the distance from page's top edge to the first system; used for first page only.

**att.width/@width** Measurement of the horizontal dimension of an entity.

**data.LINEWIDTH** Datatype of line width measurements.

**data.MEASUREMENTTYPOGRAPHYUNSIGNED** Measurements used for typographical features. Unlike data.MEASUREMENTTYPOGRAPHYSIGNED, only positive values are allowed.

### Declaration

```
<macroSpec ident="data.MEASUREMENTUNSIGNED" module="MEI" type="dt">
<desc xml:lang="en">Measurement expressed in real-world (

</macroSpec>

## data.MELODICFUNCTION

Indication of melodic function, i.e., anticipation, lower neighbor, escape tone, etc.

### Module

MEI

### Used by

**att.melodicFunction/@mfunc** Describes melodic function using [Humdrum \\*\\*embel syntax](#).

### Allowed Values

aln Accented lower neighbor.  
ant Anticipation.  
app Appoggiatura.  
apt Accented passing tone.  
arp Arpeggio tone (chordal tone).  
arp7 Arpeggio tone (7th added to the chord).  
aun Accented upper neighbor.  
chg Changing tone.  
cln Chromatic lower neighbor.  
ct Chord tone (i.e., not an embellishment).  
ct7 Chord tone (7th added to the chord).  
cun Chromatic upper neighbor.  
cup Chromatic unaccented passing tone.  
et Escape tone.  
ln Lower neighbor.  
ped Pedal tone.  
rep Repeated tone.  
ret Retardation.  
23ret 2-3 retardation.  
78ret 7-8 retardation.  
sus Suspension.  
43sus 4-3 suspension.  
98sus 9-8 suspension.  
76sus 7-6 suspension.  
un Upper neighbor.  
un7 Upper neighbor (7th added to the chord).  
upt Unaccented passing tone.  
upt7 Unaccented passing tone (7th added to the chord).

## data.MENSURATIONSIGN

Mensuration signs attribute values.

### Module

[MEI](#)

### Used by

[att.mensur.vis/@sign](#) The base symbol in the mensuration sign/time signature of mensural notation.

[att.mensural.vis/@mensur.sign](#) The base symbol in the mensuration sign/time signature of mensural notation.

### Allowed Values

C Sign for tempus imperfectum.  
O Sign for tempus perfectum.  
t Sign for divisio ternaria.  
q Sign for divisio quaternaria.  
si Sign for divisio senaria imperfecta.  
i Sign for divisio senaria imperfecta.  
sg Sign for divisio senaria gallica.  
g Sign for divisio senaria gallica.  
sp Sign for divisio senaria perfecta.  
p Sign for divisio senaria perfecta.  
sy Sign for divisio senaria ytalica.  
y Sign for divisio senaria ytalica.  
n Sign for divisio novenaria.  
oc Sign for divisio octonaria.  
d Sign for divisio duodenaria.

## **data.METERFORM**

Contains an indication of how a meter signature should be rendered.

### **Module**

MEI

### **Used by**

**att.meterSig.vis/@form** Contains an indication of how the meter signature should be rendered.

**att.meterSigDefault.vis/@meter.form** Contains an indication of how the meter signature should be rendered.

### **Allowed Values**

num Show only the number of beats.

denomsym The lower number in the meter signature is replaced by a note symbol.

norm Meter signature rendered using traditional numeric values.

sym+norm Meter signature rendered using both the symbol and the traditional numeric values.

### **Declaration**

```
<macroSpec ident="data.METERFORM" module="MEI" type="dt">

# data.METERSIGN

Meter.sym attribute values for CMN.

## Module

[MEI](#)

## Used by

**att.meterSig.log/@sym** Indicates the use of a meter symbol instead of a numeric meter signature, that is, 'C' for common time or 'C' with a slash for cut time.

**att.meterSigDefault.log/@meter.sym** Indicates the use of a meter symbol instead of a numeric meter signature, that is, 'C' for common time or 'C' with a slash for cut time.

## Allowed Values

common Common time; i.e., 4/4.

cut Cut time; i.e., 2/2.

open Open time signature, i.e., Senza misura. See Gould pp. 611–615.

## Declaration

```

## data.MIDIBPM

Tempo expressed as "beats" per minute, where "beat" is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*.

### Module

MEI

### Used by

**att.midiTempo/@midi.bpm** Captures the number of \*quarter notes\* per minute. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*.

### Declaration

```
<macroSpec ident="data.MIDIBPM" module="MEI" type="dt">
  <desc xml:lang="en">Tempo expressed as "beats" per minute, where "beat" is always defined
  as a quarter note, *not the numerator of the time signature or the metronomic
  indication*.</desc>
  <content>
    <rng:data type="decimal">
      <rng:param name="minExclusive">0</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.MIDICHANNEL

MIDI channel number. One-based values must be followed by a lower-case letter "o".

### Module

MEI

### Used by

[att.channelized/@midi.channel](#) Records a MIDI channel value.

[<chan> / @num](#) MIDI number in the range set by data.MIDICHANNEL.

### Declaration

```
<macroSpec ident="data.MIDICHANNEL" module="MEI" type="dt">
  <desc xml:lang="en">MIDI channel number. One-based values must be followed by a lower-case
letter "o".</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">0|([1-9]|1[0-5])o?|16o</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.MIDIMSPB**

Tempo expressed as microseconds per "beat", where "beat" is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*.

### **Module**

MEI

### **Used by**

**att.midiTempo/@midi.mspb** Records the number of microseconds per \*quarter note\*. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*. At 120 quarter notes per minute, each quarter note will last 500,000 microseconds.

### **Declaration**

```
<macroSpec ident="data.MIDIMSPB" module="MEI" type="dt">
  <desc xml:lang="en">Tempo expressed as microseconds per "beat", where "beat" is always
  defined as a quarter note, *not the numerator of the time signature or the metronomic
  indication*.</desc>
  <content>
    <rng:data type="positiveInteger"/>
  </content>
</macroSpec>
```

## **data.MIDINAMES**

General MIDI instrument names.

### **Module**

MEI

### **Used by**

[att.midiInstrument/@midi.instrname](#) Provides a General MIDI label for the MIDI instrument.

### **Allowed Values**

 Mute\_Triangle Mute Triangle, Key #80.  
 Open\_Triangle Open Triangle, Key #81.

## Remarks

Instrument names are based on the official list in the [General MIDI Specifications](#).

MEI uses 0-based program numbers.

Percussion sounds are available when the MIDI channel is set to "10".

```

## data.MIDIVALUE

Generic MIDI value. One-based values must be followed by a lower-case letter "o".

### Module

MEI

### Used by

- att.midiInstrument/@midi.instrnum** Captures the General MIDI instrument number. Use an integer for a 0-based value. An integer preceded by "in" indicates a 1-based value.
- att.midiInstrument/@midi.patchnum** Records a non-General MIDI patch/instrument number.
- att.midiNumber/@num** MIDI number in the range set by data.MIDIVALUE.
- att.midiValue/@val** MIDI number.
- att.midiValue2/@val2** MIDI number.
- att.midiVelocity/@vel** MIDI Note-on/off velocity.
- data.MIDIVALUE\_NAME** data.MIDIVALUE or data.NCName values.
- data.MIDIVALUE\_PAN** data.MIDIVALUE or data.PERCENT.LIMITED.SIGNED values.
- data.MIDIVALUE\_PERCENT** data.MIDIVALUE or data.PERCENT.LIMITED values.

### Declaration

```
<macroSpec ident="data.MIDIVALUE" module="MEI" type="dt">  
  <desc xml:lang="en">Generic MIDI value. One-based values must be followed by a lower-case  
  letter "o".</desc>  
  <content>  
    <rng:data type="token">  
      <rng:param name="pattern">  
        0|([1-9]|([1-9][0-9]|1([0-1][0-9]|2[0-7])))o?|128o  
      </rng:param>  
    </rng:data>  
  </content>  
</macroSpec>
```

## **data.MIDIValue\_Name**

data.MIDIValue or data.NCName values.

### Module

[MEI](#)

### Used by

[att.channelized/@midi.port](#) Sets the MIDI port value.

### Declaration

```
<macroSpec ident="data.MIDIValue_Name" module="MEI" type="dt">
  <desc xml:lang="en">data.MIDIValue or data.NCName values.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.MIDIValue"/>
      <rng:ref name="data.NCNAME"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.MIDIVALE\_PAN**

data.MIDIVALE or data.PERCENT.LIMITED.SIGNED values.

### Module

MEI

### Used by

**att.midiInstrument/@midi.pan** Sets the instrument's position in a stereo field. MIDI values of 0 and 1 both pan left, 127 or 128 pans right, and 63 or 64 pans to the center. Positive percentage values pan to the right, negative ones to the left. 0% is centered.

### Declaration

```
<macroSpec ident="data.MIDIVALE_PAN" module="MEI" type="dt">
  <desc xml:lang="en">data.MIDIVALE or data.PERCENT.LIMITED.SIGNED values.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.MIDIVALE"/>
      <rng:ref name="data.PERCENT.LIMITED.SIGNED"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.MIDIVALE\_Percent**

data.MIDIVALE or data.PERCENT.LIMITED values.

### Module

[MEI](#)

### Used by

[att.midiInstrument/@midi.volume](#) Sets the instrument's volume.

### Declaration

```
<macroSpec ident="data.MIDIVALE_Percent" module="MEI" type="dt">
  <desc xml:lang="en">data.MIDIVALE or data.PERCENT.LIMITED values.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.MIDIVALE"/>
      <rng:ref name="data.PERCENT.LIMITED"/>
    </rng:choice>
  </content>
</macroSpec>
```

## data.MODE

Modes.

### Module

MEI

### Used by

**att.keySig.anl/@mode** Indicates major, minor, or other tonality.

**att.keySigDefault.anl/@key.mode** Indicates major, minor, or other tonality.

**<key> / @mode** Indicates major, minor, or other tonality.

### Declaration

```
<macroSpec ident="data.MODE" module="MEI" type="dt">
  <desc xml:lang="en">Modes.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.MODE.cmn"/>
      <rng:ref name="data.MODE.gregorian"/>
      <rng:ref name="data.MODE.extended"/>
    </rng:choice>
  </content>
</macroSpec>
```

# data.MODE.cmn

Common modes.

## Module

[MEI](#)

## Used by

[data.MODE](#) Modes.

## Allowed Values

major Major mode.  
minor Minor mode.

## Declaration

```
<macroSpec ident="data.MODE.cmn" module="MEI" type="dt">
  <desc xml:lang="en">Common modes.</desc>
  <content>
    <valList type="closed">
      <valItem ident="major">

        <desc xml:lang="en">Minor mode.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.MODE.extended

Modern modes.

### Module

MEI

### Used by

[data.MODE](#) Modes.

### Allowed Values

ionian Ionian mode.  
hypopian Hypopian mode.  
aeolian Aeolian mode.  
hypoaeolian Hypoaeolian mode.  
locrian Locrian mode.  
hypolocrian Hypolocrian mode.

### Declaration

```

# **data.MODE.gregorian**

Gregorian modes.

## Module

[MEI](#)

## Used by

[data.MODE](#) Modes.

## Allowed Values

- dorian Dorian mode (the first mode).
- hypodorian Hypodorian mode (the second mode).
- phrygian Phrygian mode (the third mode).
- hypophrygian Hypophrygian mode (the fourth mode).
- lydian Hypolydian mode (the fifth mode).
- hypolydian Lydian mode (the sixth mode).
- mixolydian Mixolydian mode (the seventh mode).
- hypomixolydian Hypomixolydian mode (the eighth mode).
- peregrinus Tonus peregrinus (the ninth mode).

## Declaration

# data.MODSRELATIONSHIP

Bibliographic relationship values based on MODS version 3.4.

## Module

[MEI](#)

## Used by

[data.RELATIONSHIP](#) General-purpose relationships

[\*\*<relatedItem>\*\* / @rel](#) Describes the relationship between the entity identified by the [\*\*<relatedItem>\*\*](#) element and the resource described in the parent element, i.e., [\*\*<bibl>\*\*](#), [\*\*<source>\*\*](#) or [\*\*<relatedItem>\*\*](#).

## Allowed Values

preceding Temporal predecessor of the resource.

succeeding Temporal successor to the resource.

original Original form of the resource.

host Parent containing the resource.

constituent Intellectual or physical component of the resource.

otherVersion Version of the resource's intellectual content not changed enough to be a different work.

otherFormat Version of the resource in a different physical format.

isReferencedBy Published bibliographic description, review, abstract, or index of the resource's content.

references Cited or referred to in the resource.

## Declaration

```

# data.MODUSMAIOR

Maxima-long relationship values.

## Module

MEI

## Used by

[att.mensural.shared/@modusmaior](#) Describes the maxima-long relationship.

## Declaration

```
<macroSpec ident="data.MODUSMAIOR" module="MEI" type="dt">
  <desc xml:lang="en">Maxima-long relationship values.</desc>
  <content>
    <rng:data type="positiveInteger">
      <rng:param name="minInclusive">2</rng:param>
      <rng:param name="maxInclusive">3</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.MODUSMINOR**

Long-breve relationship values.

### Module

MEI

### Used by

[att.mensural.shared/@modusminor](#) Describes the long-breve relationship.

### Declaration

```
<macroSpec ident="data.MODUSMINOR" module="MEI" type="dt">
  <desc xml:lang="en">Long-breve relationship values.</desc>
  <content>
    <rng:data type="positiveInteger">
      <rng:param name="minInclusive">2</rng:param>
      <rng:param name="maxInclusive">3</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.MULTIBREVERESTS.mensural**

Logical, that is, written, duration attribute values for multi-breve rests in the mensural repertoire.

### **Module**

[MEI.mensural](#)

### **Used by**

[data.DURATIONRESTS.mensural](#) Logical, that is, written, duration attribute values for mensural rests.

### **Allowed Values**

2B A two-breve rest.

3B A three-breve rest.

### **Declaration**

```
<macroSpec ident="data.MULTIBREVERESTS.mensural" module="MEI.mensural" type="dt">
  <desc xml:lang="en">Logical, that is, written, duration attribute values for multi-breve
  rests in the mensural repertoire.</desc>
  <content>
    <valList type="closed">
      <valItem ident="2B">

      </valItem>
      <valItem ident="3B">
        <desc xml:lang="en">A three-breve rest.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## **data.MUSICFONT**

Music font family.

### **Module**

[MEI](#)

### **Used by**

[att.notationStyle/@music.name](#) Sets the default music font name.

### **Declaration**

```
<macroSpec ident="data.MUSICFONT" module="MEI" type="dt">
  <desc xml:lang="en">Music font family.</desc>
  <content>
    <rng:data type="token" />
  </content>
</macroSpec>
```

## **data.NCNAME**

"Convenience" datatype that permits combining enumerated values with a user-supplied name.

### **Module**

MEI

### **Used by**

[data.MIDIVALUE\\_NAME](#) data.MIDIVALUE or data.NCName values.

### **Declaration**

```
<macroSpec ident="data.NCNAME" module="MEI" type="dt">
  <desc xml:lang="en">"Convenience" datatype that permits combining enumerated values with a
  user-supplied name.</desc>
  <content>
    <rng:data type="NCName"/>
  </content>
</macroSpec>
```

## data.NEIGHBORINGLAYER

For musical material designated to appear on an adjacent layer or staff, the location of the layer relative to the current one; i.e., the layer above or the layer below.

### Module

MEI

### Used by

**att.beamedWith/@beam.with** In the case of cross-staff beams, the beam.with attribute is used to indicate which staff the beam is connected to; that is, the staff above or the staff below.

**att.stems.cmn/@stem.with** Contains an indication of which staff a note or chord that logically belongs to the current staff should be visually placed on; that is, the one above or the one below.

### Allowed Values

above The layer immediately above.

below The layer immediately below.

### Declaration

```
<macroSpec ident="data.NEIGHBORINGLAYER" module="MEI" type="dt">
    <desc xml:lang="en">For musical material designated to appear on an adjacent layer or staff, the location of the layer relative to the current one;
        <abbr>i.e.</abbr>
        , the layer above or the layer below.</desc>
    <content>
        <valList type="closed">
            <valItem ident="above">
                <desc xml:lang="en">The layer immediately above.</desc>
            </valItem>
            <valItem ident="below">
                <desc xml:lang="en">The layer immediately below.</desc>
            </valItem>
        </valList>
    </content>
</macroSpec>
```

## data.NMTOKEN

"Convenience" datatype that permits combining enumerated values with user-supplied values.

### Module

[MEI](#)

### Used by

**<attUsage>** / @name Name of the attribute.  
**data.HEADSHAPE** Note head shapes.  
**data.PLACEMENT** Location information.  
**data.RELATIONSHIP** General-purpose relationships  
**<namespace>** / @prefix Prefix associated with the formal identifier.  
**<tagUsage>** / @name Name of the element.

### Declaration

```
<macroSpec ident="data.NMTOKEN" module="MEI" type="dt">
  <desc xml:lang="en">"Convenience" datatype that permits combining enumerated values with
  user-supplied values.</desc>
  <content>
    <rng:data type="NMTOKEN" />
  </content>
</macroSpec>
```

## **data.NONSTAFFPLACE**

Non-staff location.

### **Module**

[MEI](#)

### **Used by**

[data.PLACEMENT](#) Location information.

### **Allowed Values**

botmar At the foot of the page.

topmar At the top of the page.

leftmar At the left of the page.

rightmar At the right of the page.

facing On the opposite, i.e., facing, page.

overleaf On the other side of the leaf.

end At the end of this division; e.g., chapter, volume, etc.

inter Within a line text; i.e., an insertion.

intra Between the lines of text, less exact than "sub" or "super".

super Above a line of text, more exact than "intra(linear)". Do not confuse with superscript rendition.

sub Below a line of text, more exact than "intra(linear)". Do not confuse with subscript rendition.

inspace In a predefined space; i.e., that left by an earlier scribe.

superimposed Obscures original text; e.g., via overstrike, addition of new writing surface material, etc.

### **Declaration**

```
<macroSpec ident="data.NONSTAFFPLACE" module="MEI" type="dt">
  <desc xml:lang="en">Non-staff location.</desc>

## data.NOTATIONTYPE

Notation type and subtype

### Module

MEI

### Used by

**att.notificationType/@notificationtype** Contains classification of the notation contained or described by the element bearing this attribute.

### Allowed Values

cmn Common Music Notation.  
mensural Mensural notation.  
mensural.black Black mensural notation.  
mensural.white White mensural notation.  
neume Neumatic notation.  
tab Tablature notation.

### Declaration

```
<macroSpec ident="data.NOTATIONTYPE" module="MEI" type="dt">
  <desc xml:lang="en">Notation type and subtype</desc>

```

# data.NOTEHEADMODIFIER.list

Enumerated note head modifier values.

## Module

[MEI](#)

## Used by

[data.NOTEHEADMODIFIER](#) Captures any notehead "modifiers"; that is, symbols added to the notehead, such as slashes, lines, text, and enclosures, etc.

## Allowed Values

- slash Slash (upper right to lower left).
- backslash Backslash (upper left to lower right).
- vline Vertical line.
- hline Horizontal line.
- centerdot Center dot.
- paren Enclosing parentheses.
- brack Enclosing square brackets.
- box Enclosing box.
- circle Enclosing circle.
- fences Enclosing "fences".

## Declaration

```
<macroSpec ident="data.NOTEHEADMODIFIER.list" module="MEI" type="dt">
  <desc xml:lang="en">Enumerated note head modifier values.</desc>

</macroSpec>
```

## data.OCTAVE

Oct attribute values. The default values conform to Acoustical Society of America representation. Read, p. 44.

### Module

MEI

### Used by

- att.nc ges/@oct.ges** Records performed octave information that differs from the written value.
- att.note.ges/@oct.ges** Records performed octave information that differs from the written value.
- att.octave/@oct** Captures written octave information.
- att.octaveDefault/@oct.default** Contains a default octave specification for use when the first note, rest, chord, etc. in a measure does not have an octave value specified.
- att.staffLoc.pitched/@oloc** Records staff location in terms of written octave.

### Declaration

```
<macroSpec ident="data.OCTAVE" module="MEI" type="dt">
  <desc xml:lang="en">Oct attribute values. The default values conform to Acoustical Society
  of America representation. Read, p. 44.</desc>

    <rng:data type="nonNegativeInteger">
      <rng:param name="maxInclusive">9</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.OCTAVE.DIS

The amount of octave displacement; that is, '8' (as in '8va' for 1 octave), '15' (for 2 octaves), or rarely '22' (for 3 octaves).

### Module

MEI

### Used by

[att.cleffing.log/@clef.dis](#) Records the amount of octave displacement to be applied to the clef.

[att.octaveDisplacement/@dis](#) Records the amount of octave displacement.

### Declaration

```
<macroSpec ident="data.OCTAVE.DIS" module="MEI" type="dt">
  <desc xml:lang="en">The amount of octave displacement; that is, '8' (as in '8va' for 1
  octave), '15' (for 2 octaves), or rarely '22' (for 3 octaves).</desc>
  <content>
    <rng:data type="positiveInteger">
      <rng:param name="pattern">8|15|22</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.ORIENTATION

Rotation or reflection of base symbol values.

### Module

MEI

### Used by

**att.mensur.vis/@orient** Describes the rotation or reflection of the base symbol.

**att.mensural.vis/@mensur.orient** Describes the rotation or reflection of the base symbol.

### Declaration

```
<macroSpec ident="data.ORIENTATION" module="MEI" type="dt">
  <desc xml:lang="en">Rotation or reflection of base symbol values.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">reversed|90CW|90CCW</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.ORNAM.cmn**

CMN ornam attribute values: A = appoggiatura (upper neighbor); a =acciaccatura (lower neighbor); b =bebung; I = ascending slide; i = descending slide; k = delayed turn; K = 5-note turn; m = mordent (alternation with lower neighbor); M = inverted mordent (alternation with upper neighbor); N = Nachschlag (upper neighbor); n = Nachschlag (lower neighbor); S = turn; s = inverted turn; t = trill commencing on auxiliary note; T = trill commencing on principal note; O = generic / unspecified ornament.

### Module

[MEI.cmnOrnaments](#)

### Used by

**att.ornamPresent/@ornam** Indicates that this element has an attached ornament. If visual information about the ornament is needed, then one of the elements that represents an ornament (mordent, trill, or turn) should be employed.

### Declaration

```
<macroSpec ident="data.ORNAM.cmn" module="MEI.cmnOrnaments" type="dt">
  <desc xml:lang="en">CMN ornam attribute values: A = appoggiatura (upper neighbor); a =acciaccatura (lower neighbor); b =bebung; I = ascending slide; i = descending slide; k = delayed turn; K = 5-note turn; m = mordent (alternation with lower neighbor); M = inverted mordent (alternation with upper neighbor); N = Nachschlag (upper neighbor); n = Nachschlag (lower neighbor); S = turn; s = inverted turn; t = trill commencing on auxiliary note; T = trill commencing on principal note; O = generic / unspecified ornament.</desc>
  <content>

      </rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.PAGE.PANELS**

The number of panels per page.

### **Module**

[MEI](#)

### **Used by**

**att.pages/@page.panels** Indicates the number of logical pages to be rendered on a single physical page.

### **Declaration**

```
<macroSpec ident="data.PAGE.PANELS" module="MEI" type="dt">
  <desc xml:lang="en">The number of panels per page.</desc>
  <content>
    <rng:data type="positiveInteger">
      <rng:param name="minInclusive">1</rng:param>
      <rng:param name="maxInclusive">2</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

# data.PEDALSTYLE

Styling of piano pedal marks.

## Module

[MEI](#)

## Used by

**att.pedal.vis/@form** Determines whether piano pedal marks should be rendered as lines or as terms.

**att.pianoPedals/@pedal.style** Determines whether piano pedal marks should be rendered as lines or as terms.

## Allowed Values

line Continuous line with start and end positions rendered by vertical bars and bounces shown by upward-pointing "blips".

pedline Pedal down and half pedal rendered with "Ped." followed by a line with end position rendered by vertical bars and bounces shown by upward-pointing "blips".

pedstar Pedal down and half pedal rendered with "Ped.", pedal up rendered by "\*", pedal "bounce" rendered with "\* Ped.".

altpedstar Pedal up and down indications same as with "pedstar", but bounce is rendered with "Ped." only.

## Declaration

```
<macroSpec ident="data.PEDALSTYLE" module="MEI" type="dt">
  <desc xml:lang="en">Styling of piano pedal marks.</desc>
  <content>
    <valList type="closed">
      <valItem ident="line">

```
</valList>
</content>
</macroSpec>
```

DEVELOPMENT  
VERSION

# data.PERCENT

Positive decimal number plus '%', i.e., [0-9]+(\.[0-9]\*?)?%.

## Module

[MEI](#)

## Used by

[att.curvature/@bulge](#) Describes a curve as one or more pairs of values with respect to an imaginary line connecting the starting and ending points of the curve. The first value captures a distance to the left (positive value) or right (negative value) of the line, expressed in virtual units. The second value of each pair represents a point along the line, expressed as a percentage of the line's length. N.B. An MEI virtual unit (vu) is half the distance between adjacent staff lines where the interline space is measured from the middle of a staff line.

[att.graced/@grace.time](#) Records the amount of time to be "stolen" from a non-grace note/chord.

[att.scalable/@scale](#) Scale factor to be applied to the feature to make it the desired display size.

[att.typography/@lineheight](#) Indicates line height in analogy to the CSS line-height property.

[data.FONTSIZE](#) Font size expressions.

[data.PGSCALE](#) Page scale factor; a percentage of the values in page.height and page.width.

## Declaration

```
<macroSpec ident="data.PERCENT" module="MEI" type="dt">
  <desc xml:lang="en">Positive decimal number plus '%',
    <abbr>i.e.</abbr>
    , [0-9]+(\.[0-9]*?)?%.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">[0-9]+(\.[0-9]*?)?%</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.PERCENT.LIMITED**

Decimal number between 0 and 100, followed by a percent sign "%".

### **Module**

MEI

### **Used by**

[att.channelized/@midi.duty](#) Specifies the 'on' part of the duty cycle as a percentage of a note's duration.

[data.MIDIVALUE\\_PERCENT](#) data.MIDIVALUE or data.PERCENT.LIMITED values.

### **Declaration**

```
<macroSpec ident="data.PERCENT.LIMITED" module="MEI" type="dt">
  <desc xml:lang="en">Decimal number between 0 and 100, followed by a percent sign
  "%".</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">
        (([0-9]|([1-9][0-9])(\.[0-9]*)?|100(\.[0]*))%
      </rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.PERCENT.LIMITED.SIGNED**

Decimal number between -100 and 100, followed by a percent sign "%".

### Module

MEI

### Used by

[data.MIDIVALUE\\_PAN](#) data.MIDIVALUE or data.PERCENT.LIMITED.SIGNED values.

### Declaration

```
<macroSpec ident="data.PERCENT.LIMITED.SIGNED" module="MEI" type="dt">
  <desc xml:lang="en">Decimal number between -100 and 100, followed by a percent sign
  "%".</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">
        (\+|-)?(([0-9]|([1-9][0-9])(\.[0-9]*))|100(\.0*))?%
      </rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.PGFUNC

Page header and footer function; a value that defines the function (i.e., the placement) of the header or the footer.

### Module

MEI

### Used by

**<pgFoot>** / @func Records the function (i.e., placement) of the page footer.

**<pgHead>** / @func Records the function (i.e., placement) of the page header.

### Allowed Values

all Header or footer for all pages, including the first and the last page, unless a page header or footer for the first or the last page is provided.

first Header or footer for the first page only.

last Header or footer for the last page only.

alt1 The first of an alternating pattern of headers or footers.

alt2 The second of an alternating pattern of headers or footers.

### Remarks

An alternating pattern with "alt1" and "alt2" starts from the first page. However, if header or footer with a func="first" is also defined, it will shift the pattern by one page. A header or footer with func="last" will interrupt the pattern.

### Declaration

```
<macroSpec ident="data.PGFUNC" module="MEI" type="dt">
  <desc xml:lang="en">Page header and footer function; a value that defines the function
  (i.e., the placement) of the header or the footer.</desc>
  <content>
    <valList type="closed">
      <valItem ident="all">
        <desc xml:lang="en">Header or footer for all pages, including the first and the
        last page, unless a page header or footer for the first or the last page is

    page. A header or footer with func="last" will interrupt the pattern.</p>  
</remarks>  
</macroSpec>
```

## **data.PGSCALE**

Page scale factor; a percentage of the values in page.height and page.width.

### **Module**

MEI

### **Used by**

[att.pages/@page.scale](#) Indicates how the page should be scaled when rendered.

### **Declaration**

```
<macroSpec ident="data.PGSCALE" module="MEI" type="dt">
  <desc xml:lang="en">Page scale factor; a percentage of the values in page.height and
  page.width.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.PERCENT"/>
    </rng:choice>
  </content>
</macroSpec>
```

## data.PITCHCLASS

Pclass (pitch class) attribute values.

### Module

MEI

### Used by

[att.pitchClass/@pclass](#) Holds pitch class information.

### Declaration

```
<macroSpec ident="data.PITCHCLASS" module="MEI" type="dt">
  <desc xml:lang="en">Pclass (pitch class) attribute values.</desc>
  <content>
    <rng:data type="nonNegativeInteger">
      <rng:param name="maxInclusive">11</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.PITCHNAME**

The pitch names (gamut) used within a single octave. The default values conform to Acoustical Society of America representation.

### **Module**

MEI

### **Used by**

**att.keySigDefault.anl/@key.pname** Holds the pitch name of the tonic key, e.g., c for the key of C.

**att.pitch/@pname** Contains a written pitch name.

**att.staffLoc.pitched/@ploc** Captures staff location in terms of written pitch name.

**att.tuning/@tune.pname** Holds the pitch name of a tuning reference pitch, i.e., the central tone of a tuning system.

### **Declaration**

```
<macroSpec ident="data.PITCHNAME" module="MEI" type="dt">
  <desc xml:lang="en">The pitch names (gamut) used within a single octave. The default
  values conform to Acoustical Society of America representation.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">[a-g]</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.PITCHNAME.GESTURAL**

Gestural pitch names need an additional value for when the notated pitch is not to be sounded.

### **Module**

[MEI](#)

### **Used by**

[att.nc ges/@pname.ges](#) Contains a performed pitch name that differs from the written value.

[att.note.ges/@pname.ges](#) Contains a performed pitch name that differs from the written value.

### **Declaration**

```
<macroSpec ident="data.PITCHNAME.GESTURAL" module="MEI" type="dt">
  <desc xml:lang="en">Gestural pitch names need an additional value for when the notated
  pitch is not to be sounded.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">[a-g] | none</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.PITCHNUMBER**

Pnum (pitch number, e.g., MIDI) attribute values.

### **Module**

[MEI](#)

### **Used by**

- [att.nc ges/@pnum](#) Holds a pitch-to-number mapping, a base-40 or MIDI note number, for example.
- [att.note ges/@pnum](#) Holds a pitch-to-number mapping, a base-40 or MIDI note number, for example.

### **Declaration**

```
<macroSpec ident="data.PITCHNUMBER" module="MEI" type="dt">
  <desc xml:lang="en">Pnum (pitch number,
    <abbr>e.g.</abbr>
    , MIDI) attribute values.</desc>
  <content>
    <rng:data type="nonNegativeInteger" />
  </content>
</macroSpec>
```

# data.PLACEMENT

Location information.

## Module

MEI

## Used by

**<add>** / @place Location of the addition.

**att.annot.vis/@place** Location of the annotation.

## Constraints

Other values not permitted when 'above', 'below', 'between' or 'within' is present.

## Declaration

```

<macroSpec ident="data.PLACEMENT" module="MEI" type="dt">
  <desc xml:lang="en">Location information.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.STAFFREL"/>
      <rng:ref name="data.NONSTAFFPLACE"/>
      <rng:ref name="data.NMTOKEN"/>
    </rng:choice>
  </content>
  <constraintSpec ident="constrain_place" scheme="schematron">
    <constraint>
      <sch:rule context="@place">
        <sch:assert test="not((some $token in tokenize(normalize-space(.),' ') satisfies
          $token =('below','above','between','within')) and count(tokenize(normalize-
          space(.),' ')) gt 1)">Other values not permitted when 'above', 'below', 'between'
          or 'within' is present.</sch:assert>
      </sch:rule>
    </constraint>
  </constraintSpec>
</macroSpec>

```

## data.PROLATIO

Semibreve-minim relationship values.

### Module

MEI

### Used by

[att.mensural.shared/@prolatio](#) Describes the semibreve-minim relationship.

### Declaration

```
<macroSpec ident="data.PROLATIO" module="MEI" type="dt">
  <desc xml:lang="en">Semibreve-minim relationship values.</desc>
  <content>
    <rng:data type="positiveInteger">
      <rng:param name="minInclusive">2</rng:param>
      <rng:param name="maxInclusive">3</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

# data.RELATIONSHIP

General-purpose relationships

## Module

[MEI](#)

## Used by

**<relation> / @rel** Describes the relationship between the entities identified by the plist and target attributes.

## Declaration

```
<macroSpec ident="data.RELATIONSHIP" module="MEI" type="dt">
  <desc xml:lang="en">General-purpose relationships</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.FRBRRELATIONSHIP"/>
      <rng:ref name="data.MODSRELATIONSHIP"/>
      <rng:ref name="data.NMTOKEN"/>
    </rng:choice>
  </content>
</macroSpec>
```

## data.ROTATION

Rotation.

### Module

MEI

### Used by

**att.noteHeads/@head.rotation** Describes rotation applied to the basic notehead shape. A positive value rotates the notehead in a counter-clockwise fashion, while negative values produce clockwise rotation.

### Declaration

```
<macroSpec ident="data.ROTATION" module="MEI" type="dt">
  <desc xml:lang="en">Rotation.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.DEGREES"/>
      <rng:ref name="data.ROTATIONDIRECTION"/>
    </rng:choice>
  </content>
</macroSpec>
```

# data.ROTATIONDIRECTION

Rotation term.

## Module

[MEI](#)

## Used by

[data.ROTATION](#) Rotation.

## Allowed Values

- none No rotation.
- down Rotated 180 degrees.
- left Rotated 270 degrees clockwise.
- ne Rotated 45 degrees clockwise.
- nw Rotated 315 degrees clockwise.
- se Rotated 135 degrees clockwise.
- sw Rotated 225 degrees clockwise.

## Declaration

```
<macroSpec ident="data.ROTATIONDIRECTION" module="MEI" type="dt">
  <desc xml:lang="en">Rotation term.</desc>
  <content>
    <valList type="closed">
      <valItem ident="none">
        <desc xml:lang="en">No rotation.</desc>
      </valItem>

        <desc xml:lang="en">Rotated 180 degrees.</desc>
      </valItem>
      <valItem ident="left">
        <desc xml:lang="en">Rotated 270 degrees clockwise.</desc>
      </valItem>
      <valItem ident="ne">
        <desc xml:lang="en">Rotated 45 degrees clockwise.</desc>
      </valItem>
      <valItem ident="nw">
        <desc xml:lang="en">Rotated 315 degrees clockwise.</desc>
      </valItem>
      <valItem ident="se">
        <desc xml:lang="en">Rotated 135 degrees clockwise.</desc>
      </valItem>
      <valItem ident="sw">
        <desc xml:lang="en">Rotated 225 degrees clockwise.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

```
</valItem>
</valList>
</content>
</macroSpec>
```

DEVELOPMENT  
VERSION

## data.SCALEDEGREE

Scale degree values.

### Module

MEI

### Used by

[att.harmonicFunction/@deg](#) Captures scale degree information using [Humdrum \\*\\*deg syntax](#) -- an optional indicator of melodic approach (^ = ascending approach, v = descending approach), a scale degree value (1 = tonic ... 7 = leading tone), and an optional indication of chromatic alteration, 1, v7, ^1, or v5+, for example. The amount of chromatic alteration is not indicated.

### Declaration

```
<macroSpec ident="data.SCALEDEGREE" module="MEI" type="dt">
  <desc xml:lang="en">Scale degree values.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">(\^|v)?[1-7](\+|\-)?</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## **data.SLASH**

The number of slashes to be rendered for tremoland.

### **Module**

MEI

### **Used by**

**att.slashCount/@slash** Indicates the number of slashes present.

### **Declaration**

```
<macroSpec ident="data.SLASH" module="MEI" type="dt">
  <desc xml:lang="en">The number of slashes to be rendered for tremoland.</desc>
  <content>
    <rng:data type="positiveInteger">
      <rng:param name="minInclusive">1</rng:param>
      <rng:param name="maxInclusive">6</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.SLUR

i=initial, m=medial, t=terminal. Number is used to match endpoints of the slur when slurs are nested or overlap.

### Module

MEI

### Used by

**att.slurPresent/@slur** Indicates that this element participates in a slur. If visual information about the slur needs to be recorded, then a `<slur>` element should be employed.

### Declaration

```
<macroSpec ident="data.SLUR" module="MEI" type="dt">
  <desc xml:lang="en">i=initial, m=medial, t=terminal. Number is used to match endpoints of
  the slur when slurs are nested or overlap.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">[i|m|t][1-6]</rng:param>
    </rng:data>
  </content>
  <exemplum>
    <egXML xml:space="preserve" valid="feasible">
      <note slur="i1 i2"/>
      <note slur="t1"/>
      <note slur="t2"/>
    </egXML>
  </exemplum>
</macroSpec>
```

## data.STAFFITEM

Items that may be printed above, below, or between staves.

### Module

[MEI](#)

### Used by

**att.staffItems/@aboveorder** Describes vertical order of items printed above a staff, from closest to farthest away from the staff.

**att.staffItems/@beloworder** Describes vertical order of items printed below a staff, from closest to farthest away from the staff.

**att.staffItems/@betweenorder** Describes vertical order of items printed between staves, from top to bottom.

### Declaration

```
<macroSpec ident="data.STAFFITEM" module="MEI" type="dt">
  <desc xml:lang="en">Items that may be printed above, below, or between staves.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.STAFFITEM.basic"/>
      <rng:ref name="data.STAFFITEM.cmn"/>
      <rng:ref name="data.STAFFITEM.mensural"/>
      <rng:ref name="data.STAFFITEM.neumes"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.STAFFITEM.basic**

Items in all repertoires that may be printed near a staff.

### Module

[MEI](#)

### Used by

[data.STAFFITEM](#) Items that may be printed above, below, or between staves.

### Allowed Values

accid Accidentals.  
 annot Annotations.  
 artic Articulations.  
 dir Directives.  
 dynam Dynamics.  
 harm Harmony indications.  
 ornam Ornaments.  
 sp Spoken text.  
 stageDir Stage directions.  
 tempo Tempo markings.

### Declaration

```

<macroSpec ident="data.STAFFITEM.basic" module="MEI" type="dt">
  <desc xml:lang="en">Items in all repertoires that may be printed near a staff.</desc>
  <content>
    <valList type="closed">

```

## **data.STAFFITEM.cmn**

Items in the CMN repertoire that may be printed near a staff.

### Module

[MEI.cmn](#)

### Used by

**data.STAFFITEM** Items that may be printed above, below, or between staves.

### Allowed Values

- beam Beams.
- bend Bend indications.
- bracketSpan Brackets, e.g., for transcribed ligatures.
- breath Breath marks.
- cpMark Copy marks.
- fermata Fermatas.
- fing Fingerings.
- hairpin Hairpin dynamics.
- harpPedal Harp pedals.
- lv Laissez vibrer indications, sometimes called "open ties".
- mordent Mordents.
- octave Octaviation marks.
- pedal Piano pedal marks.
- reh Rehearsal marks.
- tie Ties.
- trill Trills.
- tupleTuplets Tuplets.
- turn Turns.

### Declaration

```
<macroSpec ident="data.STAFFITEM.cmn" module="MEI.cmn" type="dt">
  <desc xml:lang="en">Items in the CMN repertoire that may be printed near a staff.</desc>

## **data.STAFFITEM.mensural**

Items in the Mensural repertoire that may be printed near a staff.

### **Module**

[MEI.mensural](#)

### **Used by**

**data.STAFFITEM** Items that may be printed above, below, or between staves.

### **Allowed Values**

ligature Ligatures.

### **Declaration**

```
<macroSpec ident="data.STAFFITEM.mensural" module="MEI.mensural" type="dt">
  <desc xml:lang="en">Items in the Mensural repertoire that may be printed near a
  staff.</desc>
  <content>
    <valList type="closed">
      <valItem ident="ligature">
        <desc xml:lang="en">Ligatures.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## **data.STAFFITEM.neumes**

Items in the Neume repertoire that may be printed near a staff.

### **Module**

[MEI.neumes](#)

### **Used by**

**data.STAFFITEM** Items that may be printed above, below, or between staves.

### **Declaration**

```
<macroSpec ident="data.STAFFITEM.neumes" module="MEI.neumes" type="dt">
  <desc xml:lang="en">Items in the Neume repertoire that may be printed near a staff.</desc>
</macroSpec>
```

## data.STAFFLOC

Staff location. The value '0' indicates the bottom line of the current staff; positive values are used for positions above the bottom line and negative values for the positions below. For example, in treble clef, 1 = F4, 2 = G4, 3 = A4, etc. and -1 = D4, -2 = C4, and so on.

### Module

MEI

### Used by

**att.barLine.vis/@place** Denotes the staff location of the bar line if its length is non-standard.

**att.barring/@bar.place** Denotes the staff location of bar lines, if the length is non-standard; that is, not equal to 2 times (the number of staff lines - 1).

**att.mensural.vis/@mensur.loc** Holds the staff location of the mensuration sign.

**att.staffLoc/@loc** Holds the staff location of the feature.

### Declaration

```
<macroSpec ident="data.STAFFLOC" module="MEI" type="dt">
  <desc xml:lang="en">Staff location. The value '0' indicates the bottom line of the current staff; positive values are used for positions above the bottom line and negative values for the positions below. For example, in treble clef, 1 = F4, 2 = G4, 3 = A4, etc. and -1 = D4, -2 = C4, and so on.</desc>
  <content>
    <rng:data type="integer"/>
  </content>
</macroSpec>
```

## data.STAFFREL

Location of musical material relative to a staff.

### Module

[MEI](#)

### Used by

**att.placementRelEvent/@place** Captures the placement of the item with respect to the event with which it is associated.

**att.placementRelStaff/@place** Captures the placement of the item with respect to the staff with which it is associated.

**data.PLACEMENT** Location information.

### Constraints

The @staff attribute must contain 2 numerically-adjacent integer values.

Staves and are not adjacent.

### Declaration

```
<macroSpec ident="data.STAFFREL" module="MEI" type="dt">
  <desc xml:lang="en">Location of musical material relative to a staff.</desc>
  <content>

```

```
</sch:rule>
</constraint>
</constraintSpec>
</macroSpec>
```

DEVELOPMENT  
VERSION

## **data.STAFFREL.basic**

Location of symbol relative to a staff.

### Module

MEI

### Used by

**att.cleffing.log/@clef.dis.place** Records the direction of octave displacement to be applied to the clef.

**att.fermataPresent/@fermata** Indicates the attachment of a fermata to this element. If visual information about the fermata needs to be recorded, then a **<fermata>** element should be employed instead.

**att.numberPlacement/@num.place** States where the tuplet number will be placed in relation to the note heads.

**att.octaveDisplacement/@dis.place** Records the direction of octave displacement.

**att.tuplet.vis/@bracket.place** Used to state where a tuplet bracket will be placed in relation to the note heads.

**data.STAFFREL** Location of musical material relative to a staff.

### Allowed Values

above Above the staff.

below Below the staff.

### Declaration

```
<macroSpec ident="data.STAFFREL.basic" module="MEI" type="dt">
  <desc xml:lang="en">Location of symbol relative to a staff.</desc>
  <content>
    <valList type="closed">
      <valItem ident="above">
        <desc xml:lang="en">Above the staff.</desc>
      </valItem>

      </valItem>
    </valList>
  </content>
</macroSpec>
```

# data.STEMDIRECTION

Stem direction.

## Module

[MEI](#)

## Used by

**att.stem.vis/@dir** Describes the direction of a stem.

**att.stems/@stem.dir** Describes the direction of a stem.

## Declaration

```
<macroSpec ident="data.STEMDIRECTION" module="MEI" type="dt">
  <desc xml:lang="en">Stem direction.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.STEMDIRECTION.basic"/>
      <rng:ref name="data.STEMDIRECTION.extended"/>
    </rng:choice>
  </content>
</macroSpec>
```

## **data.STEMDIRECTION.basic**

Common stem directions.

### **Module**

MEI

### **Used by**

[att.plica.vis/@dir](#) Describes the direction of a stem.

[data.STEMDIRECTION](#) Stem direction.

### **Allowed Values**

up Stem points upwards.

down Stem points downwards.

### **Declaration**

```
<macroSpec ident="data.STEMDIRECTION.basic" module="MEI" type="dt">
  <desc xml:lang="en">Common stem directions.</desc>
  <content>
    <valList type="closed">
      <valItem ident="up">
        <desc xml:lang="en">Stem points upwards.</desc>
      </valItem>
      <valItem ident="down">
        <desc xml:lang="en">Stem points downwards.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

# **data.STEMDIRECTION.extended**

Additional stem directions.

## Module

[MEI](#)

## Used by

[data.STEMDIRECTION](#) Stem direction.

## Allowed Values

- left Stem points left.
- right Stem points right.
- ne Stem points up and right.
- se Stem points down and right.
- nw Stem points up and left.
- sw Stem points down and left.

## Declaration

```
<macroSpec ident="data.STEMDIRECTION.extended" module="MEI" type="dt">
  <desc xml:lang="en">Additional stem directions.</desc>
  <content>
    <valList type="closed">
      <valItem ident="left">
        <desc xml:lang="en">Stem points left.</desc>

```

## data.STEMFORM.mensural

Form of the stem attached to the note.

### Module

MEI.mensural

### Used by

**att.stem.vis/@form** Encodes the form of the stem using the values provided by the data.STEMFORM.mensural datatype.

**att.stems.mensural/@stem.form** Records the form of the stem.

### Allowed Values

circle Stem has a circular form.

oblique Stem has an oblique form.

swallowtail Stem has a swallowtail form.

virgula Stem has a virgula-like form.

### Declaration

```
<macroSpec ident="data.STEMFORM.mensural" module="MEI.mensural" type="dt">
    <desc xml:lang="en">Form of the stem attached to the note.</desc>
    <content>
        <valList type="closed">
            <valItem ident="circle">
                <desc xml:lang="en">Stem has a circular form.</desc>
            </valItem>
            <valItem ident="oblique">
                <desc xml:lang="en">Stem has an oblique form.</desc>
            </valItem>
            <valItem ident="swallowtail">
                <desc xml:lang="en">Stem has a swallowtail form.</desc>
            </valItem>
            <valItem ident="virgula">
                <desc xml:lang="en">Stem has a virgula-like form.</desc>

        </valList>
    </content>
</macroSpec>
```

# data.STEMMODIFIER

Stem modification.

## Module

[MEI](#)

## Used by

**att.stems/@stem.mod** Encodes any stem "modifiers"; that is, symbols rendered on the stem, such as tremolo or Sprechstimme indicators.

## Allowed Values

- none No modifications to stem.
- 1slash 1 slash through stem.
- 2slash 2 slashes through stem.
- 3slash 3 slashes through stem.
- 4slash 4 slashes through stem.
- 5slash 5 slashes through stem.
- 6slash 6 slashes through stem.
- sprech X placed on stem.
- z Z placed on stem.

## Declaration

```
<macroSpec ident="data.STEMMODIFIER" module="MEI" type="dt">
  <desc xml:lang="en">Stem modification.</desc>
  <content>
    <valList type="closed">
      <valItem ident="none">
        <desc xml:lang="en">No modifications to stem.</desc>

</valList>
</content>
</macroSpec>
```

# data.STEMPOSITION

Position of a note's stem relative to the head of the note.

## Module

MEI

## Used by

**att.stem.vis/@pos** Records the position of the stem in relation to the note head(s).

**att.stems/@stem.pos** Records the position of the stem in relation to the note head(s).

## Allowed Values

left Stem attached to left side of note head.

right Stem attached to right side of note head.

center Stem is originates from center of note head.

## Declaration

```
<macroSpec ident="data.STEMPOSITION" module="MEI" type="dt">
  <desc xml:lang="en">Position of a note's stem relative to the head of the note.</desc>
  <content>
    <valList type="closed">
      <valItem ident="left">
        <desc xml:lang="en">Stem attached to left side of note head.</desc>
      </valItem>
      <valItem ident="right">
        <desc xml:lang="en">Stem attached to right side of note head.</desc>
      </valItem>
      <valItem ident="center">
        <desc xml:lang="en">Stem is originates from center of note head.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## **data.STRINGNUMBER**

In string tablature, the number of the string to be played, i.e., [1-9]+.

### **Module**

MEI

### **Used by**

**att.stringtab/@tab.string** Records which string is to be played.

### **Declaration**

```
<macroSpec ident="data.STRINGNUMBER" module="MEI" type="dt">
  <desc xml:lang="en">In string tablature, the number of the string to be played,
    <abbr>i.e.</abbr>
    , [1-9]+.</desc>
  <content>
    <rng:data type="positiveInteger"/>
  </content>
</macroSpec>
```

# **data.TEMPERAMENT**

Temperament or tuning system.

## Module

MEI

## Used by

[att.tuning/@tune.temper](#) Provides an indication of the tuning system, just, for example.

## Allowed Values

- equal Equal or 12-tone temperament.
- just Just intonation.
- mean Meantone intonation.
- pythagorean Pythagorean tuning.

## Declaration

```
<macroSpec ident="data.TEMPERAMENT" module="MEI" type="dt">
  <desc xml:lang="en">Temperament or tuning system.</desc>
  <content>
    <valList type="closed">
      <valItem ident="equal">
        <desc xml:lang="en">Equal or 12-tone temperament.</desc>
      </valItem>
      <valItem ident="just">
        <desc xml:lang="en">Just intonation.</desc>
      </valItem>
      <valItem ident="mean">
        <desc xml:lang="en">Meantone intonation.</desc>
      </valItem>
      <valItem ident="pythagorean">
        <desc xml:lang="en">Pythagorean tuning.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.TEMPOVALUE

Beats (meter signature denominator) per minute, e.g., 120.

### Module

[MEI](#)

### Used by

**att.mmTempo/@mm** Used to describe tempo in terms of beats (often the meter signature denominator) per minute, ala M.M. (Maelzel's Metronome). Do not confuse this attribute with midi.bpm or midi.mspb. In MIDI, a beat is always defined as a quarter note, \*not the numerator of the time signature or the metronomic indication\*.

### Declaration

```
<macroSpec ident="data.TEMPOVALUE" module="MEI" type="dt">
  <desc xml:lang="en">Beats (meter signature denominator) per minute,
    <abbr>e.g.</abbr>
    , 120.</desc>
  <content>
    <rng:data type="decimal" />
  </content>
</macroSpec>
```

## **data.TEMPUS**

Breve-semibreve relationship values.

### Module

MEI

### Used by

[att.mensural.shared/@tempus](#) Describes the breve-semibreve relationship.

### Declaration

```
<macroSpec ident="data.TEMPUS" module="MEI" type="dt">
  <desc xml:lang="en">Breve-semibreve relationship values.</desc>
  <content>
    <rng:data type="positiveInteger">
      <rng:param name="minInclusive">2</rng:param>
      <rng:param name="maxInclusive">3</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.TEXTRENDITION

Text rendition values.

### Module

[MEI](#)

### Used by

**att.textRendition/@rend** Captures the appearance of the element's contents using MEI-defined descriptors.

### Declaration

```
<macroSpec ident="data.TEXTRENDITION" module="MEI" type="dt">
  <desc xml:lang="en">Text rendition values.</desc>
  <content>
    <rng:choice>
      <rng:ref name="data.TEXTRENDITIONLIST"/>
      <rng:ref name="data.TEXTRENDITIONPAR"/>
    </rng:choice>
  </content>
</macroSpec>
```

# data.TEXTRENDITIONLIST

Closed list of text rendition values.

## Module

[MEI](#)

## Used by

[data.TEXTRENDITION](#) Text rendition values.

## Allowed Values

quote Surrounded by single quotes.

quotedbl Surrounded by double quotes.

italic Italicized (slanted to right).

oblique Oblique (slanted to left).

smcaps Small capitals.

bold Relative font weight.

bolder Relative font weight.

lighter Relative font weight.

box Enclosed in box.

circle Enclosed in ellipse/circle.

dbox Enclosed in diamond.

tbox Enclosed in triangle.

bslash Struck through by '\' (back slash).

fslash Struck through by '/' (forward slash).

line-through Struck through by '-'; may be qualified to indicate multiple parallel lines, e.g., line-through(2).

none Not rendered, invisible.

overline Line above the text; may be qualified to indicate multiple parallel lines, e.g., overline(3).

overstrike Use for deleted text fully or partially obscured by other text (such as 'XXXXX') or musical symbols (such as notes, rests, etc.).

strike Struck through by '-'; equivalent to line-through; may be qualified to indicate multiple parallel lines, e.g., strike(3).

sub Subscript.

sup Superscript.

superimpose Use for added text or musical symbols that fully or partially obscure text from an earlier writing stage.

underline Underlined; may be qualified to indicate multiple parallel lines, e.g., underline(2).

x-through Crossed-out; equivalent to 'bslash' (\) plus 'fslash' (/); that is, a hand-written 'X'; may be qualified to indicate multiple parallel lines, e.g., x-through(2).

ltr Left-to-right (BIDI embed).

rtl Right-to-left (BIDI embed).

lro Left-to-right (BIDI override).

rlo Right-to-left (BIDI override).

## Declaration

```
<macroSpec ident="data.TEXTRENDITIONLIST" module="MEI" type="dt">

## data.TEXTRENDITIONPAR

Parameterized text rendition values.

### Module

[MEI](#)

### Used by

[data.TEXTRENDITION](#) Text rendition values.

### Declaration

```
<macroSpec ident="data.TEXTRENDITIONPAR" module="MEI" type="dt">
<desc xml:lang="en">Parameterized text rendition values.</desc>
<content>
  <rng:data type="string">
    <rng:param name="pattern">
      (underline|overline|line-through|strike|x-through)\(\d+\)
    </rng:param>
  </rng:data>
</content>
</macroSpec>
```

## data.TIE

Tie attribute values: initial, medial, terminal.

### Module

MEI

### Used by

**att.tiePresent/@tie** Indicates that this element participates in a tie. If visual information about the tie needs to be recorded, then a `<tie>` element should be employed.

### Declaration

```
<macroSpec ident="data.TIE" module="MEI" type="dt">
  <desc xml:lang="en">Tie attribute values: initial, medial, terminal.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">[i|m|t]</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

## data.TSTAMPOFFSET

A positive or negative offset from the value given in the tstamp attribute in terms of musical time, i.e., beats[.fractional beat part].

### Module

MEI

### Used by

**att.visualOffset.to/@to** Records a timestamp adjustment of a feature's programmatically-determined location in terms of musical time; that is, beats.

**att.visualOffset2.to/@startto** Records a timestamp adjustment of a feature's programmatically-determined start point.

**att.visualOffset2.to/@endto** Records a timestamp adjustment of a feature's programmatically-determined end point.

### Declaration

```
<macroSpec ident="data.TSTAMPOFFSET" module="MEI" type="dt">
  <desc xml:lang="en">A positive or negative offset from the value given in the tstamp
  attribute in terms of musical time,
  <abbr>i.e.</abbr>
  , beats[.fractional beat part].</desc>
  <content>
    <rng:data type="decimal"/>
  </content>
</macroSpec>
```

## data.TUPLE

Tuplet attribute values: initial, medial, terminal.

### Module

MEI

### Used by

**att.tupletPresent/@tuplet** Indicates that this feature participates in a tuplet. If visual information about the tuplet needs to be recorded, then a `<tuplet>` element should be employed.

### Declaration

```
<macroSpec ident="data.TUPLE" module="MEI" type="dt">
  <desc xml:lang="en">Tuplet attribute values: initial, medial, terminal.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">[i|m|t][1-6]</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

# data.URI

A Uniform Resource Identifier, see [RFC2396].

## Module

[MEI](#)

## Used by

**att.alignment/@when** Indicates the point of occurrence of this feature along a time line. Its value must be the ID of a `<when>` element elsewhere in the document.

**att.altSym/@altsym** Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document.

**att.attacca.log/@target** Indicates the next section or movement to be performed.

**att.authorized/@auth.uri** A web-accessible location of the controlled vocabulary or other authoritative source of identification or definition for this element or its content. This attribute may contain a complete URI or a partial URI which is completed by the value of the codedval attribute.

**att.basic/@xml:base** Provides a base URI reference with which applications can resolve relative URI references into absolute URI references.

**att.bifoliumSurfaces/@outer.recto** A reference to a `<surface>` element positioned on the outer recto side of a (folded) sheet.

**att.bifoliumSurfaces/@inner.verso** A reference to a `<surface>` element positioned on the inner verso side of a (folded) sheet.

**att.bifoliumSurfaces/@inner.recto** A reference to a `<surface>` element positioned on the inner recto side of a (folded) sheet.

**att.bifoliumSurfaces/@outer.verso** A reference to a `<surface>` element positioned on the outer verso side of a (folded) sheet.

**att.classed/@class** Contains one or more URIs which denote classification terms that apply to the entity bearing this attribute.

**att.custos.log/@target** Encodes the target note when its pitch differs from the pitch at which the custos appears.

**att.dataPointing/@data** Used to link metadata elements to one or more data-containing elements.

**att.extSym.auth/@glyph.uri** The web-accessible location of the controlled vocabulary from which the value of glyph.name or glyph.num is taken, or the textual content of the element.

**att.facsimile/@facs** Points to one or more images, portions of an image, or surfaces which correspond to the current element.

**att.foliumSurfaces/@recto** A reference to a `<surface>` element positioned on the recto side of the sheet.

**att.foliumSurfaces/@verso** A reference to a `<surface>` element positioned on the verso side of the sheet.

**att.geneticState/@state** Points to the genetic state that results from this modification.

**att.handIdent/@hand** Signifies the hand responsible for an action. The value must be the ID of a `<hand>` element declared in the header.

**att.harm.log/@chordref** Contains a reference to a `<chordDef>` element elsewhere in the document.

**att.instrumentIdent/@instr** Provides a way of pointing to a MIDI instrument definition. It must contain the ID of an `<instrDef>` element elsewhere in the document.

**att.joined/@join** Used for linking visually separate entities that form a single logical entity, for example, multiple slurs broken across a system break that form a single musical phrase. Also used to indicate a measure which metrically completes the current one. Record the identifiers of the separately encoded components, excluding the one carrying the attribute.

**att.layer.log/@def** Provides a mechanism for linking the layer to a layerDef element.

**att.linked/@copyof** Points to an element of which the current element is a copy.

**att.linked/@corresp** Used to point to other elements that correspond to this one in a generic fashion.

**att.linked/@follows** points to one or more events in a user-defined collection that are known to be predecessors of the current element.

**att.linked/@next** Used to point to the next event(s) in a user-defined collection.

**att.linked/@precedes** Points to one or more events in a user-defined collection that are known to be successors of the current element.

**att.linked/@prev** Points to the previous event(s) in a user-defined collection.

**att.linked/@sameas** Points to an element that is the same as the current element but is not a literal copy of the current element.

**att.linked/@synch** Points to elements that are synchronous with the current element.

**att.metadataPointing/@decls** Identifies one or more metadata elements (other than classification terms) within the header, which are understood to apply to the element bearing this attribute and its content.

**att.name/@nymref** Used to record a pointer to the regularized form of the name elsewhere in the document.

**att.noteHeads/@head.altsym** Provides a way of pointing to a user-defined symbol. It must contain a reference to an ID of a `<symbolDef>` element elsewhere in the document.

**att.origin.startEndId/@origin.startid** indicates the first element in a sequence of events.

**att.origin.startEndId/@origin.endid** indicates the final element in a sequence of events.

**att.plist/@plist** When the target attribute is present, plist identifies the active participants; that is, those entities pointed "from", in a relationship with the specified target(s). When the target attribute is not present, it identifies participants in a mutual relationship.

**att.pointing/@xlink:role** Characterization of the relationship between resources. The value of the role attribute must be a URI.

**att.pointing/@target** Identifies passive participants in a relationship; that is, the entities pointed "to".

**att.responsibility/@resp** Indicates the agent(s) responsible for some aspect of the text's transcription, editing, or encoding. Its value must point to one or more identifiers declared in the document header.

**att.source/@source** Contains a list of one or more pointers indicating the sources which attest to a given reading. Each value should correspond to the ID of a `<source>` or `<manifestation>` element located in the document header.

**att.staff.log/@def** Provides a mechanism for linking the staff to a staffDef element.

**att.startEndId/@endid** Indicates the final element in a sequence of events to which the feature applies.

**att.startId/@startid** Holds a reference to the first element in a sequence of events to which the feature applies.

**att.stems/@stem.sameas** Points to a note element in a different layer whose stem is shared. The linked notes should be rendered like a chord though they are part of different layers.

**<handShift> / @new** Identifies the new hand. The value must contain the ID of a hand element given elsewhere in the document.

**<handShift> / @old** Identifies the old hand. The value must contain the ID of a hand element given elsewhere in the document.

**<locus> / @scheme** Identifies the foliation scheme in terms of which the location is being specified by pointing to some foliation element defining it, or to some other equivalent resource.

**<locusGrp> / @scheme** Identifies the foliation scheme in terms of which the location is being specified by pointing to some foliation element defining it, or to some other equivalent resource.

**<namespace> / @name** Formal namespace identifier; that is, a uniform resource identifier (URI).

**<when> / @since** Identifies the reference point for determining the time of the current when element, which is obtained by adding the interval to the time of the reference point. The value should be the ID of another when element within the same parent element. If the since attribute is omitted and the absolute attribute is not specified, then the reference point is understood to be the immediately preceding when element.

## Declaration

```

<macroSpec ident="data.URI" module="MEI" type="dt">
  <desc xml:lang="en">A Uniform Resource Identifier, see [RFC2396].</desc>
  <content>
    <rng:data type="anyURI"/>
  </content>
</macroSpec>

```

## data.VERTICALALIGNMENT

Data values for attributes that capture vertical alignment.

### Module

MEI

### Used by

[att.verticalAlign/@valign](#) Records vertical alignment.

### Allowed Values

top Top aligned.  
middle Middle aligned.  
bottom Bottom aligned.  
baseline Baseline aligned.

### Declaration

```
<macroSpec ident="data.VERTICALALIGNMENT" module="MEI" type="dt">
  <desc xml:lang="en">Data values for attributes that capture vertical alignment.</desc>
  <content>
    <valList type="closed">
      <valItem ident="top">
        <desc xml:lang="en">Top aligned.</desc>
      </valItem>
      <valItem ident="middle">
        <desc xml:lang="en">Middle aligned.</desc>
      </valItem>
      <valItem ident="bottom">
        <desc xml:lang="en">Bottom aligned.</desc>
      </valItem>
      <valItem ident="baseline">
        <desc xml:lang="en">Baseline aligned.</desc>
      </valItem>
    </valList>
  </content>
</macroSpec>
```

## data.WORD

A single "word" that contains only letters, digits, punctuation characters, or symbols. It cannot contain whitespace.

### Module

MEI

### Used by

**att.nNumberLike/@n** Provides a number-like designation that indicates an element's position in a sequence of similar elements. May not contain space characters.

**<locus> / @from** Specifies the starting point of the location in a normalized form.

**<locus> / @to** Specifies the end-point of the location in a normalized form.

### Declaration

```
<macroSpec ident="data.WORD" module="MEI" type="dt">
  <desc xml:lang="en">A single "word" that contains only letters, digits, punctuation
  characters, or symbols. It cannot contain whitespace.</desc>
  <content>
    <rng:data type="token">
      <rng:param name="pattern">(\p{L}|\p{N}|\p{P}|\p{S})*</rng:param>
    </rng:data>
  </content>
</macroSpec>
```

# Contributors

The Guidelines and specifications made available in this document wouldn't have been possible without the generous and selfless support of a large number of people. Some of those people, especially from the early days of MEI are explicitly mentioned in chapter [1.1.2 Acknowledgments](#) of these Guidelines. However, we believe it is important to give proper recognition to everyone contributing to this community effort. Without their continued commitment, MEI would not be possible.

This list is automatically compiled from all contributors to the [/music-encoding/music-encoding](#) and [/music-encoding/guidelines](#) repositories at GitHub. The editors of the Guidelines are equally added, as are other people who have made substantial contributions beyond the scope of GitHub. It is certainly not an exhaustive list, as there are manifold ways to contribute to MEI. If you feel like you should be mentioned here, please reach out to the [Technical Co-Chairs of the MEI Board](#), and they will happily include you here.

As representatives of the MEI Community, the MEI Board would like to thank everyone involved in the creation and maintenance of these MEI Guidelines. At the same time, it invites new contributors and encourages to help building bridges between different musical repertoires and styles, historical periods, cultural backgrounds, musical domains, research interests, and methodical concepts by reasoning about a common encoding framework like MEI.
